Commonwealth Edison Co. (Braidwood Station, Unit Nos. 1 and 2); Hearing

April 23, 1986.

Please take notice that at 9:00 a.m. on Tuesday, May 6, 1986, the evidentiary hearing in the matter of the Braidwood Station operating license will reconvene in the Council Chambers, Second Floor, City Hall Building, at 385 East Oak Street, Kankakee, Illinois 60901, and will continue at that location through May 9, 1986. Thereafter, the hearing will be moved to a different location, as yet undetermined.

The subject of the reconvened hearing will be the quality assurance issues admitted to the proceeding. Limited appearance statements concerning quality assurance will be heard at the opening session. The public is invited to attend all hearing sessions.

For the Atomic Safety and Licensing Board.

Herbert Grossman,

Chairman, Administrative Judge.

[Docket No. 50–333]

Power Authority of the State of New York; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (NRC/the Commission) is considering issuance of an exemption from the requirements of Appendix R of 10 CFR Part 50 to the Power Authority of the State of New York (PASNY/the licensee) for the James A. FitzPatrick Nuclear Power Plant located in Oswego County, New York.

Environmental Assessment

Identification of Proposed Action

The licensee would be exempted from the requirement of section III.G.2 of Appendix R to 10 CFR Part 50 that ventilation-related penetrations in fire barriers separating redundant shutdown-related systems be provided with fire dampers. Specifically, the exemption would apply to three fire dampers located in the floor/ceiling assembly between the screenwell house and safety-related pump houses.

The Need for the Proposed Action

Because of low combustible loadings, a fire in one of these areas would be of low intensity and short duration. Furthermore, safe shutdown could be affected if a fire occurred in the screenwell house or either pump house, because a single fire in any one of these areas would not render redundant shutdown systems located in the remaining areas inoperable. Therefore, installation of fire dampers in the floor/ceiling assembly would not enhance the level of fire protection and are unnecessary.

Environmental Impacts of the Proposed Action

The proposed action would not impact the ability to effect safe shutdown of the plant in the event of a fire in the above mentioned areas and would provide an acceptable level of safety, equivalent to that attained by compliance with Section III.G of Appendix R to 10 CFR Part 50. On this basis, the Commission concludes there are not significant radiological environmental impacts associated with this proposed exemption.

With regard to potential nonradiological impacts, the proposed exemption involves features located entirely within the restricted areas as defined in 10 CFR Part 20. It does not affect nonradiological plant effluents and has no other environmental impact. Therefore, the Commission concludes that there are no significant nonradiological environmental impacts associated with the proposed exemption.

Alternative Use of Resources

This action involves no use of resources not previously considered in the Final Environmental Statement (construction permit and operating license) for the James A. FitzPatrick Nuclear Power Plant.

Agencies and Persons Consulted

The NRC staff reviewed the licensee's request and did not consult other agencies or persons.

Finding of no Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed exemption.

Based upon the foregoing environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the application for exemption dated April 12, 1985 which is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC, and at the Penfield Library, State University College of Oswego, Oswego, New York.

Dated at Bethesda, Maryland, this 23rd day of April 1986.

For the Nuclear Regulatory Commission.

Daniel R. Muller,

Director, BWR Project Directorate No. 2, Division of BWR Licensing.

RAILROAD RETIREMENT BOARD

Agency Forms Submitted for OMB Review

AGENCY: Railroad Retirement Board.

ACTION: In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the Board has submitted the following proposal(s) for the collection of information to the Office of Management and Budget for review and approval.

Summary of Proposal(s)

(1) Collection title: Debtor's Financial Statement
(2) Form(s) submitted: G–423
(3) Type of request: Revision of a currently approved collection
(4) Frequency of use: On occasion
(5) Respondents: Individuals or households
(6) Annual responses: 1,550
(7) Annual reporting hours: 1,550
(8) Collection description: Under the Railroad Retirement and Railroad Unemployment and Insurance Acts, the Board has authority to secure from a debtor a statement of the individual's assets and liabilities if waiver of the overpayment is requested.

Additional Information or Comments

Copies of the proposed forms and supporting documents may be obtained from Pauline Lohens, the agency clearance officer (312–751–4692). Comments regarding the information collection should be addressed to Pauline Lohens, Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611 and the OMB reviewer, Judy McIntosh (202–395–6880), Office of Management and Budget, Room 3208, New Executive Office Building, Washington, DC 20503.

Pauline Lohens,

Director of Information and Data Management.

BILLING CODE 7905–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–23153; File No. SR–Amex–86–10]

Self-Regulatory Organizations; Proposed Rule Change by American Stock Exchange, Inc.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on April 4, 1986, the American Stock Exchange, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The American Stock Exchange, Inc. is filing for the Commission's permanent approval of the pilot procedure under the Exchange's equities allocations procedures which permits a newly listed company which so desires to select the specialist unit for its stock from a list of seven specialist units selected by the Exchange's Committee on Equities Allocations.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

(1) Purpose: In June 1984, the Commission approved on a twelve month pilot basis a "modified" equities allocation procedure proposed by the Exchange in order to increase the involvement of a newly listed company in the selection of the specialist unit in its stock.[1] The Exchange made the modified procedure available to companies listing on the Exchange on or after July 1, 1984 as an alternative to the allocation procedure which permits company participation in the selection process to a limited extent (the "limited participation procedure").[2] In June 1985, the Commission granted a six month extension of the modified procedure and in January and in March 1986, three month extensions, respectively, to permit it to further review the adequacy of the Exchange's procedures under the pilot and to provide the exchange with the opportunity to continue to assess the pilot's impact prior to requesting permanent approval.[3] The pilot is scheduled to terminate on June 30, 1986 and the Exchange is now requesting the Commission's permanent approval.

At the Commission's request, the Exchange is currently compiling information regarding its experience under the pilot to provide the Commission with a comprehensive review of the operation of the pilot to date. The Exchange expects to file its report shortly with the Commission. We anticipate that the information contained therein will reflect that the modified procedure has reasonably fulfilled its purposes: to assist the Exchange in attracting new listings and to preserve strong incentives for quality specialist performance.

(2) Basis: The proposed rule change is consistent with section 6(b) of the Act in general and furthers the objectives of section 6(b)(5) in particular in that the proposed procedure is designed to promote just and equitable principles of trade, remove impediments to and

[1] See Securities Exchange Act of 1934 Release No. 34–21062 (June 18, 1984).

[2] Under the limited participation procedure, the Exchange's Committee on Equities Allocations ("Allocations Committee") submits a list of ten eligible specialist units to the company, which has the right to eliminate three units from further consideration. The Allocations Committee then reconvenes to make its final selection from the remaining seven units.

[3] See Securities Exchange Act of 1934 Release No. 34–22165, (June 28, 1985), Securities Exchange Act of 1934 Release No. 34–22760 (January 8, 1986) and Securities Exchange Act of 1934 Release No. 34–23000 (March 12, 1986).

BEST COPY AVAILABLE

VOL 51 ISS 82 AP 29 1986 UMI

perfect the mechanism of a free and open market and a national market system, and protect investors and the public interest. The proposed rule change also furthers the purposes of section 11A(a)(1)(C)(ii) in that it will stimulate fair competition among brokers and dealers, among exchange markets, and between exchange markets and markets other than exchange markets.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change will impose no burden on competition. Rather, the proposed rule change, by rewarding superior performance, will enhance competition among Exchange specialists, and, by improving the ability of the Exchange to attract prospect companies which desire greater participation in the specialist selection process, will enhance competition among markets.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 553, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by May 20, 1986.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: April 21, 1986.

John Wheeler,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-23164; File No. SR-CBOE-85-40]

Self-Regulatory Organizations; Amendment No. 2 to Proposed Rule Change by the Chicago Board Options Exchange, Inc.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934,[1] notice is hereby given that on April 11, 1986, the Chicago Board Options Exchange, Incorporated ("CBOE") filed with the Securities and Exchange Commission ("Commission") Amendment No. 2 to a proposed rule change as described below. The Commission is publishing this notice to solicit comments on the amended proposed rule change.

The proposed rule change as amended by Amendment No. 1 would fix position limits on options on Treasury Bonds and Notes at no greater than 10% of the value of the initial or reopened public issuance of the underlying security, rounded to the next lower $100 million amount.[2] The proposal as amended by Amendment No. 1 also would require that, if government stripping of principal and interest causes the position limit as initially established to exceed 12% of the non-stripped underlying securities, the position limit would be adjusted to no greater than 12% of the non-stripped underlying securities. Amendment No. 2 to the proposal provides that the position limit shall not exceed $1.2 billion dollars of underlying securities.

CBOE states that the purpose of Amendment No. 2 is to place a 12,000 contract cap on government securities options position limits. The current cap is 4,000 contracts. According to CBOE, this cap would assure that the increase of position limits for government securitries options is "gradual."[3]

CBOE indicates that the statutory basis of the amended proposed rule change remains as stated in the original filing, i.e., section 6(b)(5) of the Act.[4] CBOE also requests approval of Amendment No. 2 prior to the thirtieth day after publication of this notice in the **Federal Register** on the basis that, because Amendment No. 2 limits the size of position limits that otherwise would be available under the filing as previously noticed, there is no "need for a renewed comment period for this one amendment."[5]

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submission should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing also will be available for inspection and copying at the principal office of CBOE. All submissions should refer to the file number in the caption above and should be submitted by May 20, 1986.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[6]

Dated: April 22, 1986.

John Wheeler,

Secretary.

[Release No. 34-23162; File No. SR-CSE-86-2]

Self-Regulatory Organizations; Cincinnati Stock Exchange, Inc.; Order Approving Proposed Rule Change

The Cincinnati Stock Exchange, Inc. ("CSE"), submitted on March 7, 1986, copies of a proposed rule change pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") and Rule 19b-4 thereunder, to extend the coverage of the CSE's trade-through and block policies to additional trading situations involving CSE members.

Notice of the proposed rule was given by the issuance of Securities Exchange Act Release No. 23008 (March 12, 1986) and by publication in the **Federal Register** (51 FR 9737 (March 20, 1986). No comments were received with respect to the proposed rule change.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to an exchange, and, in particular, the requirements of section 6 and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: April 21, 1986.

John Wheeler,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-23165; File No. S7-433]

Joint Industry Plan; Filing and Immediate Effectiveness of Amendment to the Consolidated Tape Association Plan Relating to Line Splitter Charges.

The participants in the Consolidated Tape Association ("CTA") on March 18, 1986, submitted an amendment [1] to the "Restated and Amended Plan submitted to the Securities and Exchange Commission pursuant to Rule 17a-15 under Securities Exchange Act of 1934" ("CTA Plan").[2]

I. Description of the Amendment

The amendment introduces a monthly charge to Network B participants who attach "line splitter" devices to the lines and satellite transmissions by which they receive the Network B ticker signal. The devices permit a single land line or satellite receiver to service more devices than would otherwise be possible. The new charge is contained in Schedule A-3, attached to the CTA Plan as part of Exhibit D. The new rate is effective retroactively to January 1, 1986.

II. Request for Comment

Although the amendment was effective upon filing with the Commission, the Commission may summarily abrogate the amendment within 60 days of its filing and require refiling and approval of the amendment by Commission order pursuant to Rule 11Aa3-2(c)(2), if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors and the maintenance of fair and orderly markets, to remove impediments to and perfect the mechanisms of a national market system, or otherwise in furtherance of the purposes of the Act.

In order to assist the Commission in determining whether to abrogate the amendments and to require refiling and further review, interested persons are invited to submit their views to John Wheeler, Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549, within 21 days from the date of publication of this notice in the **Federal Register**. The amendment to the CTA Plan will be available for public inspection in the Commission's public reference room. All communications should refer to File No. S7-433.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[3]

Dated: April 22, 1986.

John Wheeler,

Secretary.

[FR Doc. 86-9556 Filed 4-28-86; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-23154; File No. SR-MCC-86-3]

Self-Regulatory Organizations; Proposed Rule Change by Midwest Clearing Corp.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on March 21, 1986, the Midwest Clearing Corporation ("MCC") filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Attached as Exhibit A is MCC's proposed Schedule of Charges [see file no. SR-MCC-86-1].

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the MCC included statements concerning the purpose of and basis for the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The MCC has prepared summaries, set forth in Sections (A), (B) and (C) below, of the most significant aspects of such statements.

(A) *Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, Proposed Rule Change.* On January 16, 1986 MCC filed its Schedule of Charges. Certain fee adjustments were inadvertently omitted from or incorrectly stated in such schedule. Exhibit A reflects the revised fees, which will be effective with the February 1986 or March 1986 billing statements as shown.

The proposed rule change is consistent with Section 17A of the Securities Exchange Act of 1934 in that it provides for the equitable allocation of reasonable dues, fees and other charges among MCC's Participants.

(B) *Self-Regulatory Organization's Statement on Burden on Competition.* The Midwest Clearing Corporation does not believe that any burdens will be placed on competition as a result of the proposed rule change.

(C) *Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others.* Comments have neither been solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become

---

[1] The amendment to the CTA Plan was submitted pursuant to Rules 11Aa3-1 and 11Aa3-2 under the Securities Exchange Act of 1934 ("Act").

[2] The CTA Plan and subsequent amendments are contained in File No. S7-433. The Commission approved the CTA Plan in Securities Exchange Act Release No. 16983 (July 14, 1980), 45 FR 49414.

[3] 17 CFR 200.30-3(a)(27).

effective pursuant to section 19(b)(3) of the Securities Exchange Act of 1934 and subparagraph (e) of Securities Exchange Act Rule 19b–4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the forgoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-referenced self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by May 20, 1986.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: April 21, 1986.

John Wheeler,

Secretary.

[Release No. 34–23153; File No. SR–MSTC–86–2]

Self-Regulatory Organizations; Proposed Rule Change by Midwest Securities Trust Co.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on March 21, 1986, the Midwest Securities Trust Company ("MSTC") filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Attached as Exhibit A is MSTC's proposed Schedule of Charges (see file no. SR–MSTC–86–1).

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the MSTC included statements concerning the purpose of and basis for the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The MSTC has prepared summaries, set forth in Sections (A), (B) and (C) below, of the most significant aspects of such statements.

(A) *Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change.* On January 28, 1986 MSTC filed its Schedule of Charges. Certain fee adjustments were inadvertently omitted from or incorrectly stated in such schedule. Exhibit A reflects the revised fees, which will be effective with the February 1986 or March 1986 billing statements.

The proposed rule change is consistent with Section 17A of the Securities Exchange Act of 1934 in that it provides for the equitable allocation of reasonable dues, fees and other charges among MSTC's Participants.

(B) *Self-Regulatory Organization's Statement on Burden on Competition.* The Midwest Securities Trust Company does not believe that any burdens will be placed on competition as a result of the proposed rule change.

(C) *Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others.* Comments have neither been solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to section 19(b)(3) of the Securities Exchange Act of 1934 and subparagraph (e) of Securities Exchange Act Rule 19b–4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary of appropriate in the public interest for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-referenced self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by May 20, 1986.

For the Commisson, by the Division of Market Regulation, pursuant to delegated authority.

Dated: April 21, 1986.

[Release No. 34–23151; File No. SR–NSCC–86–04]

Self-Regulatory Organizations; National Securities Clearing Corporation; Order Approving Proposed Rule Change

On February 11, 1986, the National Securities Clearing Corporation ("NSCC") filed with the Commission, pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), a proposed rule change amending its Clearing Fund requirements for Municipal Securities Brokers' Brokers Sponsored Account [1] Members. The Commission published notice of the proposal on March 14, 1986.[2] No comments were received. This Order approved the proposal.

I. Description

The proposed rule change adds to Part XIV of NSCC's Procedures an "Alternative Clearing Fund Formula" (the "Alternative Formula") that NSCC will use to determine the minimum required Clearing Fund contribution levels of Municipal Securities Brokers' Broker Members using NSCC's sponsored account service ("Municipal Brokers").[3] The rule change also amends NSCC's "Standards of Financial Responsibility and Operational Capability" (the "Standards") to set out eligibility standards for Alternative Formula use and additional guidelines for Municipal Brokers that elect the new formula and are subject to closer than normal surveillance.[4]

The Alternative Formula differs from NSCC's original formula [5] in several respects. Under the original formula, each member must contribute an amount equal to: (A) 2½% of the Member's average daily settlement debits and credits, other than those relating to envelope settlement systems ("ESS"), plus (B) the greater of (1) 2½% of the member's average daily ESS debits and credits or (2) 5% of ESS debits; increased by a multiplication factor.[6] Under the Alternative Formula, clause (A) is essentially eliminated,[7] and clauses (B)(1) and (B)(2) are carried over unchanged except that a new clause adds back into the calculation 2% of the Member's average daily qualified securities depository debits and the multiplication factor applied to ESS actively under the original formula is eliminated. In sum, a Municipal Broker's Clearing Fund contribution under the Alternative Formula equals the larger of the daily average of: 2½% of ESS debits and credits or 5% of ESS debits, plus 2% of qualified securities depository debits. The alternative Formula thus reduces substantially the required Clearing Fund contributions of Municipal Brokers.[8]

The rule change adds new section B.3 to Part I of the Standards. That section specifies three conditions that must be met by each Municipal Broker applicant for NSCC membership before it can qualify for Alternative Formula use. First, each applicant would have to be in compliance with Commission Rule 15c3–1(a)(8).[9] Second, each applicant would need to enter into an agreement with NSCC that it will not transfer, withdraw or deliver to a third party securities received on a business day through a qualified securities depository for no value prior to paying for the securities or paying its net settlement obligations for

[1] NSCC's "sponsored account service" enables NSCC Members that cannot, or choose not to, participate in the Depository Trust Company ("DTC") directly to access DTC services through an NSCC subaccount at DTC. Each sponsored member is assigned a subaccount number and uses that account like a direct DTC participant. A sponsored account member generally can use all DTC services and facilities as if it were a direct participant. NSCC, however, remains liable to DTC on all activity in sponsored accounts, including the payment of fees to DTC. Because of its potential exposure, NSCC is authorized to verify all data for accuracy and reasonableness before submission to DTC and to reject any items that create liabilities inconsistent with the Member's normal level of business or financial capability.

[2] *See* Securities Exchange Act Release No. 22980 (March 7, 1986), 51 FR 8031 (March 14, 1986).

[3] The rule change amends NSCC Rule 1 to define "Municipal Securities Brokers' Broker" to mean "any municipal securities broker as defined in Rule 15c3–1(a)(6)(ii) of the Securities Exchange Act of 1934, as amended." Rule 15c3–1(a)(6)(ii) defines these brokers as brokers who act as agent for registered brokers, dealers or municipal securities dealers, have no public customers and maintain no municipal securities in proprietary or other accounts.

Municipal Brokers play an essential role in the municipal securities markets. Unlike equity securities, municipal securities are not traded on national securities exchanges. Municipal Brokers provide the fundamental service of confidentially bringing together buyers and sellers of municipal securities. For clearing and settlement purposes, the Broker is interposed between each buyer and seller and the Broker's daily depository settlement obligations are netted, typically resulting in a money credit reflecting the commissions the Municipal Broker earns on trades.

[4] NSCC's Standards of Financial Responsibility and Operational capability provide that NSCC may place a member on surveillance if NSCC deems it necessary. Generally speaking, any change in member status which NSCC believes subjects it to greater risk is justification for placing the member on surveillance. Once placed on surveillance, a Clearing Member can be required to deposit larger Clearing Fund contributions with NSCC.

[5] *See* NSCC Procedures, Part XIV, Section A. NSCC Members not qualifying to use the Alternative Formula generally must continue to contribute to NSCC's Clearing Fund under the original formula.

[6] The factor is calculated by dividing the Member's excess net capital into the Member's average daily ESS debits. The factor then is adjusted to provide a minimum of one and a maximum of three. The object of the factor is to increase the Clearing Fund deposits of Clearing Members that use ESS to protect NSCC more adequately against the substantial financial exposure from Clearing Members whose average daily ESS debits exceed their average daily ESS credits and whose net ESS debit balances significantly exceed excess net capital. *See* File Nos. SR–NSCC–83–10, approved in Securities Exchange Act Release No. 19882 (June 28, 1983) 47 FR 29426 (July 8, 1982). *See also* File Nos. SR–NSCC–83–34, Securities Exchange Act Release No. 19147 (October 19, 1982), 47 FR 47351 (October 25, 1982) and SR–NSCC–83–90, Securities and Exchange Act Release No. 19420 (January 13, 1983), 48 FR 2877 (January 21, 1982).

[7] Clause A is modified to exclude "qualified securities depository" debits and credits as well as ESS debits and credits. A "qualified securities depository" is defined in NSCC Rule 1 as a depository that has entered into an agreement with NSCC to act for NSCC by effecting book-entry transfers of securities to and by NSCC. NSCC's only "qualified securities depository" is the The Depository Trust Company ("DTC").

[8] NSCC expects that each Municipal Brokers' Clearing Fund requirement under the Alternative Formula will amount to about 13% of the requirement as calculated under the original formula. The rule change, however, does not alter the minimum required level of Member Clearing Fund cash contributions. *See* NSCC Procedures, Part XV, for a description of these required contribution levels. Both the original and Alternative Clearing Fund formulas are used to calculate each Member's Clearing Fund contribution requirements above the minimum required cash contribution levels. These additional contributions can take the form of other assets, such as U.S. government securities and certain letters of credit and "valued" securities. *See* NSCC Rule 4.

[9] 17 CFR 240.15c3–1(a)(6)(1985.) Rule 15c3–1(a)(6) provides that Municipal Brokers: (1) Need only deduct 7% of outstanding fails-to-deliver aged 21 business days or more; (2) take no deduction for aged fails-to-receive; (3) may exclude from aggregate indebtedness overnight bank loans and (4) must maintain minimum net capital of not less than $150,000.

VOL 51 ISS 82 AP 29 1986 UMI

that business day, whichever is less. Third, the applicant also would need to agree not to pledge any securities received on a business day through a qualified securities depository prior to the day's money settlement unless the pledge agrees to pay NSCC directly the amount due for the securities received or the applicant's net settlement obligation for that business day, whichever is less.

Finally, the rule change adds to the Standards new Part IV, "Guidelines for Computing Clearing Fund Deposits for Sponsored Account Municipal Securities Brokers' Broker Members on Surveillance Who Elect the Alternative Clearing Fund Formula." This Part essentially mirrors already-established guidelines for all other Members on surveillance status.[10] Indeed, under new Part IV, NSCC could demand from Municipal Broker Members on closer than normal surveillance Clearing Fund contributions calculated under NSCC's ordinary guidelines, *i.e.*, under Part III of the Standards. NSCC, however, would retain discretion to require Municipal Brokers on surveillance status to contribute lesser amounts of additional Clearing Fund collateral.

II. NSCC's Rationale for the Proposal

NSCC believes that the rule change would facilitate Municipal Broker participation in the National Clearance and Settlement System (the "National System"). NSCC states in its filing that substantially reduced Clearing Fund requirements for Municipal Brokers are appropriate for several reasons. While Municipal Brokers account for a substantial portion of all inter-dealer transactions in both the when-issued and secondary municipal securities markets, those Brokers, for the most part, have been unable to qualify for direct DTC membership. Moreover, NSCC represents that its original Clearing Fund formula seems to have deterred both their direct participation in NSCC and their indirect participation in DTC through NSCC's "sponsored account service." Thus, Municipal Brokers experience substantially higher clearance and settlement costs because economic considerations have forced them to process transactions either outside National System facilities or through those facilities via correspondent arrangements with direct clearing agency members.

NSCC believes that the unique role of Municipal Brokers in the municipal securities markets presents reduced financial exposure to NSCC and justifies reduced Clearing Fund contributions.[11] Thus, NSCC believes, the rule change adjusts Clearing Fund levels for Municipal Brokers to reflect more accurately their unique role in the marketplace.

NSCC believes that the Alternative Formula should bring most, if not all, Municipal Brokers directly into the National System. NSCC believes that, by joining NSCC, those Brokers should experience substantially reduced clearance and settlement costs by becoming direct, active users of National System services. Indeed, NSCC believes that the National System, and its user community generally, would benefit because the proposal should facilitate the further depository immobilization of municipal securities. In addition, NSCC believes that the Alternative Formula could, by bringing a substantial number of municipal transactions into the System, help facilitate development of a meaningful Continuous Net Settlement ("CNS") environment for municpal securities.

III. Discussion

Under section 19(b)(2) of the Act, the Commission must approve NSCC's proposed rule change if it finds NSCC's proposal is consistent with the Act and Commission rules applicable to registered clearing agencies. The Commission may not approve NSCC's proposal if it is unable to make such a finding.

Section 17A sets out the standards the Commission must use in reviewing proposed rule changes of registered clearing agencies. Section 17A(b)(3)(F) provides that the rules of a clearing agency must be designed to assure the safeguarding of securities and funds which are in the custody or control of the clearing agency or for which it is responsible. That subsection also provides that the clearing agency's rules be designed to promote the prompt and accurate clearance and settlement of securities transactions and, in general, to protect investors and the public interest.

The Commission believes the NSCC proposed rule change furthers those important statutory objectives. The primary benefit of reducing Clearing Fund contributions for Municipal Brokers would be increased participation of Municipal Brokers in the National System. The Commission agrees with NSCC that this proposed rule change will bring into the National System those Municipal Brokers who have, in the past, found participation in registered clearing agencies more costly than processing their trades manually. Additionally, lower Clearing Fund contribution requirements should make it economically feasible for Municipal Brokers who are currently processing trades through clearing agents to become direct NSCC participants, thus also cutting their processing costs significantly.

NSCC believes and the Commission agrees that a much larger percentage of municipal securities transactions would be processed through the National System if Municipal Brokers' direct participation was encouraged through lower Clearing Fund contributions. Municipal Brokers account for a large percentage of all municipal securities transactions. Their participation, therefore, could facilitate much-needed automation of the municipal securities industry. In fact, as NSCC pointed out, by bringing these Municipal Brokers into the National System, a meaningful CNS environment for municipal securities might be developed. Furthermore, direct participation in NSCC would facilitate Municipal Brokers' compliance with Municipal Securities Rulemaking Board ("MSRB") Rules G–12 and G–15. Those Rules generally require municipal securities dealers that are either direct or indirect participants to use the facilities of automated clearing agencies. The Rules were adopted in response to the tremendous paperwork burden experienced by the Municipal securities industry from manual trade processing.[12]

On the other hand, the proposed rule change would appear to increase NSCC's financial exposure. NSCC's Clearing Fund is designed to protect NSCC and its Members against losses and liabilities incident to the operation of its clearance and settlement systems. Thus, permitting Municipal Brokers direct participation in NSCC at lower Clearing Fund contribution levels may expose NSCC to greater risk. At present, Municipal Brokers either process transactions outside the National System, thus exposing NSCC to no risk on those transactions, or they process transactions through direct NSCC participants who are required, under the original Clearing Fund formula, to make larger clearing fund contributions that presumably reflect the Municipal Broker trades they process as well as their other activity.

Nevertheless, for the reasons discussed below, the Commission is satisfied that NSCC has taken adequate measures to control the increased risks posed by affording Municipal Brokers direct participation in NSCC at reduced Clearing Fund contribution levels. First, the Commission agrees with NSCC that Municipal Brokers' trading and settlement activity is unique. By matching buyers and sellers before entering its transactions for comparison and subsequent settlement, the Municipal Broker, in effect, eliminates its own net settlement obligation and, thus, any exposure to adverse market movements. The Municipal Broker can experience such settlement exposure, however, if one side of a brokered transaction fails to settle and the Municipal Broker settles the transaction as if it were itself trading as a principal. Such a failure would expose the Municipal Broker to liability only if the Municipal Broker in effect acts as principal in the failed trade and then only to the extent that the contract price of the failed transaction differs from the market value of the securities to the detriment of the Municipal Broker. NSCC, in turn, would be exposed to this liability only if the Municipal Broker itself failed as a result of *contra* party failure, because of NSCC's special status as the insolvent's sponsor into DTC.

To guard against that risk, NSCC relies on the Municipal Broker's Clearing Fund deposits and the control NSCC exercises over sponsored account depository activity. Under the proposal, NSCC would require Municipal Brokers to agree to certain limitations on their activities. Municipal Brokers could be prevented from withdrawing, transferring, or pledging securities in the depository account prior to *intra*-day or end-of-the-day money payment for those securities. Accordingly, NSCC would be exposed only to the extent of adverse market movements on the day of insolvency; that is, if the market value of securities credited to the Municipal Broker's depository account, but not yet paid for, differed from the contract price to the detriment of the Municipal Broker. This intra-day exposure currently exists in many of NSCC's processing systems, including CNS.

NSCC also developed new Standards applicable to Municipal Broker Sponsored Account Members. Part I of NSCC's Standards has been amended to require each Municipal Broker applicant to enter into an agreement with NSCC that it will not transfer, withdraw or deliver to a third party securities received through a qualified securities depository for no value prior to paying for the securities or paying its net settlement obligation for that business day, whichever is less. Also, NSCC would require the applicant to agree not to pledge any securities received on a business day through a qualified securities depository prior to the day's money settlement unless the pledgee agrees to pay NSCC directly the amount due for the securities received or the applicant's net settlement obligation for that business day, whichever is less.[13] The rule change also gives NSCC the authority to put Municipal Brokers on closer than normal surveillance status[14] and to require larger Clearing Fund contributions if, in NSCC's judgment, larger contributions are needed.[15] These safeguards are in addition to NSCC's already existing safeguard mechanisms.[16]

The Commission believes that the reduced financial exposure presented by Member Municipal Brokers appears to justify NSCC's proposed reduced Clearing Fund requirements for Municipal Brokers. The commission understands, however, that NSCC's sponsored depository accounts are difficult to monitor on a real-time, on-line basis. NSCC does monitor, however, the sponsored account activity of its current Sponsored Account Members on a historical basis and also plans to use sponsored account data to monitor Municipal Brokers' Compliance with the Standards and agreements. The Commission requests that NSCC monitor Municipal Brokers' activity under the Alternative Formula and perform a risk analysis regarding NSCC potential financial exposure from Municipal Broker Sponsored Account Activity. As part of that effort, the Commission requests that NSCC report after six months from implementation on its experience under its Municipal Broker Sponsored Account program, both with respect to its ability to monitor depository sponsored account activity and any risks to which it has been imposed.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change be, and hereby is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: April 21, 1986.

John Wheeler,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-23158; SR-NASD-86-4]

Self-Regulatory Organizations; National Association of Securities Dealers, Inc.; Order Approving Proposed Rule Change

April 21, 1986.

The National Association of Securities Dealers, Inc. ("NASD") submitted on March 14, 1986, copies of a proposed rule change pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") and Rule 19b–4 thereunder, to establish a two-year pilot program with The Stock Exchange, London, England ("LSE"), for the exchange and distribution of international securities information.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by the issuance of a Commission release (Securities Exchange Act Release No. 23022, March 14, 1986) and by publication in the Federal Register (51 FR 9738, March 20, 1986). All written statements filed with the Commission and all written communications between the Commission and any person relating to the proposed rule change were considered and (with the exception of those statements or communications that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552) were made available to the public at the Commission's public reference room.

The Commission received one comment letter on the proposed rule change,[1] from Instinet Corporation

[10] *See* Part III of the Standards.

[11] *See* note 3, *supra*.

[12] *See* Securities Exchange Act Release No. 20385 (November 14, 1983), 48 FR 52331 (November 18, 1983), corrected at 48 FR 54310 (December 1, 1983) (approving File No. SR–MSRB–83–13).

[13] NSCC stated that it has already contacted its pledgee banks and that they have assured NSCC that they are willing to enter into such agreements with applicant Municipal Brokers.

[14] Before a Member actually defaults on a settlement, NSCC is empowered to place the Member on special surveillance to monitor the Member's capacity to meet its commitments to NSCC and to impose any conditions that NSCC deems necessary for its protection or the protection of its Members.

[15] *See* NSCC Standards Part IV, added by this rule change.

[16] NSCC Rule 46 provides that NSCC may suspend a Settling Member or prohibit or limit such Settling Member with respect to access to services offered by NSCC if, among other things, the Member "is in such financial or operating difficulty that the Corporation determined, in its discretion, that such action is necessary for the protection of [NSCC], Settling Members, creditors or investors . . ." or "any circumstances in which, in the discretion of [NSCC], adequate cause exists to do so." *See* NSCC Rule 46, Section 1. Action taken by NSCC may include ceasing to act for the Settling Member or such other limits on access to its services that NSCC determines to be appropriate. (*See* NSCC Rule 46, Section 4.)

VOL 51 ISS 82 AP 29 1986 UMI

("Instinet") raising two issues. First, Instinet asserts that the NASD's decision not to charge a fee to the LSE or its subscribers for the quotation information it is receiving from the NASD poses a significant competitive disadvantage for Instinet. The NASD is requiring both Instinet and its subscribers, domestically as well as abroad, to pay for the quotation information they receive from the NASD.[3]

Second, Instinet argues that the NASD is obtaining the quotation information from the LSE on a preferential basis. It states that the NASD-LSE agreement appears to contemplate the use of the information for automated trading purposes at some future date and asserts that neither Instinet nor other vendors is able to obtain the data from the LSE on this basis. Instinet asserts that the LSE is granting the NASD uniquely favorable terms of access because of the NASD's status as a self-regulatory organization ("SRO"). It argues that this constitutes a discriminatory grant of access by the LSE to its data which is not consistent with the pro-competitive goals of the Act. Instinet also argues that the NASD is using its special status as an SRO to receive LSE market information on more favorable terms (without fee and for automated trading purposes) than are available to other vendors. Instinet argues that using SRO status to achieve this preferential position is unfair and anticompetitive.

The Commission believes the pilot program represents an important step in the internationalization of the securities markets. It will be the first program for the exchange of information between a non-North American securities exchange and a U.S. self-regulatory organization. The Commission believes the NASD's approach, a two-year pilot program for the exchange of quotation information, is a useful first step to ascertain the degree of interest in London for OTC securities and in the U.S. for LSE securities. The two-year pilot program will enable the NASD and LSE to explore the possibility for and implications of a trading link between the two entities while they address any problems that might arise with the information exchange. The Commission believes this is a rational way to approach a possible intercontinental linkage. However, the Commission believes the proposed rule change raises a number of issues.

First, the agreement provides in general terms that the NASD and LSE each will have access to such regulatory information from the other party as it needs for purposes of its surveillance and investigation respnsibilities with respect to securities in the pilot program. The NASD states that for several years the LSE has been willing to cooperate with the NASD in the areas of information disclosure, quotation and trading halts, suspensions and resumption of trading, and the surveillance and investigation of trading in securities of mutual market concern. The agreement reached between the NASD and LSE specifically confirms that the Commission and the U.K. regulatory authorities will have access to shared surveillance information.

The Commission notes however, that the U.K. has a blocking statute.[5] Before the Commission approved the linkage agreement between the American Stock Exchange and Toronto Stock Exchange, the Commission required not only a written surveillance information sharing agreement between the two exchanges, but also exchanged reciprocal surveilance and investigation cooperation undertakings with the Ontario Securities Commission.[4] Included in the Toronto Stock Exchange and Ontario Securities Commission correspondence were representations of those organizations' interpretations that the blocking statute would only be applied in the most unusual of circumstances. The Commission's staff is currently discussing this specific issue, as well as surveilance cooperation arrangements more generally, with the U.K.

The NASD-LSE pilot program provides only for the exchange of quotation information with respect to the securities specified in the agreement. It does not, as do the U.S/Candadian exchange linkages approved to date, contemplate a trading linkage. Investors in the United States as well as investors in the United Kingdom will continue to purchase securities in the same manner as before. Indeed, U.S. retail investors as a practical matter will not have access to U.K. quotation information under the pilot; that information only will be disseminated over NASDAQ Level 2 and 3 terminals, which for the most part are only located in firm upstairs trading rooms and headquarters offices and not retail branch offices. These market professionals already have access to this information to some extent through foreign vendor systems. Finally, any potential for increased manipulative activity is reduced by the fact that the NASDAQ and LSE quotation information will not be integrated into a single quotation stream in either market.[6]

Under these limited circumstances, the Commission believes that the exchange of quotation information will enhance market efficiency without raising significant new concerns regarding the enforcement of the U.S. securities laws. The Commission emphasizes, however, the importance of assurances of cooperation among the relevant regualtory authorities with respect to the reciprocal exchange of surveillance and investigatory information. For this reason, the Commission underscores the importance which it attaches to reaching an understanding between the U.S. and U.K. regarding the applicability of the U.K.'s blocking statute prior to the creation of intermarket trading linkages between markets in the two countries.

Second, an issue unique to the LSE–NASD agreement is Instinet's argument that the NASD's proposed fee arrangement is discriminatory and will have an anticompetitive effect on Instinet. As discussed, the agreement does not provide for any fees for the provisions of quotation information, either for the LSE or the NASD, while Instinet and its subscribers are required to pay the NASD for the information they receive. Instinet argues that providing the LSE and its subscribers a subset of the NQDS information at no charge, while imposing a charge on Instinet and its subscribers, is discriminatory and inhibits Instinet's ability to compete. Similarly, Instinet argues that it is competitively disadvantage because the NASD is receiving LSE quotation information on a preferential basis.

The Commission does not believe that these concerns require the Commission to withhold temporary approval of the proposed rule change and the underlying international agreement. At the staff's suggestion, the NASD has agreed to request six-month temporary approval of the two-year pilot program.[6] The Commission believes that during the six-month period the Commission will be able to consider carefully the merits of Instinet's arguments.

The Commission finds that approval of the proposed rule change on a temporary six-month pilot basis is consistent with the requirements of the Act and the rules and regulations thereunder applicable to the NASD and, in particular, the requirements of sections 11A and 15A, and the rules and regulations thereunder. In making this decision in this limited context, the Commission emphasizes that it is not reaching any final determination with respect to the issues raised by Instinet.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the above-mentioned porposed rule change be, and hereby is approved for a period of six months from the date of this order.

By the Commission.

John Wheeler,

Secretary.

Application and Opportunity for Hearing; Citicorp Homeowners, Inc.

April 22, 1986.

Notice is hereby given that Citicorp Homeowners, Inc. ("Applicant") has filed an application pursuant to section 12(h) of the Securities Exchange Act of 1934, as amended, (the "1934 Act") for an order exempting Applicant from certain reporting requirements under section 13 and from the operation of section 16 of the 1934 Act.

For a detailed statement of the information presented, all persons are referred to the application which is on file at the offices of the Commission in the Public Reference Room, 450 Fifth Street, NW., Washington, DC 20549.

Notice is further given that any interested person, not later than May 19, 1986, may submit to the Commission in writing his views or any substantial facts bearing on the application or the desirability of a hearing thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549, and should state briefly the nature of the interest of the person submitting such information or requesting the hearing, the reason for such request, and the issues of fact and law raised by the application which he desires to controvert.

Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponement thereof. At any time after that date, an order granting the application may be issued upon request or upon the Commission's own motion.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

John Wheeler,

Secretary.

Self-Regulatory Organizations; Applications for Unlisted Trading Privileges and of Opportunity for Hearing by Philadelphia Stock Exchange, Inc.

April 21, 1986.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted trading privileges in the following stock:

L. F. Rothschild, Unterberg, Towbin Holdings, Inc.
Common Stock, $1.00 Par Value (File No. 7-6940)

This security is listed and registered on one or more other national securities exchange and is reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before May 12, 1986 written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission Washington, DC 20549. Following this opportuntiy for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

John Wheeler,

Secretary.

BILLING CODE 8010-01-M

VOL 51 ISS 82 AP 29 1986 UMI

formed pursuant to a trust indenture ("Indenture") under New York and a standard terms and conditions of trust ("Agreement") (collectively Indenture and Agreement"). The Sponsor will act as depositor, United States Trust Company of New York will act as Trustee, and Standard & Poor's Corporation and Kenny Information Systems will act as independent evaluator ("Evaluator").

Applicants propose to insure certain portfolio bonds ("Securities") held in future Trusts under insurance policies to be issued by Bond Investors Guaranty Insurance Company ("BIG"). Applicant states that BIG is an affiliated person of the Sponsor because Philbro-Salomon Inc., which owns 100% of the Sponsor, also owns 20% of BIG's parent corporation, Bond Investors Group, Inc.

Applicants state that there are three principal methods of insuring municipal bonds in a unit investment trust: (1) Bonds insured when the bond is deposited into trust for coverage while the bond is held by the trust ("Portfolio Insurance"); (2) bonds insured to maturity ("Insurance to Maturity") by the sponsor with the premiums paid by the sponsor, or (3) bonds insured by the Trust under an enhanced form of portfolio insurance which provides an additional insured-to-maturity feature ("EPI"). The application states that the Sponsor proposes to cause the Trust to obtain EPI from BIG covering each Security deposited in the portfolio.

Applicant states that the Indenture and Agreement provide for sales of Securities by the Trustee under the following conditions:

1. Default by an issuer in the payment of principal of or interest on such Securities, or any other outstanding obligations of such issuer, when due and payable;
2. Institution of legal proceedings seeking to restrain or enjoin the payment of any of the Securities or attacking their validity;
3. A breach of a covenant or warranty which could adversely affect the payment of debt service on the Securities;
4. Default in the payment of principal or interest on any other outstanding obligations of the same issuer of any of the Securities;
5. In the case of revenue bonds, if the revenues, based upon official reports, fall substantially below the estimated revenues calculated to be necessary to pay principal of and interest on the bonds;
6. A decline in market price, or such other market or credit factor, as in the opinion of the Trustee would make retention of any of the Securities detrimental to the Unitholders;
7. The loss of federal tax-exemption on the Securities;
8. Termination of the Trust Fund; or,
9. Refunding or refinancing of any Security, as set forth in the Indenture and Agreement.

The Trustee will sell Securities to meet redemptions of Trust units and the Sponsor intends to maintain a secondary market for the units. The Trustee will reject any offer made by an issuer of any of the Securities to issue new obligations in exchange and substitution for any of the Securities pursuant to a refunding or refinancing plan; however, the Trustee may accept or reject such an offer or may take any other action with respect to the Securities as it deems proper if it determines that (1) the insurance covering the Securities while they are held in the Trust is inadequate, or (2) that the issuer is in default with respect to the Securities or the issuer will probably default with respect to the Securities in the reasonably foreseeable future.

According to the application, the Trusts will be structured so that the Sponsor has no involvement in determining if and which Security should be sold from the Trust. The Trustee will be compensated for portfolio supervisory services; this portfolio supervisory fee is separate and in addition to the Trustee's ordinary annual administrative fee. Applicants also state that, pursuant to the Indenture and Agreement, the Trustee, in its sole discretion, will determine whether the Trust should terminate. Applicants believe that this structure assures that no conflict could arise between the Sponsor and BIG in connection with the sale of Securities from the Trust. Applicants further represent that the Sponsor is not able to influence the transactions in such a way as to give preferential consideration to the interest of its affiliated insurer.

Applicants represent that all dealings with BIG will be at arm's length and will be based entirely on competitive considerations. Applicants represent that they will choose as insurer the company that offers, in the Sponsor's judgment, the best value to unitholders. Applicants state that the Sponsor will select the "AAA" rated insurer that offers the lowest premiums, although nonprice factors, including availability of insurance, may affect the Sponsor's choice.

Applicants represent that under EPI, Securities are insured while they are on deposit in a Trust with Portfolio Insurance, paid for by the Trust in periodic premiums. In addition, EPI provides an option to buy insurance to Maturity for the security should the Trustee sell the Security from the Trust. Insurance to Maturity will be obtained when the insured value of a portfolio Security to be sold, less the cost of the pre-determined premium, exceeds the value of that portfolio Security without such insurance ("Enhancement Point"). The pre-determined premium is fixed by a formula at the time the Security is initially deposited into the Trust, which Formula takes into account the declining coverage necessary as the Security moves toward maturity. The premium will be paid to the insurer out of the proceeds from the sale of the Security. At the time of the sale of a Security, if the Enhancement Point is reached, the Trustee must obtain Insurance to Maturity for such Security.

Applicants represent that EPI combines the advantages of Insurance to Maturity and Portfolio Insurance and eliminates the disadvantages of either form of insurance alone. In addition, EPI provides three benefits to investors in the Trust. First, bonds that are not Insured to Maturity are generally priced lower than bonds that are insured. Consequently, they are evaluated upon deposit into Trust at a lower price and thus result in a higher yield. Second, the Portfolio Insurance feature of EPI ceases when it is no longer needed. Thus, if a bond is called for redemption or is sold, and EPI does not require the purchase of Insurance to Maturity, the premiums cease. Third, Insurance to Maturity must be purchased under EPI when it is advantageous to do so. Applicants represent that there is no additional premium charged for the right to obtain Insurance to Maturity.

Applicants state that the premium rates for EPI will be at least as favorable as the rates charged by BIG to all of its customers who are unaffiliated entities and comparable to prevailing rates charged by insurers of similar stature and creditworthiness who are not affiliated with the Sponsor. Applicants submit that the terms of EPI are reasonable and fair, do not involve overreaching and are consistent with the purposes of the Act. Applicants request an exemption from section 17(a) of the Act to the extent that the provision by BIG of Enhanced Portfolio Insurance to the Trust might be deemed the sale of property to the Trust, as principal. Applicants also request an order of the Commission pursuant to section 6(c) of the Act for exemption from the provisions of section 26(a)(2)(c) of the Act to the extent necessary to permit the Trust to pay BIG for Insurance to Maturity from the proceeds of Securities sales. Applicants also request an order pursuant to section 17(d) of the Act and Rule 17d–1 thereunder to permit BIG to provide Enhanced Portfolio Insurance to the Trust.

According to Applicants, the proposed transactions would involve the payment by the Trust to BIG of monthly premiums with respect to any security while on deposit in the Trust. The Application states that the premium rates will be determined by BIG within a rate framework applicable to all trust sponsors and filed with applicable state insurance regulatory authorities, based upon BIG's determinations of the creditworthiness of the issuer of the bonds, the risk of default by the bond issuer, the potential liability arising from insuring such bond issue, and the demand of sponsors to apply for such insurance on behalf of their trusts. The Applicants state that the proposed insurance transactions with BIG will be identical or substantially identical to insurance currently being offered by BIG to other sponsors of insured municipal bond trusts.

Applicants assert that EPI adds significant additional protection from the Sponsor influencing Security sales by eliminating the possibility of bias in connection with the sale of Securities from the Trust. Applicants state that as an example, when a defaulting Security is covered by EPI, and the defaulting Security remains in the Trust, BIG is obligated to insure principal and interest payments. On the other hand, if such defaulting Security is sold, then BIG would remain obligated to insure principal and interest payments because a defaulting Security's value would have reached the Enhancement Point, automatically resulting in the Trustee's obtaining Insurance to Maturity from BIG. In either case, BIG must continue to insure the defaulted Security under EPI and the Sponsor has no discretion in deciding whether to sell Securities or whether to obtain Insurance to Maturity.

Applicants state that BIG remains liable for principal and interest should a Security default, whether that Security remains in Trust or is sold. In contrast, a conflict of interest is presented with Portfolio Insurance only. With EPI, applicants assert, no benefit could accrue to the insurer if a defaulting Security were sold. Applicants also state that based on yields calculated at the date a Security is deposited into Trust, there would be no economic benefit to BIG if the Trustee were to purchase Insurance to Maturity by exercise of the option upon sale of the Security from the Trust, thus there is no incentive to cause the Trustee to select for sale a Security that has reached the Enhancement Point.

Applicants conclude that the order requested is appropriate in the public interest, consistent with the protection of investors and purposes and policies of the Act.

Notice Is Further Given that any interested person wishing to request a hearing on the application may, not later than May 14, 1986, at 5:30 p.m., do so by submitting a written request setting forth the nature of his/her interest, the reasons for his/her request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, DC 20549. A copy of the request should be served personally or by mail upon Applicant(s) at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with request. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

John Wheeler,

Secretary.

[File No. 81–733]

Application and Opportunity for Hearing; Towers, Perrin, Forster & Crosby, Inc.

April 18, 1986.

Notice Is Hereby Given that Towers, Perrin, Forster & Crosby, Inc. ("Applicant") has filed an application pursuant to section 12(h) of the Securities Exchange Act of 1934, as amended ("1934 Act"), for an order exempting Applicant from the registration provisions of section 12(g) of the 1934 Act.

The Applicant states, in part:

1. In the absence of an exemption, Applicant will be required to register its securities under section 12(g) of the 1934 Act, and will be required to comply with all reporting requirements thereunder.

2. Applicant believes that the exemptive order it requests is appropriate in view of the fact that there are no public stockholders of the Applicant and there is no trading interest in its stock.

For a more detailed statement of the information presented all persons are referred to the application which is on file at the offices of the Commission in the Public Reference Room, 450 Fifth Street, NW., Washington, DC 20549.

Notice Is Further Given that any interested person not later than May 13, 1986 may submit to the Commission in writing his views or any substantial facts bearing on the application or the desirability of hearing thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549, and should state briefly the nature of the interest of the person submitting such information or requesting the hearing, the reason for such request, and the issues of fact and law raised by the application which he desires to controvert.

Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof. At any time after that date, an order granting the application may be issued upon request or upon the Commission's own motion.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

John Wheeler,

Secretary.

UNITED STATES INFORMATION AGENCY

Culturally Significant Objects Imported for Exhibition; Determination

Notice is hereby given of the following determination: Pursuant to the authority vested in me by the act of October 19, 1965 (79 Stat. 985, 22 U.S.C. 2459), Executive Order 12047 of March 27, 1978 (43 FR 13359, March 29, 1978), and Delegation of Authority of June 27, 1985 (50 FR 27393, July 2, 1985), I hereby determine that the objects to be included in the exhibit, "The Great Eastern Temple: Treasures of Japanese Buddhist Art from Todai-ji, Nara" (included in the list [1] filed as a part of this determination) imported from abroad for the temporary exhibition without profit within the United States are of cultural significance. These objects are imported pursuant to a loan agreement between the Art Institute of Chicago and The Asahi Shimbun of Tokyo. I also determine that the temporary exhibition or display of the listed exhibit objects at The Art Institute of Chicago, Chicago, Illinois, beginning on or about June 28, 1986, to on or about September 7, 1986, is in the national interest.

Public notice of this determination is ordered to be published in the Federal Register.

Dated: April 23, 1986.

Thomas E. Harvey,
General Counsel and Congressional Liaison.

VETERANS ADMINISTRATION

Agency Form Under OMB Review

AGENCY: Veterans Administration.
ACTION: Notice.

The Veterans Administration has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). This document contains an extension and lists the following information: (1) The department or staff office issuing the form, (2) the title of the form, (3) the agency form number, if applicable, (4) how often the form must be filled out, (5) who will be required or asked to report, (6) an estimate of the number of responses, (7) an estimate of the total number of hours needed to fill out the form, and (8) an indication of whether section 3504(h) of Public Law 96-511 applies.

ADDRESSES: Copies of the form and supporting documents may be obtained from Nancy C. McCoy, Agency Clearance Officer (732), Veterans Administration, 810 Vermont Avenue, NW, Washington, DC 20420, (202) 389-2146. Comments and questions about the items on the list should be directed to the VA's OMB Desk Officer, Dick Eisinger, Office of Management and Budget, 726 Jackson Place, NW, Washington, DC 20503, (202) 395-7316.

DATES: Comments on the information collection should be directed to the OMB Desk Officer within 60 days of this notice.

Dated: April 23, 1986.

By direction of the Administrator.

Randall H. Bryant II,
Executive Assistant to the Associate Deputy Administrator for Management.

Extension

1. Department of Veterans Benefits.
2. Supplemental Physical Examination Report.
3. VA Form 29-8100 (Series).
4. On occasion.
5. Individuals or households.
6. 3,301 responses.
7. 678 hours.
8. Not applicable.

FEDERAL COMMUNICATIONS COMMISSION

April 24, 1986.

The Federal Communications Commission will hold an Open Meeting on the subjects listed below on Thursday, May 1, 1986, which is scheduled to commence at 9:30 a.m., in Room 856, at 1919 M Street, NW., Washington, DC.

Agenda, Item No., and Subject

Private Radio—1—Title: Amendment of Parts 2 and 94 of the Rules to accommodate radio local area network stations in the 1700-1710 MHz band. (RM-5072) Summary: The FCC will consider whether to adopt a Notice of Proposed Rule Making to permit radio local area networks and similar type system to operate in the 1700-1710 MHz band.

Common Carrier—1—Title: In the Matter of International Communications Policies Governing Designation of Recognized Private Operating Agencies, Grants of IRUs in International Facilities and Assignment of Data Network Identification Codes. Summary: The Commission will consider comments filed in response to its Notice of Proposed Rulemaking in CC Docket No. 83-1230.

Common Carrier—2—Title: Report and Order revising the Uniform System of Accounts for Class A, Class B, and Class C Telephone Companies. (CC Docket 78-196) Summary: The Commission will decide whether to rescind the Uniform System of Accounts for Class A, Class B, and Class C Telephone Companies in Parts 31 and 33 of the Commission's Rules and Regulations and replace these parts with a single new uniform system of accounts in a new Part 32 for all telephone companies subject to FCC jurisdiction.

Mass Media—1—Title: Deregulation of Radio. Summary: The Commission will consider what program record keeping requirements should be adopted for commercial radio licensees.

Mass Media—2— Title: Revision of Programming and Commercialization Policies, Ascertainment Requirements, and Program Log Requirements for Commercial Television Stations. Summary: The Commission will consider petitions for reconsideraton of its *Report and Order* in the television deregulation proceeding.

This meeting may be continued the following work day to allow the Commission to complete appropriate action.

Additional information concerning this meeting may be obtained from Judith Kurtich, FCC Office of Congressional and Public Affairs, telephone number (202) 254-7674.

Issued: April 24, 1986.

Federal Communications Commission.
William J. Tricarico,
Secretary.

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

April 24, 1986.

TIME AND DATE: 10:00 a.m., Thursday, May 1, 1986.
PLACE: Room 600, 1730 K. St., NW., Washington, D.C.
STATUS: Open.
MATTERS TO BE CONSIDERED: The Commission will hear oral argument on the following:

1. Amax Chemical Corporation, Docket No. CENT 84-91-M. (Issues include whether the administrative law judge properly concluded that the operator violated 30 CFR § 57.3-22 (1984), a ground control standard.)

Any person intending to attend this hearing who requires special accessibility features and/or auxiliary aids, such as sign language interpreters, must inform the Commission in advance of those needs. Subject to 20 CFR § 2706.150(a)(3) and § 2706.160(e).

TIME AND DATE: Immediately following the oral argument.
STATUS: Closed (Pursuant to 5 U.S.C. § 552(b)(10)).
MATTERS TO BE CONSIDERED: The Commission will consider and act upon the above captioned case.
CONTACT PERSON FOR MORE INFORMATION: Jean Ellen (202) 653-5629.

Jean I. Ellen
Agenda Clerk.

NUCLEAR REGULATORY COMMISSION

DATE: Weeks of April 28, May 5, 12, and 19, 1986.
PLACE: Commissioners' Conference Room, 1717 H Street, NW., Washington, DC.
STATUS: Open and Closed.
MATTERS TO BE CONSIDERED:

Week of April 28

Thursday, May 1

9:30 a.m.
Discussion of Management-Organization and Internal Personnel Matters (Closed—Ex. 2 & 6)
11:30 a.m.
Affirmation/Discussion and Vote (Public Meeting)
a. Advanced Reactor Policy Statement (*postponed* from 4/23)

Week of May 5—Tentative

Wednesday, May 7

10:00 a.m.
Discussion/Possible Vote on Full Power Operating License for Catawba-2 (Public Meeting)

Thursday, May 8

2:00 p.m.
Meeting with Advisory Committee on Reactor Safeguards on Safety Goal Policy (Public Meeting)
3:30 p.m.
Affirmation Meeting (Public Meeting) (if needed)

Week of May 12—Tentative

Thursday, May 15

9:30 a.m.
Briefing by AIF on State of the Industry (Public Meeting)
3:30 p.m.
Affirmation Meeting (Public Meeting) (if needed)

Week of May 19—Tentative

Tuesday, May 20

2:00 p.m.
Discussion of Management-Organization and Internal Personnel Matters (Closed—Ex. 2 & 6)

Wednesday, May 21

10:00 a.m.
Briefing by Staff on Status of TVA (Open/Portion Closed—Ex. 5 & 7)
2:00 p.m.
Discussion of Management-Organization and Internal Personnel Matters (Closed—Ex. 2 & 6)

Thursday, May 22

10:00 a.m.
Briefing by Davis-Besse Ad Hoc Review Group
(Open/Portion May be Closed)
2:00 p.m.
Affirmation Meeting (Public Meeting) (if needed)

TO VERIFY THE STATUS OF MEETINGS CALL (RECORDING): (202) 634-1498.

CONTACT PERSON FOR MORE INFORMATION: L. Ong, (202) 634-1410.

L. Ong,

Department of the Interior

Bureau of Indian Affairs

Indian Trust Funds; Policy Decision Concerning the Management and Administration

VOL
51
ISS
82
AP
29
19 86
UMI

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Indian Trust Funds; Policy Decision on Management and Administration

AGENCY: The Bureau of Indian Affairs, Interior.

ACTION: Notice of policy decision concerning the management and administration of Indian Trust Funds.

SUMMARY: Bureau of Indian Affairs will strengthen its internal management and administration of Indian trust funds by contracting for certain services.

FOR FURTHER INFORMATION CONTACT: Betty L. Wilkinson, Chief, Division of Accounting Management, Main Interior Building, Room 4604, (202) 343–7336 or Charles Hughes, Attorney-Advisor, SOL–IA, Main Interior Building, Room 6459, (202) 343–9401.

SUPPLEMENTARY INFORMATION: The Secretary of the Interior has broad responsibilities in managing Indian trust funds, including collections, accounting, investments, and certification of disbursements to Indian beneficiaries. The Bureau of Indian Affairs carries out these functions except for collection of royalties from Indian oil and gas production which are administered by the Minerals Management Service. Collections are deposited through the banking system into Department of Treasury accounts specified for Indian trust funds. Treasury is responsible for maintaining all Indian trust fund cash accounts and for all disbursement of such funds upon Bureau of Indian Affairs request. The Bureau of Indian Affairs is responsible for investment of the funds in securities authorized by law. Bureau of Indian Affairs accounts are maintained to reflect tribal and individual Indian interests in fund invested and funds held in Treasury.

The Department of the Interior, with Department of Treasury concurrence, has determined that increased, expert assistance is needed to strengthen the management and administration of Indian trust funds and that such assistance should be sought from the private sector.

The Bureau has obtained an independent evaluation of the trust fund operation and has considered numerous audits and reports concerning the funds. In response to a request for information published by the Bureau, a wide range of materials have been received on relevant private sector capabilities. The Department of Treasury has assisted in assessing how the government might strengthen its Indian trust fund operation. It has been determined that the need for improvements requires immediate action and that there is no likelihood that the government could effectively duplicate the needed assistance already available in the private sector.

The procurement will be directed at a streamlined collection process through use of lock boxes, faster concentration of funds for investment, improved accounting and reporting to Indian beneficiaries and the government, and strengthened investment management.

All controls required by law of the government as trustee will continue, including approval of investment decisions. Treasury responsibility to maintain Indian trust fund accounts and to disburse trust funds will not be affected. All activities conducted under contract will involve internal trust fund operations.

The procurement will not restrict or negatively affect any existing tribal or individual Indian right or relationship to the funds. Rather, the procurement will be designed to enhance rights of and services rendered to Indian beneficiaries by better accountability, more frequent and detailed reporting on the status of funds, a modernized collection process and a better managed investment operation.

EFFECTIVE DATE: This policy shall become effective April 29, 1986.

Ross O. Swimmer,

Assistant Secretary—Indian Affairs.

LIST OF PUBLIC LAWS

Last List April 28, 1986.
This is a continuing list of public bills from the current session of Congress which have become Federal laws. The text of laws is not published in the Federal Register but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202–275–3030).

H.R. 4651/Pub. L. 99–278

To extend for 3 months the emergency acquisition and net worth guarantee provisions of the Garn-St Germain Depository Institutions Act of 1982. (Apr. 24, 1986; 100 Stat. 397; 1 page) Price: $1.00

H.R. Res. 599/Pub. L. 99–279

Commemorating the twenty-fifth anniversary of the Bay of Pigs invasion to liberate Cuba from Communist tyranny. (Apr. 24, 1986; 100 Stat. 398; 1 page) Price: $1.00

S. 1292/Pub. L. 99–280

Health Services Amendments Act of 1986. (Apr. 24, 1986; 100 Stat. 399; 3 pages) Price: $1.00

S.J. 266/Pub. L. 99–281

To designate the week of April 20, 1986, through April 26, 1986, as "National Reading Is Fun Week." (Apr. 24, 1986; 100 Stat. 402; 1 page). Price: $1.00

S.J. 303/Pub. L. 99–282

To designate April 1986, as "Fair Housing Month." (Apr. 24, 1986; 100 Stat. 403; 1 page) Price: $1.00

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: May 15; at 9 am.

WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC.

RESERVATIONS: Laurence Davey, 202-523-3517

Rules and Regulations

Federal Register
Vol. 51, No. 83
Wednesday, April 30, 1986

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Parts 918, 925, and 927

Expenses and Rates of Assessments for Specified Marketing Orders

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation authorizes expenditures and establishes assessment rates under Marketing Orders 918 and 925. In addition, this regulation increases the 1985–86 budget under M.O. 927 (Oregon/Washington/California Winter Pears). Funds to administer these programs are derived from assessments on handlers.

EFFECTIVE DATES: March 1, 1986–February 28, 1987 (§ 918.223); December 1, 1985–November 30, 1986 (§ 925.205); July 1, 1985–June 30, 1986 (§ 927.225).

FOR FURTHER INFORMATION CONTACT: Ronald L. Cioffi, Chief, Marketing Order Administration Branch, F&V, AMS, USDA, Washington, DC 20250, telephone: (202) 447–5697.

SUPPLEMENTARY INFORMATION: This rule has been reviewed under Secretary's Memorandum 1512-1 and Executive Order 12291 and has been designated a "non-major" rule. The Administrator, Agricultural Marketing Service, has certified that these actions will not have a significant economic impact on a substantial number of small entities.

These marketing orders are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). These actions are based upon recommendations and information submitted by each committee, established under the respective marketing orders, and upon other information. It is found that the expenses and rates of assessment, as hereinafter provided, will tend to effectuate the declared policy of the act.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice and engage in public rulemaking, and good cause exists for not postponing the effective dates until 30 days after publication in the **Federal Register** (5 U.S.C. 553). Each order requires that the rate of assessment for a particular fiscal period shall apply to all assessable commodities handled from the beginning of such period. To enable the committees to meet current fiscal obligations, approval of the expenses and rates of assessment is necessary without delay. It is necessary to effectuate the declared policy of the act to make these provisions effective as specified, and handlers have been apprised of such provisions and the effective dates.

List of Subjects 7 CFR Parts 918, 925, and 927

Marketing agreements and orders, Peaches, Georgia; Desert grapes, California; Winter pears, Oregon, Washington, California

1. The authority citation for 7 CFR Parts 918, 925, and 927 continue to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Therefore, new §§ 918.223, 925.205 are added; § 927.225 (50 FR 28373) is amended to read as follows (the following sections prescribe annual expenses and assessment rates and will not be published in the Code of Federal Regulations):

PART 918—FRESH PEACHES GROWN IN GEORGIA

§ 918.223 Expenses and assessment rate.

Expenses of $11,635 by the Industry Committee are authorized, and an assessment rate of $0.01 per bushel of peaches is established for the fiscal year ending February 28, 1987.

PART 925—GRAPES GROWN IN A DESIGNATED AREA OF SOUTHEASTERN CALIFORNIA

§ 925.205 Expenses and assessment rate.

Expenses of $42,000 by the California Desert Grape Administrative Committee are authorized, and an assessment rate of $0.005 per 22-pound container of grapes is established for the fiscal year ending November 30, 1986.

PART 927—BEURRE D'ANJOU, BEURRE BOSC, WINTER NELIS, DOYENNE DU COMICE, BEURRE EASTER, AND BEURRE CLAIRGEAU VARIETIES OF PEARS GROWN IN OREGON, WASHINGTON, AND CALIFORNIA

§ 927.225 [Amended]

Section 927.225 is amended by changing $1,678,124 to $1,871,477.

Dated: April 24, 1986.

Thomas R. Clark,
Acting Director, Fruit and Vegetable Division.

[FR Doc. 86-9606 Filed 4-29-86; 8:45 am]

BILLING CODE 3410-02-M

7 CFR Part 979

[Amdt. No. 5]

Melons Grown in South Texas; Handling Regulation

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule exempts gift boxes of melons from the container requirements of the handling regulation. The containers currently required are too large for gift pack use. This action will permit melon shippers to serve a small but growing segment of the melon market that would not otherwise be available to them.

EFFECTIVE DATE: May 1, 1986.

FOR FURTHER INFORMATION CONTACT: Ronald L. Cioffi, Chief, Marketing Order Administration Branch, F&V, AMS, USDA, Washington, DC 20250, telephone (202) 447–5697.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291 and has been designated a "nonmajor" rule.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has certified that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order

VOL 51 ISS 83 AP 30 1986 UMI

that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act, and rules proposed thereunder, are unique in that they are brought about through the group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

It is estimated that approximately 35 handlers of melons will be subject to regulation under the South Texas Melon Marketing Order during the course of the current season and that the great majority of this group may be classified as small entities. While regulations issued during the season impose some costs on affected handlers, the added burden imposed on small entities by this amendment, if present at all, is not significant.

Notice was given in the March 3, 1986, **Federal Register** (51 FR 7279) affording interested persons until April 2, 1986, to submit written comments. None was received.

Marketing Agreement No. 156 and Order No. 979, regulate the handling of melons grown in designated counties in South Texas. The program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The South Texas Melon Committee, established under the order, is responsible for its local administration.

Because requiremens under this program have changed infrequently, in December 1981 the committee recommended, and the Secretary approved, a regulation which would continue in effect from marketing season to marketing season indefinitely unless modified, suspended, or terminated by the Secretary upon recommendation submitted by the committee or other information available to the Secretary.

At its public organizational meeting in McAllen, Texas, on December 3, 1985, the committee recommended that the regulation continue but that gift boxes of melons be exempt from the container requirements of the handling regulation. Until this amendment, the handling regulation included a requirement that all melons be packed in containers of specified dimensions. The usual cartons for cantaloups contain 40 pounds and those for honeydew melons 30 pounds, too large for gift-type packaging. Moreover, for the gift-pack market a range of sizes and configurations for containers is necessary. The pack may contain other items such as fruit, preserves or nuts; and a range of different sizes is more appropriate in order to offer consumers a wider selection. All other provisions of the handling regulation, including minimum grade requirements, still apply to such packages. Since gift packages must contain only the highest quality melons in order to command their price, there is little chance that this will be used as a "dumping ground" for melons of questionable grade. The committee believes this action will enable melon shippers to serve a small but developing market for gift packages.

Although the amended regulation is effective for an indefinite period, the committee will continue to meet prior to or during each season to consider recommendations for modification, suspension, or termination of the regulation. Prior to making any such recommendations, the committee will submit to the Secretary a marketing policy for the season including an analysis of supply and demand factors having a bearing on the marketing of the crop. Committee meetings are open to the public and interested persons may express their views at these meetings or may file comments with the Fruit and Vegetable Division before March 1 each year. The Department will evaluate committee recommendations and information submitted by the committee, and other available information, and determine whether modification, suspension or termination of the regulations on shipments of South Texas melons would tend to effectuate the declared policy of the act.

Findings

After consideration of all relevant matters, including the proposal set forth in the notice, it is hereby found that the following amendment, as hereinafter set forth, will tend to effectuate the declared policy of the act.

It is hereby further found that good cause exists for not postponing the effective date of this section until 30 days after publication in the **Federal Register** (5 U.S.C. 553) in that (1) shipments of melons grown in the production area will begin about May 1; (2) to maximize benefits to producers, this regulation should apply to as many shipments as possible during the marketing season; and (3) compliance with this regulation, which is similar to that in effect during previous marketing seasons, will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective date.

List of Subjects in 7 CFR Part 979

Marketing agreements and orders, Melons, Texas.

PART 979—MELONS GROWN IN SOUTH TEXAS

1. The authority citation for 7 CFR Part 979 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 979.304 (47 FR 13118, March 29, 1982; 47 FR 24109, June 3, 1982; 48 FR 21881, May 16, 1983; 49 FR 15541, April 19, 1984; and 50 FR 10206, March 14, 1985) is hereby further amended by adding a new paragraph (e)(4) as follows:

§ 979.304 Handling regulation.

* * * * *

(e) *Special purpose shipments.* * * *

(4) The handling to any person of gift packages of melons not exceeding 25 pounds per package, individually addressed to such person and not for resale, is exempt from the container requirements of paragraph (b) of this section, but shall meet all assessment requirements of § 979.42 and the grade and inspection requirements of paragraphs (a) and (c) respectively of this section.

BILLING CODE 3410-02-M

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 241

[Release No. 34-23170]

Securities; Brokerage and Research Services

AGENCY: Securities and Exchange Commission.

ACTION: Interpretive Release Concerning the Scope of section 28(e) of the Securities Exchange Act of 1934 and Related Matters.

SUMMARY: The Commission today announced the issuance of an interpretive release under section 28(e) of the Securities Exchange Act of 1934 ("Act") which provides a safe harbor for persons who exercise investment discretion over beneficiaries' or clients' accounts to pay for research and brokerage services with commission dollars generated by account transactions. In the release, the Commission has clarified its interpretation of the phrase "brokerage and research services" in section 28(e)(3) and has reiterated the disclosure obligations of money managers under the federal securities laws concerning brokerage allocation practices and the use of commission dollars. The Commission has also expressed its views regarding best execution obligations of fiduciaries for their clients' transactions and its views and those of the United States Department of Labor regarding directed brokerage practices by sponsors of employee benefit plans. The Commission believes that the release will provide useful guidance to money managers and other persons in the securities industry.

FOR FURTHER INFORMATION CONTACT: Mary Chamberlin, Chief Counsel, or Kerry F. Hemond, Esq. ((202) 272–2848), Office of Chief Counsel, Division of Market Regulation, Securities and Exchange Commission, 450 5th Street, NW., Washington, DC 20549. For further information regarding the obligations imposed under the Investment Advisers Act of 1940 and the Investment Company Act of 1940, contact Thomas P. Lemke, Chief Counsel, Stephanie M. Monaco, Esq., or Gerald T. Lins, Esq. ((202) 272–2030), Office of Chief Counsel, Division of Investment Management, Securities and Exchange Commission.

SUPPLEMENTARY INFORMATION:

I. Background

Section 28(e) provides a safe harbor to money managers who use the commission dollars of their advised accounts to obtain investment research and brokerage services, provided that all of the conditions in the section are met.[1] The section states that a person who exercises investment discretion with respect to an account [2] shall not be deemed to have acted unlawfully or to have breached a fiduciary duty under state or federal law solely by reason of his having caused an account to pay more than the lowest available commission if that person determines in good faith that the amount of the commission is reasonable in relation to the value of the brokerage and research services provided. Conduct outside of the safe harbor of Section 28(e) may constitute a breach of fiduciary duty as well as a violation of specific provisions of the federal securities laws, particularly under the Investment Advisers Act of 1940 ("Advisers Act") and the Investment Company Act of 1940 ("Company Act") and of the Employee Retirement Income Security Act of 1974 ("ERISA"). In addition, the section only excuses paying more than the lowest available commission and does not shield a person who exercises investment discretion from charges of violations of the antifraud provisions of the federal securities laws or from allegations, for example, that he churned an account, failed to seek the best price, or failed to make required disclosures.

In connection with the abolition of fixed commission rates on May 1, 1975, money managers and broker-dealers expressed concern that, if money managers were to pay more than the lowest commission rate available to a broker-dealer in return for services other than execution, such as research,[3] they would be exposed to charges that they had breached a fiduciary duty. This concern was based on the traditional fiduciary principle that a fiduciary cannot use trust assets to benefit himself. The purchase of research with the commission dollars of a beneficiary or a client, even if used for the benefit of the beneficiary or the client, could be viewed as also benefiting the money manager in that he was being relieved of the obligation to produce the research himself or to purchase it with his own money. This concern stemmed in part from litigation during the 1960's and 1970's over whether advisers of investment companies had a duty to recapture commission dollars for the benefit of the investment company.[4] The Congress added section 28(e) of the Act [5] to make clear that money managers could consider the provision of research, as well as execution services, in evaluating the cost of brokerage services without violating their fiduciary responsibilities. In adopting section 28(e), the Congress acknowledged the important service broker-dealers provide by producing and distributing investment research to money managers and created a safe harbor to permit money managers, in certain circumstances, to continue to use commission dollars paid by managed accounts to acquire research as well as execution services. These arrangements have come to be referred to as "soft dollar" arrangements.

In 1976, the Commission issued an interpretive release concerning the scope of section 28(e).[6] The Commission stated in the release that the safe harbor did not protect "products and services which are readily and customarily available and offered to the general public on a commercial basis." The Commission issued the release as a result of a number of practices which it did not believe were within the safe harbor. Since that time, the Commission has issued a report pursuant to section 21(a) of the Act reiterating this standard.[7] The staff has generally declined, as a matter of policy, to express definitive views as to whether a money manager's receipt of any particular product or service would be protected by section 28(e), although it has provided general comments on research services through the no-action letter process.[8]

Prompted by an increased industry focus on soft dollar practices, over the past eighteen months the staff of the Commission's Divisions of Market Regulation and Investment Management, and the staff of the Commission's regional offices, have been engaged in an examination of such practices generally and in particular in a re-evaluation of the 1976 standard as to the meaning of the phrase "brokerage and research services" in the context of section 28(e). Based on the staff's analyses and recommendations, the Commission has concluded that the 1976 standard is difficult to apply and unduly restrictive in some circumstances, and

---

[1] Section 28(e) of the Act states in pertinent part:

No person using the mails, or any means or instrumentality of interstate commerce, in the exercise of investment discretion with respect to an account shall be deemed to have acted unlawfully or to have breached a fiduciary duty under State or Federal law unless expressly provided to the contrary by a law enacted by the Congress or any State subsequent to June 4, 1975, solely by reason of his having caused the account to pay a member of an exchange, broker, or dealer an amount of commission for effecting a securities transaction in excess of the amount of commission another member of an exchange, broker, or dealer would have charged for effecting that transaction, if such person determined in good faith that such amount of commission was reasonable in relation to the value of the brokerage and research services provided by such member, broker, or dealer, viewed in terms of either that particular transaction or his overall responsibilities with respect to the accounts as to which he exercises investment discretion. . . .

[2] The term "investment discretion" is defined in Section 3(a)(35) of the Act.

[3] This practice is commonly known as "paying up" for research.

VOL 51 ISS 83 AP 30 1986 UMI

that uncertainty about the standard may have impeded money managers from obtaining, for commission dollars, goods and services they believe are important to the making of investment decisions. Accordingly, the Commission is withdrawing the 1976 standard and adopting a revised standard, as discussed below. At the same time, however, the Commission emphasizes that money managers, particularly investment advisers registered under the Advisers Act, have important fiduciary and disclosure obligations concerning soft dollar practices, as well as a duty to obtain best execution of their clients' transactions. Finally, the Commission expresses its views on the practice of many employee benefit plan sponsors of directing their money managers to execute transactions through specified broker-dealers who have agreed to rebate to the plan a portion of the commissions paid in the form of cash, goods or services.

II. Definition of Brokerage and Research Services

A. In General

Subparagraph (3) of section 28(e) defines the brokerage and research services that are protected. The statute states that a person provides brokerage and research services insofar as he—

(A) furnishes advice, either directly or through publications or writings, as to the value of securities, the advisability of investing in, purchasing, or selling securities, and the availability of securities or purchasers or sellers of securities;

(B) furnishes analyses and reports concerning issuers, industries, securities, economic factors and trends, portfolio strategy, and the performance of accounts; or

(C) effects securities transactions and performs functions incidental thereto (such as clearance, settlement, and custody) or required in connection therewith by rules of the Commission or a self-regulatory organization of which such person is a member or person associated with a member or in which such person is a participant.

The legislative history of section 28(e) indicates that: The definition of brokerage and research services is intended to comprehend the subject matter in the broadest terms, subject always to the good faith standard in subsection (e)(1). Thus, for example, the reference to economic factors and trends would subsume political factors which may have economic implications which may in turn have implications in terms of the securities markets as a whole or in terms of the past, present, or future values of individual securities or groups of securities. Similarly, computer analyses of securities portfolios would also be covered. Thus, the touchstone for determining when a service is within or without the definition in section 28(e)(3) is whether it provides lawful and appropriate assistance to the money manager in the carrying out of his responsibilities.[9]

The Commission relied on this legislative history in adopting the 1976 guidelines, but expressed its view that in order to rely on the section 28(e) safe harbor, the product or service must not be readily and customarily available and offered to the general public on a commercial basis. While application of this standard has in some cases been clear, in other cases it has caused substantial uncertainty and confusion on the part of money managers and others, particularly as the types of research products and their methods of delivery have proliferated and become more complex. For example, participants in the securities industry have repeatedly requested clarification as to whether the application of this standard would disqualify a product that is available for hard dollars, what is meant by "the general public," the extent to which economic, financial and statistical information conveyed through computer facilities to a money manager may be considered to be research, and whether the computer facilities themselves can constitute research. The Commission is concerned that this lack of clarity has impeded the use by fiduciaries of appropriate research material and has acted as a disincentive to competition among broker-dealers.

B. Revised Standard

The Commission believes that, subject to the process discussed below of allocating payment for products or services that serve both a research and a non-research function, the controlling principle to be used to determine whether something is research is whether it provides lawful and appropriate assistance to the money manager in the performance of his investment decision-making responsibilities. In making this determination, the fact that a product or service is readily and customarily available and offered to the general public on a commercial basis does not dictate the conclusion that the product or service is not research, as was the case under the 1976 standard.[10] Rather, the focus should be on whether the product or service provides lawful and appropriate assistance to the money manager's investment decision-making process. What constitutes lawful and appropriate assistance in any particular case will depend on the nature of the relationships between the various parties involved and is not susceptible to hard and fast rules. Of course, section 28(e) continues to require the money manager to make a good faith determination that the value of research and brokerage services is reasonable in relation to the amount of commissions paid.[11] The legislative history of section 28(e) makes clear that the burden of proof in demonstrating this determination rests on the money manager.[12]

In many cases, a product or service termed "research" may serve other functions that are not related to the making of investment decisions. For example, management information systems may integrate such diverse functions as trading, execution, accounting, recordkeeping and other administrative matters, such as measuring the performance of accounts. Where a product obtained with soft dollars has a mixed use, a money manager faces a conflict of interest in obtaining that product by causing his clients to pay more than competitive brokerage commission rates. Therefore, the Commission believes that where a product has a mixed use, a money manager should make a reasonable allocation of the cost of the product according to its use. The percentage of the service or specific component that provides assistance to a money manager in the investment decision-making process may be paid for in commission dollars, while those services that provide administrative or other non-research assistance to the money manager are outside the section 28(e) safe harbor and must be paid for by the money manager using his own funds.[13] The money manager must keep adequate books and records concerning allocations so as to be able to make the required good faith showing.

Computer hardware is another example of a product which may have a mixed use. If the hardware is dedicated exclusively to software that is used for research for a client's benefit, it may be paid for in commission dollars. On the other hand, if the computer will be used in assisting the money manager in a non-research capacity (*e.g.*, bookkeeping or other administrative functions), that portion of the cost of the computer would not be within the safe harbor. The acquisition of quotation equipment should be analyzed similarly. Such equipment generally serves a legitimate research function of pricing securities for investment and keeping a manager informed of market developments. The equipment may also be used for a non-research purpose (*e.g.*, client reporting). Finally, where a money manager is invited to attend a research seminar or similar program, the cost of that seminar may be paid for with commission dollars. Non-research aspects of the trip, however, such as travel costs, hotel, meal and entertainment expenses, are not within the safe harbor.

The Commission recognizes that the task of properly allocating the research and non-research properties of certain goods and services provided to fiduciaries may be complex. The Commission believes the standard will be satisfied where a fiduciary can demonstrate a good faith attempt, under all the circumstances, to allocate the anticipated uses of a product.

III. Third Party Research

Another issue raised under section 28(e) is whether research may be produced or provided by someone other than the executing broker-dealer, or so-called "third party" research. Prior to the elimination of fixed commission rates, a variety of techniques were employed that permitted money managers to purchase third party research with brokerage commissions. Although the legislative history of section 28(e) includes a strong statement that commission dollars may be paid only to the broker-dealer that "provides" both the execution and research services and that the section does not authorize the resumption of "give-ups,"[14] it seems unlikely that Congress intended to forbid certain common practices that were then considered permissible and whose elimination would be anti-competitive.

In the 1976 release, the Commission indicated that section 28(e) might, under appropriate circumstances, apply to situations in which research produced by third parties is provided to a money manager by a broker. The Commission suggested that payment of a part of the commission to another broker who is a "normal and legitimate correspondent" of the executing or clearing broker would not necessarily be a give-up outside the protection of section 28(e).

In Release 16679, a report pursuant to section 21(a) of the Act,[15] the Commission found that the brokers involved in the arrangement did not provide the money managers with any significant research services. They merely executed the transactions and paid 50% of the commissions to Investors Information, Inc. ("III"), who represented various research originators. All arrangements for acquiring the services were made by the money managers and the vendors of the services. III simply held the money for the money managers and paid the bills as requested. The money managers were obligated to pay the vendors for the services and the brokers generally were not aware of the specific services which the managers acquired.

The Commission acknowledged that it is not necessary that a broker produce the research services "in-house" in order for the money manager to obtain the protection of section 28(e). The Commission emphasized, however, that the research services must be "provided by" the broker. The Commission stated that while a broker may under appropriate circumstances arrange to have research materials or services produced by a third party, it is not "providing" such research services when it pays obligations incurred by the money manager to the third party.

In approving the "Papilsky" rules,[16] the Commission clarified that research provided in third-party arrangements falls within section 28(e) even if the money manager participates in selecting the research services or products to be provided to it by the broker-dealer. The Commission also stated that third-party research does not have to be shipped through the broker, but may instead be delivered directly by the third party to the manager in circumstances that otherwise qualified for the safe harbor. The Commission stated:

> . . . a broker-dealer may be deemed to have provided third party research when it has incurred a direct legal obligation to a third party producer to pay for the research (regardless of whether the research is then sent directly to the broker's fiduciary customer by the third party or instead is sent to the broker who then sends it to his customer). The Commission does not believe, however, that section 28(e) would apply where the broker was merely used as an alternative means of paying obligations incurred by the fiduciary in its direct dealings with the third party . . . [citation omitted] In that regard, a broker-dealer may be deemed to have provided third party research that it is legally obligated to pay for even if its fiduciary customer participates in the selection of the research services or products to be provided to it by the broker-dealer.[17]

The staff also has expressed the opinion that section 28(e) was not intended to exclude from its coverage the payment of commissions made in good faith to an introducing broker for execution and clearing services performed in whole or in part by the introducing broker's normal and legitimate correspondent. The staff added that the protection of section 28(e) would not be lost merely because the fiduciary by-passed the order desk of the introducing broker and called its orders directly into the clearing broker.[18] More recently, the staff has stated that its views concerning correspondent relationships contemplate that the "introducing broker would be engaged in securities activities of a more extensive nature than merely the receipt of commissions paid to it by other broker-dealers for 'research services' provided to money managers."[19]

IV. Disclosure and Other Obligations Under the Investment Advisers Act of 1940 and the Investment Company Act of 1940 Applicable to Money Managers Engaging in Soft Dollar Arrangements

Money managers engaging in soft dollar arrangements must comply with all applicable disclosure requirements under the federal securities laws, and registered investment advisers and others should pay particular attention to the disclosure and books and records requirements under the Advisers Act and the Company Act. Disclosure is required even if an arrangement is within the safe harbor provided by section 28(e).[20] In addition, money

[20] As the Commission stated in a 1979 release adopting rule and form amendments designed to require registered investment companies to provide investors with disclosure about brokerage placement practices and policies, "[t]hese

VOL 51 ISS 83 AP 30 1986 UMI

managers must comply with any other laws imposing fiduciary or other obligations with respect to their participation in such arrangements. Set forth below is a discussion of the principal provisions of the Advisers Act and Company Act and rules and forms thereunder which, depending on the facts and circumstances involved, impose disclosure and other obligations on money managers and related persons.

A. Advisers Act

1. Form ADV

Fundamental to the Advisers Act is the concept that an investment adviser has a fiduciary obligation to act in the best interests of clients. As a fiduciary, an adviser has a duty to disclose to clients all material information which is intended "to eliminate, or at least expose," all potential or actual conflicts of interest "which might incline an investment adviser consciously or unconsciously—to render advice which was not disinterested." [21] Due to the potential conflict of interest when an adviser receives research as a result of allocating brokerage on behalf of clients' accounts, the Commission has long maintained that an adviser must disclose soft dollar arrangements to clients. The Commission has adopted mandatory disclosure standards for advisers involved in such arrangements,[22] as discussed below.

Pursuant to its authority in section 28(e)(2) to adopt rules governing a money manager's disclosure of brokerage policies and practices, the Commission proposed disclosure rules in 1976,[23] but later determined to "incorporate more comprehensive brokerage placement practice disclosure requirements" within the registration process for investment advisers under the Advisers Act.[24] One of these provisions is the so-called "brochure rule," which was adopted in 1979 and is set forth in Rule 204–3 under the Advisers Act. This rule requires generally that an adviser furnish each advisory client and each prospective advisory client with a written disclosure statement containing certain information regarding the adviser's business background and practices.[25] The disclosure statement may be either a copy of Part II of the adviser's Form ADV,[26] the registration form for investment advisers, or a written document containing at least the information required by Part II of the Form ADV.[27]

Item 12 of Part II of Form ADV requires disclosure to clients regarding investment or brokerage discretion. The purpose of this disclosure is to provide clients with material information about the adviser's brokerage allocation policies and practices which may be important to them in deciding to hire an adviser or continue a contract with an adviser and which will permit them to evaluate any conflicts of interest inherent in the adviser's arrangements for allocating brokerage.[28] Because brokerage policies and practices vary greatly, the disclosure made in response to Item 12 should provide sufficient information to enable a client or potential client to understand such policies and practices. This item requires disclosure regarding (1) whether the adviser or a related person has authority to determine, without specific client consent, the broker-dealer to be used in any securities transaction or the commission rate to be paid, or (2) whether the adviser or a related person suggests broker-dealers to clients. If the adviser engages in either of these practices, whether or not pursuant to a written agreement, it must describe the factors considered in selecting broker-dealers and in determining the reasonableness of commissions charged. If the value of products, research, and services given to the adviser or a related person is a factor in those decisions, the adviser must describe the following:

- The products, research, and services;[29]
- Whether clients may pay commissions higher than those obtainable from other brokers in return for those products and services;
- Whether research is used to service all of the adviser's accounts or just those accounts paying for it; and
- Any procedures the adviser used during the last fiscal year to direct client transactions to a particular broker in return for products and research services received.[30]

In its release discussing the concurrent adoption of Form ADV disclosure requirements [31] and the brochure rule, the Commission pointed out that:

> the amended rule and forms represent mandatory disclosure standards. More detailed or additional information and explanatory material could and should be provided where necessary, because of circumstances in particular cases, to ensure that all material information regarding brokerage placement practices and policies will be disclosed to investors.[32]

An investment adviser should be particularly aware of the fact that the Advisers Act disclosure requirements apply to all soft dollar arrangements, whether or not they are within the safe harbor of section 28(e).[33] Moreover,

---

disclosure requirements reflect a longstanding policy of the Commission that brokerage placement practices of investment managers may take into consideration research and brokerage services, *provided, however, that such practices are disclosed to investors.*" Securities Act Rel. No. 6019 (Jan. 30, 1979) (emphasis added) [hereinafter cited as Release 6019]. *See* "Applicability of the Commission's Policy Statement on the Future Structure of the Securities Markets To Selections of Brokers and Payments of Commissions By Institutional Managers," Securities Act Rel. No. 5550 (May 8, 1975) [hereinafter cited as Release 5550].

[21] *Securities and Exchange Commission* v. *Capital Gains Research Bureau, Inc.*, 375 U.S. 180, 191–92 (1963); *See also* Section 206 of the Advisers Act; Rule 206–6 under the Advisers Act.

[22] *E.g.*, Release 6019, *supra* note 20.

[23] Securities Act Rel. No. 5772 (Nov. 30, 1976).

[24] Investment Advisers Act Rel. No. 684 (Jan. 30, 1979).

[25] The specific delivery requirements applicable to the brochure are set forth in paragraphs (b) and (c) of Rule 204–3.

[26] Recently the Commission adopted a new, uniform Form ADV, the uniform application form for advisers registered with the Commission and the forty states that require advisers to register. Investment Advisers Act Rel. No. 881 (Oct. 15, 1985). The form was developed jointly by the Commission and the North American Securities Administrators Association.

New Form ADV retains the two part format for the earlier form. Part I requires disclosure primarily for use by regulatory agencies. Part II of the form, which serves as the basis for the brochure rule, requires disclosure primarily for use by clients.

[27] *See* Rule 204–3(a).

[28] A general discussion of the background, purpose, and effect of the disclosure required in what is now Item 12 of Form ADV may be found in Release 6019, *supra* note 20.

[29] An adviser need not list individually each product, item of research, or service received, but rather can state the types of products, research, or services obtained with enough specificity so that clients can understand what is being obtained. Disclosure to the effect that various research reports and products are obtained would not provide the specificity required.

[30] The adviser should disclose any practices, including informal ones and whether or not they involve "paying up," to allocate brokerage to particular brokers in recognition of research products and services received. In this connection, the Commission notes that a money manager that obligated itself formally to generate a specified amount of commissions would be faced with a heavy burden of demonstrating that he was consistently obtaining best execution.

[31] Item 12 of the new uniform Form ADV mirrors Item 11 of the superseded form and has remained substantively the same since its adoption in 1979.

[32] Release 6019, *supra* note 20.14 SEC Docket 836. In addition to the disclosure required by Item 12 of Part II of Form ADV, Item 15 of Part II requires disclosure that may be relevant to soft dollar arrangements. That item requires an adviser to describe any oral or written arrangements where it or any related person receives some economic benefit from a non-client, including a benefit in the form of non-research services, in connection with giving advice to clients.

[33] *See, e.g.*, Release 19870, *supra* note 7; Release 6019, *supra* note 20.

compliance with Advisers Act disclosure requirements does not relieve an adviser from other disclosure obligations under federal or state law.

2. Section 204

Section 204 of the Adviser Acts authorizes the Commission to adopt rules prescribing the books and records a registered adviser must maintain. Pursuant to this authority, the Commission has adopted Rule 204–2, which requires an adviser to keep true, accurate, and current books and records relating to its advisory business.[34] In the case of securities transactions, particularly those which may involve soft dollars, the adviser's books and records should contain sufficient details relating to each participant in a particular transaction.

3. Best Execution

The Commission's staff has stated that an adviser, as a fiduciary, owes its clients a duty of obtaining the best execution on securities transactions.[35] For further discussion of best execution, see Section V of this release.

B. Company Act

The Company Act and rules and forms thereunder impose various disclosure and other obligations on registered investment companies, investment advisers of registered investment companies, and related persons in connection with soft dollar arrangements.

1. Form N–1A

Form N–1A is the integrated registration form used by most open-end management investment companies to register under the Company Act and to register their securities under the Securities Act of 1933. Its disclosure requirements form the basis of the two-part prospectus used by these investment companies. Part B of the form, termed the "Statement of Additional Information," requires disclosure about the company's brokerage allocation practices.[36] Specifically, Item 17 requires a description of how transactions in portfolio securities are effected, including a general statement about brokerage commissions. Investment companies also must describe how broker-dealers will be selected to effect securities transactions and how the overall reasonableness of commissions paid will be evaluated,[37] including the factors considered in connection with these determinations. The instructions to this item further require that:

- If the receipt of products or services other than brokerage or research is a factor in selecting brokers, the products and services should be described;
- If the receipt of research services is a factor in selecting brokers, the nature of such research services should be described;
- The registrant must state if persons acting on its behalf are authorized to pay a commission in excess of that which another broker might have charged for the same transaction in recognition of brokerage or research services provided by the broker;
- If applicable, the registrant should explain that research services provided by brokers may be used by the adviser in servicing all of its accounts or described other practices applicable to the registrant regarding allocation of research services provided by brokers; and
- The registrant must state the amount of transactions and related commissions paid as a result of directing the registrant's brokerage transactions to a broker because of research services provided pursuant to an agreement or understanding with a broker or otherwise through an internal allocation procedure.[38]

2. Section 20(a)

Section 20(a) of the Company Act makes it unlawful for any person to solicit proxies regarding the securities of any registered investment company in contravention of Commission rules. Pursuant to this provision, the Commission has adopted two rules that may be relevant to soft dollar arrangements. First, where a proxy solicitation is made on behalf of the management of the investment company, Rule 20a–1(b) requires the adviser of the investment company to furnish promptly to management, upon request, all information necessary for management to comply with the proxy rules, including information about soft dollar arrangements.

In addition to this general obligation, Rule 20a–2 requires disclosure of specific information about the adviser and its investment advisory contract in certain proxy solicitations,[39] including information about brokerage placement practices. Specifically, paragraph (b)(7) of the rule requires disclosure of, among other things, the following:

- A description of how brokers are selected to effect securities transactions for the company and how the reasonableness of overall brokerage commissions paid will be evaluated, including the factors considered in these determinations;
- If the receipt of products or services other than research or brokerage is a factor in selecting brokers, a description of these products or services;
- If the receipt of research services is a factor in selecting brokers, the nature of such services;
- Whether persons acting on behalf of the company are authorized to pay a broker a commission in excess of that which another broker might have charged for the same transaction in recognition of brokerage or research services provided by the broker;
- If applicable, an explanation that research services furnished by the company's brokers may be used by the adviser in servicing all of its accounts and that not all such services may be used by the adviser in connection with the company, or an explanation of other policies or practices applicable to the company regarding the allocation of research services provided by brokers; and
- The amount of transactions and related commissions directed to a broker or brokers pursuant to an agreement or understanding or otherwise through an internal allocation procedure.

3. Section 15(c)

Section 15(c) makes it unlawful for any investment company to enter into or renew any investment advisory contract unless it is approved by a majority of the company's disinterested directors. In approving such a contract, this provision

[34] *E.g.*, Rule 204–2 (a)(1), (a)(2), and (a)(3).

[35] *E.g.*, *Interfinancial Corp.* (pub. avail. Mar. 16, 1985). *See also* Release 5550, *supra* note 20 (in selecting a broker-dealer, a money manager "is not required to seek the service which carries the lowest cost so long as the difference in cost is reasonably justified by the quality of the service offered"); Securities Exchange Act Rel. No. 12251 (Mar. 24, 1976).

[36] Registered investment companies must make the Statement of Additional Information available free of charge to shareholders and potential investors upon request.

[37] Where an investment manager, in return for research services, pays an affiliated broker-dealer more than normal charges for execution of brokerage transactions, the manager "would be under a heavy burden to show that such payments were appropriate." Release 6019, *supra* note 20, 16 SEC Docket 844.

[38] Disclosure about brokerage allocation practices also is required by other registration and reporting forms used by investment companies. *E.g.*, Form N–2 (Item 9); Form N–3 (Item 22); and Form N–SAR (Item 26).

[39] The requirements of Rule 20a–2 are applicable to any solicitation made by or on behalf of management or the adviser involving action with respect to the election of directors of the investment company. *See* Rule 20a–2(a).

VOL 51 ISS 83 AP 30 1986 UMI

imposes on directors a duty to request and evaluate such information as may reasonably be necessary for the directors to evaluate the terms of the contract. This provision also imposes on the company's adviser a duty to furnish such information to the directors.[40]

The Supreme Court has defined the Congressional purpose in enacting section 15(c) and related provisions of the Company Act as placing "the unaffiliated directors in the role of 'independent watchdogs' "[41] entrusted with "the primary responsibility for looking after the interest of the funds' shareholders."[42] Disinterested directors are required to "exercise informed discretion, and the responsibility for keeping the independent directors informed lies with management, *i.e.*, the investment adviser and interested directors."[43] Depending on the facts involved, the responsibility of the disinterested directors may include monitoring of the adviser's soft dollar arrangements.

4. Section 31

Section 31 of the Company Act authorizes the Commission to adopt rules prescribing the books and records to be maintained by a registered investment company or by others, on its behalf, including investment advisers.[44] Pursuant to this authority, the Commission adopted Rule 31a–1. Paragraph (b)(9) of that rule requires an investment company to maintain a record for each fiscal quarter describing in detail the basis or bases upon which it allocated orders for the purchase or sale of portfolio securities and divided brokerage commissions or other compensation on such orders.[45] The record also must indicate the consideration given to services or benefits supplied by broker-dealers to the investment company or adviser and show the nature of such services or benefits made available.

[40] In addition to paragraph (d) of section 15, paragraph (a)(1) of that provision may be applicable to a soft dollar arrangement. This provision makes it unlawful for any person to serve as an investment adviser of a registered investment company except pursuant to a written contract which has been approved by a majority vote of shareholders and which "precisely describes all compensation" to be paid under that contract. As to what constitutes "compensation," *see infra* note 46.

[41] *Burks v. Lasker*, 441 U.S. 471, 484 (1979), *citing Tannenbaum v. Zeller*, *supra* note 4.

[42] *Burks*, *supra* note 41, at 485.

[43] *Tannenbaum*, *supra* note 4, at 417–18.

[44] *See* Rule 31a–3.

[45] Rule 31a–1(b)(9) requires this record to be completed within ten days after the end of the quarter.

5. Section 36(b)

Under Section 36(b) of the Company Act, an investment adviser to a registered investment company has a fiduciary duty with respect to the receipt of compensation for services,[46] or of payments of a material nature, from the investment company or its shareholders. However, with respect to any such amount received by an adviser, no violation of section 36(b) could occur for a soft dollar arrangement falling within the safe harbor of section 28(e).[47] Where an adviser received amounts outside of the safe harbor of section 28(e) such amounts would have to be analyzed under section 36(b) to determine if they were consistent with that provision.

6. Section 17(e)(1)

As relevant here, Section 17(e)(1) of the Company Act makes it unlawful for an affiliated person of a registered investment company [48] to receive any compensation [49] for the purchase or sale of any property to or for the investment company when that person is acting as an agent [50] for the company other than in the course of that person's business as a broker-dealer.[51] The Court of Appeals for the Second Circuit has held that the objective of section 17(e)(1) "is to prevent affiliated persons [of investment companies] from having their judgment and fidelity impaired by conflicts of interest" [52] in situations where the benefit of a reciprocal relationship between the affiliated person and another person is diverted to the affiliated person while the burden of that relationship is borne by the investment company.[53]

It is important to emphasize that receipt by an investment adviser of any compensation [54] pursuant to a soft dollar arrangement in connection with the purchase or sale of any property, including securities, to or for the investment company arguably would violate section 17(e)(1). To the extent that compensation is received by an affiliated person of a fund pursuant to a soft dollar arrangement within the safe harbor of section 28(e), however, the prohibition of section 17(e)(1) would not apply.[55]

Finally, it is not necessary to show that the person receiving compensation prohibited by section 17(e)(1) influenced the actions of the investment company,[56] nor must economic injury to the investment company be shown.[57] Rather, the essence of a violation of section 17(e)(1) is the mere receipt of compensation in connection with the purchase or sale of property to or from the investment company.

[46] The term "compensation" under Section 36(b) and other provisions of the Company Act has been broadly construed to include any economic benefit paid directly or indirectly to an adviser. *E.g.*, *Steadman Securities Corporation*, Securities Exchange Act Rel. No. 13685 at 12 SEC Docket 1042, 1052 (June 29, 1977) *rev'd on other grounds sub. nom. Steadman v. Securities and Exchange Commission*, 603 F.2d 1126 (5th Cir. 1979), *aff'd*, 450 U.S. 91 (1981). *In re Investors Research Corporation, et al.*, 12 SEC Docket 108 (1976), *aff'd in part and vacated in part*, *Investors Research Corporation and Stowers v. Securities and Exchange Commission*, 628 F.2d 168 (D.C. Cir. 1980), *cert. denied*, 449 U.S. 919 (1981) [hereinafter cited as *Investors Research*]; *Investors Research Corporation*, Investment Advisers Act Rel. No. 627 (May 1, 1978), *aff'd in part and vacated in part* 628 F.2d 168 (D.C. Cir. 1980), *cert. denied* 449 U.S. 919 (1981); *Imperial Financial Services*, 42 SEC 717 (1965); Release 5280, *supra* note 20; *Accord* Investment Advisers Act Rel. No. 770 (Aug. 13, 1981) (the element of "compensation" in the definition of an investment adviser in Section 202(a) (11) of the Advisers Act "is satisfied by the receipt of any economic benefit * * *").

[47] *Securities Acts Amendments of 1975, Conference Report to Accompany S. 249, Joint Explanatory Statement of the Comm. of Conference*, H.R. Rep. No. 229, 94th Cong., 1st Sess. 103 (1975). Although both the Senate and House versions of the section 28(e) legislation contained provisions protecting money managers against breach of fiduciary duty claims, the Conference Report makes clear that the Senate version was selected for the final legislation because it "more closely preempted both statutory and common law." *Id.*

[48] The phrase "affiliated person" of an investment company is defined in section 2(a)(3)(E) of the Company Act and includes, among others, an investment adviser to an investment company. The prescription of section 17(e)(1) also applies to any affiliated person of an affiliated person of the investment company.

[49] *See supra* note 46.

[50] As the Second Circuit stated in *United States v. Deutsch*, 451 F.2d 98, 111 (2d Cir. 1971), *cert. denied*, 404 U.S. 1016 (1972), an affiliated person of an investment company is acting as an "agent" in connection with the purchase or sale of property for purposes of Section 17(e)(1) "in all cases when he is not acting as broker for the investment company." *See Provident Management Corp.*, 44 SEC 442, 448 (1970) [hereinafter cited as *Provident*].

[51] Where an adviser is acting as "broker" in connection with the purchase or sale of securities to or for an investment company, its activities would be governed by section 17(a)(2) of the Company Act.

[52] *Deutsch*, *supra* note 50, at 108.

[53] *See Investors Research*, *supra* note 46, at 173.

[54] *See supra* note 46, and accompanying text.

[55] The fact that a soft dollar arrangement outside of section 28(e) is disclosed would not cure a violation of section 17(e)(1) because that provision reflects the Congressional determination that disclosure alone is not adequate protection in the investment company field. *Investors Research*, *supra* note 46.

[56] *Deutsch*, *supra* note 50, at 108.

[57] *Id.* "No showing of actual impairment need be made. This is a prophylactic statute. Its aim is not to redress harm but to prevent it." *Investors Research*, *supra* note 46, at 1023. *See also Provident*, *supra* note 50.

V. Best Execution Obligations

As a fiduciary, a money manager has an obligation to obtain "best execution" of clients' transactions under the circumstances of the particular transaction. The money manager must:

execute securities transactions for clients in such a manner that the client's total cost or proceeds in each transaction is the most favorable under the circumstances.[58]

A money manager should consider the full range and quality of a broker's services in placing brokerage including, among other things, the value of research provided as well as execution capability, commission rate, financial responsibility, and responsiveness to the money manager. The Commission wishes to remind money managers that the determinative factor is not the lowest possible commission cost but whether the transaction represents the best qualitative execution for the managed account. In this connection, money managers should periodically and systematically evaluate the execution performance of broker-dealers executing their transactions.

VI. Employee Benefit Plans and Plan Sponsor Directed Brokerage

During the past year the practice of plan sponsor directed brokerage has drawn considerable attention. This phrase refers to an arrangement whereby an employee benefit plan sponsor requests its money manager, subject to the manager's satisfaction that it is receiving best execution, to direct commission business to a particular broker-dealer who has agreed to provide services, pay obligations or make cash rebates to the plan.

At the outset, the Commission wishes to emphasize that directed brokerage transactions clearly do not fall within the safe harbor of section 28(e). The safe harbor is available only to persons who are exercising investment discretion, as that term is defined in section 3(a)(35) of the Act.[59] A pension plan sponsor that has retained a money manager to make investment decisions, as is the case in directed brokerage arrangements, is not exercising investment discretion.[60] Accordingly, neither the plan sponsor, the money manager, nor the broker-dealer participating in the transactions can rely on section 28(e).

Section 28(e), however, cannot by its terms be violated. Thus, the fact that sponsor directed brokerage transactions are outside its protections does not necessarily mean that such transactions are illegal. Nevertheless, each participant in the transaction may be exposed to liability unless certain aspects of the transaction are carefully handled. The Commission does not administer ERISA, but sponsor directed brokerage in connection with plans covered by ERISA may involve violations of that Act and may violate the antifraud provisions of the federal securities laws.

The Department of Labor has indicated that if the cash rebate, goods or services provided by the broker to the plan is not for a purpose that exclusively benefits the plan, the transaction would constitute a *per se* violation of ERISA. The Commission understands that many money managers and brokers who are engaging in directed brokerage transactions have required the pension plan to represent in writing at the initiation of such transactions that the rebate will be used for the exclusive benefit of the plan and its beneficiaries.

A second concern arises regarding the broker's obligation to accurately confirm transactions with customers pursuant to Rule 10b–10 under the Securities Exchange Act and to maintain books and records pursuant to Rule 17a–3. Rule 10b–10(a)(7)(ii) requires a broker to disclose the amount of remuneration received or to be received by him from a customer in connection with an agency transaction. In sponsor directed brokerage arrangements the broker-dealer has agreed to charge specified commissions but at the same time has agreed to rebate a portion of the commissions. At least in the case of a cash rebate, the confirmation is false if it does not at a minimum provide disclosure that a portion of the commission was returned to the plan. The Commission has emphasized in the past improper nature of this rebating practice without disclosure.[61] Rule 17a–3(a)(8) requires the broker to keep copies of confirmations of all purchases and sales of securities and copies of notices of all other debits and credits for securities, cash and other items for the account of customers. This provision would require that the broker document any rebating arrangements that it had entered into with plan sponsors.

Third, section 28(e) allows a money manager in making his good faith determination as to the reasonableness of commissions paid to consider not only the benefit to be derived by the account paying the commissions, but also the benefits derived by other accounts. Since sponsor directed brokerage transactions are outside of the safe harbor, this additional element of protection is unavailable. Stated differently, the Commission believes that it is illegal, from a securities law fraud perspective, for a money manager or a broker-dealer to use one client's commissions to fund an undisclosed rebate to another client. This problem is particularly acute where a money manager aggregates orders for managed accounts. In this connection, the Commission believes that serious concerns are raised under the antifraud provisions of the securities laws where a money manager or broker-dealer aggregates directed and non-directed orders unless the money manager or broker-dealer can demonstrate that it has not disadvantaged one client's account in order to fund a rebate to another client. This means that the money manager and the broker-dealer must have a system of controls and a system of records to ensure that this commingling does not occur.

VII. Conclusion

The Commission believes that this release will provide useful guidance to money managers and other persons in the securities industry. It believes that the new standard comports fully with Congressional intent in the enactment of the section, while at the same time is responsive to concerns raised in response to a changing array of research products and the impact of new technology on brokerage practices. The Commission believes that the issue is ultimately one of good faith on the part of the money manager and that the disclosure obligations will allow clients to satisfy themselves that their money manager is in fact acting in their best interest.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 35

[Docket No. RM86–6–000]

Electric Utilities; Interim Rule and Request for Comment Concerning Construction Work in Progress and Anticompetitive Implications; Extension of Time For Comments

April 25, 1986.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Interim Rule and Request for Comment; extension of comment and reply comment period.

SUMMARY: On February 27, 1986, the Commission issued an Order Adopting Interim Rule and Requesting Comment Concerning Construction Work in Progress and Anticompetitive Implications (51 FR 7774, March 6, 1986). The comment and reply comment periods are being extended at the request of Edison Electric Institute.

DATE: Comments in response to all questions (Questions 1–20) shall be submitted on or before June 4, 1986.

All reply comments shall be submitted on or before July 7, 1986.

ADDRESS: Submit comments to: Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426.

FOR FURTHER INFORMATION CONTACT: Kenneth F. Plumb, Secretary (202) 357–8400.

[Docket Nos. RM86–6–001, RM86–6–002, RM86–6–003, and RM81–36–15]

Electric Utilities; Construction Work in Progress; Reconsideration of Interim Rule and Request for Comment

Issued: April 25, 1986.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Order granting rehearing for purpose of further consideration.

SUMMARY: On February 27, 1986, the Federal Energy Regulatory Commission (Commission) issued a final rule to specify interim procedures and filing requirements to be followed in cases where electric utilities request inclusion of construction work in progress in rate base, pending further Commission action on the remand by the United States Court of Appeals for the District of Columbia Circuit in *Mid-Texas Electric Cooperative, Inc.* v. *FERC*, 773 F.2d 327 (1985).

In this order, the Commission grants rehearing of its decision solely for the purpose of further consideration. This order, does not constitute action, in whole or in part, on the merits of the requests for rehearing.

EFFECTIVE DATE: April 25, 1986.

FOR FURTHER INFORMATION CONTACT: Daniel L. Larcamp, Federal Energy Regulatory Commission, Room 8006–A, 825 North Capitol Street NE., Washington, DC, 20426, (202) 357–8520.

SUPPLEMENTARY INFORMATION:

Order Granting Rehearing for Purpose of Further Consideration

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt and C. M. Naeve.

Issued: April 25, 1986.

On March 28, 1986, Public Systems [1] filed a request for rehearing of Order No. 448, 34 FERC ¶ 61,251, issued on February 27, 1986. On March 31, 1986, requests for rehearing of Order No. 448 were filed jointly by North Carolina Electric Membership Corporation, Northeast Texas Electric Cooperative, Inc., and Sam Rayburn G&T, Inc. (Cooperative Customers), and by the National Rural Electric Cooperative Association, *et al.* (*Mid-Tex* Petitioners).[2]

In the absence of Commission action within 30 days, the requests for rehearing would be deemed to have been denied. 18 CFR 385.713. In order to allow sufficient time for due consideration of the matters raised, rehearing is hereby granted for the limited purpose of further consideration. This order does not, however, constitute action, in whole or in part, on the merits of the requests for rehearing.

By the Commission.

Kenneth F. Plumb,

Secretary.

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Parts 141 and 178

[T.D. 86–94]

Customs Regulations Amendment Relating to Additional Information on Invoices for Imported Footwear

AGENCY: Customs Service, Treasury.

ACTION: Final rule.

SUMMARY: This document amends the Customs Regulations by updating the information required on invoices of imported footwear. Customs had determined that much of the information now required, which generally is descriptive of footwear, no longer is necessary, and that other information, relating to the construction of footwear, is needed. The information is used by Customs to establish the correct tariff classification and value of imported footwear for duty and/or quota purposes.

EFFECTIVE DATE: May 30, 1986.

FOR FURTHER INFORMATION CONTACT:

Legal Aspects: Donald F. Cahill, Classification and Value Division (202–566–8161);

Operational Aspects: Alex Olenick, Duty Assessment Division (202–566–5307); Headquarters, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, DC 20229.

Technical Aspects: James Sheridan, National Import Specialist, New York Region (212–466–5889; FTS–666–5889).

SUPPLEMENTARY INFORMATION:

Background

Invoices of merchandise imported into the U.S. are required by section 481, Tariff Act of 1930 (19 U.S.C. 1481), to include certain specified information and "any other facts deemed necessary to a proper appraisement, examination, and classification of the merchandise that the Secretary of the Treasury may require." Section 141.89(a), Customs Regulations (19 CFR 141.89(a)), requires additional information on invoices of footwear classifiable under Schedule 7, Part 1A, Tariff Schedules of the United States (19 U.S.C. 1202). The additional information assists Customs in establishing the correct tariff classification and value of imported footwear for duty and/or quota purposes.

Footwear manufacturing methods have changed since the additional reporting requirements were established. Approximately seven new distinctions in footwear construction which result in classification differences are effective for footwear imports since July 1, 1981 (Pub. L. 96–39, July 26, 1979, section 223(b)(2)). As a result, much of the information now required, which generally is descriptive of footwear, no longer is necessary, and other information, relating to the construction of footwear, is needed. Accordingly, Customs proposed to amend § 141.89(a) to reflect those changes and to update the information reporting requirements.

The original notice proposing to amend § 141.89(a) was published in the Federal Register on July 28, 1978 (43 FR 32819). Essentially, that proposal requested comments on questions concerning the materials used in the manufacture of imported footwear, as well as the nature of the manufacturing process itself. After consideration of the comments received in response to that notice, it was determined advisable to expand the previous proposal's questions regarding the materials used in the manufacture of footwear, so that the information received would be adequate as an aid in the correct classification. The new proposal, published in the Federal Register on May 1, 1984 (49 FR 18649), also provided certain definitions to be used in completing footwear invoices, clarified the question concerning material(s) of chief value, and revised Customs Form 5523, titled "Invoice Details For Footwear." Specifically, importers were asked to provide the following information with regard to imported footwear on Customs Form 5523.

(1) Manufacturer's style number.
(2) Importer's style number.
(3) Type of shoe.
(i) After ski boot.
(ii) Basketball shoe.
(iii) Beachcomber.
(iv) Boat shoe.
(v) Clog.
(vi) Disposable, not rubber or plastic.
(vii) Espadrille.
(viii) Field (Football/Soccer/Astroturf) shoe.
(ix) Hiking boot.
(x) Inner liner.
(xi) Jogger/Training shoe.
(xii) Kung-Fu shoe.
(xiii) Moccasin/Soled moccasin.
(xiv) Oxford.
(xv) Popsicle.
(xvi) Pump.
(xvii) Rubber/Plastic Protective and Waterproof footwear.
(xviii) Rubber/Plastic Ski boot.
(xix) Slipper.
(xx) Slipper sock.
(xxi) Spiked Track shoe.
(xxii) Tennis shoe.
(xxiii) Workboot.
(xxiv) Woven bootie.
(xxv) Zori.
(xxvi) Other (specify).

(4) Component materials of upper with value percentage of each component. If chief value of upper is fiber, and weight of entire shoe is neither 50 percent rubber or plastic, state the percentage by weight and value of each fiber used in the upper.

(5) Component materials of entire article with value percentage of each component. If the materials in (4) and (5) are primarily of leather, answer only (8) and (12). Otherwise answer all questions.

(6) Component materials of sole with value percentage of each component.

(7) Percentage or weight of entire article:
(i) Fiber.
(ii) Rubber and/or plastic.
(iii) Other (specify material).

(8) Percentage of exterior surface area of the upper:
(i) Leather.
(ii) Rubber and/or plastic.
(iii) Other (Specify material).

(9) Is there a foxing or foxing-like band around bottom of upper? If so, specify component materials of the band.

(10) Does the sole overlap the upper? If so, specify the part(s) of the upper overlapped.

(11) Does the upper extend over the ankle?

(12) Type of construction:
(i) Stitched-Turned.
(ii) Stitched-Goodyear Welt.
(iii) Stitched-Welt other than Goodyear.
(iv) Stitched-Slip-lasted (California).
(v) Stitched-Other (specify method).
(vi) Exclusively Adhesive (Cement).
(vii) Shell molded bottom cemented and/or stitched to upper.
(viii) Unit molded bottom cemented to upper.
(ix) Rolled Sole.
(x) Sole simultaneously molded and attached to upper (Simultaneous injection).
(xi) Vulcanized.
(xii) Riveted, Nailed or Stapled.
(xiii) Unsoled Moccasin.
(xiv) Combination of the above (specify types combined).
(xv) Other (specify).

(13) Is the shoe of the slip-on type, i.e., no laces, buckles or other fasteners?

(14) Does the upper have either an open toe or an open heel?

Comments on this proposal were to have been received by July 2, 1984. However, due to the complexity of the issues involved, by notice published in the Federal Register on July 9, 1984 (49 FR 27954), the comment period was extended to August 3, 1984.

Twelve comments were received in response to the proposal. Most of the commenters objected to the expanded information requirement as placing an inordinate burden on importers to collect and process many items of information not necessary for the classification of many types of footwear. Their specific comments and our responses follow:

Discussion of Comments

Comment: The lists of types and construction of shoes in proposed § 141.89(a) are too lengthy. Customs Form 5523, which would reflect the requirements in the proposal, is merely a basic entry form to aid in the classification of footwear. It need not be the most detailed and exhaustive footwear submission possible.

Response: We agree. Therefore, we are eliminating the exhaustive lists in favor of a required down description of the imported footwear in terms normally used in the trade, with examples of the type, method of construction, and kind of construction provided only on the list of instructions for the final Customs Form 5523. Furthermore, we are reducing the number of examples of types of footwear from 26 to 11.

VOL 51 ISS 83 AP 30 1986 UMI

It is estimated that 25 percent of all footwear imports will require completion of only items 1 through 7, and that items 1 through 5 and 8 through 10 will need to be filled in on another 25 percent of imports. Items 1 through 5 and 8 will need to be filled in on 10 percent of imports, and 40 percent will not require the completion of a footwear invoice or an equivalent document. In no case will all items in the footwear invoice or other document be required to be completed.

Comment: Many of the terms mentioned in the proposal, such as "foxing" and "overlap", are difficult to apply to specific importations and lend themselves to misinterpretation.

Response: Providing specific definitions for all the terms used would render the document and invoice more cumbersome than now. However, we are adding a definition for the term "foxing-like band" since this term applies to many footwear importations. Also, we are deleting some definitions contained in the proposal, which we believe are unnecessary.

Comment: The requirement for information on percentage value is not necessary for proper classification of imported footwear. Only component material of chief value should be required.

Response: We agree. Therefore, we are removing the requests for percentage value, which were contained in several items in the proposal. However, Customs may request this or any other information on specific imports as may be necessary to properly classify the imported footwear.

After consideration of the comments received and upon further review of the matter, it has been deemed advisable to adopt the proposed amendment to § 141.89(a), Customs Regulations, with the modifications noted above. Final Customs Form 5523, which has been revised to reflect the information required in items 1 through 10 of § 141.89(a), may not be available at the time of publication of this document. Accordingly, Customs field offices may accept the existing Customs Form 5523 (3/2/78 version) or the proposed Customs Form 5523 (6/11/85 version) until the new form is available.

Executive Order 12291

It has been determined that the amendment is not a "major rule" within the criteria provided in section 1(b) of E.O. 12291, and therefore no regulatory impact analysis is required.

Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act (5 U.S.C. 601, et seq.), it is certified that this amendment will not have a significant economic impact on a substantial number of small entities. Accordingly, it is not subject to the regulatory analysis or other requirements of 5 U.S.C. 603 or 604.

Paperwork Reduction Act

The collection of information requirements contained in § 141.89(a) are subject to provisions of the Paperwork Reduction Act (44 U.S.C. 3504(h)) and have been cleared by the Office of Management and Budget (OMB). Accordingly, Part 178, Customs Regulations (19 CFR Part 178), which lists the information collections contained in the regulations and the control numbers assigned by OMB, is being amended to include OMB Control Number 1515-0047.

Drafting Information

The principal author of this document was Susan Terranova, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

List of Subjects in 19 CFR Parts 141 and 178

Customs duties and inspection, Imports, Reporting and recordkeeping requirements, Collections of information.

Amendments to the Regulations

PART 141—ENTRY OF MERCHANDISE

1. The general authority citation for Part 141 continues to read as follows:

Authority: 19 U.S.C. 66, 1448, 1484, 1624; § 141.89 also issued under 19 U.S.C. 1202 (Gen. Hdnote 11), 1481.

2. Section 141.89(a), Customs Regulations (19 CFR 141.89(a)), is amended by revising the paragraph for footwear to read as follows:

§ 141.89 Additional information for certain classes of merchandise.

(a) * * *

Footwear, classifiable under Schedule 7, Part 1A, Tariff Schedules of the United States (19 U.S.C. 1202)—

(1) The manufacturer's style number.
(2) The importer's style and/or stock number.
(3) Type of shoe.
(4) Percentage by weight of entire article:
(i) Fiber.
(ii) Rubber and/or plastic.
(iii) Other (specify).
(5) Percentage of exterior surface area of the upper
(i) Leather.
(ii) Rubber and/or plastic.
(iii) Other (specify).

If item 4(ii) is 10 percent or more, if item 4(iii) is less than 90 percent *and* if item 5(i) is less than 50 percent, omit items 6 and 7 and provide the information requested in items 8 through 12 below. If one or more of these conditions are not met, provide the information requested in items 6 and 7 and omit items 8 through 12.

(6) Component material of chief value in
(i) Upper.
(ii) Sole.
(iii) Entire article.
(7) Method of construction.
(8) Kind of construction.
(9) Whether slip-on type (no laces, buckles, or other closures).
(10) Whether upper has open toe or open heel.
(11) Does shoe have foxing or foxing-like band? If so, state material(s).
(12) Whether sole overlaps upper.

The information requested in items 1 through 10 may be furnished on Customs Form 5523 or other appropriate format by the exporter, manufacturer or shipper. However, the information requested in items 11 and 12 must be furnished by the importer.

Definitions

For the purpose of this section, the following terms have the approximate definitions below. If either a more complete definition or a decision as to its application to a particular article is needed, the maker or importer of record (or the agent of either) should contact Customs prior to entry of the article.

(a) *Fiber.* "Fiber" means a material made from cotton, other vegetable fibers, wool, hair, silk, or man-made fibers. the term "man-made" fibers includes filaments and stripe. Note: Cork, wood, cardboard, and leather are not "fibers".

(b) *Foxing-like band.* "Foxing-like band" means a strip of material, which is attached to the side or the top of the outsole or is molded of the same piece as the outsole and which overlaps the upper.

(c) *Turned.* "Turned" means that construction in which the upper is sewn to the sole while the shoe is turned inside out.

(d) *Upper.* "Upper" means everything above the insole level.

(e) *Welt.* "Welt" means that construction in which a separate strip (the welt) is attached to the edge of the sole and in which the welt, the upper and a lip on the surface of the insole are stitched together with a single stitch.

PART 178—APPROVAL OF INFORMATION COLLECTION REQUIREMENTS

19 CFR Part 178 is amended as follows:

1. The general authority citation for Part 178 is revised to read as follows:

Authority: 5 U.S.C. 301, 19 U.S.C. 1624, 44 U.S.C. 3501 et seq.

2. Section 178.2, Customs Regulations (19 CFR 178.2), is amended by inserting the following in appropriate numerical sequence according to the section number under the columns indicated:

§ 178.2 Listing of OMB Control Numbers.

* * * * *

19 CFR section	Description	OMB control No.
§ 141.89(a)	Additional information on invoices for imported footwear.	1515-0047

Alfred R. De Angelus,
Acting Commissioner of Customs.

Approved: April 11, 1986.

Francis A. Keating, II,
Assistant Secretary of the Treasury.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Social Security Administration

20 CFR Parts 404 and 416

Social Security Benefits; Standard of Review for Termination of Disability Benefits; Revised Rules for Certain Medical Cessation Cases; Corrections

AGENCY: Social Security Administration, HHS.

ACTION: Final rule; correction.

SUMMARY: This document corrects errors which appeared in the final rules published in the **Federal Register** on December 6, 1985 (50 FR 50118). This action is necessary to correct a number of typographical errors which could be misleading and confusing to the reader.

FOR FURTHER INFORMATION CONTACT: Harry J. Short, Office of Regulations, Social Security Administration, 6401 Security Boulevard, Baltimore, Maryland 21235, telephone (301) 594-7337.

The following corrections are made in FR Doc. 85-28887 appearing on pages 50118 through 50147 in the issue of December 6, 1985:

§ 404.1501 [Corrected]

1. On page 50128, in the middle column, the asterisks following § 404.1501(j) should be removed.

§ 404.1579 [Corrected]

2. On page 50127, in the third column, line 25 in § 404.1579(c)(3), insert a period after "etc" and before the ";".

3. On page 50128, in the first column, line 10 in § 404.1579(d) introductory text, "persons" is corrected to read "person".

4. On the same page, in the first column, the second line in § 404.1579(d)(1), "*your*" is corrected to read "*you*".

5. On page 50129, in the third column, the heading in § 404.1579(f), "*Steps*" is corrected to read "*steps*". In the seventh line of paragraph (f) introductory text, "is" is corrected to read "are".

§ 404.1594 [Corrected]

6. On page 50131, middle column, the last line in § 404.1594(b)(2), Example, the parenthesis after "increased" is removed and inserted between "walk" and "has" in the same line.

7. On page 50132, middle column, the sixth line in § 404.1594(b)(4)(ii), "organs" is corrected to read "organ".

8. On the same page, third column, line 13 in § 404.1594(b)(7), insert a comma after "i.e." and before "your".

9. On page 50134, middle column, line 19 in § 404.1594(d)(2) Example 2, "engage" was misspelled.

10. On page 50137, in the middle column, amendatory item number 6 is corrected to read as follows:

"6. Section 416.992 is amended by revising paragraph (d)(2) to read as follows:".

§ 416.992 [Corrected]

11. The revised text in § 416.992 is correctly designated (d)(2).

§ 416.994 [Corrected]

12. On page 50138, in § 416.994(b)(1)(i) Example 2, first column, last sentence, "and" is corrected to read "to".

13. On that same page, in § 416.994(b)(1)(ii) Example, middle column, last line, the parenthesis after "increased" is removed and inserted between "walk" and "has" in the same line.

14. On page 50139, middle column, line 15 in § 416.994(b)(1)(vii), the parenthesis between "impairments" and "with" is removed.

15. On that same page, third column, the fourth line in § 416.994(b)(2)(iv) introductory text, "determination" is corrected to read "determinations".

16. On page 50140, first column, the eighth line in § 416.994(b)(2)(iv)(C), "and" is corrected to read "of".

17. On the same page, third column, line 17 in § 416.994(b)(3)(i), after the word "will" insert "be".

18. On page 50141, third column, the fifth line in § 416.994(b)(3)(iv)(A) Example 2, "education" is misspelled.

19. On that same page, third column, the first line in § 416.994(b)(3)(iv)(B), the period at the end of the line is corrected to a comma.

20. On page 50142, middle column, the last line in § 416.994(b)(4)(i), "§ 416.986" is corrected to read "§ 416.1488".

21. On that same page, middle column, the seventh line in § 416.994(b)(4)(iii), after the word "be" insert "the".

22. On that same page, third column, the heading in § 416.994(b)(5), "*Steps*" is corrected to read "*steps*". In the sixth line, of paragraph (b)(5) introductory text "decision" is corrected to read "decisions".

23. On that same page, third column, the first line in § 416.994(b)(5)(iv), the second closing parenthesis is removed. In the third line "our" is corrected to read "your".

24. On page 50144, middle column, line 15 in § 416.994(c)(1)(v), "impairments(s)" is corrected to read "impairment(s)".

25. On that same page, middle column, the first line in § 416.994(c)(2)(i), "*Improvement*" is corrected to read "*improvement*".

26. On that same page, in § 416.994(c)(2)(ii), line 20 "Chapter" is corrected to read "chapter".

27. On page 50145, in § 416.994(c)(3)(iii)(A) Example, third column, second line, "has" is corrected to read "was".

28. On page 50146, in § 416.994(c)(3)(iii)(A) Example, first column, the last line in the example, "the" is corrected to read "this".

29. On that same page, middle column, the last line in § 416.994(c)(4)(i), "§ 416.986" is corrected to read "§ 416.1488".

30. On that same page, middle column, the heading in § 416.994(c)(5), "*Steps*" is corrected to read "*steps*". In the third line of paragraph (c)(5) introductory text "decision" is corrected to read "decisions".

31. On page 50147, first column, second line in § 416.994(c)(6)(i)(F), "that you" is added after "you" and before "could".

32. On the same page, middle column, the sixth line in § 416.994(c)(7), "Subpart" is corrected to read "Subparts". In that same line "described" is corrected to read "describe".

§ 416.998 [Corrected]

33. On that same page, third column, the fourth line in § 416.998, "to" is corrected to read "is".

PART 404—[CORRECTED]

In FR Doc. 85-28672 beginning on page 50068 in the issue of Friday, December 6, 1985, make the following corrections.

Appendix A—[Corrected]

1. On page 50069, second column in 1.10A, insert a semicolon instead of a comma after "disarticulation" and before "or".

2. On page 50080, third column, 2.06 should read "*Total bilateral ophthalmoplegia*".

3. On page 50081, third column, third line under "C", "bronchietasis" should read "bronchiectasis".

4. On the same page, third column, under "D", eighth line from the bottom of the page, "excursion" should read "excursions".

5. On page 50082, third column, 3.02C, "Chronic Impairment" should read "Chronic impairment".

6. On page 50095, third column, under 4.13B2, third line, "less" should read "more".

7. On the same page, third column, under 5.09B, sixth line from the bottom, remove the period after "disorders".

8. On page 50096, first column, second line under 5.04, add a period after "endoscopy)".

9. On the same page, second column, first line of 5.06, remove the first parenthesis before "*Chronic*".

10. On the same page, second column, under 5.08B4, third line, "hypoglocemia" should read "hypoglycemia".

11. On page 50101, first column, first line of 13.03 should read "*Sarcoma of skin*".

12. On the same page, second column, second line under 13.18 "Carcinoma" should read "carcinoma" and sixth line under 13.18, insert a semicolon after "nodes" and before "or" instead of a comma.

13. On the same page, third column, in the "Table of Sections" remove "Sec" between "100.00 Growth Impairment" and "101.00 Musculoskeletal System".

14. On the same page, third column in the "Table of Sections", in line 10, "110.00 Multiply Body Systems." should read "110.00 Multiple Body Systems."

15. On page 50105, first column, fourth line under 109.03, after the word "serum" add the word "calcium".

16. On the same page, third column under 111.09A, in line six of third paragraph, "111.02 of 111.03" should read "111.02 or 111.03".

17. On page 50106, first column, third line under 111.07, "111.03" should read "101.03".

18. On the same page, first column, last line, "111.03" should read "101.03".

Dated: April 24, 1986.

K. Jacqueline Holz,

Deputy Assistant Secretary for Management Analysis and Systems.

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

23 CFR Part 480

[FHWA Docket No. 85-26]

Use and Disposition of Property Previously Acquired by States for Non-Interstate and Withdrawn Interstate Segments

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Final rule.

SUMMARY: The FHWA is amending its regulation concerning the use and disposition of property acquired by States, with the participation of Federal-aid highway funds, in connection with highway projects which are subsequently modified or terminated. This amendment to 23 CFR Part 480 implements the provisions of Pub. L. 96-106 which limited those situations in which States could avoid crediting Federal funds (payback) where FHWA had participated in the acquisition of property for Interstate highway segments that were subsequently withdrawn. This amendment also narrows the scope of Part 480 by eliminating situations other than Interstate withdrawals from its coverage.

EFFECTIVE DATE: May 30, 1986.

FOR FURTHER INFORMATION CONTACT: Curtis L. Shufflebarger, Chief, Interstate Management Branch, Office of Engineering, (202) 426-0404; or S. Reid Alsop, Office of the Chief Counsel, (202) 426-0800, Federal Highway Administration, 400 7th Street, SW., Washington, DC 20590. Office hours are from 7:45 a.m. to 4:15 p.m. ET, Monday through Friday.

SUPPLEMENTARY INFORMATION: The FHWA published its regulation on the use and disposition of highway property acquired by the States on November 17, 1978 (43 FR 54077). The regulation provided that a State need not make a credit to Federal funds if property acquired for highway purposes were reused for another public purpose, when the highway project for which the property was acquired was modified or terminated.

Subsequently, in section 2 of Pub. L. 96-106 (93 Stat. 798), Congress amended section 103(e) of Title 23, United States Code, to clarify its intent, as previously set forth in section 307(f) of the STAA of 1978 (Pub. L. 95-599, 92 Stat. 2689), with regard to repayment for Interstate segments that are withdrawn pursuant to 23 U.S.C. 103(e)(2) or 103(e)(4). Section 2(c) of Pub. L. 96-106 requires payback of the costs of construction items, materials, or rights-of-way (all of which are referred to herein as property) acquired for highway projects on segments withdrawn from the Interstate System on or after November 6, 1978 (the effective date of the STAA), unless the following three conditions are satisfied: (1) The property was acquired before November 6, 1978, (2) the Secretary of Transportation had not approved the environmental impact statement for the withdrawn segment prior to the date of withdrawal, and (3) the property is used for a public purpose within ten years after the date of withdrawal. Although payback is required for properties not meeting these conditions, section 2(c) of Pub. L. 96-106 provides that the amount of payback can be reduced significantly where the State uses the property for certain other transportation projects. In these cases, the amount that must be repaid would be the difference between the amount of Federal funds actually received by the State and the amount that would have been received based on the Federal share presently applicable to the transportation project (or type of project) for which the property is used.

An NPRM published on November 20, 1980 (45 FR 76705), as Docket No. 80-7, proposed to implement these statutory changes, while leaving the policy for situations other than Interstate withdrawal unchanged. Pursuant to the President's memorandum of January 29 1981, which, among other things, directed executive agencies to review outstanding proposals, further action was postponed on the NPRM.

The FHWA incorporated most of that NPRM's proposed changes into a new NPRM which was published on September 20, 1985 (50 FR 38130), as Docket No. 85-26. The new NPRM proposed a return to its traditional policy concerning payback for situations other than Interstate withdrawals. This policy generally requires a credit to Federal funds for property previously acquired on projects, other than Interstate withdrawals, that are terminated. House Report No. 288 [1] which accompanied Pub. L. 96-106 stated that, "It is the intent of the Committee that the Department generally continue to follow the traditional ad hoc policy of the Federal Highway Administration to require the repayment of the Federal share of certain costs so as to provide for sound fiscal management and responsible stewardship of Federal funds." The FHWA position is consistent with legislation that established the Highway Trust Fund.

Payback determinations in situations other than Interstate withdrawals will no longer be covered by this regulation. Other FHWA regulations already cover certain kinds of property disposition such as excess right-of-way resulting from plan changes (23 CFR Part 713, Subart C), deletions of open-to-traffic segments (23 CFR Part 470, Subpart A), and individual project phases which do not advance to the next phase within certain time limits for reasons other than termination of the entire segment (23 CFR Part 630, Subpart C).

The FHWA will consider any remaining payback questions for situations other than Interstate withdrawals based on the traditional payback policy. These situations are expected to occur primarily where decisions are made not to complete a highway segment not yet open-to-traffic, or where a segment, not yet open to traffic, is terminated because of a major realignment. In making these payback determinations, the FHWA will take into consideration such factors as the cause for the termination, whether FHWA had agreed to the termination, and the current value of the acquired property. In any case, where property is reused for another transportation project under 23 U.S.C., the amount of funds obligated can be deobligated and replaced by other Federal-aid funds at the appropriate participation ratio.

In order to facilitate project administration in these situations, it is expected that all outstanding payback questions for situations other than Interstate withdrawals will be settled, credits to Federal funds be made, and the projects be closed out as soon as possible after the effective date of this final revised rule. Any future termination should be closed out with a credit to Federal funds as soon as possible after termination.

Besides the fundamental change in the applicability of these regulations, other significant changes include the following: (1) The reuse of the previously acquired property will actually have to begin within 10 years of the date of withdrawal, (2) transfer of property to a private party without making payback is further limited, and (3) the FHWA expects to receive a pro rata share of the proceeds from any leasing and/or sale of the property to the pubic or private sector.

[1] H.R. Rep. No. 288, 96th Cong., 1st. Sess. 3 (1979).

Disposition of Comments

There were only three comments received in FHWA Docket No. 85-26 on the second NPRM. Two were from State highway agencies (SHA) and the third was from another Federal agency.

One SHA was concerned that immediate implementation of the regulation would force States, with withdrawals nearing the 10-year time limit, to sell substantial amounts of property in a very short time period. This could result in substantially lower revenues than would be expected under a systematic disposal program. Under § 480.109(b)(2) it is indicated that the State shall credit Federal funds "as soon as practicable" and that sales procedures shall be "designed to result in the highest possible return." This indicates FHWA's support for a systematic disposal program. To further support this approach, § 480.103(b) has been amended to indicate that the rigid 10-year deadline does not apply when a State has decided to sell the property. FHWA will work with the States to expedite such sales, recognizing the desire to maximize sales proceeds.

In the former regulation, the 10-year statutory time limit on reuse of property could be met by FHWA's approval of a plan for reuse and the State providing assurances that the actual reuse would be implemented "expeditiously." The definition of "applied to reuse under this part" in § 480.105 of the NPRM was revised to require that the actual reuse occur or the physical construction leading to the reuse must begin within the 10-year statutory time limit. The other SHA indicated that the controversies surrounding Interstate segments which ultimately resulted in the withdrawal of those segments may also delay the application of property to a reuse. It was suggested that the definitions be expanded to include preliminary engineering activities. Expanding the definition to include preliminary engineering would do little to assure the timely implementation of the proposed reuse. In fact the SHA proposal would be that the 10-year statutory time limit would be fully satisfied by preliminary engineering activities and, therefore, the subjective "expeditiously" requirement of the former regulation would not even be in effect. The intent of the NPRM was to implement a meaningful time limitation on the reuse of the property consistent with a clear reading of the statute and other similar regulations dealing with the 10-year limit. The SHA suggestion is counter to this intent and could actually lead to longer delays in implementing approved reuses. Accordingly, the SHA suggestion was not adopted.

VOL 51 ISS 83 AP 30 1986 UMI

The commenting Federal agency indicated that the NPRM adequately addresses their interests.

Other Changes

In addition to the above noted change in response to a comment, two minor editorial type revisions were made to the regulation. The phrase "In the event payback is required" was added at the beginning of § 480.111. This was done to make the section read properly. The second change was in § 480.115. The phrase "During this time period" was added at the beginning of the third sentence to better tie the participation statement in the third sentence to the preceding sentence.

The proposal in NPRM § 480.113 to limit relocation assistance to a two year period after the date of withdrawal has been eliminated for better consistency with the provisions of the Uniform Relocation Assistance and Real Property Acquisition Policies Act (42 U.S.C. 4601 *et seq.*). Instead, wording similar to that used in the previous regulation concerning the period of Federal-aid eligibility has been used in this final rule.

The FHWA has determined that this document contains neither a major rule under Executive Order 12291 nor a significant regulation under DOT regulatory procedures. The impact of this regulation falls primarily on State highway agencies. For this reason and under the criteria of the Regulatory Flexibility Act, it is certified that this action will not have a significant economic impact on a substantial number of small entities. The FHWA has prepared a final regulatory evaluation which is available for inspection in the public docket (No. 85-26, Room 4205). Copies of the regulatory evaluation may be obtained by contacting Mr. Curtis L. Shufflebarger, at the address provided above under the heading "For Further Information Contact." (Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning, and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

List of Subjects in 23 CFR Part 480

480.115 Property management.
480.117 Intangible items.

Authority: Sec. 2, Pub. L. 96-166, 93 Stat. 708 (23 U.S.C. 108(e)(5), (6), (7)); § 107(f), Pub. L. 95-599, 92 Stat. 2689 (23 U.S.C. 103(e)(5), (6)); 23 U.S.C. 315; 49 CFR 1.48(b).

§ 480.101 Purpose.

This part addresses the extent to which a credit to Federal funds (payback) will be required for property acquired by States with the participation of Federal-aid highway funds when an Interstate segment for which the property was acquired is subsequently withdrawn under section 103(e)(2) or (e)(4) of Title 23, United States Code.

§ 480.103 Applicability.

(a) This part applies to property acquired with the participation of Federal-aid highway funds for any project on a Federal-aid Interstate segment which is subsequently withdrawn and where the Federal Highway Administration (FHWA) has not previously determined if a credit to Federal funds would be required for such property prior to the effective date of this part. This part applies to both individual submissions for specific pieces of property and comprehensive reuse plans for all property, depending on the extent of the State's submission.

(b) The provisions of § 480.107 concerning payback waiver and § 480.109(b)(3) concerning payback reduction apply only to property which has been or will be applied to a reuse under this part, as determined by the FHWA, within 10 years of the withdrawal of the Interstate segment in connection with which it was acquired. Lacking a submission by a State indicating the intent to sell property in accordance with the provisions of § 480.109(b)(2) or a submission by the State for waiver of paycheck within 10 years of withdrawal and actual reuse within 10 years of withdrawal, the FHWA will require that the pro rata share of the current fair market value of the property be credited to Federal funds in accordance with § 480.109(b)(1).

(c) Nothing in this part shall be considered to affect or conflict with the obligations of States with respect to the right-of-way (ROW) revolving fund pursuant to 23 U.S.C. 108(c).

§ 480.105 Definitions.

For purposes of this part:

"Acquired" in the case of real property means that title has been passed to the acquiring agency, or a legal obligation to complete the purchase of such real property has been established; or, in the case of construction, that work has been performed, or materials obtained, and payment is due under the contract provisions.

"Applied to a reuse under this part" means that construction leading to the reuse, or the reuse itself, has begun on the real property or that construction leading to the reuse, or the reuse itself, has begun on the site where the construction items and materials will be incorporated into another project.

"Intangible items" means items having no physical existence or recoverable value, e.g., preliminary engineering, construction engineering, appraisals, relocation payments, etc.

"Property" means land, and/or interests therein, including improvements, structures and appurtenances thereto, and any other acquired items having a physical existence but not yet physically incorporated into the project (such as construction items, materials, movable equipment and machinery).

§ 480.107 Reuse of property.

(a) This section applies to:

(1) Property acquired in connection with an Interstate highway segment withdrawn before November 6, 1978; or

(2) Property acquired before November 6, 1978, in connection with an Interstate highway segment withdrawn on or after November 6, 1978, if the final environmental impact statement for the segment had not been approved prior to the date of withdrawal.

(b) When property to which this section applies is no longer needed for the Interstate highway project for which it was acquired because of withdrawal of such Interstate segment, the State may, subject to the provisions of this section, reuse the property without being required to make payback, for:

(1) A transportation project permissible under Title 23, United States Code;

(2) A public conservation or public recreation purpose; or

(3) Any other public purpose determined by the FHWA to be in the public interest.

(c) In order to request a waiver of payback for reuse of the property without being required to make a credit to Federal funds, the State shall submit to the FHWA the following information (States are encouraged to submit a comprehensive reuse plan, covering all property, rather than individual submissions for each piece of property):

(1) A description of how the State, or political subdivision thereof, or any of their agencies or instrumentalities, has reused or proposes to reuse the property and how such use satisfies paragraph (b) of this section. Only that property actually needed for a known reuse will be considered for waiver of payback. The intent of paragraph (b) of this section is to enable the States to avoid payback if the property is reused for publicly owned and operated facilities providing government services. To this end, the State shall indicate if any of the property involved was or will be transferred directly or indirectly to any private party in connection with the reuse. The State shall justify to the FHWA why reuse by a private party, without a requirement for credit to Federal funds, is considered a public purpose in the public interest. As a minimum, justification for such a transfer would have to show that property value estimates indicate the property has nominal value, and/or that proposals to competitively dispose of the property have generated little market interest.

(2) A certification that the current rights under State law of persons owning the real property immediately prior to such property being obtained by the State have been observed;

(3) An assurance that no major alteration in the reuse will be made without resubmitting the particulars of the individual case to the FHWA for another payback determination; and

(4) An assurance that the State will assume all obligations with respect to providing relocation assistance benefits to those persons described in § 480.113 after the FHWA's obligations are terminated in accordance with § 480.113.

(d) The State should also make the following information available in order to facilitate processing of a payback determination:

(1) The date the property was acquired;

(2) The withdrawal date of the Interstate segment for which the property was acquired;

(3) The approval date of any final environmental impact statement for the Interstate segment for which the property was acquired;

(4) The amount of Federal funds expended for the property to be reused; and

(5) Any additional related information requested by the FHWA.

(e) Based on the submission, the FHWA will determine if the State is required to make a credit to Federal funds.

(f) Besides making the basic determination of whether or not the reuse satisfies paragraph (b) of this section, the FHWA will require a credit to Federal funds with respect to property if:

(1) The reuse is inconsistent with any Federal statute applicable to State/local undertakings not federally assisted;

(2) The certifications and assurances required by paragraph (c) of this section are not made;

(3) The property is to form, or its value is to form, part of the State or local matching share with respect to any Federal program; or

(4) The property is transferred to any private party, unless the FHWA determines that such a reuse, without a requirement for a credit to Federal funds, is for a public purpose in the public interest.

(g) If the FHWA determines that the assurances required by paragraph (c) of this section have not been observed, the FHWA will require that a credit to Federal funds be made as provided in § 480.109.

(h) While the FHWA does not require that the State be compensated for property reused by others under this section, should there be a payment or intergovernmental credit to the State for sales, leases, rents, etc., the State shall credit Federal funds at the same pro rata share as Federal funds participated in the original acquisition. The credit to Federal funds shall be made as soon as practicable after money or credit is received.

§ 480.109 Requirement of credit to Federal funds.

(a) This section applies to:

(1) Property for which the FHWA, under § 480.107, has determined that a credit to Federal funds must be made;

(2) Property acquired before November 6, 1978, in connection with an Interstate highway segment withdrawn on or after November 6, 1978, if the final environmental impact statement for the segment had been approved prior to the date of withdrawal;

(3) Property acquired on or after November 6, 1978, in connection with a segment withdrawn from the Interstate System; or

(4) Property described in § 480.107(a) for which the State elects not to request a waiver of payback.

(b) With respect to property to which this section applies, the State shall credit Federal funds, as soon as practicable, in the following manner:

(1) If the property is retained or transferred without cost, in an amount computed by applying the Federal percentage of participation in the cost of the original acquisition to the current fair market value of the property.

(2) If the property is sold, in an amount computed by applying the Federal percentage of participation in the cost of the original acquisition to the sale proceeds (after deducting actual and reasonable selling or fix-up expenses). Fix-up expenses are limited to the extent that they are reasonably expected to increase the value of the property by at least the amount of the fix-up expenses. The credit to Federal funds shall be based on sales procedures which, unless otherwise agreed to by the FHWA, provide for competition to the maximum extent practicable and are designed to result in the highest possible return.

(3) If the property described in paragraphs (a)(2) or (a)(3) of this section has been or will be reused for another transportation project permissible under 23 U.S.C., in an amount equal to the difference between the funds the FHWA actually reimbursed the State for the property and the funds that would have been reimbursed in accordance with the current Federal share applicable to the transportation project to which the property will be applied. If the amount that would have been reimbursed is greater than the amount that was actually reimbursed, the difference will be considered zero. States shall provide to the FHWA the information required by § 480.107(c) and should provide the information requested by § 480.107(d) as soon as practicable after the State has determined how the property will be reused.

§ 480.111 Credit to original class of fund.

In the event payback is required, an amount equivalent to the Federal funds paid back pursuant to this part will then be credited to the unobligated balance of the same class of funds to which the original acquisition of the property was attributable in the manner set forth in 23 U.S.C. 118(b).

VOL 51 ISS 83 AP 30 1986 UMI

§ 480.113 Relocation assistance.

With respect to owner-occupants, tenants, businesses, and farm operations whose property has been acquired in connection with federally assisted highway project, who are still in occupancy, and who could have qualified as displaced persons if they had moved prior to the date of withdrawal, the Interstate project obligations of the FHWA under the Uniform Relocation Assistance and Real Property Acquisition Policies Act (42 U.S.C. 4601 *et seq.*) shall continue for that period of time after the withdrawal as is considered equitable by the Administrator but in no event shall this period extend beyond the date the FHWA determines that no credit to Federal funds is necessary for a reuse of the property or the date the State sells or otherwise disposes of the property.

§ 480.115 Property management.

Rules or standards of property management normally applicable to property obtained with the participation of Federal-aid highway funds shall continue to apply to the management of property acquired by States in connection with the project after withdrawal of the Interstate segment. These rules or standards shall cease to apply to the property two years after the effective date of this regulation or two years after a withdrawal approval (whichever occurs later) unless the Federal Highway Administrator determines that an extension beyond two years is in the public interest. During this time period the FHWA may, at its discretion, participate in the net costs of property management and in other costs related to the acquisition of the property or withdrawal of the highway project that are incurred. Costs associated with the design and development of the property for other uses (such as developing a reuse plan or site development costs) are not considered property management costs. In any case, Federal participation will not extend beyond the date of a determination by the FHWA that no credit to Federal funds is necessary for a reuse of the property or the date the State sells or otherwise disposes of the property.

§ 480.117 Intangible items.

States are not required to make a credit to Federal funds for intangible items for which the State had expended Federal-aid highway funds in connection with an Interstate segment which is later withdrawn.

BILLING CODE 4910-22-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Community Planning and Development

24 CFR Part 570

[Docket No. R-86-1268; FR-2244]

Urban Development Action Grants; June 1986 Funding Round for Large Cities and Urban Counties

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Final rule.

SUMMARY: This rule revises the Urban Development Action Grant regulations to permit a June 1986 funding round for large cities and urban counties with applications to be received from April 30, 1986, through May 16, 1986 and preliminary approval decisions to be made by June 30, 1986. The revision is being made to facilitate the utilization of UDAG funds that had been subject to a rescission proposal that expired on April 15, 1986. This rule does not affect the July 1986 funding round for small cities or the September funding round for large cities and urban counties.

DATES: *Effective date:* June 6, 1986.

This rule applies to applications submitted by large cities and urban counties from April 30, 1986, through May 16, 1986 and to hold over applications that will be considered in the June 1986 funding round.

FOR FURTHER INFORMATION CONTACT: Michael McMahon, Room 7264, Office of Urban Development Action Grants, Office of Community Development, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410. Telephone (202) 755-8227. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION:

Background

The February 5, 1986 rescission and deferral message of the President included a proposed rescission of UDAG budget authority. As a result of this rescission proposal, the Department suspended the processing of applications for the March 1986 funding round for small cities and the May 1986 funding round for large cities and urban counties and returned new applications that were received for these two funding rounds. Funding rounds are denominated by the month in which HUD must make preliminary approval decisions.

On April 15, 1986, the proposed rescission expired. The Department estimates that it will have approximately $58 million available for small cities and $184 million for large cities and urban counties, for the remainder of fiscal year 1986. These estimates include anticipated recaptures of previously obligated budget authority.

Under current UDAG regulations (24 CFR 570.460(a)), there are two funding rounds remaining in fiscal year 1986, one each for small cities (the July funding round) and for large cities and urban counties (the September funding round). Applications for the July small cities funding round are due during May and for the September large cities and urban county funding round during July. The Department believes that the July funding round provides adequate opportunity to utilize the $55 million anticipated to be available for small cities and, accordingly, is making no change to the current regulations with respect to funding rounds for small cities. However, the Department believes that an additional funding round for large cities and urban counties before the September round is needed for the efficient utilization of the estimated $164 million available for large cities and urban counties, and is revising § 570.460 to establish a submission and review schedule for a June 1986 funding round. Two funding rounds for large cities and urban counties will enable the Department to make funds available to large cities and urban counties more rapidly and will avoid a prohibitively large funding round in September. It will also permit the Department to make better use of its staff in reviewing large cities and urban county applications.

A June funding round is the only feasible time for an additional funding round for large cities and urban counties. A July funding round would conflict with the July small cities funding round and an August funding round would be too close to September funding round for large cities and urban counties to be of any substantive benefit. To have a June 1986 funding round, the Department has had to shorten the normal submission period and its own review period. This final rule provides the following periods:

Application submission period: April 30–May 16, 1986.

Review period: May 16–June 27, 1986.

Financial Commitment deadline: June 16, 1986.

Decision date: June 30, 1986.

Other Matters

The subject matter of this rulemaking action relates to grants and is therefore exempt from the notice and public comment requirements of Section 553 of the Administrative Procedure Act. As a matter of policy, the Department submits many rulemaking actions with such subject matter to public comment either before or after effectiveness of the action, notwithstanding the statutory exemption.

The Department has determined that prior notice and comment are unnecessary and that good cause exists for publishing this rule as final to become effective without prior public comment. The revision affects neither the substantive standards for obtaining an urban development action grant nor the amount of funding available. This rule simply makes a temporary procedural change intended to improve the efficiency of program administration.

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations in 24 CFR Part 50, which implements Section 102(2)(C) of the National Environmental Policy Act of 1969. The finding is available for public inspection during regular business hours in the Office of the General Counsel, Rules Docket Clerk, Room 10276, 451 Seventh Street, SW., Washington, DC 20410.

This rule does not constitute a "major rule" as that term is defined in Section 1(b) of Executive Order 12291 on Federal Regulation issued by the President on February 17, 1981. Analysis of the rule indicates that it does not (1) have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Under 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the Undersignd hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities. The rule merely makes one-time change in the submission date and review schedule for large cities and urban counties.

The rule was not listed in the Department's Semiannual Agenda of Regulations published on April 21, 1986 (51 FR 14086), under Executive Order 12291 and the Regulatory Flexibility Act.

The Catalog of Federal Domestic Assistance program number is 14.221, urban development action grants.

List of Subjects in 24 CFR Part 570

Grant Programs—Housing and Community Development.

Accordingly, the Department amends 24 CFR Part 570, Subpart G as follows:

PART 570—COMMUNITY DEVELOPMENT BLOCK GRANTS

1. The authority citation for Part 570 continues to read as follows:

Authority: Title I, Housing and Community Development Act of 1974 (42 U.S.C. 5301–5320); and sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

2. In § 570.460 a new paragraph (d) is added to read as follows:

§ 570.460 HUD review and action on application.

* * * * *

(d) *Submission and review schedule for June 1986 large cities and urban counties funding round.* Notwithstanding the submission and review schedule in paragraphs (a) and (a)(1) of this section, HUD will also accept and review applications from large cities and urban counties in accordance with the following schedule:

Application submission period: April 30–May 16, 1986.

Review period: May 16–June 27, 1986.

Financial Commitment deadline: June 16, 1986.

Decision date: June 30, 1986.

Dated: April 25, 1986.

Alfred C. Moran,

Assistant Secretary for Community Planning and Development.

BILLING CODE 4210-28-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[T.D. 8067]

Income Taxes; Accounting for Long-Term Contracts

AGENCY: Internal Revenue Service, Treasury.

ACTION: Correction.

SUMMARY: This document contains a correction to Treasury Decision 8067, which was published in the Federal Register on January 6, 1986 (51 CFR 376). T.D. 8067 issued final regulations relating to the accounting for long-term contracts.

EFFECTIVE DATE: The correction is effective January 5, 1986.

FOR FURTHER INFORMATION CONTACT: Dale D. Goode of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC 20224 (Attention: CC:LR:T). Telephone: 202-566-3935 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

On January 6, 1986, the Federal Register published (51 FR 376) Treasury Decision 8067 relating to the accounting for long-term contracts. The document contained final regulations under section 451 of the Internal Revenue Code of 1954.

Need for Correction

As published, T.D. 8067 contains a typographical error on page 380, third column, line 12.

Correction of Publication

§ 1.451-3 [Corrected]

Accordingly, the publication of Treasury Decision 8067 which was the subject of FR Doc. 85-30614 is corrected on page 380, third column, line 12, by removing the last word "on" and adding "in" in its place.

Paul A. Francis,

Acting Director, Legislation and Regulations Division.

BILLING CODE 4830-01-M

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Part 2676

Valuation of Plan Assets and Plan Benefits Following Mass Withdrawal—Interest Rates

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: This is an amendment to the Pension Benefit Guaranty Corporation's regulation on Valuation of Plan Assets and Plan Benefits Following Mass Withdrawal, which was published on March 25, 1986 (at 51 FR 10322). Section 2676.15(c) of the regulation contains a table setting forth, for each calendar month ending after the effective date of the regulation, a series of interest rates

VOL 51 ISS 83 AP 30 1986 UMI

to be used in valuing benefits and certain assets as of valuation dates that occur within that calendar month. This amendment adds a series of interest rates to that table.

EFFECTIVE DATE: May 1, 1986.

FOR FURTHER INFORMATION CONTACT: Deborah Murphy, Attorney, Corporate Policy and Regulations Department (35100), Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington DC 20006; 202–956–5060 (202–956–5059 for TTY and TDD). (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION: The Pension Benefit Guaranty Corporation's regulation on Valuation of Plan Assets and Plan Benefits Following Mass Withdrawal establishes rules for valuing assets and benefits of multiemployer plans under sections 4219(c)(1)(D) and 4281(b) of the Employee Retirement Income Security Act of 1974. Section 2676.15 of the regulation prescribes an interest assumption to be used in performing these valuations. Paragraph (c) of that section contains a table setting forth, for each calendar month ending after the effective date of the regulation, a series of interest rates to be used in any valuation performed as of a valuation date within that calendar month.

This amendment to the regulation adds the next monthly rate series to the table in § 2676.15(c). This rate series is for the month of May 1986 and applies to valuation dates occurring within that month. The PBGC intends to publish a new entry in the table each month, whether or not the new entry contains rates different from those prescribed for the preceding month. The PBGC will publish the rate series for each month before the beginning of the month. Beginning with the rates for June 1986, the PBGC expects to publish each month's rates on or about the fifteenth of the preceding month.

The PBGC finds that notice of and public comment on this amendment would be impracticable and contrary to the public interest, and that there is good cause for making this amendment effective immediately. These findings are based on the need to have the interest rates in this amendment reflect market conditions that are as nearly current as possible and the need to issue the interest rates promptly so that they are available to the public before the beginning of the period to which they apply. (*See* 5 U.S.C. 533 (b) and (d).) Because no general notice of proposed rulemaking is required for this amendment, the Regulatory Flexibility Act of 1980 does not apply (5 U.S.C. 601(2)).

The PBGC has also determined that this amendment is not a "major rule" within the meaning of Executive Order 12291 because it will not have an annual effect on the economy of $100 million or more; or create a major increase in costs or prices for consumers, individual industries, or geographic regions; or have significant adverse effects on competition, employment, investment, or innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

List of Subjects in 29 CFR Part 2676

Employee benefit plans and pensions.

In consideration of the foregoing, Part 2676 of Subchapter H of Chapter XXVI of Title 29, Code of Federal Regulations, is amended as follows:

PART 2676—VALUATION OF PLAN ASSETS AND PLAN BENEFITS FOLLOWING MASS WITHDRAWAL

1. The authority citation for Part 2676 continues to read as follows:

Authority: Secs. 4002(b)(3), 4219(c)(1)(D), and 4281(b), Pub. L. 93–406, as amended by sections 403(1) and 104(2) (respectively), Pub. L. 96–364, 94 Stat. 1302, 1237–1238, and 1261 (1980) (29 U.S.C. 1302(b)(3), 1399(c)(1)(D), and 1441(b)(1)).

2. In § 2676.15, paragraph (c) is amended by adding to the end of the table of interest rates therein the following new entry:

§ 2676.15 Interest

* * * * *

(c) *Interest rates.*

BILLING CODE 7708–01–M

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

29 CFR Part 2700

Rules of Procedure

AGENCY: Federal Mine Safety and Health Review Commission.

ACTION: Amendment of Commission procedural rule; adoption of final rule with request for comments.

SUMMARY: The Federal Mine Safety and Health Review Commission [the "Commission"] revises its current procedural rule governing temporary reinstatement proceedings to provide an opportunity for a hearing prior to the issuance of an order temporarily reinstating a miner in discrimination proceedings arising under the Federal Mine Safety and Health Act of 1977. The current procedural rule was adopted as an interim rule on July 31, 1981, and public comments were requested. The United States Court of Appeals for the Sixth Circuit subsequently has held that the Commission's current procedural rule denies adequate due process by not providing for a minimal hearing before an order is issued temporarily reinstating a miner. Upon consideration of the Court's decision and the comments received concerning the interim rule, the Commission has determined that revision is appropriate. By issuing this revision as a final rule, the Commission immediately affords an opportunity for an expeditious pre-reinstatement hearing that insures due process to all parties to temporary reinstatement proceedings. The Commission requests public comments on the final rule.

DATES: Effective date: April 30, 1986. Comments must be received on or before June 30, 1986.

ADDRESS: Comments may be submitted to the General Counsel, Federal Mine Safety and Health Review Commission, Sixth Floor, 1730 K Street, NW., Washington, DC 20006.

FOR FURTHER INFORMATION CONTACT: L. Joseph Ferrara, Acting General Counsel, Office of the General Counsel, at (202) 653–5610.

SUPPLEMENTARY INFORMATION:

Background

The Commission is an independent adjudicatory agency that provides trial and appellate review of cases arising under the Federal Mine Safety and Health Act of 1977, 30 U.S.C. 801 *et seq.* (1982) [the "Mine Act"]. Section 105(c) of the Mine Act, 30 U.S.C. 815(c), prohibits unlawful discharge or discrimination against miners or interference with their protected statutory rights. Section 105(c)(2) of the Mine Act, 30 U.S.C. 815(c)(2), provides that following a miner's timely complaint of unlawful discrimination, the Secretary of Labor [the "Secretary"] shall commence an investigation within 15 days following his receipt of the complaint. If the Secretary finds that the complaint was not frivolously brought, the Commission, on an expedited basis upon application of the Secretary, shall order the immediate reinstatement of the miner pending a final order on the complaint. *Id.*

Under the Commission's current Procedural Rule 44, 29 CFR 2700.44, the Secretary's application shall state his finding that the discrimination complaint was not frivolously brought and shall be accompanied by a copy of the miner's complaint, an affidavit setting forth the Secretary's reasons for his finding, and proof of service upon the mine operator. 29 CFR 2700.44(a). The Secretary's application is to be examined on an expedited basis by a Commission administrative law judge and, if it appears that the Secretary's finding is supported by the application and accompanying documents, the judge shall issue immediately an order of temporary reinstatement. *Id.* If a temporary reinstatement order is issued, the person against whom relief is sought may request a hearing before a Commission administrative law judge, who shall hold a hearing within 5 days following the request to determine whether the complaint was frivolously brought. *Id.* The judge may then dissolve, modify, or continue the order. *Id.*

In *Southern Ohio Coal Co., et al.* v. *Donovan*, 774 F.2d 693 (1985), *reh'g denied*, 781 F.2d 57 (1986), the United States Court of Appeals for the Sixth Circuit held that the Commission's current Procedural Rule 44 fails to insure any reasonable opportunity for a minimal pre-deprivation hearing before a miner is temporarily reinstated and, thus, violates the constitutional due process rights of the person against whom relief is sought. Upon consideration of this option, the Commission has revised Procedural Rule 44 to afford immediately an opportunity for a limited, pre-reinstatement hearing that insures due process to all parties to temporary reinstatement proceedings. In adopting the revised procedural rule, the Commission has reviewed and considered the comments submitted in response to the July 31, 1981 publication of the interim rule. 46 FR 39137 (1981).

Explanation of Provisions

The Commission's revised Procedural Rule 44, in new paragraph (b), provides that following prompt service of the Secretary's application for temporary reinstatement, the respondent has 10 days within which to request a hearing. If no hearing is requested, a Commission administrative law judge shall review immediately the Secretary's application. If, based upon the contents of the application, the judge determines that the complaint was not frivolously brought, he shall issue immediately an order of temporary reinstatement. If a hearing on the Secretary's application is requested, a hearing before a Commission admininstrative law judge shall be held within 10 days following receipt of the request for hearing, unless compelling reasons mandate the granting of a request for an extension of time.

New paragraph (c) states that at the hearing on the Secretary's application for temporary reinstatement, the burden of estabishing that the complaint was not frivolously brought shall be on the Secretary. The Secretary may limit his presentation to the testimony of the complainant. The respondent shall have an opportunity to cross-examine any witnesses called by the Secretary and to present evidence in support of its position. The sole issue to be determined by the judge is whether the miner's complaint was frivolously brought. New paragraph (d) provides that within 5 days following the close of a hearing on the Secretary's application, the admininstraive law judge shall issue an order granting or denying the application. The order shall include fully reasoned findings of fact and conclusions of law supporting the judge's determination as to whether the miner's complaint was frivolously brought.

New paragraph (e) provides further that a party may seek review of the judge's order on the Secretary's application for temporary reinstatement by filing a petition for review and supporting arguments with the Commission within 5 days following receipt of the order. The filing of a petition for review shall not stay the effect of the judge's order, unless the Commission directs otherwise. After a petition has been received, the revised rule provides that any response must be filed within 5 days. The Commission shall render a ruling on the petition for review within 10 days following receipt of any response or the expiration of the period for filing such response.

By permitting the opportunity for a pre-deprivation hearing, revised Procedural Rule 44 thus balances constitutional due process requirements with the Mine Act's directive that temporary reinstatement proceedings be conducted on an expedited basis.

Notice and Public Procedure

Notice and comment rulemaking does not apply to rules of agency procedure. 5 U.S.C. 553(b)(3)(A). Commission Procedural Rule 44, as revised, is a procedural rather than a substantive rule. This rule does not alter the individual rights or obligations provided by section 105(c)(2) of the Mine Act. The rule is limited to a Commission procedure for insuring all participating parties constitutional due process during temporary reinstatement proceedings before the Commission. Therefore, the rule falls within the procedural rule exception of 5 U.S.C. 553(b)(3)(A). Accordingly, no notice of proposed rulemaking was published prior to its issuance as a final rule. However, given the importance of temporary reinstatement in the Mine Act's scheme, the Commission invites and will accept public comments received on or before June 30, 1986.

Adoption of Amendment to the Commission's Rules of Procedure

For the reasons set forth in the preamble, Part 2700 of Chapter XXVII of Title 29 of the *Code of Federal Regulations* is amended as follows:

PART 2700—[AMENDED]

1. The authority citation for Part 2700 continues to read as follows:

Authority: 30 U.S.C. 815 and 832.

2. Section 2700.44 is revised to read as follows:

§ 2700.44 Temporary reinstatement proceedings.

(a) *Contents of application.* An application for temporary reinstatement shall state the Secretary's finding that

VOL 51 ISS 83 AP 30 1986 UMI

the miner's complaint of discrimination, discharge or interference was not frivolously brought and shall be accompanied by an affidavit setting forth the Secretary's reasons supporting his finding, a copy of the miner's complaint, and proof of notice to and service on the person against whom relief is sought by the most expeditious means of notice and delivery reasonably available.

(b) *Request for hearing.* Within 10 days following receipt of the Secretary's application for temporary reinstatement, the person against whom relief is sought shall advise the Commission's Chief Administrative Law Judge or his designee, and simultaneously notify the Secretary, whether a hearing on the application is requested. If no hearing is requested, the judge assigned to the matter shall review immediately the Secretary's application and, if based on the contents thereof the judge determines that the miner's complaint is not frivolously brought, he shall issue immediately an order of temporary reinstatement. If a hearing on the application is requested, the hearing shall be held within 10 days following receipt of the request for hearing by the Commission's Chief Administrative Law Judge or his designee, unless compelling reasons are shown in an accompanying request for an extension of time.

(c) *Hearing.* The scope of a hearing on an application for temporary reinstatement is limited to a determination by the judge as to whether the miner's complaint is frivolously brought. The burden of proof shall be upon the Secretary to establish that the complaint is not frivolously brought. In support of his application for temporary reinstatement the Secretary may limit his presentation to the testimony of the complainant. The respondent shall have an opportunity to cross-examine any witnesses called by the Secretary and may present testimony and documentary evidence in support of its position that the complaint is frivolously brought.

(d) *Judge's order on application.* Within 5 days following the close of a hearing on an application for temporary reinstatement the judge shall issue an order granting or denying the application. The judge's order shall include findings and conclusions supporting the determination as to whether the miner's complaint has been frivolously brought. In addition to service of the order granting or denying the application, the judge shall notify the parties of his determination by the most expeditious means reasonably available.

(e) *Review of order.* Review by the Commission of a judge's order granting or denying an application for temporary reinstatement may be sought by filing with the Commission a petition for review with supporting arguments within 5 days following receipt of the judge's order. The opposing party simultaneously shall be notified and served. The filing of a petition for review shall not stay the effect of the judge's order unless the Commission directs otherwise. Any response shall be filed within 5 days following receipt of a petition. The Commission's ruling on a petition for review shall be rendered within 10 days following receipt of any response or the expiration of the period for filing such response.

(f) *Dissolution of order.* If, following an order of temporary reinstatement, the Secretary determines that the provisions of section 105(c)(1), 30 U.S.C. 815(c)(1), have not been violated, the judge shall be so notified and shall enter an order dissolving the order of reinstatement. If the Secretary fails to file a complaint with the Commission within 60 days after an order of reinstatement has been issued, the judge may issue an order to show cause why the order of reinstatement should not be dissolved. An order dissolving the order of reinstatement shall not bar the filing of an action by the miner in his own behalf under section 105(c)(3) of the Act, 30 U.S.C. 815(c)(3), and § 2700.40(b) of these rules.

Approved: April 23, 1986.

Ford B. Ford,

Chairman, Federal Mine Safety and Health Review Commission.

BILLING CODE 6735-01-M

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 288

[DoD Instruction 7230.7]

User Charges; Fixed Fees

AGENCY: Department of Defense.

ACTION: Final rule.

SUMMARY: The part revises 32 CFR Part 288 to reestablish and update the Schedule of Fees and Rates as requested by DoD Components. It also deletes references to an "administrative surcharge" since it conflicts with principles established by the Supreme Court in connection with the "user charges" statute. In January 1985, DoD Instruction 7230.7 eliminated the fixed fee schedule and gave Components authority to compute charges. The part reestablishes fixed fees and withdraws this authority.

EFFECTIVE DATE: January 29, 1985.

ADDRESS: The Assistant Secretary of Defense (Comptroller), Department of Defense, The Pentagon, Washington, DC 20301-1155.

FOR FURTHER INFORMATION CONTACT: Thomas P. Mares, telephone 202-697-0536.

List of Subjects in 32 CFR Part 288

Accounting, Armed Forces, Government property and Services.

Accordingly, 32 CFR Part 288 is revised to read as follows:

PART 288—USER CHARGES

Sec.

288.1 Reissuance and purpose.
288.2 Applicability.
288.3 Definitions.
288.4 Policy.
288.5 Responsibilities.
288.6 Charges and fees.
288.7 Collections.
288.8 Legislative proposals.
288.9 Examples of benefits not to be charged under 288.4(c) of this part.
288.10 Schedule of fees and rates.

Authority: 31 U.S.C. 483a; Title V, Pub. L. 137, 65 Stat. 290

§ 288.1 Reissuance and purpose.

This part reissues 32 CFR Part 288 and implements the DoD program under 31 U.S.C. 9701, and OMB Circular A-25 for establishing appropriate charges for authorized services provided by DoD organizations.

§ 288.2 Applicability.

This part applies to the Office of the Secretary of Defense, the Military Departments, the Organization of the Joint Chiefs of Staff, the Unified and Specified Commands, and the Defense Agencies (hereafter referred to collectively as "DoD Components"). None of the provisions in this part should be construed as providing authority for the sale or lease of property, or the rendering of special services. Actions to convey such special benefits must be authorized by separate authority. The user charge policy is applicable except when other statutes or directives specifically direct other practices or procedures.

§ 288.3 Definitions.

Recipient. One who requests or receives the benefits of the service(s) provided.

§ 288.4 Policy.

(a) *General.* It is DoD policy not to compete with available commercial facilities (see 32 CFR Part 169a) in providing special services or in the sale or lease of property to private parties and agencies outside the Federal Government. However, when a service or sale is made that conveys special benefits to recipients, above and beyond those accruing to the public at large, a reasonable charge shall be made to each identifiable recipient, except as otherwise authorized by the Secretary of Defense. A special benefit will be considered to accrue, and a charge shall be imposed when the service rendered:

(1) Enables the recipient to obtain more immediate or substantial gain or values (which may or may not be measureable in monetary terms) than those which accrue to the general public; or

(2) Is performed at the request of the recipient and is above and beyond the services regularly received by or available without charge to the general public.

(b) *Costing.* (1) A charge shall be imposed to recover the full cost to the Federal Government of rendering a service or the fair market value of such service, whichever is higher. Fair market value shall be determined in accordance with commercial rates in the local geographical area. In the absence of a known market value, charges shall be made based on recovery of full costs to the Federal Government.

(2) When federally owned resources or property are leased or sold, a fair market value shall be obtained. Fair market value shall be determined by the application of sound business management principles and, so far as practicable and feasible, in accordance with comparable commercial practices. Charges based on fair market value need not be limited to the recovery of costs; they may produce net revenues to the Government.

(c) *Exclusions and Exceptions.* (1) The provisions of this part do not apply when other statutes or directives require different practices or procedures such as for:

(i) Morale, welfare, and recreation services to military personnel and civilian employees of the Department of Defense and other services provided in accordance with § 288.9.

(ii) Sale or disposal of surplus property under approved programs (See DoD Instruction 7310.1 [1]).

(iii) Services furnished the general public relating to, or in furtherance of, the U.S. Armed Forces recruiting program.

(iv) Services furnished to representatives of the public information media in the interest of public understanding of the U.S. Armed Forces.

(v) U.S. Armed Forces participation in public events. Charges for such participation are governed by the provisions of 32 CFR Part 238.

(vi) Records made available to the public, under the Freedom of Information Act, pursuant to 32 CFR Part 286. Charges for such record searches and copies of records are governed by § 286.61.

(vii) Services furnished to non-Federal audio-visual media Charges for such services are governed by the provisions of DoD Instruction 5410.15.[2]

(viii) Government-developed computer programs released to non-Federal customers. Charges for software packages are governed by DoD Instruction 7930.2.[3]

(ix) Pricing of performance by industrial fund activities which shall be in accordance with DoD Directive 7410.4.[4]

(2) Charges may be waived or reduced when:

(i) The recipient of the benefits is engaged in nonprofit activity designed for public safety, health, or welfare.

(ii) Payment of the full fee by a state, local government, or nonprofit group would not be in the interest of the program.

(iii) Furnishing of the service without charge is an appropriate courtesy to a foreign country or international organization, or comparable fees are set on a reciprocal basis with a foreign country.

(iv) The incremental cost of collecting the fees would be an unduly large part of the receipts from the activity.

§ 288.5 Responsibilities.

Head of DoD Components, or designees, shall:

(a) Identify each service or activity covered by this part.

(b) Determine the extent of the special benefit provided.

(c) Determine applicable cost and fair market value.

(d) Establish appropriate charges and collect from recipients of special services.

(e) Grant cost waivers or reductions consistent with guidance in this part.

(f) Recommend to the Assistant Secretary of Defense (Comptroller) necessary additions and revisions to § 288.10.

§ 288.6 Charges and Fees.

(a) *General.* (1) All charges and fees shall be based on total cost to the U.S. Government or fair market value, whichever is higher. Total cost shall be based on actual cost or replacement cost when property is to be replaced and expense data accumulated in accordance with DoD 7220.9-M.[5] Estimates from the best available records may be used if actual cost or expense data is not available.

(2) Cost accounting systems shall not be established solely for the purpose of determining charges, but the results of existing cost accounting systems shall be used. Total cost shall include all direct and indirect costs (see Chapter 71, DoD 7220.9-M).

(3) Charges and fees established in advance must be projected to the midpoint of the future period. Projected amounts shall be reviewed annually or whenever significant changes in cost or value occur.

(4) Internal management controls (see DoD Directive 5010.38 [6] must be established to ensure that charges and fees are developed and adjusted, using current, accurate, and complete data, to provide reimbursement conforming to statutory requirements. Such controls also must ensure compliance with cash management and debt collection policies (see DoD Directive 7045.13[7]).

(b) *Services.*—(1) *Basic Requirements.* The maximum charge for a special service shall be governed by its total cost or fair market value, whichever is higher, and not by the value of the service, to the recipient. The cost computation shall include the direct and indirect costs to the Government of carrying out the activity. Typically, a service may involve the following:

(i) Civilian salaries or wages, including the full cost of benefits, such as leave, retirement,and medical and life insurance.

(ii) The full cost of military personnel services, including retirement, other personnel support, leave, and permanent change of station factors.

(iii) The cost of materials, supplies, travel expenses, communications, utilities, equipment and property rental, and, maintenance of property and equipment.

[1] Copies may be obtained, if needed, from the U.S. Naval Publications and Forms Center, Code 301, 5801 Tabor Avenue, Philadelphia, Pa 19120.

[2] See footnote 1 to § 288.4(c)(1)(ii).

[3] See footnote 1 to § 288.4(c)(1)(ii).

[4] See footnote 1 to § 288.4(c)(1)(ii).

[5] See footnote 1 to § 288.4(c)(1)(ii).

[6] See footnote 1 to § 288.4(c)(1)(ii).

[7] See footnote 1 to § 288.4(c)(1)(ii).

VOL 51 ISS 83 AP 30 1986 UMI

(iv) Depreciation expense and interest of investment (currently at a 10 percent annual rate) (OMB Circular No. A-94) in DoD-owned, fixed assets.

(v) Other operational, administrative, and accessorial (DoD Instruction 7510.4 [9]) costs incurred by the activity while establishing standards and regulations and research in support of the service performed, for example.

(2) *Fees and Rates.* Fees and rates shall be based on actual costs. The charges for services provided by data processing activities shall be determined by using the costs accumulated pursuant to OMB Circular No. A-121 and Federal Government accounting Pamphlet No. 4 requirements. Fees and rates for recurring services shall be established in advance, when feasible. Recurring services include, but are not limited to, copying, certifying, and researching records, except when those services are excluded or exempted from charges under § 228.4(c) or § 228.9.

(3) *DoD-wide Fees and Rates.* Section 228.10 provides a schedule of fees and rates for certain services for use throughout the Department of Defense. Recommendations for additions and revisions to the schedule will be made to the Assistant Secretary of Defense (Comptroller).

(c) *Lease or Sale of Property.* Charges for lease or sale of property shall be based on a determination of fair market value.

(1) In cases involving the lease or rental of military equipment, when there is no commercial counterpart, fair market value will be based on the computation of an annual rent which will be the sum of the annual depreciation plus interest on investment. The amount of interest on investment is determined by applying the interest rate to the net book value; that is, acquisition cost plus additions less depreciation. The current interest rate in OMB Circular No. A-94 shall be used. Support, if furnished, and applicable general administration expenses will be extra. In determining the value, consideration may be given to the responsibility of the lessee to assume the risk of loss or damage to the property and to hold the Government harmless against claims or liabilities by the lessee or third parties.

(2) In cases involving the sale of property when there is no known fair market value, costs shall be based on the total of the standard price of the item carried in inventory, or the reduced price when so authorized for sale within the Department of Defense and the accessorial and administrative costs computed under DoD Instruction 7510.4.

[9] See footnote 1 to § 228.4(a).

§ 288.7 Collections.

(a) Collections of charges and fees shall be made in advance of rendering the service, except when preservation of life or property is involved, performance is authorized by law without advance payment, or advance payment is impractical because multiple requests for services are received on a continuing basis from a reliable requester (i.e., consistently prompt payments for services received). When an advance collection exception is approved, an accounts receivable will be established to control collections. The policies in DoD 7220.9-M, DoD Directive 5010.38, and DoD Directive 7045.13 shall be used in accounting, controlling, and managing cash and debt collections.

(1) Collections of fees and charges normally will be deposited to Miscellaneous Receipts of the Treasury unless otherwise authorized by law or regulation.

(2) Collections for utilities and services in connection with the lease of property will be deposited to the appropriation or fund responsible for financing the operations of the equipment or facility.

§ 288.8 Legislative proposals.

In cases where collections of fees and charges for services or property are limited or restricted by provisions of existing law, the DoD Component(s) concerned will submit appropriate remedial legislative proposals under applicable legislative procedures. (See DoD Instruction 5500.4.[9])

§ 288.9 Examples of Benefits not to be charged under provisions of § 288.4(c)(2) of this Part.

(a) Services requested by members of the U.S. Armed Forces in their capacity as Service members.

(b) Services requested by members of the U.S. Armed Forces who are in a casualty status, or requested by their next of kin or legal representative, or requested by any source, when it relates to a casualty.

(c) The address of record of a member or former member of the U.S. Armed Forces when the address is available readily through a directory (locator) service, and when the address is requested by a member of the U.S. Armed Forces or by a relative or a legal representative of a member of the U.S. Armed Forces or when the address of record is requested by any source for the purpose of paying monies or forwarding property to a member or former member of the U.S. Armed Forces.

(d) Services requested by or on behalf of a member or former member of the U.S. Armed Forces or, if deceased, his or her next of kin or legal representative that pertain to the following:

(1) Information required to obtain financial benefits regardless of the terms of separation from the Service.

(2) Document showing membership and military record in the Armed Forces if discharge or release was under honorable conditions, except as provided in paragraphs (1) and (2) of this section.

(3) Information relating to a decoration or award or required for memorialization purposes.

(4) Review or change in type of discharge or correction of records.

(5) Personal documents, such as birth certificates, when such documents are required to be furnished by the member.

(e) Services that are furnished free in accordance with statutes or executive orders.

(f) Information from or copies of medical and dental records or X-ray films of patients or former patients of military medical or dental facilities, when such information is required and requests for such data are (1) submitted by an accredited medical facility, physician, or dentist; or (2) requested by the patient, his or her next of kin, or legal representative.

(g) Services involving confirmation of employment, disciplinary or other records, and salaries of active or separated civilian or military personnel, when requested by prospective employers or recognized sources of inquiry for credit or financial purposes.

(h) Services requested by and furnished to a Member of Congress for official use.

(i) Services requested by state, territorial, county, or municipal government, or an agency thereof, that is performing a function related to or furthering of a DoD objective.

(j) Services requested by a court, when the service will serve as a substitute for personal court appearance of a military or civilian employee of the Department of Defense.

(k) Services requested by a nonprofit organization that is performing a function related to or furthering an objective of the Federal Government or that is in the interest of public health and welfare, including education.

(l) Services requested by an individual or corporation that is performing a function related to or furthering an objective of the Federal Government, when the cost of such services would be chargeable to a Federal Government contract or grant held by the individual or corporation.

(m) Services requested by donors with respect to their gifts.

(n) Requests for occasional and incidental services (including requests from residents of foreign countries), that are not requested often, when it is determined administratively that a fee would be inappropriate for the occasional and incidental services.

(o) Requests from Federal employees for the completion of claims for reimbursement under the Federal Employees Health Benefit Act of 1959.

(p) Administrative services provided by reference or reading rooms to inspect public records, excluding copies of records or documents furnished.

(q) Requests for military locator service by financial organizations that are located on DoD installations.

(r) Requests for military locator service by financial organizations that are engaged in the direct deposit program and that are not located on DoD installations. Requests for an address of record shall include the following:

(1) A statement that the financial organization is listed as a direct deposit recipient in the current U.S. Treasury Bureau of Accounts, "Financial Organizations Directory."

(2) A statement that the individual, whose address is being requested, has his or her pay forwarded as a direct deposit by a DoD disbursing officer.

(3) The individual's financial organization's account number.

(s) Services rendered in response to requests for classification review of DoD classified records, submitted under Executive Order 12065 and implemented by 32 CFR Part 159. Such services consist of the work performed in conducting the classification review or in granting and completing an appeal from a denial of declassification following such review.

(t) Services of a humanitarian nature performed in such emergency situations as life-saving transportation for non-U.S. Armed Forces patients, search and rescue operations, and airlift of personnel and supplies to a disaster site. This does not mean that inter- and intra-Governmental agreements to recover all or part of costs should not be negotiated. Rather, it means the recipient or beneficiary will not be assessed a "user charge."

[9] See footnote 1 to § 288.4(c)(1)(ii).

§ 288.10 Schedule of Fees and Rates.

This schedule applies to authorized services related to copying, certifying, and searching records rendered to the public by DoD Components, except when those services are excluded or excepted from charges under subsection D.3. of the basic instruction, or § 288.9. Except as provided in special cases prescribed below, a minimum fee of $3.50 will be levied for processing any chargeable case. Normally only one copy of any record or document will be provided.

Requests Involving

(a) *Training and Education [copies of documents required for other than official purposes]:*

	Fee
(1) Transcripts:	
First copy	$3.50
Each additional copy (includes requests for transcripts of graduation from military academies and schools)	.45
(2) Certificates:	
First copy	3.50
Each additional copy (includes all requests for certification, verification of attendance, and course completion from service schools and other facilities	.45

(b) *Medical and Dental Records of Patients and Former Patients (when requested for purposes other than further medical treatment).* Covers requests for information from or copies of medical records, including clinical records (inpatient records of military and non-military patients), health records (military outpatient records), outpatient records (non-Military outpatient records), dental records, and loan of x-rays.

(1) Searching and processing (per hour)	$13.25
Minimum charge	8.30
(2) Each typewritten page	3.50
(3) Office copy reproductions (per image)	0.10
(4) Copy or loan of each x-ray	8.30

(c) *Military Membership and Record [Excluding Medical and Dental Records).*

(1) Address of record, each	$3.50

(2) Copies of releasable military personnel records (e.g., effectiveness reports for officers and enlisted personnel) reproduced for the personal use of active, retired, and former members, next of kin of missing-in-action or deceased members of the Armed Forces.

Minimum charge (up to six reproduced images)	$3.50
Each additional image	.10
Statement of verification of Service or report of separation for individuals with other than honorable discharges	5.20

(d) *Photography.* (1) Still pictorial or documentary photographic prints. Unlisted standard sizes of prints may be furnished, if available, at prevailing contract or activity rates.

	Price per print (quantity)			
	1 to 9	10 to 20	21 to 50	50+
Single weight (RC type) paper:				
8"x10"	$4.50	$3.25	$2.80	$1.75
11"x14"	9.00	7.00	5.00	4.00
16"x20"	18.00	15.00	12.00	9.50
20"x24"	30.00	25.00	20.00	15.00
Single weight color paper:				
8"x10"	11.00	7.50	3.50	3.00
11"x14"	17.00	9.00	4.50	5.50
16"x20"	35.00	25.00	14.00	11.50
35mm color transparency slide made from color negative	5.00	3.50	3.00	3.00
35mm duplicate from 35mm slide	1.00	.60	.50	.45
Print mounted on 16"x20" cardboard + unit price of print	8.00			
Print mounted on 20"x24" cardboard + unit price of print	12.00			
Color transparencies (first); 16.00 each additional:				
8"x10"	20.00			
4"x5"	4.50			
4"x5" B&W negative	2.00			
70mm color negative	7.50			

Note.—Prices may vary by 20% of these average charges based on local inhouse labor, equipment, and supply (raw stock) costs.

(2) Motion Picture:

	Price per foot contact
Color:	
16mm work print (positive work print from an original negative)	$0.20
16mm reversal work print	.20
16mm color master ("A" roll)	.60
16mm duplicate negative (from master positive)	.60
16mm reversal duplicate negative	.85
16mm internegative (from reversal original)	.70
16mm short rolls (under 100 ft) + basic price	.10
16mm tab-to-tab printing + basic price	.20
Black and white:	
16mm work print (negative/positive)	.10
16mm master positive (fine grain)	.25
16mm duplicate negative	.25
16mm short rolls (under 200 ft) + basic price	.10
16mm tab-to-tab printing + basic price	.10

(3) *Miscellaneous:*

Magnetic tape—dub from 16mm film + raw stock	$65.00
Searching (per hour or fraction thereof)	16.00
Minimum charge per film order (including search)	35.00

VOL 51 ISS 83 AP 30 1986 UMI

16mm film to videotape (broadcast quality tape format per hour) + raw stock.....275.00
Minimum charge for film to videotape transfer + raw stock.....140.00

Aerial photographic print processing prices will be determined by the local DoD-operated lab due to limited availability.

35mm film processing for motion pictures is not done in-house by the DoD. Charges for this type of processing will be at prevailing contract rates on a case-by-case basis.

(e) *Construction and Engineering-Information.* Copies of aerial photograph maps, specifications, permits, charts, blueprints, and other technical engineering documents.

(1) Searching, per hour or fraction thereof (including overhead costs).....$13.25
(2) First print.....2.50
(3) Each additional print of same document.....0.85

(f) *Copies of Medical Articles and Illustrations.* Standards contained in the basic Instruction will be utilized in computing costs.

(g) *Claims, Litigation.* Copies of documents required for other than official purposes. (Includes court-martial records furnishing information from Report of Claims Investigations; e.g., automobile collision investigations and safety reports.) Requests pertaining to private litigation and to cases in which the United States is a party and where court rules provide for reproduction of records without cost to the Government (if not covered in 2. or 3., above).

(1) Searching and processing (per hour).....$13.25
Minimum charge.....6.30

Note.—Charges for professional search or research will be made in accordance with 10.b., below.

(2) Office copy reproduction (minimum for six pages or less).....$3.50
(3) Each additional image.....0.10
(4) Certification and validation with seal, each.....5.20

(h) *Publications and Forms.* A search and/or processing fees, as described in 10.a., below, will be made for requests requiring extensive time (one hour or more).

(1) *Shelf Stock.* (Requesters may be furnished more than one copy of publication or form if it does not deplete stock levels below projected planned usage.)

(i) Minimum fee per request (six pages or less).....$3.50
Plus:
(A) Form, per copy.....$.10
(B) Publications, per printed page.....02
(C) Microfiche, per fiche.....10

(ii) (Examples: Cost of 20 forms, $5.50; cost of a publication with 100 pages, $5.50; cost of microfiche publication consisting of 10 fiches, $4.50)

(2) Office Copy Reproduction (when shelf stock is not available):

(i) Minimum fee per request (six pages or less).....$3.50
(ii) Each additional page.....10
(iii) Minimum charge first fiche.....8.70
(iv) Each additional fiche.....20

(i) *Engineering Data (Microfilm).*—(1) *Aperture Cards.*

(i) Silver duplicate negative, per card.....$0.75
When keypunched and verified, per card.....85
(ii) Diazo duplicate negative, per card.....65
When keypunched and verified, per card.....75
(2) 35mm roll film, per frame.....0.50
(3) 16mm roll film, per frame.....0.45
(4) Paper prints (engineering drawings), each.....1.50
(5) Paper reprints of microfilm indices, each.....0.10

(j) *General.* Charges for any additional services not specifically provided above, consistent with the provisions of the basic Instruction, will be made by the respective DoD Components at the following rates:

(1) Clerical search and processing, per hour.....$13.25
Minimum charge.....6.30
(2) Professional search or researching (To be established at actual hourly rate prior to search. A minimum charge will be established at ½-hourly rates.).....
(3) Minimum charge for office copy reproduction (up to six images).....3.50
(4) Each additional image.....0.10
(5) Each typewritten page.....3.50
(6) Certification and validation with seal, each.....5.20
(7) Hand-drawn plots and sketches, each hour or fraction thereof.....12.00

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 124 and 403

[EN-FRL-2958-8]

The National Pollutant Discharge Elimination System and General Pretreatment Regulations; Authority for Deciding Variance Requests Based on Fundamentally Different Factors and on Water Quality Factors

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This document amends certain portions of the National Pollutant Discharge Elimination System (NPDES) regulations in order to delegate authority to EPA Regional Administrators for deciding variance requests based on section 301(g) of the CWA and based on the presence of fundamentally different factors (FDF). In addition, this document amends the General Pretreatment regulations in order to delegate authority to EPA Regional Administrators for deciding variance requests based on the presence of fundamentally different factors (FDF).

These amendments will change present procedures to require headquarters involvement only where the variance request raise nationally significant or precedent-setting issues.

DATES: For judicial review purposes, in accordance with 40 CFR Part 23 (50 FR 7268) the time and date of the Administrator's action in issuing this rule shall be 1:00 P.M. Eastern Time on May 14, 1986.

These regulations shall become effective on May 30, 1986.

FOR FURTHER INFORMATION CONTACT: Ms. Marilyn Goode, Permits Division (EN-336), U.S. Environmental Protection Agency, 401 M St., SW., Washington, DC 20460; (202) 475-9521.

SUPPLEMENTARY INFORMATION:

I. Background

A. Section 301(g) Variances

Section 301(g) of the CWA provides that variances from effluent limitations based on best available technology economically achievable (BAT) may be granted to certain direct dischargers of nonconventional pollutants. In order to obtain a variance under section 301(g), an applicant must demonstrate that his proposed modified effluent limitations (1) will meet water quality standards or best practicable control technology currently available, whichever is applicable; (2) will not result in any additional requirements on other point or nonpoint sources; (3) will not interfere with the attainment or maintenance of that water quality which shall assure protection of public water supplies, the protection and propagation of a balanced population of shellfish, fish and wildlife, and recreational activities in and on the water and (4) cannot reasonably be anticipated to pose an unacceptable risk to human health and the environment.

The existing NPDES regulations (§ 124.62) allow the Regional Administrator or NPDES State Director to deny all requests for section 301(g) variances for direct dischargers (these variances are not available to indirect dischargers). However, only the Deputy Assistant Administrator for Water Enforcement (now the Director of the Office of Water Enforcement and Permits [OWEP]) may approve such variances.

B. FDF Variances

The fundamentally different factors (FDF) variance is an administrative mechanism designed to allow alternative case-specific limitations in lieu of national effluent limitations guidelines and categorical pretreatment standards for existing direct or indirect dischargers of toxic, conventional, or nonconventional pollutants. In order to obtain an FDF variance, an applicant must demonstrate that the factors prevailing at his plant or facility are fundamentally different from the factors considered in establishing the national discharge limitations and standards, as specified in existing regulations (40 CFR 125.30–125.32 and 403.13).

In the case of direct dischargers, the existing NPDES regulations (§ 124.62) allow the Regional Administrator and the NPDES State Director to deny all requests for FDF variances. However, only the Deputy Assistant Administrator for Water Enforcement (now the Director of the Office of Water Enforcement and Permits [OWEP]) may approve such variances. In the case of indirect dischargers, the existing General Pretreatment regulations (§ 403.13) allow the State Director and the EPA Enforcement Division Director (now the Regional Water Management Division Director) to deny all requests for FDF variances. However, only the EPA Enforcement Division Director (now the Regional Water Management Division Director) may approve such requests.

C. Delegation Plan

In the case of section 301(g) and FDF variance requests from direct dischargers, the above procedures have brought about considerable duplication of effort between Headquarters and Regional offices, since they require the Regional Administrator to review and, where approval is recommended, submit the request to EPA Headquarters for further review. These reviews may also be in addition to a review by the State Director. Such multiple review has often made the issuance of timely decisions difficult. This is compounded by the fact that EPA Headquarters receive a relatively large number of these types of variance requests.

In light of the above, EPA has reexamined the need for routine Headquarters involvement in the approval of such variance requests. The Agency has concluded that Headquarters involvement should only be required where the variance request involves nationally significant or precedent-setting issues. Accordingly, EPA has decided to delegate to Regional Administrators the authority to grant as well as deny all requests for section 301(g) or FDF variances, with advance concurrence required from the Assistant Administrator for Water or his delegate only under certain circumstances. Such advance concurrence would be required only for FDF requests that raise nationally significant issues, or for the first 301(g) variance request dealing with a specific pollutant in a particular industry discharging to specific waters. Requests for which advance concurrence is required will be identified in guidance issued to EPA Regions. This delegation will not alter the authority of the State Director to deny such variance requests.

Because of the relatively small number of sections 301(c) and 302(b)(2) variance requests which have been received, the Agency is not currently amending the procedures applicable to variance requests under these provisions. The State Director and Regional Administrator will still retain authority to deny section 301(c) and 302(b)(2) variance requests while final approval authority will remain with the Director of the Office of Water Enforcement and Permits.

As noted above, in the case of FDF variances for indirect dischargers, decisions to grant requests are already made at the Regional level by the Water Management Division Director. However, to avoid confusion and for the sake of program consistency we are providing the Regional Administrator with the same authority to grant as well as deny these requests as for direct dischargers. As with direct discharges, this delegation will not alter the authority of the State Director to deny these variance requests.

EPA believes that the delegation accomplished today will simplify the present cumbersome process, result in speedier resolution of the relevant issues, and provide consistency in the treatment of direct and indirect dischargers.

In order to allow for the delegation discussed above, the Agency is today amending 40 CFR 124.62, 124.63, and 403.13 to provide that the Administrator, or his delegate, may grant or deny section 301(g) and FDF variance requests. Concurrently with this rulemaking, the Administrator is implementing the actual delegation of this authority through the EPA delegations manual. This procedure is more appropriate than delegating authority to the Regional Administrators through the rulemaking process, since the regulations as amended to day will allow the Administrator to redelegate his authority in the future directly through the delegations manual as needed instead of through a new rulemaking procedure. EPA anticipates revising other regulations in the future to specify the Administrator as the decisionmaking authority in order to allow for delegations through the manual.

In the case of appeals from decisions on variance requests from indirect dischargers (see § 403.13(m)) the Agency wishes to point out that the petition for a hearing to reconsider or contest the Regional Administrator's decision would be submitted to the Regional Administrator, even though the Regional Administrator (as the Administrator's delegate) will also be responsible for making the initial decision on the variance.

The Agency is promulgating today's amendments in final form pursuant to section 553(b)(A) of the Administrative Procedure Act (APA). The rule change issued today merely changes the procedures for processing variance requests within the Agency. The substantive standards for review of the requests remain the same. Accordingly, the rule does not "alter the rights or interests of parties." *Batterton v. Marshall*, 648 F.2d 694 (D.C. Cir. 1980). As such, it fits squarely within the exemption from notice and comment requirements of the APA.

II. Executive Order 12291

Under Executive Order 12291, EPA must judge whether a regulation is "Major" and therefore subject to the requirement of a Regulatory Impact Analysis. This regulation is not major because it affects only internal Agency procedures. The requirements applicable to the regulated public are not affected.

III. Regulatory Flexibility Act

EPA has determined, pursuant to the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), that this regulation will not have a significant economic impact on a substantial number of small entities, since it affects only internal Agency operating procedures.

VOL 51 ISS 83 APR 30 1986 UMI

List of Subjects

40 CFR Part 124

Administrative practice and procedure, air pollution control, hazardous materials, waste treatment and disposal, water pollution control, water supply, Indian lands.

40 CFR Part 403

Confidential business information, Reporting and recordkeeping requirements, Waste treatment and disposal, Water pollution control.

Dated: March 31, 1986.

Lee M. Thomas,

Administrator.

PART 124—PROCEDURES FOR DECISIONMAKING

Subpart D—Specific Procedures Applicable to NPDES Permits

1. The authority citation for Part 124 continues to read as follows:

Authority: Resources Conservation and Recovery Act, 42 U.S.C. 6901 *et seq.*; Safe Drinking Water Act, 42 U.S.C. 300(f) *et seq.*; Clean Water Act 33 U.S.C. 1251 *et seq.*; and Clean Air Act, 42 U.S.C. 1857 *et seq.*

2. Section 124.62 is amended by removing paragraphs (b) (1) and (3), redesignating paragraphs (b) (2) and (4) as paragraphs (b) (1) and (2) respectively, and adding new paragraphs (e) and (f) to read as follows:

§ 124.62 Decision on Variances.

* * * * *

(e) The State Director may deny or forward to the Administrator (or his delegate) with a written concurrence, or submit to the Administrator (or his delegate) without recommendation, a completed request for:

(1) A variance based on the presence of "fundamentally different factors" from those on which an effluent limitations guideline was based;

(2) A variance based upon certain water quality factors under CWA section 301(g).

(f) The Administrator (or his delegate) may grant or deny a request for a variance listed in paragraph (e) of this section that is forwarded by the State Director, or that is submitted to EPA by the requester where EPA is the permitting authority. If the Administrator (or his delegate) approves the variance, the State Director or Regional Administrator may prepare a draft permit incorporating the variance. Any public notice of a draft permit for which a variance or modification has been approved or denied shall identify the applicable procedures for appealing that decision under § 124.64.

3. Section 124.63 is amended by revising paragraph (a)(1) to read as follows:

§ 124.63 Procedures for Variances When EPA is the Permitting Authority.

(a) * * *

(1)(i) If, at the time, that a request for a variance based on the presence of fundamentally different factors or on section 301(g) of the CWA is submitted, the Regional Administrator has received an application under § 124.3 for issuance or renewal of that permit, but has not yet prepared a draft permit under § 124.6 covering the discharge in question, the Administrator (or his delegate) shall give notice of a tentative decision on the request at the time the notice of the draft permit is prepared as specified in § 124.10, unless this would significantly delay the processing of the permit. In that case the processing of the variance request may be separated from the permit in accordance with paragraph (a)(3) of this section, and the processing of the permit shall proceed without delay.

(ii) If, at the time, that a reqeust for a variance under sections 301(c) or 302(b)(2) of the CWA is submitted, the Regional Administrator has received an application under § 124.3 for issuance or renewal of that permit, but has not yet prepared a draft permit under § 124.6 covering the discharge in question, the Regional Administrator, after obtaining any necessary concurrence of the EPA Deputy Assistant Administrator for Water Enforcement under § 124.62, shall give notice of a tentative decision on the request at the time the notice of the draft permit is prepared as specified in § 124.10, unless this would significantly delay the processing of the permit. In that case the processing of the variance request may be separated from the permit in accordance with paragraph (a)(3) of this section, and the processing of the permit shall proceed without delay.

* * * * *

PART 403—GENERAL PRETREATMENT REGULATIONS FOR EXISTING AND NEW SOURCES OF POLLUTION

1. The authority citation for Part 403 continues to read as follows:

Authority: Clean Water Act, 33 U.S.C. 1311; 1314(b), (c), (e), and (g); 1316(b) and (c); 1317; 1318; and 1361.

2. In 403.13, paragraph (g)(1), the introductory text of paragraph (h), paragraph (i), the introductory text of (j), (j)(3), (k)(2), (l)(1), the introductory text of (l)(2), (l)(2)(ii)(B), (l)(2)(ii)(C), (l)(2)(ii)(D), and paragraph (m) are revised to read as follows:

§ 403.13 Variances from categorical pretreatment standards for fundamentally different factors.

* * * * *

(g) *Application deadline.* (1) Requests for a variance and supporting information must be submitted in writing to the Director or to the Administrator (or his delegate), as appropriate.

* * * * *

(h) *Contents submission.* Written submissions for variance requests, whether made to the Administrator (or his delegate) or the Director, must include:

* * * * *

(i) *Deficient requests.* The Administrator (or his delegate) or the Director will only act on written requests for variances that contain all of the information required. Persons who have made incomplete submissions will be notified by the Administrator (or his delegate) or the Director that their requests are deficient and unless the time period is extended, will be given up to thirty days to remedy the deficiency. If the deficiency is not corrected within the time period allowed by the Administrator (or his delegate) or the Director, the request for a variance shall be denied.

(j) *Public notice.* Upon receipt of a complete request, the Administrator (or his delegate) or the Director will provide notice of receipt, opportunity to review the submission, and opportunity to comment.

* * * * *

(3) Following the comment period, the Administrator (or his delegate) or the Director will make a determination on the request taking into consideration any comments received. Notice of this final decision shall be provided to the requester (and the Industrial User for which the variance is requested if different), the POTW into which the Industrial User discharges and all persons who submitted comments on the request.

(k) * * *

(2) Where the Director finds that fundamentally different factors do exist, he shall forward the request, with a recommendation that the request be approved, to the Administrator (or his delegate).

(l) *Review of requests by EPA.*

(1) Where the Administrator (or his delegate) finds that fundamentally different factors do not exist, he shall deny the request for a variance and send a copy of his determination to the Director, to the POTW, and to the requester (and to the Industrial User, where they are not the same).

(2) Where the Administrator (or his delegate) finds that fundamentally different factors do exist, and that a partial or full variance is justified, he will approve the variance. In approving the variance, the Administrator (or his delegate) will:

* * * * *

(ii) * * *

(B) The rationale for the adjustment of the Pretreatment Standard (including the reasons for recommending that the variance be granted) and an explanation of how the recommended alternative discharge limits were derived;

(C) The supporting evidence submitted to the Administrator (or his delegate); and

(D) Other information considered by the Administrator (or his delegate) in developing the recommended alternative discharge limits;

* * * * *

(m) *Request for hearing.* (1) Within 30 days following the date of receipt of the notice of the decision of the Administrator's delegate on a variance request, the requester or any other interested person may submit a petition to the Regional Administrator for a hearing to reconsider or contest the decision. If such a request is submitted by a person other than the Industrial User the person shall simultaneously serve a copy of the request on the Industrial User.

(2) If the Regional Administrator declines to hold a hearing and the Regional Administrator affirms the findings of the Administrator's delegate the requester may submit a petition for a hearing to the Administrator within 30 days of the Regional Administrator's decision.

BILLING CODE 6560-50-M

40 CFR Part 180

[PP4F2986/R777; FRL-3010-2]

Cypermethrin; Pesticide Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes a tolerance for residues of the insecticide cypermethrin in or on the raw agricultural commodity pecans. This regulation to establish a maximum permissible level for residues of the insecticide in or on the commodity was requested pursuant to a petition by ICI Americas, Inc.

EFFECTIVE DATE: Effective on April 30, 1986.

ADDRESS: Written objections, identified by the document control number [PP4F2986/R777], may be submitted to the: Hearing Clerk (A-110), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: By mail: George LaRocca, Product Manager (PM) 15, Registration Division (TS-767C), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 204, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, 703-557-2400.

SUPPLEMENTARY INFORMATION: EPA issued a notice, published in the **Federal Register** of December 21, 1983 (48 FR 56435), which announced that ICI Americas, Inc., Concord Pike and New Murphy Rd., Wilmington, DE 19897, had submitted a pesticide petition (PP4F2986) to EPA proposing to amend 40 CFR 180.418 by establishing a tolerance for residues of the insecticide cypermethrin [(±)alpha-cyano-[3-phenoxyphenyl)-methyl(±)-*cis,trans*-3-(2,2-dichloroethenyl)-2,2-dimethylcyclopropanecarboxylate] and its metabolites *cis,trans*-3-(2,2-dichloroethenyl)-2,2-dimethylcyclopropane carboxylic acid (DCVA) and 3-phenoxybenzoic acid (3-PB Acid) (sum of cypermethrin plus metabolites) in or on the raw agricultrual commodity pecans at 0.05 part per million (ppm).

There were no comments received in response to the notice of filing.

The data submitted in the petition and other relevant material have been evaluated. The toxicological data considered in support of the tolerance as well as the risk of cypermethrin for previously established tolerances are discussed in a document on cypermethrin that appeared in the **Federal Register** of June 15, 1984 (49 FR 24885).

A full review of the data indicates that although cypermethrin increases the frequency of spontaneously occurring tumors in the lungs of female mice at high dose levels, the increased dietary risk would be extremely small from the proposed use of cypermethrin on pecans. The increased dietary risk associated with this tolerance, based on the highly conservative assumption that all units of the commodity would bear residues at the proposed tolerance level, is estimated to be 10^{-8}—10^{-6}. This value was calculated based on the proposed tolerance level.

The acceptable daily intake (ADI) is calculated to be 0.01 mg/kg/day based on a 1-year dog feeding study with a NOEL of 1.0 mg/kg/day and using a 100-fold safety factor. The maximum permissible intake (MPI) is calculated to be 0.60 mg/day for a 60-kg person. Published and pending tolerances result in a theoretical maximum residue contribution (TMRC) of 0.0408 mg/day based on a 1.5-kg diet and utilize 6.80 percent of the ADI. The establishment of this tolerance will add only 0.00002 mg/day (1-5 kg diet) to the TMRC, resulting in a total use of 6.81 percent of the ADI.

There are no regulatory actions pending against the registration of cypermethrin. The metabolism of cypermethrin in plants and animals is adequately understood for the purposes of the tolerances set forth below. An analytical method using electron capture gas-liquid chromatography is available for enforcement purposes.

Because of the long lead time from establishing this tolerance to publication of the enforcement methodology in the Pesticide Analytical Manual II, an interim analytical methods package is being made available to the State pesticide enforcement chemists when requested by mail:

By mail: Information Service Section (TS-757C), Program Management Support Division, Office of Pesticides Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 236, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202 (703-557-3262).

Based on the above information, the Agency has determined that establishing the tolerance for residues of the pesticide in or on the commodity will protect the public health. Therefore, as set forth below, the tolerance is established for a period extending to December 31, 1988, to cover residues existing from this conditional registration of cypermethrin, and the tolerance may be made permanent if registration is continued based on information received in 1988 (see **Federal Register** notice on conditional registration of cypermethrin for use on cotton, published January 9, 1985 (50 FR 1112)).

Any person adversely affected by this regulation may, within 30 days after publication of this document in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the

VOL 51 ISS 83 AP 30 1986 UMI

issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests.

Dated: April 22, 1986.

Steven Schatzow,

Director, Office of Pesticide Programs.

Therefore, 40 CFR Part 180 is amended as follows:

1. The authority citation for Part 180 continues to read as follows:

Authority: 21 U.S.C. 346a.

2. Section 180.418 is amended by adding, and alphabetically inserting, the raw agricultural commodity, to read as follows:

§ 180.418 Cypermethrin; tolerances for residues.

* * * * *

Commodity	Part per million
* * * * *	
Pecans	0.05

BILLING CODE 6560-50-M

FEDERAL MARITIME COMMISSION

46 CFR Part 572

[Docket No. 85-7]

Maritime Carriers; Independent Action; Notice and Meeting Provisions in Conference Agreements

AGENCY: Federal Maritime Commission.

ACTION: Final rule.

SUMMARY: This revises the Commission's regulations governing the filing of agreements submitted to the Commission pursuant to the Shipping Act of 1984. The Final Rule requires conference agreements to: (1) Establish a maximum notice period of not more than 10 days for member lines taking independent action; (2) provide for a single notice to the conference of a membes line's independent action; and (3) state that a member line taking independent action is not required to attend a meeting, or to comply with other procedures, for the purpose of explaining, justifying or compromising a proposed independent action. The Final Rule also makes technical changes based on the comments received.

EFFECTIVE DATE: May 30, 1986.

FOR FURTHER INFORMATION CONTACT:

Robert D. Bourgoin, General Counsel, Federal Maritime Commission, 1100 L Street, NW., Washington, DC 20573, (202) 523-5740

John Robert Ewers, Secretary, Federal Maritime Commission, 1100 L Street, NW., Washington, DC 20573, (202) 523-5725

SUPPLEMENTARY INFORMATION:

I. Proceeding

This proceeding was initiated by a Notice of Proposed Rulemaking (Proposed Rule) published in the Federal Register, 50 FR 10810 (March 18, 1985), to revise "Part 572—Agreements by Ocean Common Carriers and Other Persons Subject to the Shipping Act of 1984," 46 CFR Part 572, as it relates to conference independent action (IA) authority. The Proposed Rule would require conference agreements to establish a maximum notice period of not more than 10 days for member lines taking independent action, to provide for a single notice of independent action to the conference, and to state that a proponent of independent action is not required to attend a meeting, or to comply with other procedures, for the purpose of explaining, justifying or compromising a proposed independent action.

A total of 14 comments were received in response to the Commission's Notice of Proposed Rulemaking. The Proposed Rule was supported in comments filed by: (1) The Department of Justice (DOJ); (2) the Chemical Manufacturers Association (CMA); (3) PPG Industries, Inc. (PPG); and (4) Brown-Forman Distillers Corporation (Brown-Forman).

Comments seeking clarification, modification, or withdrawal of the Proposed Rule were filed by: (1) The Transpacific Westbound Rate Agreement (TWRA); (2) the Philippines North America Conference (PNAC); (3) the Inter-American Freight Conference (IAFC); (4) the U.S.-Flag Far East Discussion Agreement (Agreement No. 10050); (5) the North Europe-U.S. Pacific Freight Conference, the Pacific/Australia-New Zealand Conference, and the Pacific Coast European Conference (NEUSPAC *et al.*); (6) the 8900 Lines and the U.S. Atlantic & Gulf Ports/Italy, France & Spain Freight Conference (8900 Lines *et al.*); (7) the Atlantic and Gulf/West Coast of South America Conference, the United States Atlantic and Gulf/Colombia Conference, the United States Atlantic and Gulf/Ecuador Conference, the United States Atlantic and Gulf/Venezuela Freight Association, the United States Atlantic and Gulf/Southeastern Caribbean Conference, and the United States Atlantic and Gulf/Hispaniola Steamship Freight Association (Latin American Conferences); (8) the Trans-Pacific Freight Conference of Japan/Korea, the Japan/Korea-Atlantic & Gulf Freight Conference, the Trans Pacific Freight Conference (Hong Kong), the New York Freight Bureau, and the Japan-Puerto Rico & Virgin Islands Freight Conference (Trans-Pacific Conferences); (9) the United States-European Carrier Associations (USECA) consisting of the North Europe-U.S. Gulf Freight Association, the Gulf-European Freight Association, the North Europe-U.S. Atlantic Conference, the U.S. Atlantic-North Europe Conference, the Pan-Atlantic Carrier Trade Agreement, and the Trans-Atlantic American Flag Liner Operators Agreement; and (10) Sea-Land Service, Inc. (Sea-Land).

II. Comments and Discussion

A. The Right of Independent Action

Section 5(b)(8), 46 U.S.C. app. 1704(b)(8), of the Shipping Act of 1984 (the Act or the 1984 Act), 46 U.S.C. app. 1701-1720, states that each conference agreement must:

> provide that any member of the conference may take independent action on any rate or service item required to be filed in a tariff under section 8(a) of this Act upon not more than 10 calendar days' notice to the conference and that the conference will include the new rate or service item in its tariff for use by that member, effective no later than 10 calendar days after receipt of the notice, and by any other member that notifies the conference that it elects to adopt the independent rate or service item on or after its effective date, in lieu of the existing conference tariff provision for that rate or service item.

Before addressing the specific issues raised with regard to particular provisions of the Proposed Rule, it is necessary to address a number of general issues raised by the comments

regarding the interpretation of section 5(b)(8) of the Act. One such issue concerns the proper role of independent action within the statutory scheme of the 1984 Act. A number of the conferences argue that collective ratemaking is the "normal" method for pricing ocean transportation services. It is asserted that in a well-functioning conference, differences over pricing will usually be resolved internally. Independent action is said to be a "safety valve," a "last resort," an "exception to the norm" that will rarely be used. These comments generally conclude that the Proposed Rule would distort the statutory scheme by elevating independent action above collective action.

This position, however, ascribes too peripheral a role to the independent action provision of the Act. Independent action is not merely a safety valve to be used on rare occasions whenever pricing decisions cannot be resolved internally and a member is allowed to act independently rather than be forced to leave the conference. It is a central provision designed to balance those provisions of the Act which facilitate collective action.

The independent action provision was a key feature of the compromise that led to the passage of the 1984 Act. Moreover, the independent action provision was one of the shipper-sponsored provisions. The 1984 Act represents a legislative effort to balance the interests of carriers and shippers. In order to fulfill that Congressional purpose, it is necessary to ensure that the right of independent action is fully preserved and that no restrictions, other than those permitted by the statute, are placed on its exercise.

Rather than distorting the statutory scheme, the Proposed Rule would appear to be in harmony with the purpose of the 1984 Act. The independent action provision of the 1984 Act is the counterbalance to the enhanced economic power of conferences. Congress could not have spoken more clearly on this issue than it did in the Conference Report:

> A critical factor enabling the Conferees to agree on a more narrowly drawn general standard is the inclusion in this bill of numerous other provisions which address the nation's interest in competition in the ocean common carrier industry. . . . Even more importantly, the bill includes other specific and major procompetitive reforms that will affect the operation of ocean carriers and conferences—notably a strong requirement of independent action with a limited notice period. . . .
>
> H.R. Rep. No. 98-600, 98th Cong., 2d Sess. 33-34 (1984).

As the Conference Report makes clear, Congress intended independent action to be a procompetitive balance to the more narrowly drawn general standard. Moreover, it is clear that Congress was aware that it would "affect the operation of ocean carriers and conferences . . ." including pricing. Furthermore, there is nothing in the legislative history which indicates that independent action is merely a safety valve rarely to be used or only as a last resort. Although Congress continued to allow for collective ratemaking by conferences, it provided for a strong, effective right of IA in the clearest of terms. Preserving an unburdened right of IA is in keeping with the Congressional purpose. Restricting, burdening, or making it more difficult to exercise independent action defeats the purpose of the Act and the legislative compromise that led to the Act's passage.

A number of conferences suggest further that the Proposed Rule is contrary to the Congressional purpose of continuing the conference system in order to address structural and competitive problems such as rate instability and overcapacity. While it is true that Congress did continue the conference system for such a purpose, this does not mean that independent action should be circumscribed or limited. Congress gave not only conferences but other types of carrier agreements the opportunity to deal with problems of overcapacity by providing for a relaxed general standard, expedited processing, and clear antitrust immunity. Restricting IA, however, is not a solution to the problem of overcapacity which is the fundamental cause of rate instability.

One conference comment argues that the Act's silence with regard to any other restrictions on independent action does not mean that all other conditions are *pe se* unlawful. Another comment argues that section 5(b)(8) does not prohibit other provisions in agreements which might result in reducing the frequency of independent action. This same comment criticizes the Proposed Rule as an administrative rulemaking which impermissibly adds to the statutory requirements of section 5(b)(8).

These comments misconstrue the nature of the right of independent action. Independent action means that a member line may act independently, and not collectively, with regard to any rate or service item required to be filed in a tariff. In order to take such action, the member line may only be required to provide notice of up to 10 days to the conference. To argue that the Act's alleged silence permits other substantive requirements or conditions which would effectively add to the limited notice requirement, either as a precondition to or as a consequence of independent action, is contrary to the express language of the Act. Any condition, procedure or other mandatory requirement that in effect adds to the 10-day maximum notice requirement or places a mandatory burden on IA is, on its face, *per se* violative of section 5(b)(8).

The Proposed Rule does not add to the statutory requirements of section 5(b)(8). Its intent is merely to codify, by rulemaking, Commission policy concerning some of the conference-imposed conditions on the exercise of independent action which appear, on their face, to violate section 5(b)(8). These conference-imposed requirements specified in the Proposed Rule have been encountered in a number of agreement filings and have prompted negotiation with the parties to obtain their removal or modification. Continued case-by-case adjudication of such provisions, as suggested by one comment, is inappropriate, unnecessary, and an inefficient use of Commission resources. The Proposed Rule provides clear guidelines for conferences and avoids filings which otherwise would be rejected or require modification.

Finally, it should be noted that the Department of Justice believes that the Proposed Rule does not go far enough and that additional regulations are needed. DOJ urges the Commission to broaden the scope of this proceeding to include consideration of regulations requiring all conference agreements to expressly prohibit: (1) Any form of collusion in connection with any carrier's right of independent action; (2) the erection of any artificial procedural barriers to any carrier's exercise of its right of independent action; and (3) all forms of conference or collective retaliation against carriers who exercise their right of independent action. DOJ acknowledges that consideration of its proposals would require continuation of this proceeding. Whatever the merits of these proposals, they are beyond the scope of this rulemaking. DOJ's proposals will, however, be given consideration in a future rulemaking proceeding on this subject.

B. Specific Provisions of the Proposed Rule

1. Section 572.502(a)(4)(i)—Right of Independent Action

Section 572.502(a)(4)(i) of the Proposed Rule incorporates the requirement of section 5(b)(8) of the Act

VOL 51 ISS 83 APR 30 1986 UMI

that each conference agreement must provide for the right of independent action. The language of this paragraph is substantially the same as that of the existing rule which appears at 46 CFR 572.502(a)(4).

One comment contends that the language of this paragraph, which states "and shall otherwise be in conformance with section 5(b)(8) of the Act", is superfluous and should be deleted because the regulation already incorporates all of the requirements of section 5(b)(8) of the Act.

Section 572.502(a)(4)(i) paraphrases, but does not restate verbatim, the language of section 5(b)(8) of the Act. The language cited by the comment, therefore, assures that the rule is not interpreted as a delimitation of the statutory right of independent action. Moreover, it does not add any requirement which does not already exist in the Act itself. Therefore, this language shall be retained in the Final Rule.

The same comment proposes further that language be added to this paragraph which would provide expressly for notice to a section of a conference in lieu of notice to the conference itself where ratemaking is conducted on a sectional basis. If ratemaking authority resides exclusively within the particular sections of a conference and the business of agreeing on rates and publishing tariffs is done on a sectional basis, it would not appear to be inconsistent with the Act to allow for notice to the section since it, rather than the overall conference, is the ratemaking body. To the extent the comment has merit and shall be accommodated by adding a paragraph to the Final Rule which allows for notice to a ratemaking section in lieu of notice to the overall conference. As discussed more fully below, only a single notice to the section may be required.

2. Section 572.502(a)(4)(ii)—Notice Period

Section 572.502(a)(ii) of the Proposed Rule establishes a maximum notice period of 10 days which may either be required or permitted by the conference agreement. The Proposed Rule prohibits IA provisions which provide for a minimum notice period and leave open the possibility of voluntary notice in excess of 10 days. The effect of the Proposed Rule is, thus, to preclude an IA proponent from voluntarily providing more than 10 days' notice to the conference.

The Department of Justice fully supports this requirement of the Proposed Rule. DOJ contends that this rule regarding the notice period warrants adoption because it gives full effect to the literal meaning of section 5(b)(8) of the Act and because it would prevent conference members from becoming participants in implicit understandings in which carriers would voluntarily give more advance notice of independent action than was intended under section 5(b)(8).

CMA also supports this provision. CMA contends that the language and intent of the Act are to prohibit a conference from requiring a conference member to give more than 10 calendar days' notice. Moreover, according to CMA, the restriction on voluntary notice would still allow an IA proponent to informally discuss a proposed independent action prior to giving formal notice as to withdraw a proposed independent action prior to effectiveness and resubmit it at any time.

The conference/carrier comments unanimously oppose the Proposed Rule's prohibition of voluntary notice of independent action in excess of 10 days. The comments advance various arguments to support the position that an IA proponent should be permitted to voluntarily provide notice of more than 10 days.

First, some comments argue that the plain meaning of the language of the Act places a limit only upon the conference agreement and not on the action of an individual member. The only purpose of section 5(b)(8) of the Act allegedly is to prohibit a conference from imposing a greater notice period upon a member line. Some comments argue further that the language of the Act, which states that the inclusion of the IA item in the tariff for use by the member shall be "effective no later than 10 calendar days after receipt of the notice", does not impose any restriction on the member line. This language, it is argued, merely requires the conference to file the notice within 10 days of receipt. Some comments argue that filing and effectiveness of the tariff must be distinguished from the effective date of the IA rate as specified in the tariff. The language of the Act is said merely to require filing of the tariff within 10 days. This filing requirement allegedly cannot be converted into a limitation on a member's right to give voluntary notice of more than 10 days. Thus, it is contended that an IA proponent can specify an effective date of more than 10 days and that this does not conflict with the requirement that the conference file the tariff within 10 days. Finally, some comments argue that the Proposed Rule would conflict with the minimum 30-day notice requirement of section 8(d) if the independent action rate is a new or increased rate.[1] The comments conclude that the Commission may not prevent, or compel a conference to prevent, a member line from independently and unilaterally giving more that 10 days' notice, cancelling IA whether effective or pending, or extending the effective date of a pending IA.

Second, some conference comments contend that the legislative history makes clear that Congress intended only to place a limit on the maximum number-of-days notice which a conference could require a member line to give. They argue that the legislative history speaks only in terms of the maximum notice that may be required, and does not prohibit additional voluntary notice. It is also argued that if Congress had intended to impose such a requirement, it would have established minimum and maximum time periods.

Third, conference comments argue that the policy of the Act favors allowing carriers the freedom to structure their own affairs. In keeping with this policy, member lines should be allowed to provide longer notice.

Fourth, conference comments argue that the prohibition on voluntary notice of more than 10 days is unworkable and unneeded. Several conferences point out that the Proposed Rule could be circumvented in various ways. A member considering independent action could: (1) Announce an intended IA in advance of formal notice and discuss, withdraw or compromise it; (2) docket a rate proposal and give formal notice of IA only after the proposal is rejected by the conference; or (3) give notice of IA and then withdraw it prior to effectiveness and re-notice the IA. Another comment argues that a conference could completely disregard a notice given 11 days prior to the effective date under the Proposed Rule.

Fifth, some conference comments argue that there are positive benefits to be obtained from a rule which would allow voluntary notice of more than 10 days. It is argued that such voluntary notice would enhance communication among members which would in turn

[1] Section 8(d), 46 U.S.C. app. 1707(d), provides:

No new or initial rate or change in an existing rate that results in an increased cost to the shipper may become effective earlier than 30 days after filing with the Commission. The Commission, for good cause, may allow such a new or initial rate or change to become effective in less than 30 days. A change in an existing rate that results in a decreased cost to the shipper may become effective upon publication and filing with the Commission.

The comments, in effect, argue that, if the Proposed Rule requires effectiveness of an IA rate within 10 days of filing, there would be a potential conflict with the 30-day notice requirement of section 8(d) in the case of new or increased rates.

support collective ratemaking and thereby promote rate stability. It is also stated that such voluntary notice would enable conference members to meet outside competitors' rates well in advance and allow time to take a possible second IA to meet outside competition.

Sixth, three conference comments contend that contract law permits a party that is required to give a specific notice to voluntarily give more notice than that required by the contract.

Seventh, one comment argues that the legal construction generally given to statutory provisions and agency rules requiring a notice period of a certain number of days supports voluntary additional notice. This comment argues that none of these statutes or rules prohibits the person bearing the notice burden from giving additional notice.

Eighth, two comments argue that the Proposed Rule is inconsistent with the Commission's previous interpretation of notice requirements made in the Final Rule issued in Docket No. 84-26, *Rules Governing Agreements By Ocean Common Carriers And Other Persons Subject To The Shipping Act of 1984*, 49 FR 45320 (November 15, 1984). There, the comments contend, the Commission recognized the right to give more than 10 days' notice by deleting an absolute 10-day limit from its interim rule.

A 10-day maximum notice requirement is consistent with section 5(b)(8) of the Act and shall be retained in the Final Rule. Section 5(b)(8) of the Act establish the mechanism by which independent decisions regarding tariffed price or service items may be made within the structure of the conference system. Section 5(b)(8) sets forth statutory requirements regarding notice, waiting period, conference filing obligations and effectiveness of IA items. These requirements affect both the collective action of the conference and the individual action of a conference member taking IA. The language of section 5(b)(8) is clear. "Each conference agreement must—(8) provide that any member of the conference may take independent action . . . upon not more than 10 calendar days' notice to the conference. . . ." This language requires each conference agreement to contain such a provision which establishes a maximum waiting period following notice *of not more than* 10 calendar days. The conference is then required to ". . . include the new rate or service item in its tariff for use by that member *effective* no later than 10 calendar days after receipt of the notice (emphasis added)." This language not only obligates the conference to *file* the IA item in the conference tariff after receiving notice, but further specifies when the IA item shall become *effective*. This limit applies both to the conference and the individual member taking IA. Neither the conference nor the IA proponent may set an effective date beyond 10 calendar days. The language of section 5(b)(8), when read in its entirety, establishes a clear, certain, and predictable mechanism governing independent action which includes a 10 calendar day limit on IA notice. Once formal notice of independent action has been given, the Act establishes a definite scheme for filing of the IA item in the conference tariff and effectiveness of the IA item.

The legislative history, to the extent that it addresses the question of notice, waiting period and effective date, is not inconsistent with and in some instances supports the interpretation of section 5(b)(8) taken in the Final Rule. The Conference Report, for example, stated that:

> The conferees agree that the notice period to be given to the conference before a member may take independent action cannot be more than ten calendar days. The House recedes from a provision that would have limited the notice period to 2 working days for independent action; the Senate recedes from a provision that would have limited independent action to certain trades and only when a loyalty contract is in effect.

H.R. Rep. No. 98-600, 98th Cong., 2d Sess. 29 (1984). Similarly, the House Committee on the Judiciary stated that the bill "". . . requires all conferences to permit independent action upon a maximum of ten days' notice to the conference." H.R. Rep. No. 98-53, Part 2, 98th Cong., 1st Sess. 30 (1983).

Moreover, as the legislative history acknowledges, the proper length of the waiting period was a matter of dispute:

> The proper length of the waiting period has been a matter of some dispute. The chemical manufacturers advocate no waiting period, or a maximum of 48 hours; Sea-Land Industries argues that conferences need at least ten days; other carrier representatives believe a still longer period is necessary to allow conference members to meet before the rate takes effect. As approved by the Committee, the conference may shorten, but cannot lengthen, the ten-day notice period. While some carriers preferred a longer period, the Committee believes some concessions are warranted in the interest of a flexibility [sic] pricing mechanism that could significantly aid this nation's export performance.

H.R. Rep. No. 98-53, Part 2, 98th Cong., 1st Sess. 27 (1983). The 10-day waiting period thus represents a compromise between shipper interests which had advocated no waiting period or 48-hour notice and some carrier interests which had advocated a longer waiting period. Moreover, a 10-day ceiling was imposed so that there would be more pricing flexibility for the benefit of U.S. shippers and exporters. A shorter waiting period before a rate or service item becomes effective also contributes to the stated intention to give U.S. shippers ". . . greater flexibility in meeting price competition from foreign shippers and to enable them to respond more quickly to market opportunities." H.R. Rep. No. 98-53, Part 1, 98th Cong., 1st Sess. 31 (1983).

Although not directly addressing the question of voluntary notice, the extensive discussion in the legislative history of the appropriate period of notice would appear to have little value if a member line could voluntarily give more than 10 days' notice. Similarly, the compromise between carrier and shipper interests would appear to be disturbed if carrier members could voluntarily provide more notice. As noted above, the Conference Report states that the Act provides for a ". . . strong requirement of independent action with a *limited notice period* (emphasis added)." H.R. Rep. No. 98-600, 98th Cong., 2d Sess. 33-34 (1984). The Final Rule implements the intended purpose of section 5(b)(8) by assuring that shippers will have the benefit of IA rates that become effective within 10 days after notice. The Final Rule also reduces the potential danger that, by allowing voluntary notice in excess of 10 days, conference members might become participants in implicit understandings in which carriers would always "voluntarily" give more than 10 days' advance notice of independent action.

The various objections raised by the conference comments do not warrant a change in this provision of the Proposed Rule. The alleged loopholes in the Proposed Rule which would allow effectively for longer periods of notice do not in any way undermine the purpose or value of a maximum 10-day requirement. The Proposed Rule was not intended to preclude advance discussions of possible independent actions or other rate actions or considerations that might be undertaken prior to formal notice. In fact, the availability of these procedures indicates that conference flexibility in considering IA proposals is not unduly impaired. Moreover, the Proposed Rule does not prevent an individual carrier that has given notice of IA from withdrawing the IA prior to its effectiveness. In this regard, the alleged positive benefits of allowing voluntary notice of more than 10 days (*i.e.*, better communications, conference stability, etc.) still would be largely available under various pre-formal notice

BEST COPY AVAILABLE

VOL 51 ISS 83 APR 30 1986 UMI

procedures. The Rule does ensure, however, that once formal notice is given, and unless withdrawn by the IA proponent, the filing of the tariff and effectiveness of the IA rate will occur in a predictable and certain manner.

Nor does the alleged inconsistency of the Proposed Rule with section 8(d) of the Act constitute a barrier to the issuance of a Final Rule precluding voluntary notice in excess of 10 days. The Final Rule has been harmonized with section 8(d) by expressly recognizing that new or increased rates are subject to the requirements of section 580.10(a)(2), 46 CFR 580.10(a)(2), of the Commission's tariff rules. Presumably, such instances would be rare because the vast majority of independent actions are rate decreases. In this regard it should be noted that at one point H.R. 1878 expressly provided that independent action would apply only to an action ". . . that results in a decreased cost to a shipper . . . ." The accompanying Committee Report noted that: "Independent action must be limited to decreases in rates." H.R. Rep. No. 98–53, Part 2, 98th Cong., 1st Sess. 30 (1983). Although this language did not remain in the legislation which became law, it would appear to be consistent with the Act to allow IA on any tariffed rate or service item, including rate increases, but to make IA's which increase rates subject to tariff filing requirements. The approach also seems appropriate inasmuch as both section 5(b)(8) and section 8(d) are provisions of the Act which are intended to benefit shippers. The Final Rule reconciles the requirements of both provisions.

Neither the principles of contract law nor the construction given to notice periods in other statutes or agency rules are controlling in this instance. Section 5(b)(8) sets statutory limits on the waiting period before tariff filing and on rate effectiveness which apply both to the conference and the individual member.

Finally, the Proposed Rule is not inconsistent with the Commission's previous interpretation of notice requirements made in Docket No. 84–26, *Rules Governing Agreements by Ocean Common Carriers and Other Persons Subject To The Shipping Act of 1984*, 49 FR 45320 (November 15, 1984), as alleged in some comments. In that proceeding, the Commission ultimately deleted the model independent action provision which had been in effect in the interim rule issued under the 1984 Act. *See* 46 CFR 572.801(e). The Commission retained unchanged § 572.502(a)(4) which specified the content of the independent action article of conference agreements. In addressing the comments to § 572.502(a)(4), the Commission stated:

> Section 572.502(a)(4) requires that conference agreements specify its (sic) independent action procedures. Comment 34 proposes that this section be revised to permit: (1) independent action procedures which allow for the exercise of such action on less than 10 calendar days' notice; and (2) a conference member to independently elect to provide more than 10 calendar days' notice of its intention to exercise independent action.
>
> Section 572.502(a)(4) tracks the language of section 5(b)(8) of the Act which, in relevant part, provides that conference agreement independent action provisions may not impose a notice period of ". . . more than 10 calendar days . . ." for the exercise of independent action. The revisions suggested by Comment 34 are unnecessary because their intended purpose is presently being served by section 572.502(a)(4). Therefore, no change to this section has been made.
>
> 49 FR 45335.

One comment relies upon this discussion as support for the contention that the Commission has previously interpreted section 5(b)(8) of the Act to allow for voluntary notice of more than 10 days. This reliance is misplaced. Certainly nothing in the present rule itself (§ 572.502(a)(4)) in any way interprets section 5(b)(8) as allowing for voluntary notice of more than 10 days. Moreover, the accompanying discussion referred to above was intended merely to indicate that further changes in § 572.502(a)(4) were unnecessary inasmuch as conferences would be permitted to draft their own independent action provisions in accordance with section 5(b)(8) of the Act. The discussion did not expressly authorize voluntary notice of more than 10 days. To the extent that that discussion may have left any ambiguity on this issue, it is clarified by the Final Rule issued in this proceeding.

As indicated in the Notice of Proposed Rulemaking, § 572.502(a)(4)(ii) is intended to address provisions in conference agreements which are stated in terms of a minimum period of notice to the conference. An example of such a provision would be one which states that a conference member may take independent action "upon not less than 10 calendar days' notice to the conference." Such a provision requires a minimum period of notice but leaves open the possibility that a member line taking independent action may voluntarily provide notice which exceeds the required minimum, including notice in excess of 10 days. Such conference provisions which only establish a minimum notice period are prohibited by the Final Rule. The Final Rule permits a conference to provide for a fixed period of notice not in excess of 10 calendar days, or a range of notice provided that the maximum permissible notice does not exceed 10 calendar days.

3. Section 572.502(a)(4)(iii)—Single Notice

Section 572.502(a)(4)(iii) of the Proposed Rule states that an IA proponent may only be required to give a single notice to a "conference official" or "designated representative." The Proposed Rule would codify by rule the Commission's established policy with regard to multiple notice provisions. Although not expressly stated, this section does not preclude an IA proponent from voluntarily giving notice to the other parties to the agreement.

DOJ contends that this section of the Proposed Rule warrants adoption because it prohibits a procedural obstacle to independent action that is inconsistent with the statutory language which requires notice "to the conference." CMA supports this section and states that the statute allows only for single notice.

Relying on the statutory definition of the term "conference," 46 U.S.C. app. 1702(7), four conference comments argue that the individual members of the conference are "the conference" and that a requirement of notice to each member therefore is permissible.

Two comments contend that the Act does not prohibit a conference from requiring direct notice to each conference member, provided that the conference does not refuse to publish an independent action in a tariff or otherwise withhold the right of independent action if the member fails to notify other members as well as the conference secretariat. Another comment adds that a multiple notice requirement is permissible provided that the notice to all members does not extend the notice period.

Other comments contend that: (1) Multiple notice imposes little if any burden on the IA proponent; (2) there is no evidence that multiple notice would deter IA; (3) many rate agreements operate without a secretariat and depend on the initiating party to communicate with all other participants; and (4) notice to all other members serves a legitimate commercial purpose by assuring that other members have a reasonable period of time to decide whether to exercise follow-up IA. Finally, two comments submitted by carrier interests take the position that the Act does prohibit a conference from requiring a member to give more than one notice, but does not preclude a member from voluntarily doing so.

Section 5(b)(8) of the Act requires an IA proponent to provide notice "to the conference." the Act's definition of "conference," 46 U.S.C. app. 1702(7), states:

> "conference" means an association of ocean common carriers permitted, pursuant to an approved or effective agreement, to engage in concerted activity and to utilize a common tariff; but the term does not include a joint service, consortium, pooling, sailing, or transshipment arrangement.

This definition does not support the argument advanced in several comments that the conference is merely the sum of its members and therefore notice to each member may be required. Rather the definition makes clear that the conference is itself a distinct entity, namely an "association of ocean common carriers." It is the single entity, i.e. "association," to whom notice must be given. Section 5(b)(8) provides that "the conference" will include the new rate or service item in its tariff. Normally this is accomplished by the conference office or secretariat. The filing of the IA tariff item is not the responsibility of the other member lines. If there is no central conference office, then one member could be designated to file the tariff.

Other comments contend that a conference may require multiple notice as long as this requirement does not prevent or delay the publication of the IA item in the conference tariff. Such an interpretation, in addition to again ignoring that the Act speaks in terms of notice "to the conference," also, as a practical matter, lays a heavy collateral burden on the taking of IA since failure to provide multiple notice still would constitute a breach of the agreement in the view of these comments. Finally, it should be noted that the Proposed Rule does not preclude voluntary notice to other conference members. Thus, the alleged benefits of multiple notice still might be available through voluntary notice to the other members.

Section 572.502(a)(4)(iii) also requires each conference agreement to indicate which conference official or single designated representative is to receive the IA notice. One comment suggests that this requirement be modified to allow the conference to designate an office rather than a particular person. Another comment recommends that, if this requirement is retained, it be modified to take into account conferences which conduct ratemaking by sections and to allow notice to the section.

These suggested changes may be accommodated without imposing any additional burden on the IA proponent and may facilitate the giving of IA notice. It is therefore appropriate to amend this section to allow a conference to designate a conference official, single designated representative, or conference office as the recipient of the IA notice. As discussed above, a new paragraph allowing for notice to the ratemaking section in lieu of notice to the overall conference would address the concerns of such conferences where ratemaking is by section.

Finally, it should be noted that § 572.404 of the Commission's rules, 46 CFR 572.404, allows for a waiver of any of the requirements of § 572.502 upon a showing of good cause. A waiver of the single notice requirement might be available, for example, to a conference with no formal administrative structure for receiving notice or to a conference made up of only a few lines.

4. Section 572.502(a)(4)(iv)—Mandatory Meetings, Etc.

Section 572.502(a)(4)(iv) of the Proposed Rule prohibits a conference from requiring attendance at conference meetings, submission of information other than that necessary to accomplish tariff filing, or compliance with any other procedures for the purpose of explaining, justifying, or compromising the proposed independent action. This section would codify current Commission policy in this area.

DOJ supports this section of the Proposed Rule and argues that such meeting, informational, or procedural requirements should be prohibited because they encourage intimidation, harassment, and coercion of carriers who attempt to take IA. CMA argues that such mandatory requirements should be prohibited because the Act provides for independent action, not action that must be discussed and considered collectively.

Two conference comments argue that the Act does not prohibit a requirement of mandatory meetings. TWRA, for example, states: "It is permissible . . . to require . . . meetings and even to treat failure to comply as a breach, so long as the IA is published as noticed within 10 days." TWRA and PNAC argue that the conference also may require additional information or data so long as failure to comply cannot be used as a basis for refusing to publish a tariff. Another comment argues that the conference may require a statement of the reasons motivating or underlying the independent action. Finally, one comment argues that conferences should be permitted to require a "post-IA exercise" explanation of the IA.

Several other conferences express no objection to this paragraph provided that it is clarified that voluntary meetings, voluntary submission of additional information or data, and voluntary procedures to explain or justify independent action are not precluded.

The argument that mandatory requirements beyond notice to the conference may be imposed upon an IA proponent, provided that the conference fulfills its filing obligation, is without merit. Simply because a requirement is not made a pre-condition to filing IA does not alter the fact that it places an obligation on the IA proponent once the proponent takes IA. Mandatory requirements which are absolute pre-conditions to the taking of IA are, of course, more offensive. But whenever the taking of IA means that the proponent must meet some other requirement, sometimes even at risk of violating the conference agreement if not done, that provision has gone beyond the permissible limits of section 5(b)(8) of the Act inasmuch as it may burden the use of independent action.

The Act merely requires an IA proponent to give notice. Once notice is given, the conference must carry out the ministerial task of tariff filing. An IA proponent has no other obligations under the Act. Any *mandatory* requirement beyond notice is impermissible. As some of the comments candidly acknowledge, failure to meet these conference-imposed mandatory requirements would be a breach of the agreement. Such a breach would presumably subject the IA proponent to penalties under the terms of the agreement, a circumstance which would clearly burden the taking of independent action. Therefore, any mandatory requirements, whether meetings, information, or procedures, appear to be prohibited under the Act. This prohibition is clarified by the Proposed Rule. Even post-IA *mandatory* explanations, although arguably less burdensome, are impermissible.

The Proposed Rule does not preclude *voluntary* attendance at meetings, submission of information, or observance of procedures. Such provisions do not, in themselves, burden the taking of independent action. There does not appear to be any reason at this time to prohibit IA proponents who wish to *voluntarily* accommodate the conference or its members from doing so.

5. Section 572.502(a)(4)(v)—Following IA

Section 572.502(a)(4)(v) of the Proposed Rule incorporates the

VOL 51 ISS 83 AP 30 1986 UMI

requirement under the Act that the conference file the IA item in the conference tariff for use by the member. It also provides for following IA by other members who wish to adopt an IA item as their own.

Several comments seek clarifications of this provision. One suggests that the language of this provision be modified to account for conferences in which ratemaking is done by sections. A similar change has been considered in connection with earlier paragraphs of the Proposed Rule and shall be accommodated here through the paragraph which allows for notice to the section in such conferences.

Several comments suggest that the Final Rule expressly state that an IA proposal may be amended, postponed, or cancelled during the notice period and prior to its effectiveness. The Proposed Rule did not preclude such action by an IA proponent. Nor does the Final Rule.

Finally, one comment states that the Final Rule should protect follow-up independent action by providing that a following IA continues to remain in effect after the original IA is withdrawn prior to its effective date unless the conference is instructed otherwise. Whatever the merit of this comment, such a provision was not put forth in the Proposed Rule and would appear to be beyond the scope of this rulemaking proceeding. In addition, this issue is currently being addressed in Commission Docket No. 86–3, *Modifications to the Trans-Pacific Freight Conference of Japan Agreement, et al.*

6. Section 572.502(a)(4)(vi)—Compliance

Section 572.502(a)(4)(vi) of the Proposed Rule provides for immediate compliance with a Final Rule by all new conferences and allows 90 days after effectiveness for compliance by other conferences.

One conference states that it needs 180 days to accomplish the changes which might be required by the Proposed Rule and requests that that rule allow the period of time for compliance.

It would appear that 90 days is not an unreasonable period of time in which to achieve compliance with the Final Rule. Indeed, only one conference expressed any difficulty with this provision. Therefore, a change in this section is not deemed necessary.

7. Section 572.502(a)(4)(vii)—Rejection

Section 572.502(a)(4)(vii) provides that any agreement which does not comply with the requirements of this section shall be rejected pursuant to section 572.601.

One comment argues that this provision is inconsistent with paragraph (vi) and should be deleted. A number of other comments argue that this paragraph exceeds the Commission's rejection authority. These comments argue that the Commission can only reject an agreement because it failes to meet the express requirements of section 5(b) of the Act.

Section 5(b) states that each conference agreement *must, inter alia,* provide a member line the right of independent action or not more than 10 days' notice. The Proposed Rule would prohibit only those provisions which, on their face, fail to comply with one of the requirements a conference agreement filed pursuant to section 5 must meet if it is to be made effective under section 6 and granted antitrust immunity under section 7 of the Act. Accordingly, this appears to be a proper use of the Commission's rejection authority and shall be retained in the Final Rule.

8. Section 572.502(a)(4)(viii)—Ratemaking Section

Section 572.502(a)(4)(viii) provides that, if ratemaking is done by sections within a conference, any notice required by the Final Rule may be to the section involved. This is a new paragraph which accommodates a concern expressed in a conference comment as discussed above.

III. Conclusion

This Final Rule is intended to give full effect to section 5(b)(8) of the Act in accordance with the Act's guiding policies. The changes made in the Proposed Rule accommodate as fully as is consistent with the requirements of the Act certain concerns expressed in the comments. The key substantive provisions of the Proposed Rule, however, have been retained in the Final Rule.

The Federal Maritime Commission has determined that this rule is not a "major rule" as defined in Executive Order 12291, 46 FR 12193, February 27, 1981, because it will not result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effect on competition, employment, investment, productivity, innovations, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Chairman of the Commission certifies pursuant to section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 601, *et seq.*) that this Rule will not have a significant economic impact on a substantial number of small entities, including small businesses, small organizational units, and small governmental jurisdictions.

The collection of information requirements contained in this Final Rule have been approved by the Office of Management and Budget under provisions of the Paperwork Reduction Act of 1980 (P.L. 96–511) and have been assigned OMB Control Number 3072–0045.

List of Subjects in 46 CFR Part 572:

Administrative practice and procedure, Antitrust, Contracts, Maritime carriers, Rates and fares, Reporting and recordkeeping requirements.

PART 572—[AMENDED]

Therefore, pursuant to 5 U.S.C. 553 and sections 5, 6, and 17 of the Shipping Act of 1984 (46 U.S.C. app. 1704, 1705, 1716), Part 572 of Title 46, Code of Federal Regulations, is amended as follows:

1. The authority citation for Part 572 continues to read as follows:

Authority: 5 U.S.C. 553; 46 U.S.C. app. 1701–1707, 1708, 1710, 1712, 1714–1717.

2. Paragraph (a)(4) of § 572.502 is revised to read:

§ 572.502 Organization of conference and interconference agreements.

(a) * * *

(4) *Article 13—Independent action.*

(i) Each conference agreement shall specify the independent action procedures of the conference which shall provide that any conference member may take independent action on any rate or service item required to be filed in a tariff under section 8(a) of the Act upon not more than 10 calendar days' notice to the conference and shall otherwise be in conformance with section 5(b)(8) of the Act.

(ii) Each conference agreement that provides for a period of notice for independent action shall establish a fixed or maximum period of notice to the conference. A conference agreement shall not require or permit a conference member to give more than 10 calendar days' notice to the conference, except that in the case of a new or increased rate the notice period shall conform to the requirements of § 580.10(a)(2).

(iii) Each conference agreement shall indicate the conference official, single designated representative, or conference office to which notice of independent action is to be provided. A conference agreement shall not require notice of independent action to be given by the proposing member to the other parties to the agreement.

(iv) A conference agreement shall not require a member who proposes independent action to attend a conference meeting, to submit any further information other than that necessary to accomplish the filing of the independent tariff item, or to comply with any other procedure for the purpose of explaining, justifying, or compromising the proposed independent action.

(v) A conference agreement shall specify that any new rate or service item proposed by a member under independent action shall be included by the conference in its tariff for use by that member effective no later than 10 calendar days after receipt of the notice and by any other member that notifies the conference that it elects to adopt the independent rate or service item on or after its effective date.

(vi) All new conference agreements filed on or after the effective date of this section shall comply with the requirements of this section. All other conference agreements shall be modified to comply with the requirements of this section no later than 90 days from the effective date of this section.

(vii) Any new conference agreement or any modification to an existing conference agreement which does not comply with the requirements of this section shall be rejected pursuant to § 572.601 of this part.

(viii) If ratemaking is by sections within a conference, then any notice to the conference required by § 572.502(a)(4) may be made to the particular ratemaking section.

BILLING CODE 6730–01–M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 1

[FCC 86–153]

Practice and Procedure; Improvement of the Efficiency and Clarity of Informal Complaint Procedures and Requirements

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission has revised its procedures for handling informal complaints to reduce delay, improve processing efficiency, and clarify procedural requirements.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

EFFECTIVE DATE: May 30, 1986.

FOR FURTHER INFORMATION CONTACT: Norberta Yurawecz, Enforcement Division, Common Carrier Bureau, (202) 632–7553.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's order, adopted April 7, 1986, and released April 18, 1986.

The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Library (Room 639), 1919 M Street, Northwest, Washington, DC. The complete text of this decision may also be purchased from the Commission's Copy Contractor, International Transcription Service, (202) 857–3800, 2100 M Street, Northwest, Suite 140, Washington, DC 20037.

Summary of Order

1. This action revises § 1.713 and §§ 1.716–1.718 of the Commission's Rules, dealing with informal complaints, in order to promote more efficient processing of such matters. The revisions include direct service of responses upon complainants by the affected carrier, modification of the form for informal complaints to include complainant's telephone number and a description of the relief sought, elimination of the requirement that carriers file duplicate responses with the Commission, and specification of those circumstances under which complainants will be contacted by the Commission regarding its review and disposition of the matters raised.

2. These revisions will reduce delay in informing complaints of the results of the carrier's investigation, improve processing, and clarify and simplify the Commission's handling of informal complaints.

Ordering Clause

3. Accordingly, it is ordered that, effective May 30, 1986, §§ 1.713, 1.716, 1.717 and 1.718 of the Commission's Rules, 47 CFR 1.713, 1.716, 1.717 and 1.718, are amended as set forth below.

List of Subjects in 47 CFR Part 1

Administrative practice and procedure.

Federal Communications Commission.

William J. Tricarico,

Secretary.

PART 47—[AMENDED]

Part 1 of Title 47 of the Code of Federal Regulations is amended as follows:

1. The authority citation for Part 1 continues to read:

Authority: Secs. 4, 303, 48 Stat. 1066, 1082, as amended; 47 U.S.C. 154, 303.

§ 1.713 [Amended]

2. Section 1.713 is amended by removing the phrase "in duplicate".

3. Sections 1.716–1.718 are revised to read as follows:

Informal Complaints

§ 1.716 Form.

An informal complaint shall be in writing and should contain: (a) The name, address and telephone number of the complaint, (b) the name of the carrier against which the complaint is made, (c) a complete statement of the facts tending to show that such carrier did or omitted to do anything in contravention of the Communications Act, and (d) the specific relief of satisfaction sought.

§ 1.717 Procedure.

The Commission will forward informal complaints to the appropriate carrier for investigation. The carrier will, within such time as may be prescribed, advise the Commission in writing, with a copy to the complainant, of its satisfaction of the complaint or of its refusal or inability to do so. Where there are clear indications from the carrier's report or from other communications with the parties that the complaint has been satisfied, the Commission may, in its discretion, consider a complaint proceeding to be closed, without response to the complainant. In all other cases, the Commission will contact the complainant regarding its review and disposition of the matters raised. If the complainant is not satisfied by the carrier's response and the Commission's disposition, it may file a formal

VOL 51 ISS 83 AP 30 1986 UMI

complaint in accordance with § 1.721 below.

§ 1.718 Unacted-on informal complaints; formal complaints relating back to the filing dates of informal complaints.

When an informal complaint has not been satisfied pursuant to § 1.717, the complainant may file a formal complaint with this Commission in the form specified in § 1.721. Such filing will be deemed to relate back to the filing date of the informal complaint: Provided, that the formal complaint: (a) Is filed within 6 months from the date of the carrier's report, (b) makes reference to the date of the informal complaint, and (c) is based on the same cause of action as the informal complaint. If no formal complaint is filed within the 6-month period, the complainant will be deemed to have abandoned the unsatisfied informal complaint.

47 CFR Part 73

[MM Docket No. 85-110; RM-4776; RM-5069]

FM Broadcast Station in Willcox, AZ, et al.

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: Action taken herein substitutes FM Channel 275C1 for Channel 224A at Bayard, New Mexico and modifies the Class A license of Station KNFT–FM, in response to a petition filed by KNFT, Incorporated. In addition, Channel 224A is deleted at Silver City, New Mexico.

EFFECTIVE DATE: June 2, 1986.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Nancy V. Joyner, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 73

Radio broadcasting.

The authority citation for Part 73 continues to read:

Authority: Secs. 4 and 303, 48 Stat. 1066, as amended, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply secs. 301, 303, 307, 48 Stat. 1081, 1082, as amended, 1083, as amended, 47 U.S.C. 301, 303, 307. Other statutory and executive order provisions authorizing or interpreted or applied by specific sections are cited to text.

First Report and Order

In the matter of amendment of § 73.202(b), Table of Allotments, FM Broadcast Stations (Willcox, Arizona, *Silver City* [1] and *Bayard, New Mexico);* MM Docket No. 85–110, RM–4776, *RM–5069.*

Adopted: April 10, 1986.
Released: April 24, 1986.

By the Chief, Policy and Rules Division.

1. The Commission has under consideration the *Notice of Proposed Rule Making* herein, 50 FR 16112, published April 24, 1985, which proposed the substitution of FM Class C Channel 300 for Channel 252A at Willcox, Arizona and modification of the license of Station KWCX(FM) accordingly, in response to a petition filed by Rex K. Jensen ("Jensen"). In addition, a counterproposal was filed by KNFT, Incorporated ("KNFT"), licensee of Station KNFT–FM,[2] (Channel 224A), Bayard, New Mexico, requesting the substitution of Class C FM Channel 300 for Channel 224A at Bayard and modification of its license.[3]

2. Since the distance between Willcox and Bayard is approximately 142 kilometers, whereas 290 kilometers is required between Class C co-channels, KNFT's petition at Bayard was accepted as a counterproposal.[4] However, KNFT subsequently modified its request to specify Channel 275C1 in lieu of Channel 300 to avoid a conflict with Willcox. In the event other interests in the Bayard proposal were expressed, KNFT provided information reflecting that several other Class C1 channels could be alloted (See, *Modification of FM and TV Station Licenses,* 98 FCC 2d 916 (1984).)

3. Both Willcox, Arizona and Bayard, New Mexico are within 320 kilometers of the common U.S.–Mexico border, thus necessitating concurrence by the Mexican government in the proposals. At this time the Commission has obtained such approval with respect to Bayard. Therefore, and in the interest of expediting service to the Bayard area, we are severing the Bayard proposal since it no longer conflicts with the Willcox proposal. No oppositions nor other expressions of interest in the Bayard proposal were received.

4. KNFT's proposal is premised on its desire to increase service to the public by expanding its listening area to include a greater portion of Grant County which it describes as "fast growing" having increased approximately 19% during the last census period.

5. We believe the public interest would benefit from the KNFT proposal since it could provide Bayard, New Mexico with its first wide-coverage area FM station. A staff engineering study reveals that Channel 275C1 may be allotted to Bayard at the present site of Station KNFT(FM), in conformity with § 73.207(b) of the Commission's Rules.

6. Accordingly, pursuant to the provisions of sections 5(i), 5(c)(1), 303 (g) and (r) and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is ordered, that effective June 2, 1986, the FM Table of Allotments, § 73.202(b) is amended with respect to the communities listed below, as follows:

City	Channel No.
Silver City, NM	233A
Bayard, NM	275C1

7. It is further ordered, That, pursuant to section 316(a) of the Communications Act of 1934, as amended, the license of KNFT, Incorporated for Station KNFT-FM, Bayard, New Mexico, is modified effective June 2, 1986, to specify operation on Channel 275C1 in lieu of Channel 224A. The license modification for Station KNFT-FM is subject to the following conditions:

(a) The licensee shall submit to the Commission a minor change application for a construction permit (Form 301), specifying the new facilities;

(b) Upon grant of the construction permit, program tests may be conducted in accordance with § 73.1620;

(c) Nothing contained herein shall be construed to authorize a change in transmitter location or to avoid the necessity of filing an environmental impact statement pursuant to § 1.1301 of the Commission's Rules.

8. It is further ordered, that the Secretary of the Commission shall send a copy of this Order by certified mail, return receipt requested, to KNFT, Incorporated, Highway 180 East, Silver City, New Mexico 88061.

9. For further information concerning the above, contact Nancy V. Joyner, Mass Media Bureau, (202) 634–6530.

[1] These communities have been added to the caption.

[2] KNFT is also the licensee of Station KNFT (AM), Bayard.

[3] Channel 224A is allotted to Silver City, New Mexico, and licensed to Bayard under the former "10 mile" rule (Section 73.208(b)).

[4] Public Notice of the counterproposal was given on June 20, 1985, Report No. 1523

Federal Communications Commission.

Report and Order (Proceeding Terminated)

In the matter of amendment of § 73.202(b) Table of Allotments, FM Broadcast Stations (St. George, Utah); MM Docket No. 85–142, RM–4775.

Adopted: April 9, 1986.
Released: April 23, 1986.

By the Chief, Policy and Rules Division.

1. The Commission considers herein the *Notice of Proposed Rule Making,* 50 FR 23731, published June 5, 1985, proposing the allotment of Class C Channel 259 to St. George, Utah, as that community's second FM service. The *Notice* was issued in response to a petition filed by ESG Corporation ("petitioner"). Petitioner filed supporting comments and reply comments reaffirming its intention to apply for the channel. Simmons Family Inc., filed supporting comments stating its intention to apply for the channel.

2. The Commission believes that the public interest would be served by the allotment of Channel 259 to St. George, Utah, as that community's second FM channel. The channel can be allotted in compliance with the minimum distance separation requirements of § 73.207 of the Commission's Rules.

3. Accordingly, pursuant to the authority contained in sections 4(i), 5(c)(1), 303 (g) and (r) and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is ordered, that effective May 30, 1986, the FM Table of Allotments is amended with regard to the following community:

City	Channel No.
St. George, UT	228A, 259

4. The window period for filing applications will be open on June 2, 1986 and close on July 2, 1986.

5. It is further ordered, that this proceeding is terminated.

6. For further information concerning this proceeding, contact Patricia Rawlings, Mass Media Bureau, (202) 634–6530.

Federal Communication Commission.

Other statutory and executive order provisions authorizing or interpreted or applied by specific sections are cited to text.

Report and Order (Proceeding terminated)

In the matter of amendment of § 73.202(b), Table of Allotments, FM Broadcast Stations (Twisp, Washington); MM Docket No. 85–250, RM–4981.

Adopted: April 9, 1986.
Released: April 23, 1986.

By the Chief, Policy and Rules Division.

1. The Commission has before it for consideration the *Notice of Proposed Rule Making,* 50 FR 34520, published August 26, 1985, proposing the allotment of FM Channel 292A to Twisp, Washington, as that community's first FM channel, at the request of Broadcasters Northwest, Inc. Supporting comments and reply comments were filed by petitioner reaffirming its interest in the proposed channel.

2. Channel 292A can be allotted to Twisp, Washington in compliance with the minimum spacing requirements. Since Twisp is located 320 kilometers (200 miles) of the U.S.-Canadian border, concurrence from the Canadian government has been obtained.

3. We believe the public interest would be served by the allotment of Channel 292A to Twisp, as its first FM service. Accordingly, pursuant to the authority contained in sections 4(i), 5(c)(1), 303 (g) and (r) and 307(b) of the Communications Act of 1934, as amended, §§ 0.61, 0.204(b) and 0.282 of the Commission's Rules, it is ordered, that effective May 30, 1986, the FM Table of Allotments, § 73.202(b) of the Rules, is amended with respect to the following community:

City	Channel No.
Twisp, WA	292A

4. The window period for filing applications will open on June 2, 1986 and close on July 2, 1986.

5. It is further ordered that this proceeding is terminated.

6. For further information concerning this proceeding, contact Patricia Rawlings, Mass Media Bureau, (202) 634–6530.

Federal Communications Commission.

BILLING CODE 3810-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Final Rule To Determine the Sonora Chub To Be a Threatened Species and To Determine Its Critical Habitat

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The Service determines a fish, the Sonora chub (*Gila ditaenia*), to be a threatened species and determines its critical habitat under the authority contained in the Endangered Species Act of 1973, as amended. A special rule allowing take in accordance with applicable Arizona State laws and regulations is also included. The Sonora chub occurs in Santa Cruz County, Arizona, and in Sonora, Mexico. It is threatened by the possible introduction of exotic fishes and their parasites into its habitat, and by potential mining activities. It is particularly vulnerable to these threats because of its very limited range, and because of the intermittent nature of the stream. This rule implements Federal protection provided by the Endangered Species Act of 1973, as amended, for the Sonora chub.

DATES: The effective date of this rule is May 30, 1986.

ADDRESSES: The complete file for this rule is available for inspection during normal hours, by appointment, at the Region 2 Office of Endangered Species, U.S. Fish and Wildlife Service, 500 Gold Avenue, SW., Room 4000, Albuquerque, New Mexico 87103.

FOR FURTHER INFORMATION CONTACT: Mr. Gerald Burton, Endangered Species Biologist, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, New Mexico 87103 (505/766-3972 or FTS 474-3972).

SUPPLEMENTARY INFORMATION:

Background

The Sonora chub was first collected by E.A. Mearns in 1893 from Sycamore Creek, Arizona. It was described from fish collected by R.G. Miller (1945) from the Rio Magdalena near the town of La Casita in Sonora, Mexico. This fish is a member of the minnow family and is generally less than 125 millimeters (5 inches) in total length. It is a moderately chubby, dark colored fish, with two prominent black lateral bands on the sides and a dark oval spot at the base of the tail. In breeding males, a red coloration develops at the bases of the lower fins and some orange coloration is present on the belly. The Sonora chub is primarily a pool dweller, but is highly secretive and little is known of its behavior and habitat preferences (Minckley, 1973).

In the United States, the Sonora chub occurs in Sycamore Canyon in Sycamore Creek proper, Yank's Spring, and in two of its tributaries, located on the Coronado National Forest northwest of Nogales, Santa Cruz County, Arizona. The tributaries include the lower 1.25 stream miles (sm) of Penasco Creek, and the lower .25 sm of an unnamed stream in an unnamed canyon that enters Sycamore Canyon from the west in the NW¼ of Section 23, T. 23 S., R. 11 E. (Bell, 1984). Yank's Spring is a perennial spring which has been impounded in a concrete tank for many years. Sycamore Creek starts to flow about .5 mile below Yank's Spring and flows downstream 3.7 miles (USDA, 1982) in a series of pools and small riffles over a bedrock and rubble substrate. It is intermittent during part of the year, at which time it is a series of pools of varying depth (L. Miller, 1949; Brooks, 1982). When intermittent, pools are maintained in shaded areas against cut banks or the canyon walls by underground flow Minckley, 1973). During years of heavy rainfall, water does reach to the International Border, some 5 miles downstream from Yank's Spring, at which time the Sonora chub presumably extends its range to that boundary, if not beyond. Pensaco Creek is a west-flowing tributary to Sycamore Creek. It drains a large portion of the east side of the Sycamore Creek watershed, but has only intermittent flow. The chub is found in the lower 1.25 sm of the creek in pools in bedrock or pools maintained by underground flow (Bell, 1984). The unnamed stream channel supports three perennial bedrock pools in the .25 sm just above its confluence with Sycamore Creek. The lower two pools support large numbers of Sonora chubs (Bell, 1984).

Available life history information is limited to food habit observations based on a few individuals and to spawning observations based on the presence of young in various collections (Minckley, 1973). Information on the riparian habitat is provided in earlier works by R.G. Miller (1945), L. Miller (1949), and Goodding (1961). Recent water quality and habitat information is presented by Brooks (1982) in a brief characterization of the physio-chemical features of Sycamore Creek. This information is summarized in the 1983 status report on *Gila ditaenia* (Minckley, 1983).

Current threats to the United States population include the stocking of exotic fishes and their associated parasites, and possible uranium mining activities.

In the State of Sonora, Mexico, this fish is known from very few localities, and nothing is known about its biology. The 1940 type locality was the Rio Magdalena near La Casita, Sonora, Mexico. At that time the Rio Magdalena was a clear stream 4 to 5 feet wide, about 1 foot deep, and with a fairly swift current over a bottom of sand and gravel. The principal vegetation was watercress, found in backwaters along the stream (R.G. Miller, 1945). It is not known if habitat for *Gila ditaenia* still exists at this location, or if so, its condition. *Gila ditaenia* has been collected as recently as 1981 from the Rio Magdalena drainage at Campo Carretero and Cienega La Atascosa (D. Hendrickson, Arizona State University, pers. comm., 1983; and in press). These collections indicate the possibility of hybridization between *Gila ditaenia* and *Gila purpurea*, the Yaqui chub, in at least one locality.

In November 1982, the U.S. Fish and Wildlife Service contracted Mr. C.O. Minckley to prepare a report on the status of *Gila ditaenia*. Minckley recommended threatened status with critical habitat because of threats to the species from the introduction of exotic fishes and their associated parasites, and potential mining activities; and the fact that this fish occurs in a very limited area in Arizona and has an uncertain status in Mexico.

Gila ditaenia was included on the Service's December 30, 1982, Vertebrate Notice of Review (47 FR 58454) in category 2. Category 2 includes those taxa that are thought to possibly warrant listing as threatened or endangered, but for which more information is needed to determine the status of the species and to support listing. That information is now available for *Gila ditaenia* in a status report (Minckley, 1983). On June 6, 1984, the Service published a proposed rule to determine *Gila ditaenia* to be a threatened species with critical habitat (49 FR 23402).

Gila ditaenia is listed by the State of Arizona as a threatened species, Group 3 (Arizona Game and Fish Commission, 1982), which comprises those species ". . . whose continued presence in Arizona could be in jeopardy in the foreseeable future."

Summary of Comments and Recommendations

In the June 6, 1984, proposed rule (49 FR 23402) and associated notifications, all interested parties were requested to submit factual reports or information that might contribute to the development of a final rule. Appropriate State agencies, county governments, Federal agencies, scientific organizations, and other interested parties were contacted and requested to comment. A newspaper notice was published in the *The Nogales Herold* in Nogales, Arizona, on July 3, 1984, that invited general public comment. Nine comments, all in support of the proposal, were received and are discussed below. No public hearing was requested or held.

The U.S. Forest Service supported the listing of *Gila ditaenia* as threatened and the designation of critical habitat. However, it recommended that the lower 1.25 sm of Penasco Creek, a small tributary of Sycamore Creek, be added to the critical habitat. It also requested that a recovery team be appointed as soon as possible. In light of additional biological information furnished by the Forest Service, the Fish and Wildlife Service agrees that Penasco Creek should be added to the designated critical habitat. This has been done in this final rule.

Letters in support of the listing and designation of critical habitat were received from the Arizona Game and Fish Department, the Board of Supervisors of Santa Cruz County, the International Union for Conservation of Nature and Natural Resources (IUCN), the Yuma Audubon Society, the American Society of Icthyologists and Herpetologists, the Desert Fishes Council, and C.O. Minckley. In addition, the IUCN stated that if will include this species in the forthcoming edition of the IUCN Fish Red Data Book, probably in the vulnerable category.

Summary of Factors Affecting the Species

After a thorough review and consideration of all information available, the Service has determined that the Sonora chub should be classified as a threatened species. Procedures found at section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and regulations promulgated to implement the listing provisions of the Act (codified at 50 CFR Part 424) were followed. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to the Sonora chub are as follows:

A. *The present or threatened destruction, modification, or curtailment of its habitat or range.* Known present and historic range of *Gila ditaenia* in the United States consists of Sycamore Creek, Yank's Spring, the lower 1.25 sm of Penasco Creek, and the lower .25 sm of an unnamed tributary stream entering Sycamore Creek from the west. All are located on the Coronado National Forest in Santa Cruz County, Arizona. Its very limited distribution makes this fish quite susceptible to any habitat disturbances, especially during periods when the stream flow is intermittent. Habitat disturbances that could be detrimental to the species are increased siltation and runoff subsequent to mining or other activities, depletion of the stream flow, and the introduction of manmade pollutants into the stream. It is quite possible that this species could be extirpated throughout its small U.S. range in a relatively short time by such habitat damage and loss (Minckley, 1983).

Sycamore Canyon at present remains in a basically unaltered state, and present impacts of human activities in the area are relatively minor. A portion of Sycamore Creek (4.75 sm), Penasco Creek, and an unnamed tributary of Sycamore Creek are contained within the Pajarito Wilderness Area. The remaining 1.5 sm of Sycamore Creek and the lower portion of the unnamed tributary containing the Sonora chub are also contained within the Goodding Research Natural Area, which is a special use designation of the U.S. Forest Service. This area is withdrawn from mineral entry and is closed to grazing. Recreation is limited to non-developed and dispersed uses. The canyons that contain critical habitat, however, do receive heavy visitor use. Yank's Spring is the site of a trailhead parking lot for visitors, but the spring has been impounded in a concrete tank for meny years and is resistant to habitat damage.

In addition to the Sonora chub, Sycamore Canyon supports several rare and unique plant and animal species. One of these, the Tarahumara frog, which is a candidate for Federal listing, experienced a catastrophic die-off in Sycamore Canyon in 1974 and has not been found there since. The factors causing its disappearance are not fully known.

At present no mining is occurring anywhere within the Sycamore Creek watershed and none is expected in the near future (R.B. Tippecannoic, U.S. Forest Service, pers. comm., 1983);

VOL 51 ISS 83 AP 30 1986 UMI

however, active mining is ongoing in California Gulch, just one watershed to the west. Exploration for uranium occurred in 1981 on the upper eastern slopes of the Sycamore drainage on mining claims occupying approximately 4 to 5 square miles. Uranium was found and the claims are being maintained; however, no active mining is presently planned there. The Sycamore Creek drainage contains valuable minerals, and the development of mining activity within the watershed would have the potential for severe adverse effects on *Gila ditaenia* through such activities as increased water demand and withdrawal, habitat disturbance, siltation, and pollution.

Although the canyon is included in a livestock grazing allotment, there is little direct effect on the Sonora chub habitat, due in part to steep, rocky streambank topography. Indirect effects of grazing, such as erosion and siltation, are minor at present, but could have significant effects on the Sonora chumb habitat if grazing were increased.

Very little is known about the habitat of *Gila ditaenia* in Mexico. Hendrickson (Arizona State University, pers. comm., 1983) noted that the habitat near Cienega La Atascosa was in good condition in 1981; however, there is no protection for habitat or species in Mexico and the current or proposed uses in the area are not fully known. There is irrigated agriculture along the river, but very little groundwater pumping seems to be occurring. The amount of land under cultivation, the amount of water diversion, the pollution, and the riparian and channel damage appear to have remained fairly constant in the past (G. Nabhan, University of Arizona, pers. comm., 1983).

B. *Overutilization for commercial, recreational, scientific, or educational purposes.* There is no indication that this species is overused for any of these purposes.

C. *Disease or predation.* Predation by introduced exotic fishes could prove disastrous for *Gila ditaenia*, leading to its extirpation in the United States. The introduction of exotic fishes, particularly game fish, into Sycamore Canyon would undoubtedly result in predation of the Sonora chub. Currently, predatory green sunfish occur in small numbers in the lower portions of Sycamore and Penasco Canyons; however, the extent of their impact is unknown. In 1983, mosquitofish were observed in an ephemeral pool in Penasco Canyon. The source of these fish was not determined and it is not known if they survived. The spread of mosquitofish into Penasco and Sycamore Canyons could be damaging to the Sonora chub since they are an aggressive predator. Both green sunfish and mosquitofish have been shown to be contributing factors in the decline of other southwestern native fishes. The adverse impacts of parasites, introduced along with exotic fishes, on other species of *Gila* have been documented (James, 1983; Minckley *et al.*, 1981; Wilson *et al.*, 1968) and would probably occur with *Gila ditaenia*.

D. *The inadequacy of existing regulatory mechanisms.* The State of Arizona lists this species under Group 3 of the "Threatened Native Wildlife in Arizona." Group 3 includes "Species or subspecies whose continued presence in Arizona could be in jeopardy in the foreseeable future. Serious threats to the occupied habitats have been identified and populations (a) have declined or (b) are limited to a few individuals in few locations" (AGFC, 1982). No protection of the habitat is included in such designation and no management plan exists for this species. The State of Arizona requires a scientific collecting permit for taking individuals of the Sonora chub. In Mexico no protection exists for either the species or its habitat.

E. *Other natural or manmade factors affecting its continued existence.* Although unlikely, the United States population could be extirpated by natural phenomena (drought), if the water supply for Sycamore Creek should fail. The possibility of this occurring is increased by human activities which are likely to occur in the area. Watershed disturbances within the basin, such as poor grazing practices, mining, roads, or ORV use, can contribute to erosion, lowering water tables, and disturbed runoff patterns, and may affect the amount of flow in Yank's Spring, Sycamore Creek, and Penasco Canyon. Direct manipulation of water within the basin, such as stock tank construction and groundwater pumping, could also affect the flows.

In Mexico, Hendrickson (pers. comm., 1983; and in press) found that *Gila purpurea*, the Yaqui chub, which is native to the drainages of the Rios Yaqui, Matape, and Sonora, is now present in the Rio Magdalena along with *Gila ditaenia*. His collections indicate that hybridization may be occurring between the two species in at least one location. Spread of *Gila purpurea* in the Rio Magdalena could result in extensive losses of *Gila ditaenia* through hybridization.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by this species in determining to make this rule final. Based on this evaluation, the preferred action is to list the Sonora chub as threatened with critical habitat. It was apparent that not listing this species would probably result in its becoming endangered in the foreseeable future because of:

(1) The small size of the U.S. population and its habitat and its resultant vulnerability to damage from a single or multiple sources,

(2) The potential for mineral development in the area, and

(3) The uncertain status of the Mexican population, its lack of any legal protection, and increasing water demand in its range. However, the status of the United States population of *Gila ditaenia* is presently stable, and at least some populations exist in Mexico. The U.S. population currently receives some protection through State regulations and by management policies of the U.S. Forest Service. Therefore, endangered status seems inappropriate.

Critical Habitat

Section 3 of the Act defines "critical habitat" as (i) the specific areas within the geographical area occupied by the species, at the time it is listed in accordance with the Act, on which are found those physical or biological features (I) essential to the conservation of the species and (II) that may require special management considerations or protection; and (ii) specific areas outside the geographic area occupied by the species at the time it is listed, upon a determination that such areas are essential for the conservation of the species.

Section 4(a)(3) of the Act requires that critical habitat be designated to the maximum extent prudent and determinable concurrently with the determination that a species is endangered or threatened. Critical habitat is designated for *Gila ditaenia* to include the entire area where the species is known to occur in the United States. This consists of Sycamore Creek, starting from and including Yank's Spring, downstream to the International Border with Mexico; plus the lower 1.25 miles of Penasco Creek, and the lower .25 miles of an unnamed stream that enters Sycamore Creek from the west in the NW ¼ of Section 23, T.23S., R.11E. in Santa Cruz County, Arizona. This critical habitat includes a 25 foot wide riparian area along each side of Sycamore and Penasco Creeks. This riparian zone is essential to the maintenance of the creek ecosystems and the stream channels, and thus to the conservation of the species. The riparian zone around the Yank's Spring has been removed from the critical habitat designation because the spring is impounded in a concrete tank and does not have a riparian zone. No riparian zone is designated for the unnamed stream because this portion of critical habitat consists of bedrock pools that are relatively unaffected by the riparian zone. All of the designated area is located within the Coronado National Forest.

Yank's Spring, Sycamore Creek, and two of its tributaries were chosen for critical habitat designation for the Sonora chub because they presently support the only U.S. population of this species. The area provides all of the ecological, behavioral, and physiological requirements necessary for the survival of this chub. The remaining portion of the range is in Mexico. Critical habitat is not designated in areas outside U.S. jurisdiction (50 CFR 424.12(h)).

Section 4(b)(8) of the Act requires, for any proposed or final regulation that designates critical habitat, a brief description and evaluation of those activities (public and private) that may adversely modify such habitat or may be affected by such designation. Activities in Sycamore Canyon during times of intermittent flow, such as mining activities, could be detrimental to the critical habitat. Any activities that would deplete the flow or would significantly alter the natural flow regime in Yank's Spring, the unnamed tributary, or Sycamore or Penasco Creeks, such as excessive groundwater pumping, impoundment, or water diversion, would adversely impact the critical habitat. Any activities that would extensively alter the channel morphology of Sycamore or Penasco Creeks, Yank's Spring, or the unnamed tributary, such as mining, excessive sedimentation, impoundment, or riparian destruction, would adversely impact the critical habitat. Any activities that would significantly alter the water chemistry of Yank's Spring, Sycamore or Penasco Creeks, or the unnamed tributary, such as release of chemical or biological pollutants at a point source or by dispersed release, would adversely impact the critical habitat. Additionally, the introduction of exotic fish may prove detrimental to the Sonora chub's critical habitat due to predation and to competition for food and space. Any parasites associated with such introduction would also be detrimental. As no Federal activities are currently planned for this area, critical habitat designation is not expected to cause an impact in the near future. If, in the future, activities are planned, the critical habitat of the Sonora chub would have to be considered in such planning.

Section 4(b)(2) of the Act requires the Service to consider economic and other impacts of designating a particular area as critical habitat. The Service has evaluated the proposed critical habitat designation for the Sonora chub, taking into consideration all additional comments received. The critical habitat, except Yank's Spring, is contained within a natural area and a wilderness area. Forest Service management of these areas is apparently compatible with the critical habitat designation. Livestock grazing is not expected to affect or be affected by the critical habitat designation since the steep topography of the critical habitat generally precludes grazing access. There are mining claims in the vicinity of the critical habitat; however, no mining activities are currently ongoing or planned within or in the vicinity of the critical habitat designation. Recreational activities in the vicinity of Yank's Spring are not expected to affect or be affected by the critical habitat designation because the spring is impounded in a concrete tank and is resistant to habitat damage. No information was brought forward on economic or other impacts which warranted adjusting the boundaries of the critical habitat designation. Additional biological information from the U.S. Forest Service, however, did warrant adjustment of the proposed critical habitat designation to include an additional 1.5 miles of tributary streams containing the Sonora chub. The additional area is entirely on U.S. Forest Service lands and no significant economic or other impacts are expected from the adjustment of the critical habitat designation.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages the results in conservation actions by other Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. Such actions are initiated by the Service following listing. The protection required of Federal agencies and the prohibitions against taking and harm are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR Part 402 and are now under revision (see proposal at 48 FR 29990; June 29, 1983). Section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of a listed species or to destroy or adversely modify its critical habitat. If a Federal activity may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service.

The only known United States population of the Sonora chub, and all critical habitat for the species, are located on the Coronado National Forest. Sycamore Canyon and the adjacent canyons containing critical habitat are fairly remote and approximately 1.5 miles of Sycamore Creek is included in a natural area and a wilderness area. Present management of these areas is compatible with the critical habitat designation. Therefore, apparently Federal activities are not expected to affect or be affected by the critical habitat designation.

The Act and its implementing regulations found at 50 CFR 17.21 and 17.31 set forth a series of general prohibitions and exceptions that apply to all threatened wildlife. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to take, import or export, ship in interstate commerce in the course of commercial activity, or sell or offer for sale in interstate or foreign commerce any listed species. It is also illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken illegally. Certain exceptions apply to agents of the Service and State conservation agencies.

Permits may be issued to carry out otherwise prohibited activities involving threatened animal species under certain circumstances. Regulations governing permits are at 50 CFR 17.22, 17.23, and 17.32. Such permits are available for scientific purposes, to enhance the propagation or survival of the species, and/or for incidental take in connection with otherwise lawful activities. For threatened species, there are also permits for zoological exhibition, educational purposes, or special purposes consistent with the purposes of

VOL 51 ISS 83 AP 30 1986 UMI

the Act. In some instances, permits may be issued during a specified period of time to relieve undue economic hardship that would be suffered if such relief were not available.

The above discussion generally applies to threatened species of fish or wildlife. However, the Secretary has discretion under section 4(d) of the Act to issue special regulations for a threatened species that are necessary and advisable for its conservation. *Gila ditaenia* is threatened primarily by habitat disturbance or alteration, not by intentional, direct taking of the species or by commercialization. Given this fact and the fact that the State currently regulates direct taking of the species through the requirement of State collecting permits, the Service has concluded that the State's collection permit system is more than adequate to protect the species from excessive taking, so long as taking is limited to: educational purposes, scientific purposes, the enhancement of propagation or survival of the species, zoological exhibition, and other conservation purposes consistent with the Endangered Species Act. A separate Federal permit system is not required to address the current threats to the species. Therefore, a special rule is issued that allows take to occur for the above-stated purposes without the need for a Federal permit if a State collecting permit is obtained and all other State wildlife conservation laws and regulations are satisfied. The special rule also acknowledges the fact that incidental take of the species by State-licensed recreational fishermen is not a significant threat to this species. In fact, angling is an unlikely method of capture of the species. Therefore, under this special rule such incidental take would not be a violation of the Act if the fishermen immediately returned the individual fish taken to its habitat. Any activities involving the taking of this species not otherwise enumerated in the special rule are prohibited. Without this special rule, all of the prohibitions of 50 CFR 17.31 would apply. This special rule will allow for more efficient management of the species, and thus will enhance the conservation of the species. For these reasons, the Service concludes that this regulation is necessary and advisable for the conservation of the Sonora chub.

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined by the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

Regulatory Flexibility Act and Executive Order 12291

The Department of the Interior has determined that designation of critical habitat for this species will not constitute a major action under Executive Order 12291 and certifies that this designation will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). No significant economic or other impacts are expected to result from the critical habitat designation. This conclusion is based on Forest Service management of recreational and other activities within the Coronado National Forest, the absence of any mining activities or plans to mine the claims within or in the vicinity of the critical habitat, and the unquantifiable benefits that may result from the critical habitat designation. In addition, no direct costs, enforcement costs, or information collection or recordkeeping requirements are imposed on small entities by this designation of critical habitat. These findings are based on a Determination of Effects that is available at the Region 2 Office of Endangered Species, U.S. Fish and Wildlife Service (See **ADDRESSES**).

Endangered and threatened wildlife, Fish, Marine mammals, Plants (agriculture).

Regulations Promulgation

PART 17—[AMENDED]

Accordingly, Part 17, Subchapter B of Chapter I, Title 50 of the Code of Federal Regulations, is amended as set forth below:

1. The authority citation for Part 17 continues to read as follows:

Authority: Pub. L. 93–205, 87 Stat. 884; Pub. L. 94–359, 90 Stat. 911; Pub. L. 95–632, 92 Stat. 3751; Pub. L. 96–159, 93 Stat. 1225; Pub. L. 97–304, 96 Stat. 1411 (16 U.S.C. 1531 *et seq.*).

2. Amend § 17.11(h) by adding the following, in alphabetical order under "Fishes," to the List of Endangered and Threatened Wildlife:

§ 17.11 Endangered and threatened wildlife.

* * * * *

(h) * * *

Species							
Common name	Scientific name	Historic range	Vertebrate population where endangered or threatened	Status	When listed	Critical habitat	Special rules
Fishes							
Chub, Sonora	*Gila ditaenia*	U.S.A. (AZ), Mexico	Entire	T	227	17.95(e)	17.44(o)

3. Add the following paragraph (o) as a special rule to § 17.44.

§ 17.44 Special rules—fishes.

* * * * *

(o) Sonora chub, *Gila ditaenia*.

(1) No person shall take the species, except in accordance with applicable State fish and wildlife conservation laws and regulations in the following instances: (i) For educational purposes, scientific purposes, the enhancement of propagation or survival of the species, zoological exhibition, and other conservation purposes consistent with the Act; or, (ii) incidental to State-permitted recreational fishing activities, provided that the individual fish taken is immediately returned to its habitat.

(2) Any violation of applicable State fish and wildlife conservation laws or regulations with respect to the taking of this species will also be a violation of the Endangered Species Act.

(3) No person shall possess, sell, deliver, carry, transport, ship, import, or export, by any means whatsoever, any such species taken in violation of these regulations or in violation of applicable State fish and wildlife conservation laws or regulations.

(4) It is unlawful for any person to attempt to commit, solicit another to commit, or cause to be committed, any offense defined in paragraphs (o) (1) through (3) of this section.

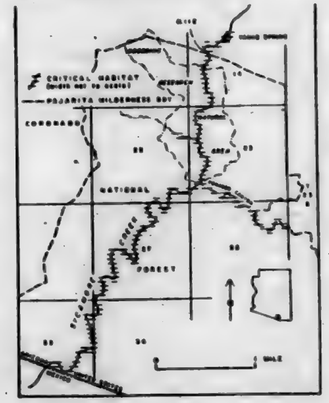
4. Amend § 17.95(e) by adding the critical habitat of the Sonora chub as follows (the position of the following critical habitat entry under § 17.95(e) will follow the same sequence as the species occurs in 17.11):

§ 17.95 Critical habitat—fish and wildlife.

(e) * * *

* * * * *

Sonora Chub (*Gila ditaenia*)



Arizona, Santa Cruz County. An area of land and water in the Coronado National Forest, consisting of the following:

1. Sycamore Creek, and a riparian zone 25 feet wide along each side of the creek, from Yank's Spring downstream approximately 5 stream miles to the International Border with Mexico within sections 14, 22, 23, 27, 33, and 34, T. 23 S., R. 11 E.

2. Yank's Spring in the SE¼ of the NW¼ of sec. 14, T. 23 S., R. 11 E.

3. Penasco Creek, including a riparian zone 25 feet wide along each side of the creek, from its confluence with Sycamore Creek (SW¼ of the SW¼ of sec. 23, T. 23 S., R. 11 E.) upstream approximately 1¼ miles to the east boundary of sec. 26, T. 23 S.;

4. An unnamed tributary to Sycamore Creek, from its confluence with Sycamore Creek (SW¼ of the NW¼ of sec. 23, T. 23 S., R. 11 E.) upstream approximately ¼ mile to the west boundary of the NE¼ of the SE¼ of the NE¼ sec. 22, T. 23 S., R. 11 E.

Known primary constituent elements include clean permanent water with pools and intermediate riffle areas and/or intermittent pools maintained by bedrock or by subsurface flow in areas shaded by canyon walls.

BILLING CODE 4310–55–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 226

[Docket No. 41152–6061]

Designated Critical Habitat; Hawaiian Monk Seal

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final rule.

SUMMARY: By this rule NOAA designates critical habitat for the Hawaiian monk seal (*Monachus schauinslandi*) under the Endangered Species Act of 1973 (ESA). The habitat designated includes all beach areas, lagoon waters, and ocean waters out to a depth of 10 fathoms around Kure Atoll, Midway Islands (except Sand Island), Pearl and Hermes Reef, Lisianski Island, Laysan Island, Gardner Pinnacles, French Frigate Shoals, Necker Island, and Nihoa Island. The designation of critical habitat will benefit the Hawaiian monk seal by requiring Federal agencies to ensure that their actions are not likely to result in the destruction or adverse modification of the critical habitat.

DATE: This rule become effective on May 30, 1986.

FOR FURTHER INFORMATION CONTACT: Eugene T. Nitta, Western Pacific Program Office, Southwest Region, National Marine Fisheries Service, P.O. Box 3830, Honolulu, HI 96812, Telephone (808) 955–8831; James H. Lecky, Southwest Region, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, California 90731, Telephone (213) 548–2518; or Margaret Lorenz, Protected Species Division, National Marine Fisheries Service, Washington, D.C. 20235, Telephone (202) 634–7529.

Copies of the final environmental impact statement prepared for this rule are also available from these offices.

VOL 51 ISS 83 AP 30 1986 UMI

SUPPLEMENTARY INFORMATION:

Background

The NMFS listed the Hawaiian monk seal as an endangered species under the ESA in November 1978. In December 1978, the Marine Mammal Commission recommended designating certain portions of the Hawaiian monk seal's range as critical habitat. The NMFS prepared an environmental assessment to evaluate the need for the action and to identify alternatives.

On March 2, 1979, the NMFS published a Draft Environmental Impact Statement (DEIS) on the proposed designation of critical habitat, and incorporated three boundary options in the preferred alternative (to designate critical habitat). These options were to place the seaward limit at the 10-fathom isobath, at the 20-fathom isobath, or at three miles from shore. The 10-fathom option included pupping beaches, beaches used for hauling out (moving ashore), water inhabited by females and young during nursing and post-weaning, and a portion of the foraging habitat used by monk seals while they are near the islands. The 20-fathom option was developed to incorporate additional foraging habitat. The three-mile option was essentially the original recommendation from the Marine Mammal Commission.

Thirty comments were received during the public comment period on the DEIS. Twenty-three commenters favored the designation of critical habitat, but there was no consensus for a preferred boundary option. Seven commentees opposed designation of critical habitat because they felt that data substantiating a need for critical habitat were lacking, existing regulatory mechanisms were providing adequate protection, and the designation would impede development of commercial fisheries. Those in opposition included the State of Hawaii, the Western Pacific Fishery Management Council, and the Hawaii Fishing Coalition.

The NMFS postponed further action until the Hawaiian Monk Seal Recovery Team (Recovery Team) had reviewed the DEIS and submitted its recommendations. On October 6, 1980, the Recovery Team supported the 20-fathom option and recommended including Nihoa Island, Gardner Pinnacles, and Maro Reef in the designation. The NMFS deferred the designation process pending the completion of the Hawaiian Monk Seal Recovery Plan (Recovery Plan). The Recovery Plan was submitted to NMFS in March 1983, with a recommendation to designate critical habitat out to 20-fathoms including Nihoa Island, Gardner Pinnacles, and Maro Reef.

Based on an evaluation of the need for critical habitat, the NMFS published a proposed rule for designating Hawaiian monk seal critical habitat in the Federal Register on January 9, 1985 (50 FR 1066–1095). A Supplemental Environmental Impact Statement (SEIS) regarding the proposed action was published on December 21, 1984. Comments on the proposed rule and SEIS were accepted until March 11, 1985.

A combined public meeting and public hearing was held on February 5, 1985, in Honolulu, Hawaii, regarding the proposed rule and the SEIS for the Proposed Designation of Critical Habitat for the Hawaiian Monk Seal in the Northwestern Hawaiian Islands (NWHI). Nine individuals representing the Hawaii Audubon Society, Greenpeace Hawaii, the Sierra Club—Hawaii Chapter, the Sierra Club Legal Defense Fund, Life of the Land, the University of Hawaii Environmental Center, and interested members of the general public presented testimony. Eight of the nine were in favor of designation of critical habitat out to 20 fathoms. One individual, speaking for himself, testified in favor of no action, noting that his interpretation of the information presented in the SEIS was that there would be no appreciable benefits to monk seals from the proposed designation of critical habitat.

Twenty-eight organizations and individuals provided written comments on either the proposed rule or SEIS. Twelve commenters recommended designation of critical habitat out to 20 fathoms based on their interpretation of the information presented in the SEIS. Six commenters recommended 10 fathoms for critical habitat. Two commenters supported designation of critical habitat with no preference for boundaries. Three indicated no comments on the proposal and another suggested that a more precise definition of the inland boundary of critical habitat was necessary. Four comments were received against designation based on lack of sufficient data to support critical habitat designation, no demonstrated advantage of designation versus no action, and/or the fear of Federal preemption in resource management activities.

The NMFS has decided to proceed with the designation of critical habitat for the Hawaiian monk seal basically as described in the SEIS and proposed rule because the NMFS believes the area designated is consistent with the criteria established by the definition of critical habitat (16 U.S.C. 1532(5)(A)). No significant new information regarding Hawaiian monk seal biology, commercial fishing activities, or Federal agency activities in the NWHI was received during the comment period.

The specific written and oral comments requiring a response are summarized below.

Comment: Twenty commenters recommended designating critical habitat out to 20 fathoms.

Response: The ESA defines critical habitat as "* * * the specific areas within the geographical area occupied by the species, at the time it is listed * * * on which are found those physical or biological features (I) essential to the conservation of the species, and (II) which may require special management considerations or protection." The comments in favor of the 20-fathom alternative address the first criterion for designation, but not the second. The NMFS reviewed the Recovery Team's recommendation to designate critical habitat out to 20 fathoms, but determined that only the habitat out to 10 fathoms is in need of special management considerations or protection. This conclusion was reached after the NMFS reviewed recommendations for management measures in the Recovery Plan, the record of section 7 consultations on Federal activities potentially affecting monk seals in the NWHI, and information on the biology of the monk seal. These sources indicate that the habitat which may be in need of special management considerations or protection is that habitat used by monk seals for pupping and nursing, where weaned pups learn to swim and forage, and major hauling out areas where growth has been substantial and pupping is imminent. Designating critical habitat to 10 fathoms will include all habitat utilized for these purposes, and is consistent with the criteria in the definition of critical habitat.

Comment: Seven commenters stated that Maro Reef should be included in the critical habitat designation.

Response: The NMFS has determined that the portion of the monk seal's habitat consistent with the definition of critical habitat is the portion used for pupping and nursing pups, and the shallow nearshore waters where weaned pups learn to swim and forage (see previous response). Maro Reef contains no emergent land and, therefore, no pupping habitat. It provides foraging habitat for transient seals from atolls with emergent land. There has been no indication that the foraging habitat at Maro Reef might be in need of special management considerations or protection, as is required by the definition of critical habitat. Therefore, the NMFS has decided not to include Maro Reef in the final designation.

Comment: Three commenters stated that Sand Island at Midway should be included in the critical habitat designation.

Response: Sand Island was excluded from the proposed designation because it has been substantially modified by the military. The Marine Mammal Commission stated that excluding Sand Island is reasonable because it has been developed and human activity limits monk seal use of its beaches.

Comment: Four commenter stated that critical habitat is redundant to the other consultation requirements of section 7 of the ESA.

Response: A critical habitat designation may enhance the section 7 process by requiring Federal agencies to consult in instances where their activities may modify or destroy habitat without directly affecting the species. The benefit provided by the designation is the clear and early notification to Federal agencies and the public of the existence of critical habitat and the importance of the area to the Hawaiian monk seal.

Comment: The Minerals Management Service suggested that the harbors at Midway should be excluded from critical habitat to eliminate potential controversy in the event that Midway is used to support deep ocean mining efforts near the NWHI. They noted that this activity would be subject to a formal consultation under section 7 whether or not the harbors were included in critical habitat.

Response: Sand Island and its harbor are excluded from the designation of critical habitat.

Comment: The State of Hawaii commented that there is insufficient data to support designation of critical habitat.

Response: Based on the best scientific information available, the NMFS has determined that there is sufficient justification to define and designate critical habitat for the Hawaiian monk seal. The components of monk seal habitat identified as critical habitat in the Final Environmental Impact Statement (FEIS) include breeding areas, pupping and major haul-out sites, and nearshore waters used by females and pups.

Comment: The State of Hawaii indicated that available information does not show that the area proposed for critical habitat is any more critical than the seals' entire habitat.

Response: Critical habitat, as defined in the ESA, is habitat that is essential to the conservation of a species and that may be in need of special management considerations or protective measures to conserve the habitat. The best available information concerning the Hawaiian monk seal, the management recommendations in the Recovery Plan, and the concerns raised in section 7 consultations indicate that the habitat utilized by monk seals for pupping and nursing and where weaned pups learn to swim and forage is critical habitat as defined by the ESA.

Comment: Two commenters suggested that critical habitat designation would also provide increased habitat protection for other species of plants and animals found in the NWHI.

Response: Although there may be habitat protection for other species, this is not a factor in the decision to designate critical habitat.

Comment: The Fish and Wildlife Service and Hawaii Chapter of the Sierra Club comments that the 20-fathom contour provides a more cohesive and recognizable administrative boundary for critical habitat that would be easier to enforce than the 10-fathom contour line which is highly irregular.

Response: The point regarding smoothness and continuity of bottom contours is well taken. However, our review of the best available information indicates that habitat within 10 fathoms is the only habitat in need of special management considerations or protection.

Comment: The State of Hawaii, Department of Land and Natural Resources (DLNR) and the U.S. Coast Guard suggested that the inshore extent of critical habitat be defined more precisely.

Response: Vegetation behind pupping beaches is important because it provides shade from intense solar radiation for nursing females, pups, and other seals. It may also screen seals on the beach from potentially disturbing stimuli behind the vegetation. The extent of vegetation is so variable that a more precise definition is difficult to construct. However, the NMFS has clarified the description in the final rule.

Critical Habitat

The ESA defines critical habitat as "* * * (i) the specific areas within the geographical area occupied by the species, at the time it is listed * * * on which are found those physical or biological features (I) essential to the conservation of the species, and (II) which may require special management considerations or protection; and (ii) specific areas outside the geographical area occupied by the species at the time it is listed * * * upon a determination by the Secretary that such areas are essential for the conservation of the species" (16 U.S.C. 1532(5)(A)). "Except in those circumstances determined by the Secretary, critical habitat shall not include the entire geographical area which can be occupied" by the species (16 U.S.C. 1532(5)(C)).

The criteria to be considered in making a critical habitat designation are included in 50 CFR 424.12. The following biological requirements must be considered in designating critical habitat:

(1) Space for individual and population growth, and for normal behavior;

(2) Food, water, air, light, minerals, or other nutritional or physiological requirements;

(3) Cover or shelter;

(4) Sites for breeding, reproduction, rearing of offspring, germination, or seed dispersal; and generally,

(5) Habitats that are protected from disturbance or are representative of the historic geographical and ecological distributions of listed species.

Regulations designating critical habitat must be based on the best available scientific data and to the maximum extent practicable must be accompanied by a brief description and evaluation of those activities that may adversely modify such habitat or may be affected by such designation. Economic and other relevant impacts of specifying critical habitat must also be considered when designating habitat, and any area may be excluded from a critical habitat designation if a determination is made that the benefits of the exclusion outweigh the benefits of designation. The only exception to this provision is where the failure to designate such habitat will result in the extinction of the species.

In order to determine what portion of the monk seal's range contains habitat that is consistent with the definition of "critical habitat", the NMFS reviewed the available biological information, responses to the requests for comments on the SEIS and proposed rule, the management recommendations in the Recovery Plan, and the record of section 7 consultation on Federal activities in the NWHI with a potential for affecting monk seals.

There are no inherent restrictions on human activities in an area designated as critical habitat. A critical habitat designation affects only those actions authorized, funded, or carried out by Federal agencies. It provides notification to Federal agencies that a listed species is dependent on a particular area for its continued existence and that any

VOL 51 ISS 83 AP 30 1986 UMI

Federal action that may affect that area is subject to the consultation requirements of section 7 of the ESA. Certain activities such as commercial fisheries that are Federally regulated, scientific research conducted under Federal permits or funding, Federal management of other resources, and military operations may be conducted within an area designated as critical habitat if the authorizing Federal agency determines through the section 7 consultation process that the activity is not likely to jeopardize the continued existence of the species or result in the destruction or adverse modification of critical habitat. Activities that are conducted by state agencies or the private sector without Federal involvement may be carried out without regard to section 7, although other provisions of the ESA may impose prohibitions on activities resulting in the taking of endangered or threatened species.

Hawaiian Monk Seal Biology

The biology of the Hawaiian monk seal is discussed in the SEIS and FEIS. The discussion includes the history of exploitation, trends in population size, current status of the population, life history parameters, habitat requirements, and biological problems confronting the species. Further information is available from the DEIS, the Recovery Plan, and the Status Review for the Hawaiian Monk Seal. The pertinent habitat requirements are summarized below.

Habitat Requirements

Existing data indicate that all beach areas used by the Hawaiian monk seal for pupping, nursing, and rearing pups and some haul-out areas where pupping is imminent (e.g. Tern Island, French Frigate Shoals) are essential for the continued existence of the species. This critical area includes the first line of vegetation backing these beaches which provides shelter from the wind and other elements. Lava bench and boulder beach habitat found at Necker and Nihoa Islands also constitute pupping and haul-out areas. Because of the limited terrestrial habitat available to the Hawaiian monk seal, any loss of pupping, nursing, and major haul-out areas could affect the conservation of the species adversely.

Shallow, protected water immediately adjacent to beaches is also important to the Hawaiian monk seal. With the exception of undisturbed dry sand beaches, this nearshore protected water habitat is the most important factor for a successful pupping area. Pregnant females use beaches adjacent to shallow protected waters for pupping, apparently to have a protected shallow area to take their pups when they first enter the water.

Studies have shown that, for three months after weaning, pups make daily sorties from the beaches, presumably to feed. They are seen in the water close to shore, and it is assumed that the critical stage of learning to feed is carried out in nearshore waters. During the first month, the pups lose weight, then stabilize, and finally begin to gain weight. By four months post-weaning, pups begin spending up to 10 days at a time away from the island.

Further observations indicate that adult female monk seals leave the islands for about two to three weeks upon weaning their pups. They leave in an emaciated condition and return in relatively good condition, remain for a few days on the islands, then depart for an additional period of a few weeks before reappearing well nourished. Since they do not haul out during these protracted periods away, it is assumed that they are feeding at least beyond the inner reef and probably a considerable distance from shore.

Information on foraging habitat is available from studies on food habits and surveys of nearshore fish resources. Watson and Peterson (1984), analyzed hard parts recovered from scats and spewings to define the prey base exploited by monk seals. They found that monk seals feed on octopus, squid, and a diverse list of fishes which were identified to family. They did not report lobster as a prey species, although it has been reported elsewhere (e.g. DeLong *et al.* 1982). Studies on the distribution of fishery resources within 10 fathoms in the NWHI show that octopus and the families of fish preyed upon by monk seals occur in nearshore waters at most of the NWHI (Okamoto and Kanemaka 1984).

Information on foraging behavior is available from observations of monk seals and depth of dive studies. Rauzon *et al.* (1977) observed 301 dives in the channel off the western end of Tern Island, French Frigate Shoals. They did not observe consumption of prey but concluded from the regularity of the dives that the seals were foraging. Water depths in the area of observation varied from less than one fathom to five fathoms. Studies of depth of dive for the seals were conducted at Lisianski Island in 1980 (DeLong *et al.* 1982) and 1982 (Schlexer 1984) to provide additional information on habitat use. DeLong *et al.* (1982) attached depth-of-dive recorders to seven adult male monk seals. Over 4,800 dives by six animals (one recorder failed) were recorded. Fifty-nine percent of the dives were in the range of 3.5 to 21.9 fathoms (10–40 meters). No information was collected on diving in water less than 3.5 fathoms, and maximum dives ranged beyond 88.2 fathoms (121 meters). Schlexer (1984) placed recorders on five adult males, one subadult female, one juvenile male, and one juvenile female. The dive recorders malfunctioned, so that the dive profiles recorded may not be a true reflection of habitat use (Schlexer 1984). In spite of the malfunction, Schlexer reported that his data were generally consistent with the data collected by DeLong *et al.* (1982) for adult males. The subadult and juvenile females made dives in excess of 80 fathoms (150 meters) extending the known diving range of monk seals.

Thus, the biological information shows that monk seals forage from near shore waters (<0.5 fathoms) (Rauzon *et al.* 1977) to some depths down the reef slope beyond 80 fathoms (Schlexer 1984). Monk seals have also been reported to be absent from the breeding beaches for an extended period of time (Johnson and Johnson 1978). Feeding habits of monk seals during these absences have not been studied. They may be attracted to forage resources over sea mounts and submerged reefs. Monk seals have been reported at Maro Reef which has no emergent land (Gilmartin 1983).

The only observed monk seal matings have been in the nearshore and shallow offshore waters around Laysan Island. Critical habitat delineated by the 10-fathom isobath would include the known breeding habitat as well as a portion of foraging habitat for the Hawaiian monk seal.

Based on available information, habitat requirements for the health, well being, and continued viability of the Hawaiian monk seal population, listed in order of probable importance, consist of the following:

1. Pupping and major hauling beaches including the vegetation immediately backing the beaches (coral sand beaches and lava benches).
2. Shallow protected water adjacent to the above (tide pools, inner reef waters, shoal areas, and near shore shallows).
3. Deeper inner reef areas and lagoon waters.
4. Other waters surrounding the NWHI to at least 50 fathoms.
5. Banks and shoals without emergent lands and pelagic waters.

To define the portion of the monk seal's habitat that might be in need of special management considerations or protection, the NMFS reviewed recommendations for management measures in the Recovery Plan, the record of section 7 consultations on Federal activities potentially affecting monk seals in the NWHI, and information on the biology of the monk seal. These sources indicate that nearshore and terrestrial habitat constitute the areas in need of special management considerations or protection.

Most of the management measures recommended in the Recovery Plan are directed at limiting access to terrestrial habitat to minimize the adverse effects of human-caused disturbance. Other management measures identified in the plan include improved monitoring of the population, emergency response plans, activities to promote the survival of seals, and the implementation of management measures that may be indicated by future research. These other measures are either not directed at the conservation of habitat or are likely to be directed at terrestrial habitat.

As of December 1985, the NMFS had completed eight formal consultations and three informal consultations on Federal activities potentially affecting monk seals in the NWHI. Of the formal consultations, two concluded in "jeopardy" opinions, five concluded in "no jeopardy" opinions, and one concluded that there was insufficient information available to ensure "no jeopardy". The informal consultations concluded with determinations that the proposed activities would not affect the monk seal population. "Jeopardy" opinions were issued for activities that would result in increased levels of disturbance of monk seals on the beaches or in the water adjacent to the beaches used for pupping. "No jeopardy" opinions were issued for activities offshore or that could be conducted on shore without increased levels of disturbance.

The one consultation in which NMFS concluded there was insufficient information to make a determination of either "jeopardy" or "no jeopardy" was a consultation with the Western Pacific Fisheries Management Council on implementation of the Spiny Lobster Fishery Management Plan. In the biological opinion on this activity, the NMFS stated that monk seals could be affected by disturbance, incidental mortality, and reduction of a prey population. The concern for adverse effects of disturbance were centered on the need to protect beaches used for pupping. No incidental mortality has been reported since the consultation was initiated in January 1980. The effects of competing with a commercial fishery for a food resource remain undetermined. However, studies on food habitats verify that the monk seal exploits a variety of species and does not depend on lobster.

The NMFS believes that the section 7 record through December 1985 provides a comprehensive overview of Federal activities in the NWHI and that the level of activity in the NWHI is likely to remain stable into the future. There may be some growth in commercial fisheries, and there may be leasing of the deep sea floor for exploration and development of manganese crust resources. Growth in commercial fisheries will be managed under fishery management plans which provide protective measures for monk seals. Leasing of the deep sea floor is the responsibility of the Minerals Management Service (MMS). The MMS is drafting an environmental impact statement for leasing in the NWHI and has initiated the section 7 processes informally. Development of a managanese crust mining industry is likely years away because the technology for mining at the depths at which manganese crusts occur (>1,000 meters) is still developing. Therefore, the NMFS believes that activity generated by the MMS decision to proceed with leasing will be minimal and in locations not likely to affect monk seal habitat.

Studies of trends in distribution and abundance indicate that special management measures may be necessary to control the adverse effects of human activity on land and near pupping beaches. Kenyon (1972) attributed the decline in the number of monk seals at Kure and Midway during the 1960's to frequent human disturbance of hauled out seals. The increase in use of Tern Island (French Frigate Shoals) by monk seals as a hauling out site subsequent to the closure of the Coast Guard Station there (Ittner unpublished observation cited in Gilmartin 1983) supports Kenyon's hypothesis.

Information on the susceptibility of monk seals to disturbance in water is limited to anecdotal reports that monk seals approach fishing vessels to rob fishermen's lines of hooked fish. These reports are supported by a photograph of a monk seal with a fish hook in its mouth. Other pinniped species that are known to be sensitive to disturbance on land (e.g. California sea lions, and harbor seals) are relatively bold in the water. They approach fishing boats to take hooked fish off of fishermen's lines (Miller *et al.* 1983) and they approach divers closely. Since thresholds for disturbance are likely higher in the water than on land, management measures to control human presence in the offshore environment are not critical.

The recommended management measures in the Recovery Plan and the biological opinions resulting from formal consultations, and information on trends in abundance indicate that the habitat which may be in need of special management considerations or protection is that habitat utilized by monk seals for pupping and nursing, where weaned pups learn to swim and forage, and major hauling out areas where growth has been substantial and pupping is imminent. A precise boundary to the area in need of special management considerations or protection is difficult to draw, but designating critical habitat out to 10 fathoms will include all such areas. The depth-of-dive studies and other available information do not indicate that any portion of the foraging habitat is more important than other portions, and no need for special management measures to protect any of the foraging habitat has been identified.

Therefore, the NMFS designates as critical habitat for the Hawaiian monk seal; all beach areas, including all beach crest vegetation to its deepest extent inland, lagoon waters, and ocean waters out to a depth of 10 fathoms around Kure Atoll, Midway Islands (except Sand Island and its harbor), Pearl and Hermes Reef, Lisianski Island, Laysan Island, Gardner Pinnacles, French Frigate Shoals, Necker Island, and Nihoa Island. Many of the habitat components such as beach areas, vegetation, nearshore shallow water areas, and offshore banks and shoals cannot be simply delineated as specific stretches of beach or specific offshore areas. Therefore, it is necessary to designate entire areas without piecemeal delineations. For example, monk seals use all of the beaches on Green Island at Kure as hauling areas and certain other areas for pupping areas. Additionally, the various sand spits and islets grow, shrink, disappear, change shape, and even change location. In some cases, new islets appear after storms or strong tide conditions. Therefore, references to beaches or beach areas should be assured to include all sand spits and islets.

If ongoing or future research or other new information indicates that habitat beyond 10 fathoms is essential and that special management considerations or protective measures may be needed to protect the habitat, the NMFS will initiate rulemaking to make the

VOL 51 ISS 83 AP 30 1986 UMI

appropriate changes in the critical habitat boundaries.

Effect of the Rulemaking

This action only directly affects Federal agencies. It does not affect State and local government activities or private actions which are not dependent on or limited by Federal authority, permits, or funds; however, many of the activities in the NWHI are subject to some Federal control and could potentially be affected. Section 7 requires Federal agencies to consult with the NMFS to ensure that any activity funded, authorized, or undertaken by them is not likely to jeopardize the continued existence of endangered species or result in the destruction or adverse modification of its critical habitat.

Currently, Federal agencies are required to consult on actions that may affect Hawaiian monk seals. The designation of critical habitat will require Federal agencies to evaluate their activities with respect to critical habitat and consult with the NMFS on any action which may affect critical habitat to ensure that it is not likely to result in the destruction or adverse modification of the critical habitat. In most situations consultation would be required even without a critical habitat designation because actions that affect critical habitat are also likely to affect the monk seal. Designating critical habitat will assist Federal agencies in evaluating the potential effects of their activities on monk seals or their critical habitat and in determining when consultation with the NMFS would be appropriate. The additional consultations that will be required are minimal. Therefore, the designation of critical habitat will not substantially add to the Federal agencies' responsibilities, and will not have any significant adverse economic impacts on State or private entities, including small businesses. The Federal agencies most likely to be affected by critical habitat designation include the U.S. Coast Guard, U.S. Navy, U.S. Fish and Wildlife Service (FWS), Western Pacific Regional Fishery Management Council, and the NMFS.

The final rule is not expected to have any direct impact on exising fisheries in the NWHI. The only direct economic costs will be those associated with more extensive monitoring of Federal activities by the NMFS and those from administrative actions by Federal activities resulting from reviews of their activities in the NWHI. The additional costs are expected to be minimal since Federal agencies would have had to conduct section 7 consultations for activities that may affect Hawaiian monk seals and/or conform to National Environmental Policy Act (NEPA) requirements for actions that significantly affect the quality of the human environment.

Future activities which may require evaluation under section 7 of the ESA include (1) construction activities of the Coast Guard on Green Island at Kure Atoll, the Navy on Sand Island at Midway Islands, and the FWS on Tern Island at French Frigate Shoals; (2) habitat manipulation/enhancement by the FWS within the Hawaiian Islands National Wildlife Refuge; (3) deep ocean mining; (4) ocean dumping of wastes and chemicals; (5) Federally funded or regulated fishing activities; and (6) fisheries and wildlife research conducted, funded, supported, or controlled by Federal agencies in the NWHI.

Classification

For reasons discussed in *Effect of the Rulemaking* above, the NOAA Administrator has determined that this is not a major rule requiring a regulatory impact analysis under Executive Order 12291. The regulations are not likely to result in (1) an annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Further, the General Counsel of the Department of Commerce has certified that the final rule will not have a significant economic impact on a substantial number of small business entities as described in the Regulatory Flexibility Act; therefore, a regulatory flexibility analysis is not required. This rule does not contain a collection of information requirements for purposes of the Paperwork Reduction Act of 1980.

National Environmental Policy Act

This action is categorically excluded from the requirements to prepare an environmental assessment and environmental impact statement under NEPA by NOAA Directive 02-10 (49 FR 29644; July 23, 1984). This final rule will not have any adverse environmental consequences. However, since a DEIS and SEIS were prepared, the NMFS has elected to continue with the NEPA process. Accordingly, an FEIS has been prepared for this action and copies are available upon request from the NMFS (see "For Further Information Contact" section for address).

Coastal Zone Management Consistency Statement

The Assistant Administrator for Fisheries, NOAA, determined that the designation of critical habitat for the Hawaiian monk seal is consistent with the approved State of Hawaii Coastal Zone Management Program.

The relevant Coastal Zone Management Objective is to "[p]rotect valuable coastal ecosystems from disruption and minimize adverse impacts on all coastal ecosystems". State of Hawaii Coastal Zone Management Program and Federal Environmental Impact Statement (Hawaii Program; p. 37, HRS section 205 A-2(b)(4)). One of the supporting policies is to protect endangered species which includes the Hawaiian monk seal (Hawaii Program pp. 38-39, HRS Chapter 195D).

The purpose of designating critical habitat is to protect the area, a valuable coastal ecosystem, from disruption and adverse impacts. The ultimate purpose is to protect and conserve the monk seal. Therefore, the critical habitat designation is consistent with the approved Hawaii Coastal Zone Management Plan.

This determination was submitted to the State of Hawaii's Department of Planning and Economic Development for review under section 3.7 of the Coastal Zone Management Act. The State agency agreed with the consistency determination.

List of Subjects in 50 CFR Part 226

Endangered and threatened wildlife, Marine mammals.

Dated: April 24, 1986.

Carmen J. Blondin,

Assistant Administrator for Fisheries Resource Management, National Marine Fisheries Service.

PART 226—[AMENDED]

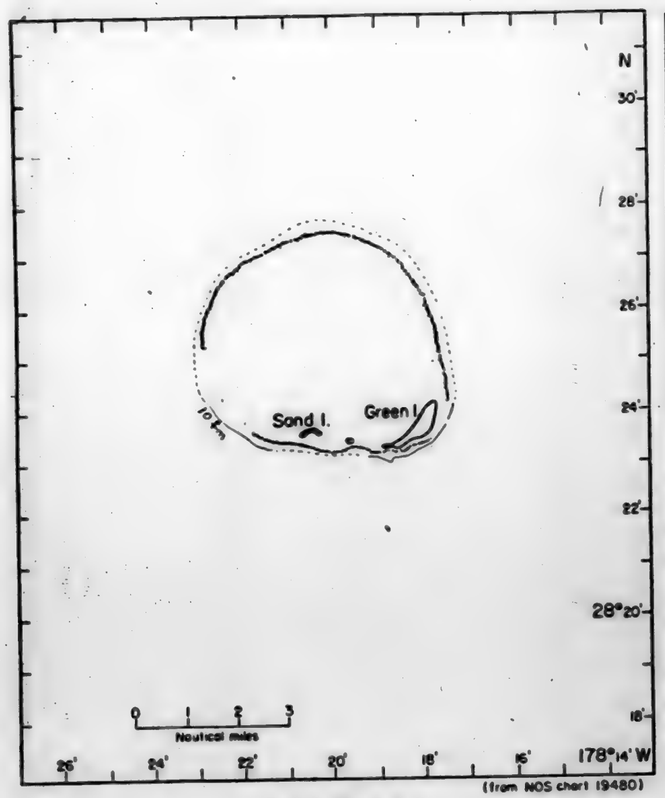
Accordingly, Part 226 of Chapter II of Title 50 of the Code of Federal Regulations is amended as set forth below.

1. The authority citation for Part 226 is revised to read as follows:

Authority: 16 U.S.C. 1533.

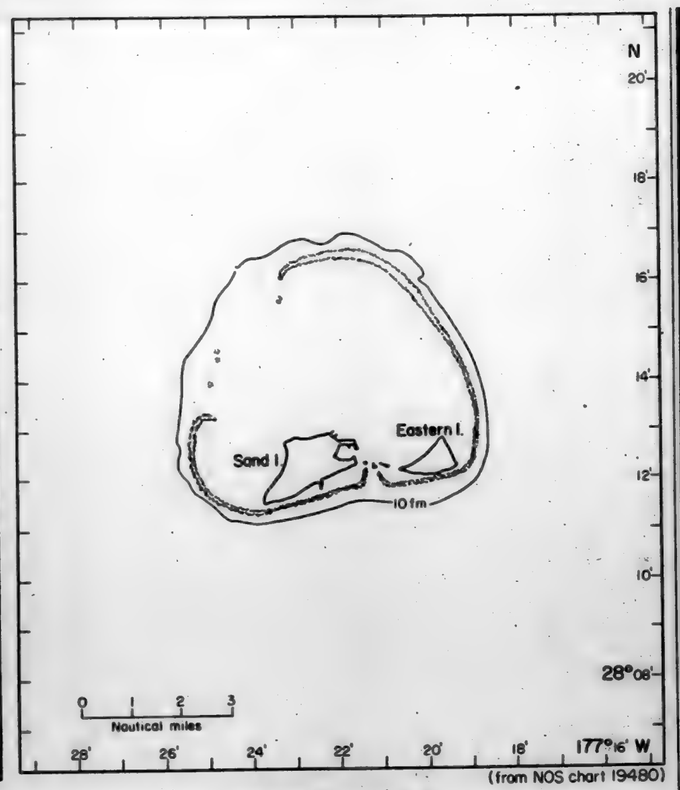
2. A new Subpart B is added to Part 226 to read as follows:

Subpart B—Critical Habitat for Marine Mammals



§ 226.11 Northwestern Hawaiian Islands.

Hawaiian Monk Seal



(Monachus schauinslandi)

All beach areas, sand spits and islets, including all beach crest vegetation to its deepest extent inland, lagoon waters, inner reef waters, and ocean waters out to a depth of 10 fathoms around the following:
Kure Atoll (28°24' N., 178°20' W.)
Midway Islands, except Sand Island and its harbor (28°14' N., 177°22' W.)
Pearl and Hermes Reef (27°55' N., 175° W.)
Lisianski Island (26°04' N., 173°56' W.)
Laysan Island (25°46' N., 171°44' W.)
Gardner Pinnacles (25°00' N., 168°00' W.)
French Frigate Shoals (23°45' N., 166°00' W.)
Necker Island (23°34' N., 164°42' W.)
Nihoa Island (23°03.5' N., 161°55.5' W.)

[Docket No. 51180-6180]

Foreign Fishing, Groundfish of the Gulf of Alaska, and Groundfish of the Bering Sea and Aleutian Islands Area

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of inseason adjustments.

SUMMARY: NOAA announces the apportionment of amounts of Alaska groundfish to the domestic annual harvest (DAH) and total allowable level of foreign fishing (TALFF) under provisions of the fishery management plans (FMPs) for Groundfish of the Gulf of Alaska and for Groundfish of the Bering Sea and Aleutian Islands Area. Groundfish are apportioned according to the regulations implementing those FMPs. The intent of this action is to assure optimum use of these groundfish by allowing the domestic and foreign fisheries to proceed without interruption.

EFFECTIVE DATE: April 25, 1986.

FOR FURTHER INFORMATION CONTACT: Janet Smoker (Resource Management Specialist, Alaska Region, NMFS), 907-586-7229.

SUPPLEMENTARY INFORMATION:

Background

Optimum yields (OYs) for groundfish species in the Gulf of Alaska are established by the FMP for Groundfish of the Gulf of Alaska. This FMP was developed by the North Pacific Fishery Management Council (Council) under the Magnuson Fishery Conservation and Management Act and are implemented by regulations at 50 CFR 611.92 and Part 672.

Total allowable catches (TACs) for various groundfish species in the Bering Sea and Aleutian Islands area are established under the FMP for Groundfish of the Bering Sea and Aleutian Islands Area. This FMP was also developed under the Magnuson Act and is implemented by regulations at 50 CFR 611.93 and Part 675. The TACs and OYs are apportioned initially among DAH, reserves, and TALFF. Each reserve amount, in turn, is to be apportioned to DAH and/or TALFF during the fishing year, under 50 CFR 611.92(c) and 672.20(c) for the Gulf of Alaska, and 611.93(b) and 675.20(b) for the Bering Sea and Aleutian Islands area. In addition, surplus amounts of both components of DAH [DAP (domestic processed fish) and JVP (joint venture processed fish)] may be apportioned to TALFF during the fishing year under those same regulations.

The initial DAPs and JVPs for 1986 were based in part on the projected needs of the U.S. industry as assessed by a mail survey sent by the Director, Alaska Region, NMFS (Regional Director) to fishermen and processors in October 1985. The Regional Director intends to resurvey the industry in April or May 1986.

Because most U.S. fisheries have just commenced, insufficient fishing time has elapsed to determine what amounts of DAH, if any, will prove excess to the needs of U.S. fishermen and reapportioning any DAH to TALFF in this action is therefore not timely. Reapportionment of DAH along with any reserves not released by this action will be considered upon completion of analysis of the industry survey.

1. Gulf of Alaska.
2. Bering Sea and Aleutian Islands area.

As soon as practicable after April 1, June 1, and August 1, or on other dates considered necessary, the Secretary of Commerce will apportion to DAH all or part of the reserve that he finds will be harvested by U.S. vessels during the remainder of the year, and will apportion to TALFF any remaining reserve that is not apportioned to DAH. When the initial DAH and TALFF for 1986 were established (51 FR 956, January 9, 1986), DAH and TALFF were supplemented with 29,857 mt from the initial 300,000-mt reserve, thereby reducing it to 270,143 mt. This action supplements DAH and TALFF by taking an additional 135,072 mt from the reserve and reducing it to 135,071.

Apportionments to DAH:

To provide for increased amounts requested by several JVP operators, 17,000 mt of the nonspecific reserve is transferred to the yellowfin sole JVP and 9,300 mt of the nonspecific reserve is transferred to the flatfish JVP. In the Aleutians area, an unprecedented JVP fishery on pollock early in the year resulted in a harvest that severely reduced the opportunities for continuing the fishery through the year. In order to provide for continued JVP fisheries in the area, 8,000 mt of unallocated TALFF is transferred to JVP (Table 1).

Apportionments to TALFF:

In the Bering Sea area, 106,772 mt of the nonspecific reserve is transferred to the pollock TALFF. This amount is determined excess to the 1986 needs of U.S. fishermen.

Apportionments to DAH and TALFF will be considered at a later date pending reevaluation of DAP and JVP needs for 1986.

TABLE 1.—BERING SEA/ALEUTIANS REAPPORTIONMENTS OF TAC

		Current	This action	Revised
Pollock (Bering Sea Area only, TAC=1,200,000; EY=1,200,000)	DAP	141,755		141,755
	JVP	680,000		680,800
	TALFF	188,245	+106,772	297,017
Pollock (Aleutians Area only, TAC=100,000; EY=100,000)	DAP	18,039		18,039
	JVP	10,804	+8,000	18,804
	TALLF	66,157	−8,000	48,157
Yellowfin sole (TAC=280,500; EY=230,000)	DAP	1,000		1,000
	JVP	127,300	+17,000	144,300
	TALFF	49,745		49,745
Other flatfish (TAC=124,200; EY=137,800)	DAP	4,192		4,192
	JVP	89,550	+9,300	98,850
	TALFF	11,828		11,828
Total (TAC=2,000,000)	DAP	326,090		325,890
	JVP	1,014,083	+34,300	1,048,383
	RES	270,148	−136,072	135,871
	TALFF	390,675	+106,772	491,447

Comments and Responses

In accordance with 50 CFR 611.92(c), 611.93(b), 672.20(c), and 675.20(b), aggregated reports on U.S. catches of Alaska groundfish and the processing of those groundfish were available for public inspection to facilitate informed public comment. In addition, those provisions afforded the public an opportunity to submit comments on the extent of which U.S. fishermen will harvest and the extent to which U.S. processors will process Alaska groundfish. One comment was received.

Comment: The entire reserve in the Bering Sea and Aleutian Islands area (BSA) should be apportioned to TALFF on April 1 since the DAH amounts for all groundfish species are clearly adequate to account for any unanticipated expansion of the domestic fishery in 1986.

Response: Traditionally, no more than 50 percent of the reserves in the BSA have been released in April, and then only following analysis of the DAH resurvey. Without the results of this survey, and in view of recent unanticipated expansion of proposed JVP fisheries, it is not appropriate to reapportion reserves to TALFF other than Bering Sea pollock, for which a considerable buffer remains.

Classification

This action is taken under 50 CFR 611.92(c), 611.93(b), 672.20(c), and 675.20(b), and complies with Executive Order 12291.

In view of the prior notice provided in the authorizing regulations regarding the dates after which apportionment of reserves and reassessment of DAH are to occur, together with the need to avoid disruption of foreign and U.S. fisheries and to afford a reasonable opportunity to achieve OY, NOAA has determined that delaying the effective date of this notice would be impracticable, unnecessary, and contrary to the public interest.

50 CFR Part 672

[Docket No. 41276-4176]

Groundfish of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of closure.

SUMMARY: The Director, Alaska Region, NMFS (Regional Director), has determined that the share of the sablefish optimum yield (OY) allocated to trawl gear in the Central Regulatory Area of the Gulf of Alaska will be achieved on April 26, 1986. A closure of the sablefish fishery by trawl gear is necessary to limit the harvest of sablefish by trawl gear to the 20 percent of the OY that is permissible by Federal law in this area. This closure is a management measure intended to allocate the sablefish resource among trawl, hook-and-line, and pot gear in the Central Regulatory Area as required by Amendment 14 to the Fishery Management Plan for the Groundfish Fishery of the Gulf of Alaska (FMP).

DATES: This notice is effective from 12:00 noon, Alaska Standard Time, April 26, 1986, until 12:00 midnight, Alaska Standard Time, December 31, 1986. Public comments are invited on this closure until May 11, 1986.

ADDRESS: Comments should be sent to Robert W. McVey, Director, Alaska Region, National Marine Fisheries Service, P.O. Box 1668, Juneau, Alaska 99802. During the 15-day comment period, the data upon which this notice is based will be available for public inspection during business hours (8:00 a.m. to 4:30 p.m., Monday through Friday) at the NMFS Alaska Regional Office, Federal Building, Room 453, 709 West Ninth Street, Juneau, Alaska.

FOR FURTHER INFORMATION CONTACT: Ronald J. Berg (Fishery Management Biologist, NMFS), 907-586-7230.

SUPPLEMENTARY INFORMATION: The FMP, which governs the groundfish fishery in the fishery conservation zone under the Magnuson Fishery Conservation and Management Act (Magnuson Act) provides for inseason adjustments of fishing seasons and areas. Implementing rules at 50 CFR 672.22(a) specify that these adjustments will be made by the Secretary of Commerce (Secretary) under procedures set out in that section.

Section 672.2 defines three regulatory areas of the Gulf of Alaska. One of these is the Central Regulatory Area for which current regulations specify the sablefish OY to be 3,080 metric tons (mt). However, the North Pacific Fishery Management Council (Council), at its December 10-14, 1985, meeting, determined that the OY should be 6,150 mt. The Council recommended that NOAA promulgate an emergency interim rule under Magnuson Act Section 305(e) to implement the new OY, pending amendment of the FMP. The Regional Director has submitted an emergency interim regulation to implement the 1986 OY as recommended by the Council. This emergency interim regulation is expected to be promulgated in the near future.

As a result of implementation of Amendment 14 to the FMP (October 24, 1985; 50 FR 43193), § 672.24(b)(2) of the regulations allows directed fishing, defined at § 672.2, for sablefish in the Central Regulatory Area with trawl gear, as well as with hook-and-line and pot gear. Under this section, fishing for sablefish with trawl gear is allowed until trawl vessels have harvested 20 percent of the sablefish OY. Thus, 1, 230 mt of sablefish in the Central Regulatory Area is allocated to vessels using trawl gear.

This regulation also requires the Regional Director to close all fishing for groundfish with a gear type in an area when the sablefish share allocated by Amendment 14 to that gear type has been taken. At its January 15-17, 1986, meeting, the Council recommended, however, that NOAA amend this regulation to allow the Regional Director to prohibit directed fishing for sablefish by that gear type in that area and thus leave a bycatch to support other directed groundfish fisheries. Fishing for other groundfish species could thus continue. The Regional Director has submitted an emergency interim rule that would amend the regulation cited above to implement the Council's recommendation.

The requirement of § 672.24(b) that all groundfish fishing by a gear type in an area to be closed when its sablefish allocation for that area has been taken conflicts with Amendment 14 as interpreted by the Council and NMFS. The Regional Director is, therefore, not obliged even before promulgation of the new rule to impose such a closure, provided that continued fishing by that gear type will not cause overfishing of sablefish.

An estimated 15 shorebased trawl vessels and 4 catcher/processor trawl vessels have made sablefish landings during the fishing season, which began on January 1, 1986. The total sablefish share allocated to trawl gear has been harvested. Therefore, further sablefish directed fishing, as defined at § 672.2, with trawl gear is prohibited after 12:00 noon April 26, 1986. This closure is a management measure intended to implement the allocation of the sablefish resource as provided for by Amendment 14 to the FMP. The Regional Director has reviewed the necessary bycatches of sablefish that might be taken in other directed groundfish trawl fisheries in the Central Regulatory Area and finds that continued trawling for other groundfish species will not cause overfishing of sablefish.

This closure will be effective upon filing of this notice for public inspection with the Office of the Federal Register and after it has been publicized for 48 hours through Alaska Department of Fish and Game procedures under § 672.22(a). Public comments on this notice of closure may be submitted to the Regional Director at the address stated above for 15 days following the effective date. The necessity of this closure will be reconsidered in view of comments received, and a subsequent notice will be published in the Federal Register, either confirming this closure's continued effect, modifying it, or rescinding it.

Other Matters

Allocation of the sablefish resource among trawl, hook-and-line, and pot gear in the Central Regulatory Area of the Gulf of Alaska as required by Amendment 14, and the continued health of that resource will be jeopardized unless this order takes

VOL 51 ISS 83 APR 30 1986 UMI

effect promptly. The agency therefore finds for good cause that advance notice and public comment on this order is contrary to the public interest and that the effective date should not be delayed.

This action is authorized under §§ 672.22 and 672.24 and complies with Executive Order 12291.

14 CFR Part 71

[Airspace Docket No. 86-AGL-12]

Proposed Alteration of Transition Area, New Ulm, MN

Correction

In FR Doc. 86-8808 beginning on page 13527 in the issue of Monday, April 21, 1986, make the following corrections:

1. On page 13528, second column, second complete paragraph, second line, "§ 71-181" should read "§ 71.181". In the fourth complete paragraph, second line, "as" should read "an".

2. On the same page, third column, in the **Authority**", in the third and fourth lines, "Pub. 97-449" should read "Pub. L. 97-449" and "1.69" should read "11.69". Also, in the same column, under "New Ulm, MN", eighth line, insert "bearing" after "162"".

BILLING CODE 1505-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 261

[SW-FRL-3010-5]

Hazardous Waste Management System; Identification and Listing of Hazardous Waste; Proposed Exclusions

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule and request for comment.

SUMMARY: The Environmental Protection Agency (EPA) today is proposing to exclude the solid wastes generated at five facilities from the list of hazardous wastes contained in 40 CFR 261.31 and 261.32. This action responds to delisting petitions submitted under 40 CFR 260.20, which allows any person to petition the Administrator to modify or revoke any provision of Parts 260 through 265, 124, 270, and 271 of Title 40 of the Code of Federal Regulations, and 40 CFR 260.22, which specifically provides generators the opportunity to petition the Administrator to exclude a waste on a "generator-specific basis" from the hazardous waste list. The effect of this action, if promulgated, would be to exclude certain wastes generated at particular facilities from listing as hazardous wastes under 40 CFR Part 261.

The Agency has previously evaluated four of the petitions which are discussed in today's notice. Based on our review at that time, these petitioners were granted temporary exclusions. Due to changes to the delisting criteria required by the Hazardous and Solid Waste Amendments of 1984, however, these petitions as well as the other petition for which we propose to grant an exclusion have been evaluated both for the factors for which the wastes were originally listed, and for other factors and toxicants reasonably expected to be present in these wastes.

DATES: EPA will accept public comments on these proposed exclusions until May 30, 1986. Any person may request a hearing on these proposed exclusions by filing a request with Eileen B. Claussen, whose address appears below, by May 15, 1986. The request must contain the information prescribed in 40 CFR 260.20(d).

ADDRESSES: Send two copies of your comments to EPA. One copy should be sent to the Docket Clerk, Office of Solid Waste (WH-562B), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. A second copy should be sent to Jim Kent, Delisting Section, Waste Identification Branch, CAD/OSW (WH-562B), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. Identify your comments at the top with this statement: "Section 3001—Delisting Petition: Proposed Exclusions Beginning with Northern Metal; April 30, 1986."

Requests for a hearing should be addressed to Eileen B. Claussen, Director, Characterization and Assessment Division, Office of Solid Waste (WH-562B), U.S. Environmental Protection Agency, 401 M. Street, SW., Washington, DC 20460.

The public docket for these proposed exclusions is located in Room S-212, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, and is available for viewing from 9:00 a.m. to 4:00 p.m., Monday through Friday, excluding holidays.

FOR FURTHER INFORMATION CONTACT: RCRA Hotline, toll free at (800) 424-9346, or at (202) 382-3000. For technical information, contact Lori DeRose, Office of Solid Waste (WH-562B), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, (202) 382-5096.

SUPPLEMENTARY INFORMATION:

Background

On January 16, 1981, as part of its final and interim final regulations implementing Section 3001 of RCRA, EPA published an amended list of hazardous wastes from non-specific and specific sources. This list has been amended several times, and is published in 40 CFR 261.31 and 261.32. These wastes are listed as hazardous because they typically and frequently exhibit any of the characteristics of hazardous wastes identified in Subpart C of Part 261 (*i.e.*, ignitability corrosivity, reactivity, and extraction procedure [EP] toxicity) or meet the criteria for listing contained in 40 CFR 261.11 (a)(2) or (a)(3).

Individual waste streams may vary, however, depending on raw materials, industrial processes, and other factors. Thus, while a waste that is described in these regulations generally is hazardous, a specific waste from an individual facility meeting the listing description may not be. For this reason, 40 CFR 260.20 and 260.22 provide an exclusion procedure, allowing persons to demonstrate that a specific waste from a particular generating facility should not be regulated as a hazardous waste.

To be excluded, petitioners must show that a waste generated at their facility does not meet any of the criteria under which the waste was listed. (See 40 CFR 260.22(a) and the background documents for the listed wastes.) In addition, the Hazardous and Solid Waste Amendments of 1984 (HSWA) require the Agency to consider factors (including additional constituents) other than those for which the waste was listed, if there is a reasonable basis to believe that such additional factors could cause the waste to be hazardous. Accordingly, a petitioner also must demonstrate that his waste does not

VOL 51 ISS 83 AP 30 1986 UMI

exhibit any of the hazardous waste characteristics, as well as present sufficient information for the Agency to determine whether the waste contains any other toxicants at hazardous levels. (See 40 CFR 260.22(a); Section 222 of the Hazardous and Solid Waste Amendments of 1984, 42 U.S.C. 6921(f); and the background documents for the listed wastes.) Although wastes which are "delisted" (*i.e.*, excluded have been evaluated to determine whether or not they exhibit any of the characteristics of a hazardous waste, generators remain obligated to determine whether their waste remains non-hazardous based on the hazardous waste characteristics. In addition, if substantial changes are made to the manufacturing or treatment process or to the raw materials used, the waste once again is hazardous (*i.e.*, the exclusion does not apply). To become excluded, the generator must file a new petition so that a determination can be made as to whether the new waste is non-hazardous.

In addition to wastes listed as hazardous in 40 CFR 261.31 and 261.32, residues from the treatment, storage, or disposal of listed hazardous wastes also are eligible for exclusion and remain hazardous wastes until excluded. (See 40 CFR 261.3(c) and 261.3(d)(2).) Again, the substantive standard for "delisting" is: (1) That the waste not meet any of the criteria for which it was listed originally; and (2) that the waste is not hazardous after considering factors (including additional constituents) other than those for which the waste was listed, if there is a reasonable basis to believe that such additional factors could cause the waste to be hazardous. Where the waste is derived from one or more listed hazardous wastes, the demonstration may be made with respect to each constituent or the waste mixture as a whole. (See 40 CFR 260.22(b).) Generators of these excluded treatment, storage, or disposal residues remain obligated to determine whether these residues exhibit any of the hazardous waste characteristics on a periodic basis.

Approach Used to Evaluate Delisting Petitions

The Agency first will evaluate the petition to determine whether the waste (for which the petition was submitted) is non-hazardous based on the criteria for which the waste was originally listed. If the Agency believes that the waste is still hazardous (based on the original listing criteria), it will propose to deny the petition. If, however, the Agency agrees with the petitioner that the waste is non-hazardous with respect to the factors for which the waste was listed, it then will evaluate the waste with respect to any other factors or criteria, if there is a reasonable basis to believe that such additional factors could cause the waste to be hazardous.

The Agency is using a hierarchical approach in evaluating petitions for the other factors or contaminants (*i.e.*, those listed in Appendix VIII of Part 261). This approach may, in some cases, eliminate the need for additional testing. The petitioner can choose to submit a raw materials list and process descriptions. The Agency will evaluate this information to determine whether any Appendix VIII hazardous constituents are used or formed in the manufacturing and treatment process and are likely to be present in the waste at significant levels. If so, the Agency then will request that the petitioner perform additional analytical testing. If the petitioner disagrees, he may present arguments on why the toxicants would not be present in the waste, or, if present, why they would pose no toxicological hazard. The reasoning may include descriptions of closed or segregated systems, or mass balance arguments relating volumes of raw materials used to the rate of waste generation. If the Agency finds that the arguments presented by the petitioner are not sufficient to eliminate the reasonable likelihood of the toxicant's presence in the waste at levels of regulatory concern, the petition would be tentatively denied on the basis of insufficient information. The petitioner then may choose to submit the additional analytical data on representative samples of the waste during the public comment period.

Rather than submitting a raw materials list, petitioners may test their waste for any additional toxic constituents that may be present and submit this data to the Agency. In this case, the petitioner should submit an explanation of why any constituents from Appendix VIII of Part 261, for which no testing was done, would not be present in the waste or, if present, why they would not pose a toxicological hazard.

In making a delisting determination, the Agency evaluates each petitioned waste against the listing criteria and factors cited in 40 CFR 261.11(a)(2) and (a)(3). Specifically, the Agency considers whether the waste is acutely toxic, as well as the toxicity of the constituents, the concentration of the constituents in the waste, their tendency to migrate and bioaccumulate, their persistence in the environment once released from the waste, plausible types of management of the waste, and the quantities of the waste generated. In this regard, the Agency has developed an analytical approach to the evaluation of wastes that are landfilled and land treated. See 50 FR 7882 (February 26, 1985), 50 FR 48886 (November 27, 1985), and 50 FR 48943 (November 27, 1985). The overall approach which includes a ground water transport model, is used to predict reasonable worst-case contaminant levels in ground water in nearby receptor wells (*i.e.*, the model estimates the ability of an aquifer to dilute the toxicant from a specific volume of waste). The land treatment model also has an air component and predicts the concentration of specific toxicants at some distance downwind of the facility. The compliance point concentration determined by the model then is compared directly to a level of regulatory concern. If the value at the compliance point predicted by the model is less than the level of regulatory concern, then the waste is a candidate for delisting. If the value at the compliance point is greater than this level, however, then the waste probably still will be considered hazardous, and not excluded from Subtitle C control.[1]

This approach evaluates the petitioned wastes by assuming reasonable worst-case land disposal scenarios. This approach has resulted in the development of a sliding regulatory scale which suggests that a large volume of waste exhibiting a particular extract level would be considered hazardous, while a smaller volume of the same waste could be considered non-hazardous.[2] The Agency believes this to be a reasonable outcome since a larger quantity of waste (and the toxicants in the waste) might not be diluted sufficiently to result in compliance point concentrations that are less than the level of regulatory concern. The selected approach predicts that the larger the waste volume, the greater the level of toxicants at the compliance point. The mathematical relationship (with respect to ground water) for wastes that are typically landfilled yields at least a six-fold dilution of the toxicant concentration initially entering the aquifer (*i.e.*, any waste exhibiting extract levels equal to or less than six times a level of regulatory concern will generate a toxicant concentration at the receptor well equal to or less than same level). Depending on the volume of waste, an additional five-fold dilution may be imparted, resulting in a total dilution of up to thirty-two times.

[1] The Agency recently proposed a similar approach, including a ground water transport model, as part of the land disposal restrictions rule (see 51 FR 1602, January 14, 1986). The Agency, however, has not yet evaluated the comments on this proposal. If this approach is promulgated, the Agency will consider revising the delisting analysis.

[2] Other factors may result in the denial of a petition, such as actual ground water monitoring data or spot check verification data.

The Agency is using this approach as one factor in determining the potential impact of the unregulated disposal of petitioned waste on human health and the environment. The Agency has used this approach in evaluating each of the wastes proposed for exclusion in today's publication. As a result of this evaluation, the Agency is proposing to grant the petitions discussed in this notice.

It should be noted that EPA has not verified the submitted test data before proposing to grant these exclusions. The sworn affidavits submitted with each petition bind the petitioners to present truthful and accurate results. In addition, the Agency conducts a spot sampling and analysis program to verify the representative nature of the data for some percentage of the submitted petitions before final exclusions will be granted.

Finally, before the Hazardous and Solid Waste Amendments of 1984, the Agency granted temporary exclusions without first requesting public comment. The Amendments specifically require the Agency to provide notice and an opportunity for comment before granting an exclusion. All of the exclusions proposed today will not be made final until all public comments (including those at requested hearings, if any) are addressed.

Petitioners

The proposed exclusions published today involve the following petitioners:

Northern Metal Specialty Division of Western Industries, Inc., Osceola, Wisconsin;
Plastene Supply Company, Portageville, Missouri;
Reynolds Metals Company, Sheffield, Alabama;
Universal Oil Products, Decatur, Alabama;
Whirlpool Corporation, Fort Smith, Arkansas.

I. Northern Metal Specialty Division

A. Petition for Exclusion

Northern Metal Specialty Division of Western Industries, Inc., (NMSD), located in Osceola, Wisconsin, manufactures steel cavities for microwave ovens and steel tops and oven cavities for ranges. NMSD has petitioned the Agency to exclude its wastewater treatment sludge, presently listed as EPA Hazardous Waste Nos. F006—Wastewater treatment sludges from electroplating operations except from the following processes: (1) Sulfuric acid anodizing of aluminum; (2) tin plating on carbon steel; (3) zinc plating (segregated basis) on carbon steel; (4) aluminum or zinc-aluminum plating on carbon steel; (5) cleaning/stripping associated with tin, zinc, and aluminum plating on carbon steel; and (6) chemical etching and milling of aluminum, and EPA Hazardous Waste No. K062—Spent pickle liquor from steel finishing operations. The listed constituents of concern for EPA Hazardous Waste No. F006 are cadmium, hexavalent chromium, nickel, and cyanide (complexed), while the listed constituents for EPA Hazardous Waste No. K062 are hexavalent chromium and lead.

Based upon the Agency's review of their petition, NMSD was granted a temporary exclusion on December 27, 1982.[3] The Agency's basis for granting the temporary exclusion was the low migration potential of the constituents of concern—namely, cadmium, hexavalent chromium, lead, nickel and complexed cyanides. On November 8, 1984, the Hazardous and Solid Waste Amendments were enacted. In part, these Amendments required the Agency to consider factors (including additional constituents) other than those for which the waste was listed, if the Agency has a reasonable basis to believe that such additional factors could cause the waste to be hazardous. (See section 222 of the Amendments, 42 U.S.C. 6921(f).) In anticipation of these changes, and as a result of these new requirements, the Agency requested additional information from NMSD. This information was submitted on February 2 and December 17, 1985. The Agency, therefore, has re-evaluated NMSD's petition to: (1) Determine whether the petition should be granted based on the toxicants and factors for which it was originally listed; and (2) evaluate the waste for factors (other than those for which the waste was listed) to determine whether the waste is non-hazardous. Today's notice is our re-evaluation of this petition.

In support of their petition, NMSD has submitted a detailed description of their manufacturing processes and wastewater treatment system, including lists of raw materials and schematic toxicity test results of the waste for all EP metals and nickel; distilled water leachate and total constituent analyses for cyanide; total oil and grease content of the waste; and reactivity test data for sulfide. NMSD also submitted test results for ignitability and corrosity.

NMSD's manufacturing process of the microwave oven cavities involves alkaline cleaning, and iron phosphating followed by sealing and plating. The final seal and deionized water rinse of the phosphating process contains chromic acid. This manufacturing line operates continuously. The manufacture of the range tops and cavities involve alkaline cleaning, acid pickling, and immersion nickel coating followed by porcelain enameling. The nickel immersion line operates intermittently, approximately 20% of the total 1985 production time. NMSD claims that the wastewater treatment sludge resulting from these operations is non-hazardous because the constituents of concern are present either in insignificant concentrations or, if present at significant levels, are essentially in immobile forms. NMSD also claims that the waste is not hazardous for any other reason.

Effluent from the chromium containing tanks is pretreated with sodium hydrosulfite to reduce the hexavalent chromium to trivalent chromium. The pretreated chromium effluent, pickle liquor wastewaters, rinse waters, and wastewater from the nickel immersion process are pumped into NMSD's waste treatment facility where lime neutralization, metal hydroxide precipitation, flocculation, clarification, and pressure filtration take place. The clarifier sludge (1–2% solids) is dewatered to 15–20% solids by the filter press. The effluent pH is maintained between 8 and 8.5.

NMSD has collected a total of 16 composite samples from the filter press on four separate occasions over the course of four and one-half years. Equal volumes of sludge were collected from the filter press three times per day and combined into a daily composite. NMSD's demonstration was originally based on five daily composite samples collected between February and June of 1981 and on three daily composite samples collected during one week in March of 1982 when only the phosphating process was in operation. In response to the Agency's request for additional information, NMSD provided the Agency with four additional composite samples (collected in the same manner) during one week in November 1984. At this time, both the iron phosphating and nickel immersion production lines were in operation. NMSD claims that since the nickel immersion process is operated only on an intermittant basis, the sample

[3] This exclusion was not published in the Federal Register. Since the Assistant Administrator for Solid Waste and Emergency Response approved the decision, however, we have concluded that Northern Metal was granted a temporary exclusion. See public docket for specific documentation.

VOL 51 ISS 83 AP 30 1986 UMI

collected in November 1984, represented a worst-case of the sludge generated during the year. Subsequently, NMSD resampled their filter cake in October of 1985. Increments were collected at two-hour intervals to form a daily composite. Each of the four samples represented two production days. Eighty percent of the sample was collected on a day when only the phosphating process was in operation. Twenty percent of the sample was collected on a day when both the phosphating and nickel immersion process was in operation. NMSD claims that the samples thus collected are representative of their porcesses and reflect any variation of constituent concentrations in the waste.

Total constituent analyses on the filter cake for the listed and non-listed inorganic toxicants revealed the maximum concentrations reported in Tablic 1. Also included in Table 1 are oil and grease test results, number of samples that were analyzed, and total cyanide.

TABLE 1.—TOTAL CONSTITUENT CONCENTRATIONS

Toxicant	Maximum total constituent concentration (mg/kg)	Number of samples analyzed
As	<67	9
Ba	36	9
Cd	40	9
Cr	8700	9
Pb	67	9
Hg	<17	9
Ni	2700	9
Se	<900	9
Ag	1.8	9
CN (total)	0.6	9
oil & grease	2220	4

The results of the leachate analyses for both the listed and non-listed inorganic toxicants are presented in Table 2.

TABLE 2.—EP LEACHATE CONCENTRATIONS

Toxicant	Maximum EP leachate concentration (ppm)	Number of samples analyzed
As	[1] 0.025	
Ba	<0.25	9
Cd	[2] 0.01	10
Cr	[3,4] 0.05	14
Pb	0.4	14
Hg	<0.005	9
Ni	20	12
Se	0.08	9
Ag	<0.04	9
CN-	[5] <0.02	4

[1] Analytic results on the four samples collected during 1981 did not detect As at a detection limit of 0.05 ppm. Subsequent analyses used a lower detection limit.

[2] One sample out of the ten contained Cd at a concentration of 0.18 ppm. The concentration of Cd in all of the other 9 samples were less than or equal to 0.01 ppm. Thus, we consider the one high sample an outlier and have not considered it in our evaluation.

[3] One sample out of 14 contained Cr at a concentration of 0.85 ppm. The concentration of Cr in all of the other 13 samples was less than or equal to 0.05 ppm. Thus, we consider the one high sample an outlier and have not considered it in our evaluation.

[4] Hexavalent chromium is listed as the constituent of concern for this waste. The concentration of total chromium is low enough, however, to make a determination of hexavalent chromium unnecessary.

[5] Cyanide was extracted in distilled water only.

NMSD also submitted a list of raw materials used in their process. This list indicated that no Appendix VIII hazardous constituents, other than those tested for, are used in the process and, thus, would not be expected to be present in the waste. Ignitability test results indicated that the samples exhibited no flash point at 200 °F. Total sulfide concentration was reported at less than 75 ppm. NMSD claims that the maximum volume of sludge generated from its filter press is 150 tons annually.

B. Agency Analysis and Action

The Agency believes that NMSD's wastewater treatment sludge should be considered non-hazardous, as conditioned below. The Agency believes that the 10 composite samples were non-biased and adequately represent any variations which may occur in NMSD's processes. The key factor that would cause a variation in toxicant concentrations in the waste would be the use of different raw materials due to changes in the product line being manufactured. Variations in raw materials can be expected when the facility either performs as a job shop or when the product line changes on a seasonal basis. Although NMSD's phosphating line operates continuously, the nickel immersion line operates intermittently. The nickel immersion line operated 20% of the time in 1985. NMSD, however, collected eight of their 10 composite samples when the nickel immersion line was in operation. The Agency, therefore, believes that NMSD's samples encompassed any seasonal variation in product line, and, therefore, are representative of NMSD's waste.

The Agency has evaluated the toxic constituents in NMSD's waste using the vertical and horizontal spread (VHS) model.[4]

This evaluation, using the total volume of waste (150 tons) and the maximum reported EP leachate concentrations as input parameters, resulted in the maximum predicted compliance point concentrations reported in Table 3. (When leachate concentrations were below the detection limits, the value of the detection limit was used to predict these concentration.)

TABLE 3.—PREDICTED MAXIMUM CONCENTRATIONS AT THE COMPLIANCE POINT

Toxicant	Maximum compliance point concentration (mg/l)	Regulatory standard (mg/l)
As	0.0008	0.05
Ba	0.008	1.0
Cd	0.006	0.01
Cr	0.03	0.05
Pb	0.01	0.05
Hg	0.0002	0.002
Ni	0.62	0.35
Se	0.002	0.01
Ag	0.001	0.05

As indicated in Table 3, the maximum predicted concentrations of the EP toxic metals are all below the National Interim Primary Drinking Water Standards. The presence of these constituents at the reported concentrations is therefore not of regulatory concern. The predicted maximum concentration of nickel, however, exceeds the Agency's interim criteria of 0.35 ppm.[5] The Agency is particularly concerned about the high and variable concentrations of leachable nickel. When both the nickel immersion and phosphating process were operating, the EP leachate values ranged from 1.0 ppm up to 20 ppm while the total constituent concentrations ranged rom 68–2700 ppm. When only the phosphating process was in operation (approximately 80% of the time) the maximum nickel lechate concentration was 6.5 ppm, which corresponds to a compliance point concentration of 0.2 ppm, well below the Agency's interim criterion of 0.35 ppm.

Distilled water leachate levels for cyanide are below the U.S. Public Health Services suggested drinking water standard and are, therefore, not of regulatory concern.[6] The total sulfide concentration was reported to be less than 75 ppm. We do not believe, however, that this is the actual level since: (1) Sulfides are not used in the process; and (2) a strong positive interference results when sulfide is analyzed in the presence of sulfite (sulfite is used to reduce chromium during wastewater treatment). We, therefore, believe that the actual concentration of sulfide is very low and not of regulatory concern. The Agency has also reviewed the Material Safety Data sheets and has concluded, that no other hazardous constituents are present in NMSD's waste.

[4] See FR 7882, Apendix I, February 20, 1985, for a detailed explanation of the development of the VHS model for use in the delisting program. See also the final version of the VHS model, 50 FR 48896, Appendix, November 27, 1985.

[5] The Agency previously used 632 ppb as the regulatory standard for nickel. Pending the completion of current EPA studies on the health effects of nickel, the Agency is using 350 ppb for the purpose of evaluating delisting petitions. The basis for this standard are explained at 50 Fr 20220-46, May 15, 1985.

[6] Drinking Water Standards, U.S. Public Health Service, Publication 956, 1962 (0.2 ppm).

The Agency believes, that based upon the constituents and factors evaluated, NMSD's phosphating process produces a non-hazardous waste and as such should be excluded from hazardous waste management. On the other hand, the sludge produced when both the phosphating process and nickel immersion process are operating is of concern. Since the nickel immersion process only operates intermittently (20%), however, the Agency has decided to grant a conditional exclusin when both processes are in operation. In particular, NMSD must test weekly composites of the dewatered sludge for nickel when the nickel immersion line is in operation. If nickel leachate values exceed 10 ppm, (resulting in 300 ppb at the compliance point) the waste will have to be disposed of as a hazardous waste; if the nickel leachate value is less than 10 ppm, the waste will be considered non-hazardous. NMSD can, however, demonstrate to the Agency that nickel leachate levels are typically and frequently below 10 ppm by weekly composites, and then petition the Agency to remove this contingency to their exclusion. The Agency, therefore, proposes to grant an exclusion to NMSD, pursuant to the conditions described above, for its facility located in Osceola, Wisconsin, for its filter press sludge, as described in their petition. (The Agency notes that any changes to the manufacturing or treatment processes will require NMSD to file an addendum to their petition or a new petition.[7] Any future changes to these characteristics of the sludge will require a redemonstration of the hazard of the waste.)

II. Plastene Supply Company

A. Petition for Exclusion

Plastene Supply Company (Plastene), located in Portageville, Missouri, electroplates plastic parts for the automotive and small appliance industries. Plastene has petitioned the Agency to exclude its filter cake, presently listed as EPA Hazardous Waste No. F006—Wastewater treatment sludges from electroplating operations except from the following processes: (1) Sulfuric acid anodizing of aluminum; (2) tin plating on carbon steel; (3) zinc plating (segregated basis) on carbon steel; (4) aluminum or zinc-aluminum plating on carbon steel; (5) cleaning/stripping associated with tin, zinc, and aluminum plating on carbon steel; and (6) chemical etching and milling of aluminum. The listed constituents of concern for this waste are cadmium, hexavalent chromium, nickel, and cyanide (complexed).

Based upon the Agency's review of their petition, Plastene was granted a temporary exclusion on December 31, 1981 (see 46 FR 61279). The basis for granting the exclusion was the low concentration of cadmium and cyanide, and the low migration potential of chromium and nickel in the waste. On November 8, 1984, the Hazardous and Solid Waste Amendments were enacted. In part, the Amendments require the Agency to consider factors (including additional constituents) other than those for which they were originally listed, if the Agency has a reasonable basis to believe that such additional factors could cause the waste to be hazardous. (See section 222 of the Amendments, 42 U.S.C. 6921(f).) In anticipation of either enactment of this legislation or regulatory changes by the Agency, EPA requested additional information from Plastene. This information was submitted on May 6, 1985 and December 4, 1985. As a result, the Agency has re-evaluated Plastene's petition to: (1) determine whether the temporary exclusion should be made final based on the original listing criteria; and (2) determine whether the waste is non-hazardous with respect to factors and toxicants other than the original listing criteria. Today's notice is the result of our re-evaluation of their petition.

Plastene has submitted a detailed description of its manufacturing and treatment processes, including schematic diagrams; total constituent analyses and EP toxicity test results of the filter cake for cadmium, total chromium, and nickel; and analytical results for total, amenable, and leachable cyanide.[8] Plastene also submitted total constituent analyses and EP toxicity test results for arsenic, barium, lead, mercury, selenium, and silver, and total oil and grease analyses on representative waste samples. Plastene further submitted a list of raw materials used in the manufacturing process. The Agency requested this information, as noted above, to determine whether toxicants, other than the original listing criteria, are present in the waste at levels of regulatory concern.

Plastene's manufacturing process includes ABS* plastic injection molding, chrome etching, electroless nickel plating, and copper, nickel, and chromium electroplating. Plastene claims that cadmium and cyanide are not used in their process. Treatment of the rinse water from the plating operations involves chromium reduction using sulfur dioxide and sulfuric acid; lime, calcium carbonate, and sodium hydroxide neutralization; polymer flocculation; clarification; and rotary vacuum filtration. Plastene claims that its treated wastewater sludge is non-hazardous due to the immobile nature of chromium and nickel and negligible levels of cadmium and cyanide in the sludge. Plastene also believes that their waste is not hazardous for any other reason.

Plastene presented analytical data on 182 composite samples which were collected from the filter press. Each composite sample was comprised of grab samples collected from three discrete areas of the filter press on each sampling date. The grab samples were collected at random times over a one-year period. (See petition for specific dates that samples were collected.) Plastene claims that the samples collected are representative of any variation of the listed and unlisted constituent concentrations in the waste. Plastene further claims that although the facility could be considered a job shop, the manufacturing processes used at the facility are uniform and the use of raw materials does not vary substantially over time. In addition, the petitioner claims that the sampling period was long enough to cover any scheduled changes in the product line and, therefore, all raw materials used in the process are represented by the samples collected.

Total constituent and leachable analyses of the filter cake for the listed constituents revealed the maximum concentrations reported in Table 1. (See "Agency Analysis and Action" for a more detailed explanation of why maximum levels were used.)

TABLE 1.—MAXIMUM CONCENTRATIONS (PPM)

	Total constituent analyses	EP leachate analyses
Cd	0.3	0.03
Cr (total) [1]	200	0.38
Ni	300	1.13
CN	<0.2	[2] <0.02

[1] Hexavalent chromium is listed as the constituent of concern for this waste. The concentration of total chromium,

[7] Once a final decision on this petition is made, a significant process change would require submissionof a new petition or treatment of the waste as hazardous.

[8] Leachable cyanide was determined using a distilled water extractant in the EP Toxicity test without pH adjustment.

VOL 51 ISS 83 AP 30 1986 UMI

however, is too small to make a determination of hexavalent chromium concentration.

[1] From distilled water leach test.

Total constituent and leachate analyses of the filter cake for the non-listed EP toxic metals revealed the maximum concentrations reported in Table 2.

TABLE 2.—MAXIMUM CONCENTRATIONS (PPM)[1]

	Total constituent analysis	EP leachate analysis
As	<0.1	<0.01
Be	9.0	5.0
Pb	3.5	0.28
Hg	<0.01	<0.001
Se	<0.1	<0.01
Ag	0.1	0.02

[1] The EP leachate values and maximum constituent analyses reported in Table 2 represent the maximum levels reported for the particular metal and do not necessarily represent the same sample.

The maximum total oil and grease content reported was 0.028 percent. Plastene also submitted a list of raw materials used in their manufacturing and wastewater treatment processes. This list indicated that no Appendix VIII hazardous constituents, other than those tested for, are used in the process and that formation of any of these constituents is highly unlikely. Plastene also provided test data indicating that the filter press cake is not ignitable, corrosive, or reactive. Plastene claims to generate a maximum of 2664 tons of filter cake per year.

B. Agency Analysis and Action

Plastene has demonstrated that its waste treatment system produces a non-hazardous sludge. The Agency believes that the 162 composite samples collected from the filter press over a one-year period were non-biased and adequately represent any variations that may occur in the waste stream petitioned for exclusion. The key factor that could vary toxicant concentrations in the waste would be the use of different raw materials due to changes in the product line being manufactured. Variation in the raw materials can be expected either when the facility performs as a job shop or when the product line changes on a seasonal basis. The Agency believes that the sampling period used by Plastene was long enough to cover any scheduled changes in the product line, since the petitioner has verified that all of the plating lines were in operation during the sampling period. The samples, therefore, are representative of the waste generated by Plastene.

The Agency has evaluated the mobility of the listed constituents from Plastene's waste using a vertical and horizontal spread (VHS) model.[9] The VHS model generated compliance point values using the 2664 tons per year generation rate and the maximum reported extract levels as input parameters. These compliance point concentrations are exhibited in Table 3. The Agency has evaluated this petition using the maximum reported extract levels rather than the mean extract level even though there was a large sample population (*i.e.*, 162 data points) due to the variability exhibited by the original data set of samples submitted by the petitioner. In addition, since variability is expected in wastes generated from job shops, it is inappropriate to average these data points.

TABLE 3.—VHS MODEL: CALCULATED COMPLIANCE POINT CONCENTRATIONS (PPM)

	Filter press	Regulatory standard
Cd	0.004	0.01
Cr (total)	0.040	0.05
Ni	0.150	0.36
Cn	<0.008	0.2

The filter cake exhibited cadmium and chromium levels (at the compliance point) below the National Interim Primary Drinking Water Standards; cyanide levels below the U.S. Public Health Service's suggested drinking water standard;[10] and nickel levels below the Agency's Interim Health Advisory.[11] The total cyanide levels in the waste are also below the air threshold limit set by the American Conference of Governmental Hygienists.[12] These constitutents are, therefore, not of regulatory concern.

The Agency also concluded, through the use of the VHS model, that no other EP toxic metals are present in the filter cake at levels of regulatory concern (*i.e.*, none are above any regulatory standard at the compliance point in the VHS model). the Compliance point values generated from these extract levels are displaced in Table 4.

TABLE 4.—VHS MODEL: CALCULATED COMPLIANCE POINT CONCENTRATIONS (PPM)

	Filter press	Regulatory standard

TABLE 4.—VHS MODEL: CALCULATED COMPLIANCE POINT CONCENTRATIONS (PPM)—Continued

	Filter press	Regulatory standard
Se	<0.004	0.01
Ag	0.003	0.05

The Agency also reviewed Plastene's raw material lists and material safety data sheets for each component in the raw materials lists. The Agency has concluded from this review that no other Appendix VIII toxicants, other than those tested for, are present in the waste.

The Agency believes that the treatment process used by Plastene generates a non-hazardous waste. The Agency, therefore, proposes to grant an exclusion to Plastene's facility, located in Portageville, Missouri, for its filter cake, as described in its petition. (The Agency notes that any changes to the manufacturing or treatment processes will require Plastene to file an addendum to their petition or a new petition.[13] Any future changes to these processes that could effect the physical or chemical characteristics of the sludge will require a redemonstration of the hazards of the waste.)

III. Reynolds Metals Company

A. Petition for Exclusion

Reynolds Metals Company's Sheffield Plant (Reynolds), located in Sheffield, Alabama uses a chromating process in the coating of coiled aluminum stock. reynolds has petitioned the agency to exclude its wastewater treatment sludge from the chemical conversion of aluminum, presently listed as EPA Hazardous Waste No. F019. The listed constituents of concern for EPA Hazardous Waste No. F019 are hexavalent chromium and cyanide (complexed).

Based upon the Agency's review of their petition and supplementary data submitted on October 27, 1981, Reynolds was granted a temporary exclusion on November 22, 1982 (See 47 FR 52868). The basis for granting the exclusion was the low migration potential for the constituents of concern (*i.e.*, chromium and cyanide). On November 8, 1984, the Hazardous and Solid Waste Amendments were enacted. In part, the Amendments require the Agency to consider factors (including additional constituents) other than those for which

[13] Once a final decision on this petition is made a significant process change would require submission of a new petition or treatment of the waste as hazardous.

the waste was listed, if the Agency has a reasonable basis to believe that such factors could cause the waste to be hazardous. (See section 222 of the Amendments, 42 U.S.C. 6921(f).) In anticipation of either enactment of this legislation or regulatory changes by the Agency, EPA requested additional information from Reynolds. This additional information was submitted on December 14, 1984 and November 5, 1985. As a result, the Agency has re-evaluated Reynolds' petition to: (1) Determine whether the temporary exclusion should be made final based on the original listing criteria; and (2) evaluate the waste for factors (other than those for which the waste was originally listed) to determine whether the waste is non-hazardous. Today's notice is the result of our re-evaluation of their petition.

In support of their petition, Reynolds has submitted descriptions of their manufacturing and wastewater treatment processes, including schematic diagrams and lists of raw materials. Reynolds also submitted analytical data to characterize the sludge in its as-disposed condition. This includes the results of EP leachate tests and total constituent analyses for the EP toxic metals and nickel; distilled water leach tests and total constituent analyses for cyanide; and results of tests for the wastes sulfide and oil and grease content. Much of this information was provided, as noted above, to demonstrate that no additional hazardous constituents (*i.e.*, constituents other than those for which the waste was listed) are present in the waste.

Reynolds' waste is the result of a chromate chemical conversion process whereby the aluminum is prepared for subsequent coating. Spent chromate solutions are chemically treated to covert the hexavalent chromium to trivalent chromium, which is precipitated out of the solution and separated in a clarifier. The resultant metal hydroxide sludge is dewatered through vacuum filtration.

The characterization of the sludge was based upon samples collected during two sampling periods.[14] In both cases, the samples were composites, collected from the filter press, which represented the sludge generated during a four-week period. Specifically, increments[15] were collected at random times during each day of filter press operation and, at the end of the week, composited to produce a sample. This procedure was followed during each of the four weeks, resulting in four samples.

Total constituent analysis of the samples revealed the maximum concentrations (reported in Table 1) for the EP toxic metals, nickel cyanide, sulfide, and oil and grease content. Table 1 also presents the maximum values from leachate tests.

TABLE 1.—MAXIMUM CONCENTRATIONS[1]

	Total constituent analysis (mg/kg)	EP leachate analysis (mg/l)
As	0.091	<0.05
Be	230	.22
Cd	<0.2	<0.1
Cr	84580	<0.5

Se	0.056	<0.05
Ag	<0.2	<0.1
Ni	<0.2	<0.01
CN	<4	[2] <0.05
Sulfide	66	[3]
Oil and Grease	22	[3]

[1] The EP leachate values and maximum constituent analyses reported in Table 1 represent the maximum levels reported for the particular metal and do not necessarily represent the same sample.

[2] Results form distilled water leaching test.

[3] Not applicable.

Reynold's description of their manufacturing and wastewater treatment processes, along with the submitted lists of raw materials indicated that no other Appendix VIII hazardous constituents, other than those tested for, would be expected, nor would they likely be formed in their waste. Test results also indicated that the waste is not ignitable or corrosive. Reynolds estimates the maximumm generation rate of the dewatered sludge to be 400 yd[3] yr.

B. Agency Analysis and Action

Reynolds has demonstrated that their wastewater treatment system produces a non-hazardous sludge. The Agency believes that the samples collected during the four-week sampling period are non-biased and adequately reflect any variations which may occur in the subject wastestream. The key factor that could vary the constituent concentration in this waste would be the use of different raw materials or different processes in the manufacturing process that contribute to the wastestream. While the type of coating that Reynolds ultimately applies does vary, the source of the subject waste is a preliminary process which is uniform regardless of variations in subsequent processes (*i.e.*, wastes from the coating operation are not discharged to the wastewater treatment system). The Agency, therefore, believes that Reynolds' claim of uniformity of the subject waste is substantiated and that, given this uniformity, a four-week sampling period is sufficient to characterize the waste.

The Agency has evaluated the mobility of toxicants from Reynolds' waste using the vertical and horizontal spread (VHS) model.[16] This evaluation, using the maximum values for the estimated annual sludge generation and leachate concentrations as input parameters, has resulted in the maximum predicted compliance point concentration exhibited in Table 2. Table 2 also presents, for each toxicant, the regulatory standard to which the compliance point concentration is compared.[17]

TABLE 2.—CALCULATED MAXIMUM COMPLIANCE POINT CONCENTRATION

	Compliance point concentration	(mg/l)
As	<0.008	0.05
Ba	0.69	1.0
Cd	<0.008	0.01
Cr	<0.016	0.05
Pb	<0.006	0.05
Hg	0.0001	0.002
Se	<0.002	0.01
Ag	<0.008	0.05
Ni	<0.001	0.35
CN	<0.002	0.2

As indicated in Table 2, the predicted maximum compliance-point concentrations of these toxicants are all less than their regulatory standards. The presence of these toxicants at the reported levels, is therefore, not of regulatory concern. In addition, the Agency's evaluation of the processes and raw materials used at Reynolds' facility indicates that no other Appendix VIII hazardous constituents are present, or are likely to be formed, in Reynolds' waste.

The waste's maximum sulfide and cyanide content (66 mg/kg and <4 mg/kg, respectively) is low enough so as not

[14] Samples collected during the first sampling period (in 1983) were used in Reynolds' inital petition. Since the petition was submitted prior to the Hazardous and Solid Waste Amendments of 1984, analysis was restricted to the constituents for which the waste was listed and the factors which could cause the waste to meet the hazardous waste characteristics. The second set of samples (collected in 1986) were analysed for EP leachate and total constituent concentration of the EP toxic metals, nickel, and cyanide as well as the waste's oil and grease content.

[15] An "increment" refers to an individual sample which is subsequently composited.

[16] See Footnote 4.

[17] For the EP toxic metals, these values are equal to the National Interim Primary Drinking Water Standards. For nickel, the Agency has adopted an interim delisting standard of 0.35 mg/l (see footnote 6). For cyanide, the value is equal to the U.S. Public Health Service's recommended drinking water standard.

VOL 51 ISS 83 AP 30 1986 UMI

to be of regulatory concern from an air contamination route. That is, the Agency believes these levels to be sufficiently low so as to preclude the generation of hazardous levels of toxic gases. In particular, total cyanide levels in the waste are below the air threshold limit set by the American Conference of Governmental Hygienists [18] while sulfide levels are not of regulatory concern based upon the results of air dispersion calculations.[19] (The capability of a sulfide- or cyanide-bearing waste to generate hazardous levels of toxic gases, vapors, or fumes is a property of the reactivity characteristic.)

The Agency believes, based upon the constituents and factors evaluated, that Reynolds' waste is non-hazardous and should be excluded from hazardous waste contro. The Agency, therefore, proposes to grant a final exclusion to Reynolds Metals Company's Sheffield Plant, located in Sheffield, Alabama, for their dewatered wastewater treatment sludge from the conversion coating of aluminum, as described in their petition. (The Agency notes that any changes to the manufacturing or treatment processes will require Reynolds to file an addendum to their petition or a new petition.[20] Any future changes to these processes that could effect the physical or chemical characteristics of the sludge will require a redemonstration of the hazard of the waste.)

IV. Universal Oil Products Company

A. Petition for Exclusion

Universal Oil Products, Wolverine Division (Universal), located in Decatur, Alabama, is involved in the manufacture of aluminum and copper tubing. Universal has petitioned the Agency to exclude its treated sludge presently listed as EPA Hazardous Waste No. F006—Wastewater treatment sludges from electroplating operations except from the following processes: (1) Sulfuric acid anodizing of aluminum; (2) tin plating on carbon steel; (3) zinc plating (segregated basis) on carbon steel; (4) aluminum or zinc-aluminum plating on carbon steel; (5) cleaning/stripping associated with tin, zinc, and aluminum plating on carbon steel; and (6) chemical etching and milling of aluminum.

Universal discontinued their electroplating operations in August 1983. The subject of Universal's petition is the sludge that was generated before August 1983, which is contained in two holding lagoons. One of the lagoons is inactive; the other lagoon is still in use but has not received any listed hazardous waste since August 1983. Universal has petitioned to exclude their previously generated sludge, contained in the two holding lagoons, because it does not meet the criteria for which it is listed.[21]

The listed constituents of concern for EPA Hazardous Waste No. F006 are cadmium, hexavalent chromium, nickel, and cyanide (complexed). Universal's sludge resulted from the lime treatment and precipitation of solids from wastewaters from the alkali rinse, acid cleaning, and plating operations. Universal claims that their wastewater treatment system produced a non-hazardous sludge because the constituents of concern are present in either insignificant concentrations (*i.e.*, Universal states that cadmium and cyanide are not used in their process) or in essentially an immobile form. Universal further claims that this waste is not hazardous for any other reason.

Universal has submitted detailed information to describe their electroplating and wastewater treatment processes, including schematic diagrams; total constituent analyses, and EP toxicity and EP for oily waste test results of the sludge for cadmium, chromium, hexavalent chromium, and nickel; and total constituent analyses and distilled water leach tests for cyanide.

Universal also submitted total constituent analyses of the waste and EP and oily toxicity test results for arsenic, barium, lead, mercury, selenium, and silver; and total oil and grease content for representative waste samples. In addition, Universal provided ground water monitoring data in support of its delisting petition. Universal further submitted a list of raw materials used in manufacturing process and test results for Total Toxic Organics on their wastewater for the organic priority pollutants.[22] The Agency requested this information, as noted above, to determine if hazardous constituents other than those for which the waste was originally listed, are present in the waste at levels of regulatory concern.

Universal currently manufactures aluminum and copper tubing, in several alloys, for various final products. Previously, Universal produced a plated copper tubing, but discontinued this operation in August 1983. This plating process generated the listed waste. The plating process involved wrapping the copper tubes with a porous conductive tape and lowering them into a copper sulfate solution for plating. The wastewaters from the electroplating operations (*i.e.*, the rinsewater from electroplating operations, the rinsewater from alkali washings, and the rinsewater from acid cleaning) resulted in the production of the generically listed sludge. This process also involved a vapor degreasing step using 1,1,1-trichloroethane, before plating. Universal claims that no solvent from the degreasing operation entered the wastewater treatment system, and thus this solvent would not be expected to be found in the petitioned sludge.[23]

Universal's waste treatment system consisted of lime slurry neutralization of the acidic wastewater, precipitation, and polymer addition. A high molecular weight polymer was added to precipitate metals not adequately treated by lime. The sludge is contained in two 1.25 million gallon settling lagoons, labeled the active and inactive lagoon. The active lagoon is currently receiving non-listed waste.

To ensure collection of representative samples, a sampling strategy was employed which used composites of randomly collected samples. Each of the two impoundments (called the active lagoon and inactive lagoon) measures 525 × 55 feet; however, significant sludge accumulation is limited to the first 150 feet from the influent points. Less than two inches of waste covers the remainder of the lagoons. Sampling was therefore limited to the 150 × 55 foot area to the influent pipe. This 150 × 55 foot area of each lagoon was divided into quadrants. Using a core sampling, five core samples representing the total depth of the impoundments (4½ feet) were randomly collected from each quadrant. The five cores from each quadrant were composited to produce four separate composite samples for each impoundment. Cores from each quadrant were kept separate. Universal claims that the samples collected are representative of any variation of the listed and unlisted constituent concentrations in the waste. The petitioner further claims that the listed wastes, generated prior to August 1983, and the unlisted wastes, currently being generated, are both from manufacturing processes that operate(d) in a consistent manner and that the use of raw materials do (did) not vary over the time periods that these individual wastestreams were generated.[24]

Total constituent analyses of the sludge for the EP toxic metals, nickel, and cyanide revealed the maximum concentrations reported in Table 1.

TABLE 1.—MAXIMUM TOTAL CONSTITUENT ANALYSIS (mg/kg)

Constituent	Active sludge lagoon	Inactive sludge lagoon
As	4.4	4.8
Be	12	76
Cd	0.1	0.1
Cr	170	648
Pb	26	29
Hg	<0.1	<0.1
Ni	200	250
Se	<0.1	<0.1
Ag	1.0	1.6
CN	<1	<1

Total oil and grease values reported for the active lagoon ranged from 0.27 to 0.40 percent while values for the inactive lagoon ranged from 0.60 to 1.15 percent.[25]

The EP toxicity and the EP for Oily Waste leachate analyses for these same constituents revealed the maximum concentrations reported in Table 2.[26]

TABLE 2.—MAXIMUM EP LEACHATE CONCENTRATIONS (MG/L)

Constituent	Active sludge lagoon	Inactive sludge lagoon
As	<0.1	<0.1
Be [1]	11	7
Cd	<0.01	<0.01
Cr [2]	<0.1	<0.1
Pb	<0.1	0.2
Hg	<0.01	<0.01
Ni	1.8	1.6
Se	<0.02	<0.02
Ag [3]	<0.2	<0.2
CN [4]	0.02	<0.005

[1] The maximum concentration of Be reported in the sludge was 76 ppm. If fully extracted, the calculated concentration in the leachate would be 3.8 ppm. This is less than the reported EP leachate concentrations. Universal claims that these high EP leachate levels result from the high level of calcium in the waste which overwhelms the Be standard additions. The intensity of the Be emissions is secondary to the calcium intensity, causing the depressed standard addition recovery. This problem was not encountered with the Be total constituent analysis.

[2] Hexavalent chromium is listed as the constituent of concern for this waste; however, since the concentration of total chromium is low, a determination of the concentration of hexavalent chromium is unnecessary.

[3] The maximum Ag leachate concentration is greater than predicted based on total constituent analysis. The Agency believes, however, that these values are within the range of the experimental precision of the test methods (*i.e.*, total digestion and EP leachate procedure.)

[4] Distilled water leachate analysis.

Ground water monitoring data indicated excessive levels (1.2 mg/l) of hexavalent chromiun in downgradient monitoring wells. The Agency, therefore, requested additional information from Universal to determine the source of the hexavalent chromium. Information provided by Universal revealed that during the period from 1960 to 1970, the facility stored neutralized chromic acid sludge (sodium dichromate dissolved in sulfuric acid) in their on-site lagoons. Records of analytical test data of this waste show it to be approximately 0 percent chromium, and based on the raw materials used at the time, all of the chromium content was in the form of hexavalent chromium. It was further shown that the hexavalent chromium bearing sludge was completely removed during 1973 and 1974. (Recent analyses of soil samples taken near the storage lagoons show that soil in the lagoon walls still contain excessive levels of hexavalent chromium.) Universal, therefore, claims that the source of contamination is not from the sludge which they request to be listed, but rather the contamination source, Universal claims, is from the chromic acid sludge that was disposed of in the 1960's.

Universal claims that the maximum volume of waste generated typically does not exceed 7,000 pounds per year; however, Universal has approximately 55,000 cubic feet of waste (30,940 cubic feet in the inactive lagoon and 24,750 cubic feet in the active lagoon) currently stored on-site.

B. Agency Analysis and Action

Universal has demonstrated that its wastewater treatment sludge, currently contained in both the active and inactive lagoons, is non-hazardous. The Agency believes that the eight composite samples (four collected from each of the lagoons) were non-biased and adequately represent any variations which may occur in the waste petitioned for exclusion. The Agency believes that, since the samples were complete cores and were taken randomly throughout the section of the lagoons which had significant sludge accumulation, any stratification occurring vertically due to settling or horizontally as a function of distance from the inlet pipe would be represented by the sampling scheme used. The key factor which would vary constituent concentrations in continuously generated sludge would be the use of different raw materials, due to changes in the product line being manufactured. Variations in raw materials used can be expected when a facility either performs as a job shop or when the product line changes on a seasonal basis. Since this facility did not perform as a job shop or have seasonal product variations, the Agency believes that Universal has substantiated their claim that the manufacturing and treatment processes were uniform and consistent.

Although electroplating operations ceased in August of 1983, representative samples were taken from both the inactive lagoon (which contains only the previously generated listed waste) and the active lagoon (which contains both the listed waste and the currently generated unlisted waste). The Agency believes that the samples taken and the analytical data presented from these samples are sufficient to accurately characterize the petitioned waste.

The Agency has evaluated the mobility of the constituents from Universal's waste using a vertical and

---

[18] See footnote 12.

[19] A copy of these calculations is available in the public docket for this notice.

[20] Once a final decision on this petition is made, a significant process change would require submission of a new petition or treatment of the waste as hazardous.

[21] Universal originally submitted their petition on March 2, 1982. A supplement to the original petition was received on November 19, 1982. On November 8, 1984, the Hazardous and Solid Waste Amendments of 1984 were enacted. In part, the Amendments require the Agency to consider factors (including additional constituents) other than those for which the waste was listed, if the Agency has a reasonable basis to believe that such additional factors could cause the waste to be hazardous. (See section 222 of the Amendments, 42 U.S.C. 6921(f).) In anticipation of either enactment of this legislation or regulatory changes by the Agency, EPA requested additional information from Universal. This additional information was submitted on February 2, 1984 and March 6, 1985.

[22] Universal has NPDES permits for their outfalls. The facility was re-permitted in 1984 under categorical standards. This required Universal to submit a Baseline Monitoring Report which included a test for Total Toxic Organics (TTO). The TTO were not detected at Outfall 004, the outfall which receives the effluent from the wastewater treatment lagoons which is the subject of this notice.

[23] Process diagrams and waste treatment schematics provided by Universal in support of their delisting petition show that spent solvents resulting from the degreasing step of the electroplating process were treated in a separate waste treatment system and did not enter the petitioned wastestream.

[24] According to Universal, the wastes generated by prior electroplating operations were from processes which operated in a consistent manner and which used raw materials that did not vary over time (*i.e.*, the waste currently stored from these operations, which ceased in August 1983, is representative of the waste generated by that process). In addition, the unlisted waste currently being generated and stored in the active lagoon is representative of the waste generated by current manufactured processes at this facility since these processes operate in consistent manner and the current use of raw materials does not change over time.

[25] Three of the four sludge samples analyzed from the inactive lagoon exhibited total oil and grease levels less than or equal to 0.70 percent.

[26] Although Universal Oil performed the oily waste EP, the Agency does not believe its use is appropriate in this instance. Only 1 out of 8 of the composite samples had an oil and grease content above 1% (*i.e.*, 1.15%). The calculated 95% confidence interval for oil and grease was 0.76%, below the level of 1% at which we currently require the oily waste EP.

VOL 51 ISS 83 AP 30 1986 UMI

horizontal spread (VHS) model.[27] The Agency's evaluation of Universal's 55,000 cubic feet of lagooned sludge and the maximum extract levels for the constituents using the VHS model has generated the compliance point concentrations exhibited in Table 3.

TABLE 3—MAXIMUM CONCENTRATIONS

Constituent	Calculated compliance point concentration	Regulatory standard
As	0.01	0.05
Be	1.3	1.0
Cd	0.001	0.01
Cr	0.01	0.05
Pb	0.02	0.05
Hg	0.001	0.002
Ni	0.22	0.350
Se	0.002	0.01
Ag	0.02	0.05
CN	0.002	0.20

With the exception of barium, the predicted maximum concentrations of the metals (at the compliance point) are below the National Interim Primary Driking Water Standards (NIPDWS); nickel values were less than the interim Health Advisor;[28] and cyanide levels were less than the U.S. Public Health Service's suggested drinking water standards.[29]

Although the predicted maximum concentration of barium at the compliance point exceeds the NIPDWS, the Agency believes that the results may be spurious. Analysis of the raw data on barium revealed suppressed standard addition results at the highest spike level (60 ppm), resulting in depressed recovery values and in a high calculated concentration. These results are questionable because: (1) Total constituent concentrations are very low (ranging from 7 to 76 ppm); (2) recoveries were good for total analyses; and (3) barium is not used in the manufacturing process or wastewater treatment process.

Cyanide levels in the waste are also not expected to be present at levels of regulatory concern from an air contamination route. Total cyanide levels in the waste are well below the air threshold limit of 10 ppm as set by the American Conference of Governmental Industiral Hygienists.[30]

The Agency also has concluded that no other hazardous constituents are present in the waste at levels of regulatory concern. The raw materials currently used by Universal in their manufacturing process do not contain any additional hazardous constituents, such as organic toxicants. Before August 1983, Universal produced a product which required a vapor degreasing step before plating. No solvent from this operation entered the wastestream.[31] Universal has submitted TTO data for three samples from the active lagoon outfall. No organic priority pollutants, however, were detected in the effluent. In addition, the Agency's evaluation of the processes and raw materials used at Universal indicates that no other Appendix VIII hazardous constituents are present, or are likely to be formed, in Universal's waste.

With respect to the ground water monitoring data, the Agency has a number of concerns. Based on the information and data provided, as well as analytical test results of the sludges currently generated and/or stored however, the Agency believes that Universal has substantiated their claim that the excessive levels of hexavalent chromium found near the storage lagoons and found in the walls are the result of waste previously generated, stored, and removed and that these constituent levels are not the result of wastes currently being generated and included in their petition. Universal detected up to 3600 ppm of hexavalent chromium in the walls of the lagoons. Based on the total constituent analysis, the maximum level of hexavalent chromium measured in Universal's waste is less than 1 ppm. EP data indicated that less than 0.1 ppm of chromium would leach. Accordingly, the Agency believes that the hexavalent chromium in the walls of the lagoon did not come from the waste. It must be noted, that today's proposed rule does not exclude the contaminated soils that have resulted from the previous practice of storing chromic acid sludge in the on-site lagoons. Universal, therefore, remains obligated to remove and dispose of these soils pursuant to the requirements of section 3008 of the Resource Conservation and Recovery Act (RCRA). In addition, pursuant to section 3004(u), Universal is still subject to the corrective action provisions of RCRA.

The Agency believes that the waste is non-hazardous (for all reasons) and as such should be excluded from hazardous waste control. The Agency, therefore, proposes to grant a one-time exclusion to Universal Oil Products Company, Wolverine Division, located in Decatur, Alabama, for their wastewater treatment sludge generated from electroplating operations and contained in two on-site holding lagoons.

V. Whirlpool Corporation

A. Petition for Exclusion

Whirlpool Corporation (Whirlpool), located in Forth Smith, Arkansas, manufactures household refrigerators and freezers. Whirlpool has petitioned the Agency to exclude its treated sludge, presently listed as EPA Hazardous Waste No. F006—Wastewater treatment sludges from electroplating operations except from the following processes: (1) sulfuric acid anodizing of aluminum; (2) tin plating on carbon steel; (3) zinc plating (segregated basis) on carbon steel; (40 aluminum or zinc-aluminum plating on carbon steel; (5) cleaning/stripping associated with tin, zinc, and aluminum plating on carbon steel; and (6) chemical-etching and milling of aluminum. The listed constituents of concern for this waste are cadmium, hexavalent chromium, nickel, and cyanide (complexed).

Based upon the Agency's review of their petition, Whirlpool was granted a temporary exclusion on August 6, 1981 (see 46 FR 40156). The basis for granting the exclusion was the low concentration and/or the immobile form of the constituents of concern (cadmium, hexavalent chromium, nickel, and cyanide in the waste. On November 8, 1984, the Hazardous and Solid Waste Amendments were enacted. In part, the Amendments require the Agency to consider factors (including additional constituents) other than those for which the waste was listed, if the Agency has a reasonable basis to believe that such additional factors could cause the waste to be hazardous waste. (See section 222 of the Amendments, 42 U.S.C. 6921(f).) In anticipation of either enactment of this legislation or regulatory changes by the Agency, EPA requested additional information from Whirlpool. This information was submitted on December 2, 1983, and January 15, 1986. As a result, the Agnecy has re-evaluated Whirlpool's petition to: (1) Determine whether the temporary exclusion should be made final based on the criteria for which it was originally listed and (2) evaluate the waste for factors (other than those for which the waste was originally listed) to determine whether the waste is non-hazardous. Today's notice is the result of our re-evaluation of their petition.

Whirlpool has submitted a detailed description of its manufacturing and wastewater treatment processes, including schematic diagrams; total constituent analyses and EP toxicity test

[27] See footnote 4.
[28] See footnote 5.
[29] See footnote 6.
[30] See footnote 12.
[31] See footnote 22.

results of the sludge for cadmium, total chromium, and nickel; and results of total constituent analyses and distilled water leach test for cyanide. Whirlpool also submitted total constituent analyses and EP toxicity test results for arsenic, barium, lead, mercury, selenium, and silver, and total oil and grease analyses on representative waste samples. Whirlpool further submitted a list of raw materials used in the manufacturing process. The Agency requested this information, as noted above, to determine whether hazardous constituents, other than those for which the waste was originally listed, are present in the waste at levels of regulatory concern.

In Whirlpool's manufacturing process, metals are coated with an alkaline phosphate, rinsed with chromic acid, and then pickled in preparation for painting and enameling. Whirlpool claims that cadmium and cyanide are not used in their process. Treatment of the rinse water from the phosphating system primarily involves neutralization with lime and the reduction of hexavalent chromium to trivalent chromium. The rinse waters from the pickling stages enter a pH adjustment tank (lime or sulfuric acid is added), a flocculant tank, and then flows to a clarifier. The sludge from the clarifier then joins the phosphating wastes to undergo batch lime treatment before the mixture is dewatered to approximately a 40 percent solids content, using a filter press. Whirlpool claims that its treated wastewater sludge is non-hazardous due to the immobile nature and negligible levels of cadmium, chromium, cyanide, and nickel in the sludge. Whirlpool also believes that their waste is not hazardous for any reason.

Grab samples were collected from the filter press conveyor belt each time the press was dumped (approximately every hour). Six weekly composite samples were formed from these grab samples. The sludge samples that were collected from November 4, 1985 to January 10, 1986 represent sludge that has been treated with approximately three percent lime. Whirlpool's original petition was based on four samples collected within a seven-month period. As noted above, additional information was submitted in December 1983, in anticipation of the Hazardous and Solid Waste Amendments; four additional daily composite samples, taken over a one-week period, were included with this submission. Whirlpool claims, however, that they plan to continue the additional lime treatment demonstrated in their most recent submittal. Whirlpool believes that these samples (collected from November 4, 1985 to January 10, 1986) therefore, are best representative of the listed and unlisted constituent concentrations in the waste.[32]

The petitioner further claims that the manufacturing processes used at the facility are operated in a consistent manner and that the use of raw materials does not vary over time. Consequently, they believe that the samples collected adequately characterize their waste.

Total constitutent analyses and EP toxicity test results of the treatment sludge for the listed constitutents revealed the maximum concentrations reported in Table 1.

TABLE 1.—MAXIMUM CONCENTRATIONS

	Total constituent analyses (mg/kg)	EP leachate analyses (mg/l)
Cd	5.1	0.02
Cr (total) [1]	663	<0.05
Ni [2]	314	1.75
CN [3]	2.5	0.02

[1] Hexavalent chromium is listed as the constituent of concern for this waste; however, the concentration of total chromium is low enough to make a determination of hexavalent chromium unnecessary.
[2] A nickle concentration of 1.75 ppm in the leachate was found in 1 of the 5 samples analyzed. In the remaining samples nickel was not detected at 0.05 ppm.
[3] From distilled water leach test.

The total constituent analyses and EP toxicity test results of the treatment sludge for the on-listed EP toxic metals revealed the maximum concentrations reported in Table 2.

TABLE 2.—MAXIMUM CONCENTRATIONS

	Total constituent analyses (mg/kg)	EP leachate analyses (mg/l)
As	0.14	<0.01
Be	<5.2	<0.1
Pb	29	<0.2
Hg	0.3	<0.01
Se	<5	<0.01
Ag	<0.52	<0.05

The maximum total oil and grease value reported was 0.72 percent. Whirlpool also submitted a list of all raw materials used in their manufacturing and wastewater treatment processes. This list indicated that no Appendix VIII hazardous constituents, other than those tested for, are used in the process and that formation of any of these constituents is highly unlikely. Whirlpool also provided test data indicating that the filter press cake is not ignitable, corrosive, or reactive. Whirlpool claims to generate a maximum of 4000 cubic yards per year of waste from the filter press.

B. Agency Analysis and Action

Whirlpool has demonstrated that its waste treatment system produces a non-hazardous sludge. The Agency believes that the six weekly composite samples collected from the filter press were non-biased and adequately represent any variations that may occur in the waste stream petitioned for exclusion.[33] The key factor that could vary toxicant concentrations in the waste would be the use of different raw materials due to changes in the product line being manufactured. Whirlpool is not a job shop nor does it have seasonal product variations. The Agency, therefore, believes that Whirlpool substantiated their claim that the manufacturing and treatment processes are uniform and consistent. The Agency believes that the samples collected are representative of the waste generated by Whirlpool.

The Agency has evaluated the mobility of the constituents from Whirlpool's waste using a vertical and horizontal spread (VHS) model.[34] The Agency's evaluation of Whirlpool's waste, using the maximum values for the estimated annual sludge generation and reported leachate concentrations as input parameters, has resulted in the maximum predicted compliance point concentrations for the listed constituents exhibited in Table 3.

TABLE 3.—COMPLIANCE POINT CONCENTRATIONS (mg/1)

	Filter press	Regulatory standard
Cd	0.003	0.01
Cr (total)	0.008	0.05
Ni	0.27	0.35
CN	0.003	0.2

The filter press sludge exhibited cadmium and chromium levels (at the compliance point) below the National Interim Primary Drinking Water

[32] In previous submittals, Whirlpool's waste demonstrated nickel EP leachate levels ranging from 0.11 to 8.35 ppm. When these values were used in the evaluation of Whirlpool's petition, it was determined that they were too high to allow for a delisting. The regulatory standard for nickel, however, is an interim number, and the nickel levels demonstrated in Whirlpool's waste were just slightly too high. The Agency stated that a petition would not be denied based solely on the waste's nickel content (see 50 FR 20347, May 15, 1985) until a final regulatory standard was set. Rather then wait for this standard, Whirlpool decided to modify their treatment process. It was determined that 3% lime addition sufficiently bound all of the EP toxic metals, and nickel.

[33] The Agency only considered the samples collected after the 3% lime treatment had begun, since these samples represent the waste as Whirlpool now intends to generate it. This treatment is, therefore, considered necessary for the exclusion to be valid.

[34] See footnote 4.

VOL 51 ISS 83 AP 30 1986 UMI

Standards and cyanide levels below the U.S. Public Health Service's suggested drinking water standard.[35] The predicted maximum nickel value is below the Agency's interim standard.[36] These constituents are, therefore, not of regulatory concern.

The Agency has concluded that no other inorganic hazardous constituents are present in the filter press sludge at levels of regulatory levels (*i.e.*, none are above any regulatory standard at the compliance point in the VRS model, see Table 4. Where concentrations were below the detection limit for the constituent, the detection limit was used in the VHS calculations). In addition, the Agency also finds that no hazardous organic constituents are present in the waste. The Agency reviewed the list of raw materials used by Whirlpool, as well as the material safety data sheets for these materials, and concluded that no other Appendix VIII toxicants are present in the waste.

TABLE 4.—COMPLIANCE POINT CONCENTRATIONS (mg/1)

	Filter press	Regulatory standard
As	0.002	0.05
Ba	0.015	1
Pb	0.031	0.05
Hg	0.00015	0.002
Se	0.002	0.01
Ag	0.008	0.05

The Agency believes that, based upon the constituents and factors evaluated, Whirlpool's waste is non-hazardous and should be excluded from hazardous waste control. The Agency, therefore, proposes to grant an exclusion to Whirlpool Corporation, located in Fort Smith, Arkansas, for its dewatered electroplating wastewater treatment sludge, as described in its petition. (The Agency notes that any changes to the manufacturing or treatment processes will require Whirlpool to file an addendum to their petition or a new petition.[37] Any future changes to these processes that could effect the physical or chemical characteristics of the sludge will require a redemonstration of the hazards of the waste.)

IX. Effective Date

This rule, if promulgated, will become effective immediately. The Hazardous and Solid Waste Amendments of 1984 amended Section 3010 of RCRA to allow rules to become effective in less than six months when the regulated community does not need the six-month period to come into compliance. That is the case here since this rule reduces, rather than increases, the existing requirements for persons generating hazardous wastes. In light of the unnecessary hardship and expense which would be imposed on the petitioners by an effective date six months after promulgation and the fact that such a deadline is not necessary to achieve the purpose of Section 3010, we believe that these rules should be effective immediately. These reasons also provide a basis for making this rule effective immediately under the Administrative Procedure Act, pursuant to 5 U.S.C. 553(d).

X. Regulatory Impact

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement of a Regulatory Impact analysis. This proposal to grant exclusions is not major since its effect is to reduce the overall costs and economic impact of EPA's hazardous waste management regulations. This reduction is achieved by excluding wastes generated at specific facilities from EPA's list of hazardous wastes, thereby enabling these facilities to treat their wastes as non-hazardous.

XI. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601-612, whenever an Agency is required to publish a general notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis which describes the impact of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). The Administrator may certify, however, that the rule will not have a significant economic impact on a substantial number of small entities.

This amendment will not have an adverse economic impact on small entities since its effect will be to reduce the overall costs of EPA's hazardous waste regulations. Accordingly, I hereby certify that this proposed regulation will not have a significant economic impact on a substantial number of small entities.

This regulation, therefore, does not require a regulatory flexibility analysis.

List of Subjects in 40 CFR Part 261

Hazardous waste, Recycling.

Dated: April 24, 1986.

Marcia Williams,

Director, Office of Solid Waste.

For the reasons set out in the preamble, 40 CFR Part 261 is proposed to be amended as follows:

PART 261—IDENTIFICATION AND LISTING OF HAZARDOUS WASTE

1. The authority citation for Part 261 continues to read as follows:

Authority: Secs. 1006, 2002(a), 3001, and 3002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended [42 U.S.C. 6905, 6912(a), 6921, and 6922]

2. In Appendix IX, add the following wastestreams in alphabetical order in table 1.

Appendix IX—Wastes Excluded Under §§ 260.20 and 260.22

TABLE 1.—WASTES EXCLUDED FROM NON-SPECIFIC SOURCES

Facility	Address	Waste description
Northern Metal Specialty Division of Western Industries, Inc.	Osceola, Wisconsin	Dewatered wastewater treatment sludge (EPA Hazardous Waste Nos. F006 and K062) generated from their electroplating operations and steel finishing after [date of publication]. When the nickel immersion process is in operation with the Phosphating process, NMSD must test weekly composites of the waste for nickel. If nickel leachate values exceed 10 ppm the waste must be managed as a hazardous waste.
Plastene Supply Company	Portageville, Missouri	Dewatered wastewater treatment sludges (EPA Hazardous Waste No. F006) generated from electroplating operations after [date of publication].
Reynolds Metals Company	Sheffield, Alabama	Dewatered wastewater treatment sludges (EPA Hazardous Waste No. F019 generated from the chemical conversion of aluminum after [date of publication].
Universal Oil Products, Wolverine Division	Decatur, Alabama	Wastewater treatment sludges (EPA Hazardous Waste No. F006) generated from electroplating operations and contained in two holding lagoons on [date of publication]. This is a one time exclusion.

[35] See footnote 8.

[36] See footnote 5.

[37] Once a final decision on this petition is made, a significant process change would require submission of a new petition or treatment of the waste as hazardous.

BILLING CODE 1505-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

45 CFR Part 5b

Privacy Act of 1974; Proposed Exempt System

AGENCY: Office of the Secretary, HHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Department of Health and Human Services proposes to exempt a new system or records, 09–37–0019, "National Medical Expenditure Survey (NMES) Records," to be maintained by National Center for Health Services Research and Health Care Technology Assessment (NCHSR), from the subject access and amendment requirements of the Privacy Act to maintain the statistical nature of these documents.

DATE: Comments on the proposed amendment must be received on or before May 30, 1986.

ADDRESS: Address comments in writing to Carl C. Coleman, Acting Director, Freedom of Information/Privacy Division, Office of the Assistant Secretary for Public Affairs, Room 410 B, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201.

Comments will be available for public inspection at this address on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m.

FOR FURTHER INFORMATION CONTACT: Dr. Daniel Walden, Senior Research Manager, Division of Intramual Research, NCHSR, (301)–443–4636.

SUPPLEMENTARY INFORMATION: Section 304 of the Public Health Service (PHS) Act, 42 U.S.C. 242b, authorities the Secretary, acing through the National Center for Health Service Research and Health Care Technology Assessment (NCHSR), to conduct and support research demonstrations, evaluations, and statistical and epidemiological activities for the purpose of improving the effectiveness, efficiency, and quality of health services in the United States.

The National Medical Expenditure Survey (NMES) succeeds a series of national medical expenditure surveys, most notably the 1977 National Medical Care Expediture Survey (NMCES) and the 1980 National Medical Care Utilization and Expenditures Survey (NMCUES). The new survey will collect information on health status, use of health care services, expenditures and sources of payment, insurance coverage, employment, and demographic information for a sample of civilian non-institutionalized as well as institutionalized populations. The data from this survey will be used solely for statistical purposes and for health policy research and analysis. No use will be made of the data which will affect the subject individuals or any of their rights, benefits or privileges.

The data collection activities of NCHSR are governed by 42 U.S.C. 242(d), section 308(d) of the PHS Act. Under this provision, information collected which can be identified with an individual may not be used for any purpose other than the purpose for which it is collected, i.e., statistical and health policy research. Further, no information may be released from health statistical data which might identify individuals or institutions unless the individuals or institution or authorized representative has given specific consent for such release.

Records on identifiable households, health care providers, employers, residents, and next of kin of such residents, of nursing and personal care homes, psychiatric hospitals, facilities for the mentally retarded, will be collected for NMES. Names, addresses and telephone numbers of individuals who respond on behalf of health care facilities and insurers will also be collected. Together, these records will constitute a "system of records" as that term is defined by the Privacy Act. Records will be retrieved by identifier as necessary to corroborate, complete or correct responses. Initially, the records were to be included under the broad National Center for Health Statistics (NCHS) systems of records 09–37–0010 and 09–37–0013 both of which contain prior medical expenditure survey data from the National Medical Care Expenditure Survey (NMCES) and the National Medical Care Utilization and Expenditure Survey (NMCUES). All data in these two systems are exempt from subject access and amendment requirements. However, the PHS has established a separate system of records for new NMES records (09–37–0019) which are to be administered by NCHSR and has published a notice in the **Federal Register** to this effect, 51 FR 2762, January 21, 1986.

It is herein proposed, in accordance with paragraph (k)(4) of the Privacy Act, that the new NMES material compiled y NCHSR and its contractor(s) be maintained solely for health statistical research purposes and, like the original NMCES and NMCUES data, that it be exempted from paragraphs (c)(3), (d), (e)(4) (G) and (H), and (f) of the Privacy Act which essentially pertain to subject access and amendment rights.

The Department has determined that notice of the authorized exemption of this system of records from the above-cited subject access and amendment requirements of the Privacy Act is not a major rule within the meaning of Executive Order 12291, nor will it have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act. Finally, the propoaal does not impose any new information collection requirements within the Paperwork Reduction Act.

List of Subjects in 45 CFR Part 5b

Privacy.

Accordingly, the Department of Health and Human Services proposes to amend 45 CFR Part 5b as set forth below.

Dated: February 18, 1986.

Donald Ian Macdonald,

Acting Assistant Secretary for Health.

Approved: March 24, 1986.

Otis R. Bowen,

Secretary, Department of Health and Human Services.

[MM Docket No. 86–151; RM–4930]

FM Broadcast Station in Hyden, KY

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: Action taken herein proposes to allot FM Channel 222A to Hyden, KY as that community's first FM channel in response to a petition filed by Ayers Shortt Sales, Inc.

DATES: Comments must be filed on or before June 16, 1986, and reply comments on or before July 1, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: D. David Weston, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 73

Radio broadcasting.

The authority citation for Part 73 continues to read:

Authority: Secs. 4 and 303, 48 Stat. 1066, as amended, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply secs. 301, 303, 307, 48 Stat. 1081, 1082, as amended, 1083, as amended, 47 U.S.C. 301, 303, 307. Other statutory and executive order provisions authorizing or interpreted or applied by specific sections are cited to text.

Notice of Proposed Rule Making

In the Matter of amendment of § 73.202(b) Table of Allotments FM Broadcast Stations. (Hyden, Kentucky); MM Docket No. 86–151 RM–4930.

Adopted: April 14, 1986.

Released: April 24, 1986.

By the Chief, Policy and Rules Division.

1. The Commission has before it for consideration a petition for rule making filed by Ayers Shortt Sales, Inc. ("petitioner") requesting the allotment of FM Channel 222A to Hyden, Kentucky as that community's first FM allotment. Petitioner has expressed an intention to apply for the channel, if allotted. The channel can be allocated in compliance with the Commission's minimum distance separation requirements.

PART 73—[AMENDED]

2. In view of the fact that the proposed allotment could provide a first FM channel to Hyden, Kentucky, the Commission proposes to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules for the following community:

City	Channel No.	
	Present	Proposed
Hyden, KY		222A

3. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note. A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be allotted.

4. Interested parties may file comments on or before June 16, 1986, and reply comments on or before July 1, 1986, and are advised to read the Appendix for the proper procedures. Additionally, a copy of such comments should be served on the petitioners, or their counsel or consultant, as follows: Mark E. Fields, Esq., Miller & Fields, P.C., P.O. Box 33003, Washington, DC 20033 (Counsel to petitioner).

5. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

6. For further information concerning this proceeding, contact D. David Weston, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Federal Communications Commission.

Charles G. Schott,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in section 4(i), 5(c)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b)and 0.283 of the Commission's Rules, it is proposed to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed allotment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is allotted and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to allot a different channel than was requested for any of the communities involved.

4. *Comments and Rely Comments; Service.* Pursuant to applicable procedures set out §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, DC.

47 CFR Part 73

[MM Docket No. 86-150; RM-5232]

FM Broadcast Station in Loudon, TN

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: Action taken herein, at the request of Loudon Broadcasters, Inc., proposes the allotment of Channel 256A to Loudon, Tennessee, as that community's second FM service.

DATES: Comments must be filed on or before June 16, 1986, and reply comments on or before July 1, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Patricia Rawlings, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 73

Radio broadcasting.

The authority citation for Part 73 continues to read:

Authority: Secs. 4 and 303, 48 Stat. 1066, as amended, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply secs. 301, 303, 307, 48 Stat. 1081, 1082, as amended, 1083, as amended, 47 U.S.C. 301, 303, 307. Other statutory and executive order provisions authorizing or interpreted or applied by specific sections are cited to text.

Notice of Proposed Rule Making

In the Matter of amendment of § 73.303(b), Table of Allotments, FM Broadcast Stations. (Loudon, Tennessee); MM Docket No. 86-150 RM-5232.

Adopted: April 10, 1986.
Released: April 23, 1986.
By the Chief, Policy and Rules Division.

1. The Commission has before it for consideration a petition for rule making filed by Loudon Broadcasters, Inc., ("petitioner") licensee of AM Station WLOD, Loudon, Tennessee, seeking the allotment of Channel 256A to Loudon, Tennessee, as that community's second FM service. Petitioner has expressed its intention to apply for the channel, if allotted.

2. The channel can be allotted consistent with the Commission's minimum distance separation requirements provided a site restriction of 3.5 kilometers (2.1 miles) northeast of Loudon is imposed to avoid a short spacing to Station WAHR(FM), Channel 250, Huntsville, Alabama.

PART 73—[AMENDED]

3. In view of the fact that the proposed allotment could provide a second FM service to Loudon, Tennessee, the Commission proposes to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules, for the following community:

City	Channel No.	
	Present	Proposed
Loudon, TN	257A	256A, 257A

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein. Note: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be allotted.

5. Interested parties may file comments on or before June 16, 1986, and reply comments on or before July 1, 1986, and are advised to read the appendix for the proper procedures. Additionally, a copy of such comments should be served on the petitioners, or their counsel or consultant, as follows: Rudolph L. Ennis, McCampbell & Young, 2021 Plaza Tower, P.O. Box 550, Knoxville, TN 37901.

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules. See, *Certification that sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Patricia Rawlings, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Federal Communications Commission.

Charles Schott,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in sections 4(i), 5(c)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed allotment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is allotted and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counter proposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to allot a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in § 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, DC.

BILLING CODE 6712-01-M

47 CFR Part 73

[MM Docket No. 86-153; RM-5185]

FM Broadcast Station in Kingsville, TX

AGENCY: Federal Communications Commission.

ACTION: Proposed Rule.

SUMMARY: Action taken herein, at the request of Whitlock Communications, Inc., proposes the substitution of Channel 248C1 for Channel 249A at Kingsville, Texas, and modification of the license of Station KDUV(FM), Kingsville, Texas, to specify operation on Channel 248C1, as that community's first wide coverage area FM service.

DATES: Comments must be filed on or before June 16, 1986, and reply comments on or before July 1, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Patricia Rawlings, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 73

Radio broadcasting.

The authority citation for Part 73 continues to read:

Authority: Secs. 4 and 303, 48 Stat. 1066, as amended, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply secs. 301, 303, 307, 48 Stat. 1081, 1082, as amended, 1083, as amended, 47 U.S.C. 301, 303, 307. Other statutory and executive order provisions authorizing or interpreted or applied by specific sections are cited to text.

Notice of Proposed Rule Making

In the matter of amendment of § 73.202(b), Table of Allotments, FM Broadcast Stations Kingsville, Texas; MM Docket No. 86-153, RM-5185.

Adopted: April 11, 1986.
Released: April 24, 1986.
By the Chief, Policy and Rules Division.

1. Before the Commission for consideration is a petition for rule making filed by Whitlock Communications, Inc. ("petitioner"), licensee of FM Station KDUV, Channel 249A at Kingsville, Texas, proposing the substitution of Class C1 Channel 248 for Channel 249A and modification of its license to specify operation on Channel 248C1. Petitioner submitted information in support of the proposal and states the improved service would provide a new fulltime broadcast service to a substantial population.

2. The substitution can be made in compliance with the Commission's minimum distance separation requirements with a site restriction of 5.2 kilometers (3.2 miles) southeast of Kingsville. This restriction is necessary to avoid short spacing to the buffer zone for Station KAJA(FM), Channel 247, San Antonio, Texas. Additionally, the proposal must conform with the technical requirements of § 73.1030(c)(1)–(5) of the Rules regarding protection to the Commission's monitoring station at Kingsville, Texas. Further, since Kingsville is located within 320 kilometers (200 miles) of the U.S.-Mexican border, concurrence must be obtained from the Mexican government before the channel can be allotted.

3. In accordance with our established policy, we shall propose to modify the license of Station KDUV(FM) to specify operation on Channel 248C1. However, if another party should indicate an interest in the Class C1 allotment, the modification may not be implemented unless an additional equivalent channel is allotted.[1] See, *Modification of FM and TV Station Licenses*, MM Docket No. 83-1148, 98 F.C.C. 2d 916 (1984).

PART 73—[AMENDED]

4. Accordingly, in order to provide Kingsville with its first wide coverage FM station, the Commission proposes to amend the FM Table of Allotments, § 73.202(b) of the Rules, with regard to the community listed below, as follows:

City	Channel No.	
	Present	Proposed
Kingsville, Texas	224A, 249A	224A, 248C1

5. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

[1] Pending before the Commission is the *Notice of Proposed Rule Making* in MM Docket No. 85-313, 50 FR 45430, published October 31, 1985, proposing to permit FM stations to upgrade to adjacent superior classes of channel in their communities without having to demonstrate the availability of an equivalent channel in this type of proceeding. Parties should consider this proposal when commenting herein.

Note: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be allotted.

6. Interested parties may file comments on or before June 16 1986, and reply comments on or before July 1, 1986, and are advised to read the Appendix for the proper procedures. Additionally, a copy of such comments should be served on the petitioners, or their counsel or consultant, as follows: Barry D. Wood, Kenneth D. Shirley, Wiley & Rein, Suite 1100, 1776 K Street, NW., Washington, DC 20006. (Counsel for petitioner).

7. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules. See, *Certification that sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

8. For Further information concerning this proceeding, contact Patricia Rawlings, Mass Media Bureau (202) 634-6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Federal Communications Commission.

Charles Schott,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in section 4(i), 5(c)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amended the FM Table of Allotments, §73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

UMI

BEST COPY AVAILABLE

VOL 51 ISS 83 AP 30 1986 UMI

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed allotment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is allotted and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See §1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to allot a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or the other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See §1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of §1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, DC.

47 CFR Part 73

[MM Docket No. 86-148; RM-4991]

TV Broadcast Station in Grand Junction, CO

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: Action taken herein proposes the assignment of VHF television Channel 13 to Grand Junction, Colorado, in response to a petition filed by KOB-TV, Inc.

DATES: Comments must be filed on or before June 16, 1986, and reply comments on or before July 1, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Nancy V. Joyner, or Stanley Schmulewitz, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 73

Television broadcasting.

The authority citation for Part 73 continues to read:

Authority: Secs. 4 and 303, 48 Stat. 1066, as amended, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply secs. 301, 303, 307, 48 Stat. 1081, 1082, as amended, 1083, as amended, 47 U.S.C. 301, 303, 307. Other statutory and executive order provisions authorizing or interpreted or applied by specific sections are cited to text.

Notice of Proposed Rule Making

In the matter of amendment of § 73.606(b), Table of Assignments, Television Broadcast Stations (Grand Junction, Colorado); MM Docket No. 86-148, RM-4991.

Adopted: April 9, 1986.
Released: April 23, 1986.

By the Chief, Policy and Rules Division.

1. The Commission herein considers a petition for rule making filed on behalf of KOB-TV, Inc. ("petitioner") requesting the assignment of VHF television Channel 13 [1] to Grand Junction, Colorado, as that community's sixth local television service. Petitioner indicates that if the channel is assigned to Grand Junction, as requested, it will file an application for a construction permit to build a television station primarily as a satellite of Station KOB-TX, Albuquerque, New Mexico.

2. Grand Junction (population 28,144),[2] the seat of Mesa County (population 81,530), is located in western Colorado, approximately 320 kilometers (200 miles) west of Denver. Currently, it is served by Station KREX-TV (Channel 5), KJCT (TV) (Channel 8), and Channel 12 (vacant). Additionally, Channels 2 and 4 have been proposed for assignment to Grand Junction in MM Docket No. 84-892.

3. A staff engineering study reveals that VHF television Channel 13 can be assigned to Grand Junction with a site restriction 12.3 miles south of the community to avoid short-spacing to Station KWWY-TV (Channel 13), Rock Springs, Wyoming. Moreover, the proposal will require a carrier offset.

PART 73—[AMENDED]

4. In consideration of the above, we believe it is appropriate to elicit comments on the proposal to amend the Television Table of Assignments, § 73.606(b) of the Commission's Rules, as follows:

City	Channel No.	
	Present	Proposed [1]
Grand Junction, CO	5-, 8-, 10+	2+, 4+, 5-, 8-, 13-, and 10+.

[1] Channels 2 and 4 are proposed for assignment in MM Dkt. 84-892, 49 FR 39673, October 1, 1984.

5. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be allotted.

6. Interested parties may file comments on or before June 16, 1986, and reply comments on or before July 1, 1986, and are advised to read the Appendix for the proper procedures. Additionally, a copy of such comments should be served on the petitioners, or their counsel or consultant, as follows:

Marvin Rosenberg, Esq., Richard S. Myers, Esq., Fletcher, Heald and Hildreth, 1225 Connecticut Avenue, NW., Suite 400, Washington, DC 20036, (Counsel for Petitioner).

7. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

8. For further information concerning this proceeding, contact Nancy V. Joyner, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Federal Communications Commission.

Charles Schott,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in sections 4(i), 5(e)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

(4) *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in § 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, DC.

47 CFR Part 73

[MM Docket No. 86-152; RM-5004]

TV Broadcasting Station in Waterville, ME

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes to assign UHF Television Channel 23 to Waterville, Maine, in response to a petition filed by Kennebec Valley Television. The proposal could provide a first commercial service to the community.

DATES: Comments must be filed on or before June 16, 1986, and reply comments on or before July 1, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 73

Television Broadcasting.

The authority citation for Part 73 continues to read:

Authority: Secs. 4 and 303, 48 Stat. 1066, as amended, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply secs. 301, 303, 307, 48 Stat. 1081, 1082, as amended, 1083, as amended, 47 U.S.C. 301, 303, 307. Notice of Proposed Rule Making

In the Matter of Amendment of § 73.606(b), Table of Assignments, TV Broadcast Stations. (Waterville, Maine); MM Docket No. 86-152 RM-5004.

Adopted: April 14, 1986.
Released: April 24, 1986.

By the Chief, Policy and Rules Division.

1. A petition for rule making has been filed by Kennebec Valley Television ("petitioner"), requesting that UHF Television Channel 35 (vacant) be reassigned from Lewiston, Maine to Waterville. The assignment could provide a first commercial television service to Waterville. Petitioner has submitted information in support of the assignment and stated its intention to apply for the channel, if allocated.

2. Waterville (population 17,179) [1], Maine, in Kennebec County (population 109,889), is located approximately 110 kilometers (70 miles) northeast of Portland.

3. A staff study has found that UHF Television Channel 23 could be assigned to Waterville with no change required at Lewiston. Channel 23 can be assigned to Waterville, Maine, in compliance with the minimum distance separation requirements of § 73.610 of the Commission's Rules. Concurrence of the Canadian government is required since Waterville is located within 199 miles of the common U.S.-Canadian border.

PART 73—[AMENDED]

4. Comments are invited on the proposal to amend the Television Table of Assignments, § 73.606(b) of the Commission's Rules, with respect to the following community:

City	Channel No.	
	Present	Proposed
Waterville, ME		23-

5. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in

[1] Population figures are from the 1980 U.S. Census.

VOL 51 ISS 83 APR 30 1986 UMI

the attached Appendix and are incorporated by reference herein.

Note: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be allotted.

6. Interested parties may file comments on or before June 16, 1986, and reply comments on or before July 1, 1986, and are advised to read the Appendix for the proper procedures. Additionally, a copy of such comments should be served on the petitioners, or their counsel or consultant, as follows: David J. Kaufman, Mahn, Franklin & Goldenberg, 1718 Connecticut Avenue, NW., Washington, DC 20009.

7. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Allotments, § 73.606(b) of the Commission's Rules. See, *Certification that sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

8. For further information concerning this proceeding, contact Kathleen Scheuerle, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Federal Communications Commission.

Charles G. Schott,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the TV Table of Allotments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposal allotment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is allotted and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to allot a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposal Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, DC.

BILLING CODE 6712-01-M

47 CFR Part 73

[MM Docket No. 86–149; RM–5171]

TV Broadcast Station in Corning, NY

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: Action taken herein proposes the assignment of UHF Channel 41 to Corning, New York, as the community's first local commercial television service, at the request of Clarence Smith.

DATES: Comments must be filed on or before June 16, 1986, and reply comments on or before July 1, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 73

Television broadcasting.

The authority citation for Part 73 continues to read:

Authority: Secs. 4 and 303, 48 Stat. 1066, as amended, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply secs. 301, 303, 307, 48 Stat. 1081, 1082, as amended, 1083, as amended, 47 U.S.C. 301, 303, 307. Other statutory and executive order provisions authorizing or interpreted or applied by specific sections are cited to text.

Notice of Proposed Rule Making

In the Matter of Amendment of § 73.606(b), Table of Assignments, Television Broadcast Stations. (Corning, New York); MM Docket No. 86–149 RM–5171.

Adopted: April 10, 1986
Released: April 23, 1986

By the Chief, Policy and Rules Division.

1. The Commission has before it for consideration the petition for rule making filed by Clarence Smith ("petitioner") requesting the assignment of UHF TV Channel 54 to Corning, New York, as the community's first local commercial television service. Petitioner states that he will apply for the channel, if assigned.

2. Corning (population 12,953) [1] in Steuben County (population 99,217), is located in south central New York, approximately 95 kilometers (60 miles) west of Binghamton, New York. Corning currently has assigned to it unoccupied and unapplied for UHF TV Channel *30, which is reserved for noncommercial educational use.

[1] Population figures are taken from the 1980 U.S. Census.

3. Channel 54 can be assigned to Corning in compliance with the Commission's minimum distance separation requirements but would require an excessive site restriction of 36.3 kilometers (22.7 miles) south in order to avoid short-spacings to existing stations in Erie, Pennsylvania, and Binghamton, New York, and to an unused channel assignment at Peterborough, Ontario, Canada.[2] The staff has found that Channel 41 can be assigned to Corning, with a site restriction of only 20.6 kilometers (12.8 miles) southwest to avoid short-spacings to Station WMGC–TV, Binghamton, and to Station WENY–TV, Elmira, New York. Therefore, in light of the less restrictive site requirement, we will propose the assignment of Channel 41 rather than the requested Channel 54.

4. Canadian concurrence in the assignment must be obtained since Corning is located within 400 kilometers (250 miles) of the U.S.-Canada border.

PART 73—[AMENDED]

5. We believe the public interest would be served by proposing to assign a first local commercial channel to Corning. Accordingly, we propose to amend the Television Table of Assignments, § 73.202(b) of the commission's rules, for the community listed below, to read as follows:

City	Channel No.	
	Present	Proposed
Corning, NY	*30	*30, 41+

6. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

7. Interested parties may file comments on or before June 16, 1986, and reply comments on or before July 1, 1986, and are advised to read the Appendix for the proper procedures. Additionally, a copy of such comments should be served on the petitioner as follows: Clarence Smith, SELMARK USA, P.O. Box 151, Buffalo, New York 14205.

8. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

9. For further information concerning this proceeding, contact Leslie K. Shapiro, Mass Media Bureau, (202) 634–6530. However, members of public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Federal Communications Commission.

Charles Schott,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in sections 4(i), 5(c)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the TV Table of Assignments, Section 73.606(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See Section 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied be a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, DC.

BILLING CODE 6712-01-M

[2] The assignment of Channel 41 at Corning would also avoid a conflict with the assignment of a first local television service at Williamsport, Pennsylvania (MM Docket 85–284, 50 FR 41178, published October 9, 1985). While the *Notice* therein proposed the assignment of Channel 32, the staff as found that there is a possible conflict with the use of that channel at Williamsport and existing land mobile operations at Philadelphia. The staff has performed an engineering study and one possible solution to the conflict would be the assignment of Channel 53 to Williamsport. However, first adjacent channel assignments are not possible here since Williamsport and Corning are located only 33 miles apart instead of the required 55 miles.

VOL 51 ISS 83 AP 30 1986 UMI

DEPARTMENT OF THE INTERIOR
Fish and Wildlife Service

50 CFR Part 23

Information Requested on Changes in Appendices to the Convention on International Trade in Endangered Species of Wild Fauna and Flora

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Request for information.

SUMMARY: The Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) regulates trade in certain animal and plant species, which are listed in appendices to this treaty. Any nation that is a Party to CITES may propose amendments to Appendices I and II for consideration by the other Parties.

This notice announces plans by the Fish and Wildlife Service (Service) to develop proposals for the United States to amend Appendices I and II. The Service invites information and comments from the public on animal or plant species that should be considered as candidates for U.S. proposals. Such proposals may concern the addition of species to Appendix I or II, the transfer of species from one appendix to another, or the removal of species from Appendix I or II. A proposal may also concern the addition or exemption of parts and derivatives of plant species in Appendix II. The Service will use the information and comments received in determining whether to develop proposals for the next regular meeting of CITES Party nations.

DATE: The Service will consider all information and comments received by August 1, 1986, in determining whether it should develop proposals on particular species.

ADDRESS: Please send correspondence concerning this notice to the Office of Scientific Authority, Mail Stop: Room 527, Matomic Building, U.S. Fish and Wildlife Service, Washington, D.C. 20240. Materials received will be available for public inspection from 8:00 a.m. to 4:00 p.m., Monday through Friday, in room 537, 1717 H Street, NW, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Dr. Charles W. Dane, at address given above, or telephone (202) 653–5948.

SUPPLEMENTARY INFORMATION: This is the first in a series of Federal Register notices about proposals to amend CITES Appendix I or II that will be considered at the sixth regular biennial meeting of the Parties. The purpose of this notice is to solicit information that will help the Service to identify species that are candidates for addition, removal, or reclassification in the appendices, and parts and derivatives of Appendix II plants that warrant regulation. This request is not limited to species occurring in the United States. Any Party may submit proposals concerning wild animal or plant species occurring anywhere in the world.

Background

CITES regulates import, export, reexport, and introduction from the sea of certain animal and plant species. The term "species" is defined in CITES as "any species, subspecies, or geographically separate population thereof." Each species for which trade is controlled is included in one of three appendices. The basic standards for including species in the appendices, as set forth below, are contained in Article II of CITES. Appendix I includes species threatened with extinction that are or may be affected by trade. Appendix II includes species that although not necessarily threatened with extinction may become so unless trade in them is strictly controlled. It also lists species that must be subject to regulation in order that trade in other currently or potentially threatened species may be brought under effective control. Such listings frequently are required because of difficulty in distinguishing specimens of currently or potentially threatened species from other species at ports of entry.

For animals in Appendix I or II and plants in Appendix I, any readily recognizable part or derivative thereof is automatically included, by language in CITES, when the species is listed in the Appendices. For any plants added to Appendix II, readily recognizable parts and derivatives thereof must be specified to be included. All readily recognizable parts and derivatives of plants already listed on Appendix II were included, with certain exceptions, by amendment at the last Conference of the Parties held in Buenos Aires in 1985. *See* 50 FR 48212, 48219 (Nov. 22, 1985), *to be codified at* 50 CFR 23.23(d).

Appendix III includes species that any Party nation identifies as being subject to regulation within its jurisdiction for purposes of preventing or restricting exploitation, and for which it needs the cooperation of other Parties in controlling trade. The present notice concerns only Appendices I and II.

The Parties have adopted a format for proposals to amend Appendix I or II, in order to ensure that certain types of information are provided. It is as follows:

A. *Proposal*
B. *Proponent* (nation)
C. Supporting statement
1. *Taxonomy*
11. Class
12. Order
13. Family
14. Genus, species or subspecies, including author(s) and year
15. Common name(s), including English common name(s), when applicable, and French and Spanish common names, if known
16. Code numbers, when applicable, e.g., International Species Inventory System (ISIS) number
2. *Biological data*
21. Distribution (current and historical)
22. Population (estimates and trends), and relevant information on population dynamics
23. Habitat (trends)
3. *Trade data*
31. National utilization
32. Legal international trade
33. Illegal trade
34. Potential trade threats
341. Live specimens
342. Parts and derivatives
4. *Protection status*
41. National
42. International
43. Additional protection needs
5. *Information on similar species* (addressing the issue of similarity in appearance)
6. *Comments from countries of origin* (other than proponent)
7. *Additional remarks*
8. *References (to published literature and other documents)*

Future Actions

The next regular meeting of the Parties is scheduled to be held in Ottawa, Canada, on July 12–24, 1987. Any proposals to amend Appendix I or II at the meeting must be submitted to the CITES Secretariat at least 150 days prior to the meeting (i.e., to be received by the Secretariat no later than February 12, 1987), and the Service plans to send any such proposals to the Secretariat in late January 1987.

The Service plans to publish a Federal Register notice in early November 1986 to announce tentative U.S. species proposals and to invite information and comments on them. Another notice in January 1987 will announce the Service's final decisions on species proposals to be submitted to the CITES Secretariat. In future notices, the Service also will address the development of U.S. negotiating positions on other issues and on proposals by other Parties to amend Appendix I or II.

Persons having comments and information on species that might be potential candidates for CITES proposals are urged to contact the Service's Office of Scientific Authority

This notice ws prepared by Dr. Charles W. Dane, Chief, Office of Scientific Authority, under the authority of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 et. seq.)

List of Subjects in 50 CFR Part 23

Endangered and threatened wildlife, Endangered and threatened plants, Exports, Fish, Imports, Marine mammals, Plants (agriculture), Treaties.

Dated: April 23, 1986.

Susan E. Recce,
Deputy Assistant Secretary for Fish and Wildlife and Parks.

BILLING CODE 4310-55-M

50 CFR Parts 26, 36, and 96

Alaska National Wildlife Refuges, Management Regulations

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule; withdrawal of previously proposed rules.

SUMMARY: The Fish and Wildlife Service (Service) proposes to issue regulations applicable to all national wildlife refuges (NWRs) in Alaska. These proposed rules will further define and clarify two existing regulations and liberalize another. It is also the intent of this action to propose to remove 50 CFR 26.37, and Part 96, and withdraw proposed Parts 97–107 which were superseded by the enactment of the Alaska National Interest Lands Conservation Act of 1980 (ANILCA) (16 U.S.C. 3101) and the subsequent development of 50 CFR Part 36. No new or additional restriction or closures are proposed in these regulations.

DATE: Comments on these proposed rules must be submitted on or before June 30, 1986.

ADDRESS: Send comments to: Regional Director, (ATTN: William Knauer, Wildlife Resources), U.S. Fish and Wildlife Service, 1011 East Tudor Road, Anchorage, Alaska 99503, telephone (907) 786–3399.

FOR FURTHER INFORMATION CONTACT: Mr. William Knauer (address above) or the respective refuge manager at the address or telephone number listed below:

Refuge Manager, Alaska Maritime National Wildlife Refuge (NWR), P.O. Box 3089, Homer, AK 99603, (907) 235–6546
Refuge Manager, Alaska Peninsula NWR, P.O. Box 277, King Salmon, Alaska 99613, (907) 246–3339
Refuge Manager, Arctic NWR, Federal Building and Courthouse, 101 12th Ave. Box 20, Fairbanks, Alaska 99701 (907) 456–0250
Refuge Manager, Becharof NWR, P.O. Box 277, King Salmon, Alaska 99613, (907) 246–3339
Refuge Manager, Innoko NWR, General Delivery, McGrath, Alaska 99627 (907) 524–3251
Refuge Manager, Izembek NWR, Pouch 2, Cold Bay, Alaska 99571, (907) 532–2445
Refuge Manager, Kanuti NWR, Federal Building and Courthouse, 101 12th Ave., P.O. Box 20, Fairbanks, Alaska 99701, (907) 456–0329
Refuge Manager, Kenai NWR, P.O. Box 2139, Soldotna, Alaska 99669, (907) 262–7021
Refuge Manager, Kodiak NWR, P.O. Box 825, Kodiak, Alaska 99615, (907) 487–2600
Refuge Manager, Koyukuk NWR, P.O. Box 287, Galena, Alaska 99741, (907) 656–1231
Refuge Manager, Nowitna NWR, P.O. Box 287, Galena, Alaska 99741, (907) 656–1231
Refuge Manager, Selawik NWR, P.O. Box 270, Kotzebue, Alaska 99752, (907) 442–3799
Refuge Manager, Tetlin NWR, P.O. Box 155, Tok, Alaska 99780, (907) 883–5312
Refuge Manager, Togiak NWR, P.O. Box 10201, Dillingham, Alaska 99576, (907) 842–1063
Refuge Manager, Yukon Delta NWR, P.O. Box 346, Bethel, Alaska 99559, (907) 543–3151
Refuge Manager, Yukon Flats NWR, Federal Building and Courthouse, 101 12th Ave., Box 20, Fairbanks, Alaska 99701, (907) 452–0407.

SUPPLEMENTARY INFORMATION: These proposed rules are to further define and clarify two sections and liberalize another in the Management Regulations for Alaska National Wildlife Refuges (50 CFR Part 36, 46 FR 31827, June 17, 1981). They are proposed in accordance with the requirement for public participation found in 50 CFR 36.42.

The definition of off-road vehicles (ORV) is clarified to reduce confusion and more closely conform to the definitions used by other federal agencies.

The relaxation of regulations governing the use of live standing timber for subsistence purpose is based on a request by the Interior Regional Council Committee in the Annual Report to the Secretary for 1983 and on field examinations, which show the existing regulation to be burdensome and overly restrictive.

To make the present regulation (§ 36.21(e)) prohibiting the harassment of wildlife by aircraft more consistent with the general National Wildlife Refuge System's regulation (§ 27.34), certain terminology will be deleted.

The two rulemaking documents in 50 CFR 26.37 (finalized 3/4/80) and Part 96 (finalized 12/26/78 and amended 3/14/79), have been superseded by 50 CFR Part 36 and are no longer necessary. Proposed Parts 97–106 (general land management regulations for Yukon Flats and Becharof National Wildlife Monuments) (44 FR 37754, June 28, 1979) and Part 107 (mining on the two Monuments) (45 FR 2616, January 11, 1980) address monuments which since have become National Wildlife Refuges and therefore the proposals are no longer relevant.

Corrections include the listing of current Office of Management and Budget (OMB) information collection approval numbers and the listing of new refuge headquarters locations for permit applications and submissions.

The policy of the U.S. Fish and Wildlife Service is, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Interested persons may submit written comments, suggestions, or objections regarding the proposal to the regional office at the address provided above. Public hearings to receive comments will be held in Anchorage, Fairbanks, Fort Yukon, and Galena, Alaska. Prior local notice will be provided in the major affected areas. All relevant comments will be considerd prior to the issuance of final rules.

Conformance With Statutory and Regulatory Authorities

Section 304 of the Alaska National Interest Lands Conservation Act (ANILCA) of 1980 requires the Secretary to prescribe such regulations as may be necessary and appropriate to ensure that any activities carried out on a national wildlife refuge in Alaska are compatible with the purposes of that refuge.

The purposes of all 16 Alaska NWRs are specified in Sections 302 and 303 of ANILCA. The refuges that will be affected by these regulations were all established for the following purposes: (a) Conservation of fish and wildlife populations and habitats, (b) fulfillment of international treaty obligations, and (c) protection of water quality and quantity. All the Alaska refuges except Kenai NWR also have as a purpose the opportunity for continued subsistence use when consistent with purposes (a) and (b) above. In addition to the first

VOL 51 ISS 83 AP 30 1986 UMI

three purposes mentioned above, Kenai NWR is to provide opportunities for scientific research, interpretation, environmental education, land management training and fish and wildlife oriented recreation. An additional purpose of the Alaska Maritime NWR is to provide a program of scientific research on marine resources.

The proposed regulations were generated because of direct requests by the public to clarify certain sections of the Management Regulations and to alleviate the overly burdensome regulation on tree cutting.

The Service has analyzed the impacts of public use and access on certain Alaska refuges in the following final environmental impact statements: Proposed Alaska Coastal National Wildlife Refuge (October 1974); Proposed Alaska Peninsula National Wildlife Refuge (1976); Proposed Arctic National Wildlife Refuge (October 1974); Proposed Selawik National Wildlife Refuge (1975); Proposed Koyukuk National Wildlife Refuge (1974); Proposed Togiak National Wildlife Refuge (October 1974); Proposed Yukon Delta National Wildlife Refuge (October 1976); Operation of the National Wildlife Refuge System (November 1976); Alternative Administrative Actions, Alaska National Interest Lands (1978); and the Final Comprehensive Conservation Plans, Environmental Impact Statements, and Wilderness Reviews for Kenai, Becharof, Izembek, and Alaska Peninsula National Wildlife Refuges.

Public use and access were also evaluated for compatibility with refuge purposes in an environmental assessment on proposed rules for management of Alaska NWRs in May 1981. Adequately regulated public use is consistent with and will not interfere with the refuge purposes delineated above.

The proposed regulations have also been evaluated as to the impact on subsistence as required by ANILCA Section 810. Based on the determination that the proposed public use and access would not be significantly different from that currently allowed, these proposed regulations are consistent with the purposes and intent of Section 810 and will result in no significant restrictions on subsistence activities.

Environmental Considerations

The Final Environmental Statement for Operation of the National Wildlife Refuge System was filed with the Council on Environmental Quality on November 12, 1976. A notice of availability was published in the Federal Register on November 19, 1976 (41 FR 51131). An environmental assessment and finding of no significant impact for the proposed interim rules for Alaska National Wildlife Refuges was approved on May 13, 1981. These proposed regulations do not involve a significant change in the level of use previously permitted. A thorough review was made of the existing environmental impact statements and assessments. A finding of no significant impact for these proposed rules was executed on May 23, 1985.

Information Collection

The Paperwork Reduction Act (Pub. L. 96-511) requires each information collection requirement to display an OMB clearance number and contain a statement to inform the person receiving the request why the information is being collected, how it will be used, and whether a response is voluntary, mandatory, or required to obtain a benefit. The Service has received approval from OMB for the information collection requirements of these regulations under the approval number cited below.

Type of information collection	OMB approval No.
Special use permits on Alaska refuges	1018-0061

These regulations impose no new reporting or recordkeeping requirements that must be cleared by OMB. The information is being collected to assist the Service in administering these programs in accordance with statutory authorities requiring that public uses be compatible with the primary purposes for which the areas were established. The information will be used to award benefits. A response is required to obtain a benefit.

Economic Effects

Executive Order 12291, "Federal Regulation," of February 17, 1981, requires the preparation of a regulatory impact analysis for major rules. A major rule is one likely to result in an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, government agencies or geographic regions; or significant adverse effects on the ability of United States-based enterprises to compete with foreign-based enterprises. The Regulatory Flexibility Act of 1980 (5 U.S.C. 601 et seq.) requires preparation of flexibility analyses for rules that will have a significant effect on a substantial number of small entities, which include small businesses, organization or governmental jurisdictions.

The Department of the Interior has determined that this rulemaking is not a "major rule" within the meaning of Executive Order 12291 and certifies that it will not have a significant economic effect on a substantial number of small entities within the meaning of the Regulatory Flexibility Act. This rule is expected to cost the National Wildlife Refuge System less than $1,000 annually for permit processing and is expected to cost the users of refuge resources who need permits less than $1,700 annually (a cost of $20 per individual for time and information to develop a permit application).

This rulemaking will impose no costs on small entities. The exact number of businesses and the amount of trade that will be affected by the rulemaking is unknown since the permits are generally issued to individuals. The aggregate effect will be a positive economic effect on a number of small entities that will be seasonal in nature and will, in most cases, merely continue pre-existing uses of refuge areas.

William Knauer, Wildlife Resources, Alaska Regional Office, U.S. Fish and Wildlife Service, Anchorage, Alaska, is the primary author of this proposed rulemaking document.

List of Subjects

50 CFR Part 26

National Wildlife Refuge System, Recreation, Wildlife refuges.

50 CFR Part 36

Alaska, National Wildlife Refuge System, Public land-mineral resources, Public lands-rights-of-way, Recreation, Traffic regulations, Wildlife refuges.

50 CFR Part 96

Alaska, Recreational areas, Wildlife refuges.

Accordingly, the proposed rule on Parts 97-107 is withdrawn, and 50 CFR is proposed to be amended as shown below:

PART 26—[AMENDED]

1. The authority for § 26.37 continues to read as follows:

Authority: National Wildlife Refuge Administration Act, 16 U.S.C. 668dd et seq.; Fish and Wildlife Act of 1956, 16 U.S.C. 742 et seq.; Federal Land Policy and Management Act, 204(j), 43 U.S.C. 1714(j).

§ 26.37 [Removed]

2. Section 26.37 is removed from 50 CFR Part 26.

PART 36—[AMENDED]

3. The authority for Part 36 continues to read as follows:

Authority: The Alaska National Interest Lands Conservation Act, Pub. L. 96-487 (December 2, 1980); the National Wildlife Refuge System Administration Act, as amended, 16 U.S.C. 668dd et seq.; Fish and Wildlife Act of 1956, 16 U.S.C. 742(a) et seq.; Refuge Recreation Act, 16 U.S.C. 460k et seq.; Paperwork Reduction Act of 1980, 94 Stat. 2812, Pub. L. No. 96-511.

§ 36.2 [Amended]

4. Amend § 36.2(h) by adding the sentence "It includes, but is not limited to, four-wheel drive or low-pressure-tire vehicles, motorcycles and related two-, three- or four-wheel vehicles, amphibious machines, ground-effect or air-cushion vehicles, airboats, recreation vehicle campers, and any other means of transportation deriving motive power from any source other than muscle or wind," immediately after the words "as defined in this section."

§ 36.3 [Amended]

5. Revise the first sentence of § 36.3 to read as follows: "The information collection requirements contained in §§ 36.15, 36.21, 36.22, 36.23, 36.24, 36.33, 36.39 and 36.41 of these regulations have been approved by the Office of Management and Budget under 44 U.S.C. 3507 and assigned clearance number 1018-0061."

§ 36.15 [Amended]

6. Amend § 36.15(a) by revising paragraphs (a)(1) and (2), and adding a new paragraph (a)(3), to read as follows: "(1) For live standing timber greater than six inches diameter at breast height (4½ feet above ground level), the refuge manager may allow cutting in accordance with the specifications of a special use permit if such cutting is determined to be compatible with the purposes for which the refuge was established; (2) For live standing timber between three and six inches diameter at breast height, cutting is allowed on the Arctic National Wildlife Refuge south of the divide of the Brooks Range and on the Innoko, Kanuti, Koyukuk, Nowitna, Selawik, Tetlin, and Yukon Flats National Wildlife Refuges unless restricted by the refuge manager. No more than 20 trees may be cut within any 20 acre block without a special use permit. On the remainder of the Arctic National Wildlife Refuge and on all other Alaska National Wildlife Refuges, the refuge manager may allow cutting in accordance with the specifications of a special use permit if such cutting is determined to be compatible with the purposes for which the refuge was established;

(3) For live standing timber less then three inches diameter at breast height, cutting is allowed unless restricted by the refuge manager.

§ 36.21 [Amended]

7. Revise § 36.21(e) to read as follows: "The operation of aircraft resulting in the harassment of wildlife is prohibited".

§ 36.41 [Amended]

8. Revise Subpart F, § 36.41(a)(1), to read as follows: "(1) These regulations and other regulations generally applicable to the National Wildlife Refuge System require that permits be obtained from the refuge manager. For activities on the Arctic, Kanuti, and Yukon Flats Refuges, permits are to be obtained from the respective refuge office in Fairbanks, Alaska. For activities on the Alaska Peninsula and Becharof Refuges, permits are to be obtained from the refuge office in King Salmon, Alaska. For activities on the Koyukuk and Nowitna Refuges, permits are to be obtained from the refuge office in Galena, Alaska. For activities on the Alaska Martime, Innoko, Izembek, Kenai, Kodiak, Selawik, Tetlin, Togiak, and Yukon Delta Refuges and for the Aleutian Islands Unit of the Alaska Martime Refuge, permits are to be obtained from the refuge manager, headquartered, respectively, in Homer, McGrath, Cold Bay, Soldotna, Kodiak, Kotzebue, Tok, Dillingham, Bethel, and Adak, Alaska. In all cases where a permit is required, the permittee must abide by the conditions under which the permit was issued."

PART 96—[REMOVED]

9. In 50 CFR, Part 96 is removed.

Dated: March 28, 1986.

P. Daniel Smith,

Acting Assistant Secretary for Fish, Wildlife and Parks.

BILLING CODE 4310-55-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 216

[Docket No. 51203-5203]

Regulations Governing the Taking and Importing of Marine Mammals

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Denial of a Petition to Undertake Rulemaking.

SUMMARY: On June 21, 1985, the National Marine Fisheries Service (NMFS) published a Notice of Receipt of a petition to undertake rulemaking (50 FR 25725). The petition received from Safari Club International requested several modifications to the U.S. marine mammal regulations that would require periodic review of the status of marine mammal species and a determination on whether the moratorium on the taking and importation of any of these species should be waived. Under the Marine Mammal Protection Act, there is a moratorium on taking marine mammals unless an exception has been made. Under the Safari Club proposal, waivers, if not implemented within two years of publication of the proposed rulemaking, would be withdrawn not later than thirty days thereafter. NMFS is required to publish notice of receipt of a rulemaking petition, solicit comments on its merit, determine whether or not to propose a rule within 120 days of receipt and publish notice of the determination in the Federal Register. This notice of denial of the petition completes these requirements.

ADDRESS: Requests for information on this Notice should be addressed to the Director, Office of Protected Species and Habitat Conservation, National Marine Fisheries Service, Washington, DC 20235.

FOR FURTHER INFORMATION CONTACT: K. R. Hollingshead (Marine Resource Management Specialist) 202/634-7529.

SUPPLEMENTARY INFORMATION:

Background

On May 7, 1985, the Safari Club International petitioned the Secretary of Commerce, as provided under the Administrative Procedure Act (APA) (5 U.S.C. 553(e)), for rulemaking requiring NMFS to conduct a periodic review of the status of marine mammal species and to determine whether the moratorium on any of these species should be waived. The NOAA Directives require NMFS to publish notice of the receipt of this petition and solicit public comment.

Specifically, the petitioner requested that NMFS implement six changes to 50 CFR Part 216. The proposed changes are as follows: (1) Add a new Subpart J to 50 CFR Part 216 requiring a review of the status of marine mammal species at least once every five years to determine whether the Marine Mammal Protection Act (16 U.S.C. 1361-1407) (MMPA) moratorium on the taking and importing of marine mammals and marine mammal products should be waived for any species;

VOL 51 ISS 83 AP 30 1986 UMI

(2) With respect to the five-year review, amend § 216.73 of Chapter 50 by adding a new paragraph (c) requiring the Director (Assistant Administrator for Fisheries) to offer the substance of the Federal Register notice required by this section for publication in appropriate scientific journals;

(3) Amend § 216.90(c) by adding the requirement that final regulations waiving the moratorium with respect to any species of marine mammal, or part thereof, will be published in the Federal Register not later than two years after the date of publication of the notice of proposed waiver;

(4) If a final regulation is not adopted within this two-year period, the Director will publish a notice of withdrawal in the Federal Register not later than 30 days after the end of this period;

(5) The Director will not prepare a regulation waiving the moratorium with respect to any species of marine mammals, or part thereof, for which a proposed regulation has been withdrawn unless he receives sufficient new information to warrant the proposal of a regulation, or unless three years have elapsed since the withdrawal of a prior proposed regulation to waive the moratorium; and

(6) Publication in the Federal Register of any final regulation waiving the moratorium will include a summary of the data on which the regulation is based and must show the relationship of the data to the regulations.

Public Comments

NMFS received three letters commenting on the petition. Comment: The Eskimo Walrus Commission stated it agreed that a periodic review of regulations governing marine mammals should be required. They also advocated public hearings in Alaska with the user group protected by the "Native exemption". The Walrus Commission also stated that regulations for importing marine mammals and marine mammal products should be a littel less stringent.

Response: Since NMFS has denied the rulemaking petition for the reasons given below, holding a public hearing would serve no purpose at this time. We regard these comments to be more pertinent to consideration of Management Authority to States, under 50 CFR Part 403, than to the petitioned action.

Comment: The Center for Environmental Education (CEE) stated that a waiver of the moratorium is clearly the intention of the petitioner, that the petitioner should justify such a waiver and that the legislative history of the MMPA is clear in placing this burden of justification on those seeking a waiver to the moratorium. The CEE believes that the cost for conducting such a review, holding hearings and promulgating regulations should be borne by the petitioner. Additionally, CEE recommended that NMFS consult with Fish and Wildlife Service (FWS) which also has responsibilities under the MMPA.

Response: NMFS agrees with the comment that the legislative history of the MMPA places the evidentiary burden on the person seeking a waiver of the moratorium to justify the need for and the appropriateness of the waiver. NMFS did consult with FWS which received an identical rulemaking petition (see 50 FR 32099, August 8, 1985).

Comment: The Marine Mammal Commission provided extensive comments on each aspect of the petition and recommended that the petition be denied in its entirety. The Commission's discussion of the six elements of the petition is summarized below.

1. "The Marine Mammal Protection Act does not require status reviews to be conducted on a set schedule. Instead, it 'authorizes' and 'directs' the Secretary to conduct reviews on the status of species 'from time to time . . .' 16 U.S.C. 1371(a)(3)(A). The apparent intent of this section is to provide the Secretary with flexibility to take action whenever it comes to his attention that it is appropriate to do so and to waive the moratorium. Under this flexible approach, the Secretary is free to initiate steps to waive the moratorium when a legally sufficient request to do so has been submitted by another party or when, based upon agency review of a particular fact situation, it is determined that such action would be consistent with the Marine Mammal Protection Act. Petitioner has set forth no compelling reason why this workable statutory scheme should be abandoned in favor of the more inflexible procedure they propose."

2. "Even if the Service grants Petitioner's five year status review request, we consider it unnecessary to publish notice in scientific journals. Federal Register notice should suffice for purposes of notifying interested parties of agency action under the Marine Mammal Protection Act, and there is no apparent reason to depart from this practice in the case of a five year status review. Such a requirement also could establish an undesirable precedent requiring journal publication of other Marine Mammal Protection Act and Endangered Species Act actions. The request to amend 50 CFR Part 216 for this purpose should therefore be denied."

3. "There is no requirement in the Marine Mammal Protection Act that proceedings on a waiver be completed within a specified time period. Sufficient time limitations on conducting a waiver rulemaking are already contained in the Service's regulations in 50 CFR Part 216, Subpart G. Provided that scheduling problems do not arise, it is likely that most waiver proceedings would be completed within Petitioner's requested two year time frame. It is possible, however, that complicated waiver proceedings would require more time to complete. In such a situation, it would be contrary to section 101(a)(3)(A) of the Act to require by regulation that a waiver review be terminated before the Secretary has had an opportunity to 'determine when, to what extent, if at all, and by what means, it is compatible with this chapter to waive the requirements of this section so as to allow taking, or importing of any marine mammal, or any marine mammal product . . .' 16 U.S.C. 1371(a)(3)(A). For this reason, and because there is no apparent benefit to be derived from such a limitation, the Commission recommends that this request be denied."

4. "As noted above, it is possible that adequate review of a waiver request will require more than two years. In such an instance, it would be inappropriate, if not contrary to the requirements of section 101(a)(3)(A) of the Marine Mammal Protection Act, to mandate withdrawal of a waiver request at the end of the two year period. Section 101(a)(3)(A) requires the Secretary to adopt suitable regulations, issue permits, and make determinations in accordance with section 102, 103, 104, and 111 of the Marine Mammal Protection Act with respect to each proposed waiver 16 U.S.C. 1371(a)(3)(A). This mandatory administrative review and decision-making procedure should be allowed to run its course, regardless of the amount of time required. The request to amend 50 CFR Part 216 for this purpose should therefore be denied."

5. "There is no apparent need for such a regulation [to require that a proposed waiver may not be proposed unless new information is recieved or unless three years has elapsed from proposal.] Moreover, as Petitioner has noted, section 101(a)(3)(A) authorizes and directs the Secretary 'from time to time' to take action, in appropriate cases, to waive the mortorium. *Id.* Petitioner's proposed amendment could produce a result that is inconsistent with these requirements by imposing a mandatory three year period, instead of the Act's more flexible 'from time to time' authorization. Moreover, section 101(a)(3)(A) requires that such action be taken on the basis of the best scientific evidence available. Petitioner would replace this requirement with a 'sufficient new information standard' which also could produce a result that is inconsistent with the Act. The request to amend 50 CFR Part 216 for this purpose should therefore be denied."

6. "This requirement [that a final rule include a summary of the data supporting the waiver] is unnecessary. Section 101(a)(3)(A) requires that the procedures of section 103 of the Marine Mammal Protection Act by followed when promulgating waiver regulations. Section 103(d)(3) requires that the Secretary publish and make available to the public at the time of publication of a notice to waive the moratorium 'a statement describing the evidence before the Secretary upon which he proposes to waive such regulation . . .' 16 U.S.C. 1373(d)(3). Such publication should satisfy Petitioner's request on this point. In addition to this Marine Mammal Protection Act requirement, the general rulemaking requirements of the Administrative Procedure Act also would require that a summary similar to that requested by the petitioner be included in the proposed and final regulations. Petitioner's request on this point would therefore achieve no useful purpose and should be denied."

Response: NMFS agrees with the comments of the Marine Mammal Commission.

Discussion

NMFS has denied the Safari Club International's petition based on the determination that the MMPA does not require that status reviews be conducted on a specific schedule, rather it directs that such reviews be conducted 'from time to time.' This aspect of the statute gives NMFS authority to initiate waiver proceedings prescribed in the MMPA at any time. NMFS believes that administrative resources can best be utilized if waiver proceedings are initiated only when there is an indication that a waiver may be appropriate or when a specific proposal is under consideration. The existing procedures have served in eight previous considerations of waivers of the moratorium, and NMFS has determined that the existing statutory scheme should not be abandoned in favor of the more inflexible procedures proposed in the petition.

NMFS has determined that the existing regulations regarding section 103(d) hearings on waivers of the moratorium are inconformance with the MMPA and the APA. The proposed change to require status reviews of each species to be published in scientific journals has no legal basis and the editorial boards of scientific journals are not under any legal obligation to publish government proceedings. The existing regulatory requirement of publishing waiver proceedings in the Federal Register provides for public participation in the process and preserves due process required by the APA. The petitioner's recommendation to include a "summary by the Director of the data on which such regulations are based. . .", is provided for by the MMPA and has been adhered to by NMFS in all previous waiver proceedings.

For these reasons, the petition of Safari Club International is denied.

Dated: April 25, 1986.

Carmen J. Blondin,

Deputy Assistant Administrator for Fisheries Resource Management, National Marine Fisheries Service.

BILLING CODE 3510-22-M

VOL 51 ISS 83 AP 30 1986 UMI

Notices

Federal Register
Vol. 51, No. 83
Wednesday, April 30, 1986

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forms Under Review by Office of Management and Budget

April 25, 1986.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) An indication of whether section 3504(h) of Pub. L. 96-511 applies; (9) Name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from: Department Clearance Officer, USDA, OIRM, Room 404-W Admin. Bldg., Washington, DC 20250 (202) 447-2118.

Comments on any of items listed should be submitted directly to: Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503. Attn: Desk Officer for USDA.

If you anticipate commenting on a submission but find that preparation time will prevent you from doing so promptly, you should advise the OMB Desk Officer of your intent as early as possible.

Soil Conservation Service

Environmental Statements; Hancock Cove Watershed, UT

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a Finding of No Significant Impact.

SUMMARY: Pursuant to the National Environmental Policy Act (NEPA) of 1969; as amended; the Council on Environmental Quality NEPA Regulations (40 CFR Part 1500-1508); and the Soil Conservation Service NEPA Procedures (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Hancock Cove Watershed, Duchesne County, Utah.

FOR FURTHER INFORMATION CONTACT: Francis T. Holt, State Conservationist, Soil Conservation Service, Room 4402, Federal Building, 125 South State Street, Salt Lake City, Utah 84147, telephone 801-524-5050.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Francis T. Holt, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The project concerns a plan for irrigation water conservation and improvement of soil resources. The planned works of improvement include 14 structures for water control, 14,000 feet of conveyance pipelines, and lining about 300 feet of Hancock Lateral. Land treatment includes 24 side-roll sprinkler systems on 1,500 acres along with conservation cropping systems and irrigation water management, installing 15,000 feet of group pipelines, and other onfarm conservation practices.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Proection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Francis T. Holt.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register.**

Dated; April 22, 1986.
Francis T. Holt,
State Conservationist.

COMMISSION ON CIVIL RIGHTS

Michigan Advisory Committee; Agenda and Notice of Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Michigan Advisory Committee to the Commission will convene at 6:00 p.m. and adjourn at 9:00 p.m., on May 15, 1986, at the Ann Arbor Hilton, Victorian Room, 610 Hilton Blvd. (I-94 & State St.), Ann Arbor, Michigan. The purpose of the meeting is to discuss the status of civil rights in Michigan and committee projects.

Persons desiring additional information, or planning a presentation to the Committee, should contact Committee Chairperson, Charles H. Tobias, or Clark Roberts, Director of the Midwestern Regional Office at (312) 353-7371, (TDD 312/886-2188). Hearing impaired persons who will attend the meeting and require the services of a sign language interpreter, should contact the Regional Office at least five (5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, DC, April 24, 1986.
Yvonne E. Schumacher,
Program Specialist for Regional Programs.

DEPARTMENT OF COMMERCE

International Trade Administration

Export Trade Certificate of Review

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Issuance of an Export Trade Certificate of Review.

SUMMARY: The Department of Commerce has issued an export trade certificate of review to Pacific Northwest Fish Export Association, Inc. (PNFEA). This notice summarizes the conduct for which certification has been granted.

FOR FURTHER INFORMATION CONTACT: James V. Lacy, Director, Office of Export Trading Company Affairs, International Trade Administration, 202-377-5131. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Title III of the Export Trading Company Act of 1982 ("the Act") (Pub. L. 97-290) authorizes the Secretary of Commerce to issue export trade certificates of review. The regulations implementing Title III are found at 15 CFR Part 325 (50 FR 1804, January 11, 1985).

The Office of Export Trading Company Affairs is issuing this notice pursuant to 15 CFR 325.6(b), which requires the Department of Commerce to publish a summary of a certificate in the **Federal Register.** Under section 305(a) of the Act and 15 CFR 325.11(a), any person aggrieved by the Secretary's determination may, within 30 days of the date of this notice, bring an action in any appropriate district court of the United States to set aside the determination on the ground that the determination is erroneous.

Description of Certified Conduct

Export Trade

Products: fish and fish products including salmon (fresh, frozen, canned and roe), herring roe, tanner crab, king crab, and black cod (sablefish).

Services: consulting; international market research; advertising; marketing; insurance; product research and design, exclusively for export; legal assistance; transportation, including trade documentation and freight forwarding; communication and processing of foreign orders; warehousing; foreign exchange; financing; and taking title to goods in connection with the export of fish and fish products.

Export Markets

The Export Markets include all parts of the world except the United States (the fifty states of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands and the Trust Territory of the Pacific Islands).

Export Trade Activities and Methods of Operation

1. PNFEA may compile for, collect from, and disseminate to its members the following information regarding the export of fish and fish products to the Export Markets:

a. sales and marketing efforts and opportunities in the Export Markets for fish and fish products, including, but not limited to, the pricing of exports and selling strategies, sales, projected demand, standard terms of sale, financing, insurance, transportation, foreign competition and customers' specifications, all in the Export Markets;

b. quality and quantity of fish and fish products available for export by its members, including, but not limited to, export inventory levels and geographic availability; and

c. U.S. and foreign legislation, regulations and policies affecting export sales.

2. The members may, in meetings conducted by PNFEA, discuss information regarding the export of fish and fish products to the Export Markets as enumerated in paragraph 1 above.

3. PNFEA and the members may prescribe the following conditions on the acquisition and sale of PNFEA stock:

a. each new shareholder must execute and accede to the PNFEA shareholders' agreement on the same terms as the original shareholders, and

VOL 51 ISS 83 AP 30 1986 UMI

b. any shareholder desiring to sell its stock shall offer such stock to PNFEA at book value for thirty (30) days, and after thirty (30) days, shall offer such stock to any other shareholder of the corporation at book value for fifteen (15) days. After such fifteen (15) day period, the shares may be sold to anyone, subject to the same restriction on any subsequent retransfer of shares.

Definitions

For purposes of this certificate, "member" shall have the meaning set forth in § 325.2(e) of the Regulations and does not denote ownership of stock in PNFEA. The following entities are "members" of PNFEA: Icicle Seafoods, Inc., Seattle, WA; Ocean Beauty Seafoods, Inc., Seattle, WA; Peter Pan Seafoods, Inc., Seattle, WA; and Sea-Alaska Products, Inc., Seattle, WA.

A copy of each certificate will be kept in the International Trade Administration's Freedom of Information Records Inspection Facility, Room 4102, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

Dated: April 24, 1986.

James V. Lacy,

Director, Office of Export Trading Company Affairs.

BILLING CODE 3510-DR-M

Petitions by Producing Firms for Determinations of Eligibility To Apply for Trade Adjustment Assistance; Deluxe Craft Manufacturing Co., et al.

Petitions have been accepted for filing on the dates indicated from the following firms: (1) DeLuxe Craft Manufacturing Company, 1945 North Fairfield Avenue, Chicago, Illinois 60647, producer of photo albums, scrap books, binders and desk accessories (December 19, 1985); (2) L.E. Jones Company, 1200 34th Avenue, Menominee, Michigan 49858, producer of valve seat inserts (December 20, 1985); (3) U.S. Repeating Arms Company, P.O. Box 30-300, New Haven, Connecticut 06511, producer of firearms (December 23, 1985); (4) Medko, Inc., 4500 Quebec Avenue North, Minneapolis, Minnesota 55428, producer of metal electronic components (December 23, 1985); (5) Coronet Leather Finishing Corporation, 201 Central Street, Georgetown, Massachusetts 01833, processor of leather (December 26, 1985); (6) The Harry Gill Company, P.O. Box 428, Urbana, Illinois 61801, producer of track and field equipment (December 27, 1985); (7) Jerome Industries Corporation, 730 Division Street, Elizabeth, New Jersey 07201, producer of transformers (December 30, 1985); (8) The Carpenter Shoe Company, Inc., P.O. Box 1387, Green Cove Springs, Florida 32043, producer of children's footwear (December 30, 1985); (9) Rochester Button Company, 107 Norris Drive, Rochester, New York 14610, producer of buttons (December 31, 1985); (10) Amtec Enterprises, Inc., 645 North 3rd Street, Newark, New Jersey 07107 (December 31, 1985).

In addition, the following petitions were accepted on April 18, 1986, following the reauthorization of the trade adjustment assistance program: (11) Acme United Corporation, 425 Post Road, Fairfield, Connecticut 06430, producer of scissors, shears, rulers, yardsticks, letter openers, nail clippers, medical instruments and hospital supplies; (12) The American Fabrics Company, 1089 Connecticut Avenue, Bridgeport, Connecticut 06609, producer of lace and embroideries; (13) American Ventures International, 9449 West Jefferson, Culver City, California 90230, producer of fabric; (14) Amkey, Inc., 220 Allardvale Street, Wilmington, Massachusetts 01887, producer of electronic keyboards; (15) Better Coil & Transformer Corporation, 90 East Union Street, Goodland, Indiana 47948, producer of transformers; (16) Bigg Electronics, Inc., 1227 Walt Whitman Road, Melville, New York 11747, producer of audio equipment; (17) Chautauqua Vineyards, Inc., 10001 Route 60, Fredonia, New York 14063, producer of wine and wine jelly; (18) Colloid Chemicals, Inc., P.O. Box 240238, Charlotte, North Carolina 28224, producer of dyestuffs; (19) Crown-Globe, Inc., P.O. Box 228, Philadelphia, Pennsylvania 19526, producer of men's, women's, and children's shirts and underwear (20) Devar, Incorporated, 706 Bostwick Avenue, Bridgeport, Connecticut 06605, producer of computer components and process control instruments; (21) Elkhart Cases, Inc., P.O. Box 1414, Elkhart, Indiana 46515, producer of musical instrument cases and other plastic articles; (22) Flair Manufacturing Corporation, 600 Old Willets Path, Hauppauge, New York 11788, producer of heating and air conditioning controls; (23) Hoskins Lumber Company, 23888 Highway 20, Philomath, Oregon 97370, producer of lumber; (24) J&K Sales Company, Inc., 10 Front Street, Pawtucket, Rhode Island 02860, producer of jewelry; (25) J.W. Bray Company; Inc., 305 East Hawthorne Street, Dalton, Georgia 30720, producer of women's footwear; (26) Keystone Electronics Corporation, 49 Bleecker Street, New York, New York 10012, producer of electronic components and hardware; (27) LeBow Jewelry, Ltd., 50 Vision Boulevard, East Providence, Rhode Island 02914, producer of jewelry and jewelry chains; (28) Letisse, Inc., 330 Fifth Avenue, New York, New York 10001, producer of handbags and belts; (29) P/A Industries, Inc., 522 Cottage Grover Road, Bloomfield, Connecticut 06002, producer of metal stamping and web processing equipment; (30) P.B. Machine Company, Inc., 2 Elm Street, Holcomb, New York 14469, producer of fasteners; (31) Power Systems, Inc., 12 Tobey Road, Bloomfield, Connecticut 06002, producer of electronic voltage regulators; (32) Rochester Metal Products Corporation, P.O. Box 2505, Muncie, Indiana 47302, producer of iron castings; (33) Russell Aives Mills, Ltd., 13 Lucon Drive, Deer Park, New York 11729, producer of men's, women's and children's sweaters; (34) S. Howes Company, Inc., Howard Street, Silvercreek, New York 14136, producer of processing equipment; (35) San Juan Manufacturing, Inc., 3102 B Street Northwest, Auburn, Washington 98001, producer of sailboats; (36) Stylstek, Inc., 1857 Middlesex Street, Lowell, Massachusetts 01851, producer of footwear components; (37) Suncook Woven Label Company, Inc., P.O. Box 234, Suncook, New Hampshire 03275, producer of fabric labels; (38) Topco, Inc., 107 Trumbull Street, Elizabeth, New Jersey 07206, producer of lamps, lamp parts and waste receptacles; (39) Transco Products Corporation, 609 West Elizabeth Avenue, Linden, New Jersey 07036, producer of blank recording discs; and (40) Windstreamers, Inc., 1045 12th Northwest, Issaquah, Washington 98027, producer of wind banners.

The petitions were submitted pursuant to section 251 of the Trade Act of 1974 (Pub. L. 93-618), as amended. Consequently, the United States Department of Commerce has initiated separate investigations to determine whether increased imports into the United States of articles like or directly competitive with those produced by each firm contributed importantly to total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of each petitioning firm.

Any party having a substantial interest in the proceedings may request a public hearing on the matter. A request for a hearing must be received by the Certification Division, Office of Trade Adjustment Assistance, Room 4015A, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230, no later than the close of business of the tenth calendar day following the publication of this notice.

The Catalog of Federal Domestic Assistance official program number and title of the program under which these petitions are submitted is 11.300, Trade Adjustment Assistance. Insofar as this notice involves petitions for the determination of eligibility under the Trade Act of 1974, the requirements of Office of Management and Budget Circular No. A-95 regarding review by clearinghouses do not apply.

Charles L. Smith,

Acting Chief, Certification Division, Office of Trade Adjustment Assistance.

Computer Peripherals, Components and Related Test Equipment Technical Advisory Committee; Meeting

A meeting of the Computer Peripherals, Components and Related Test Equipment Technical advisory Committee will be held May 20, 1986, at 9:30 a.m., the Herbert C. Hoover Building, Room B841, 14th and Constitution Avenue, NW., Washington, DC. The Committee advises the Office of Export Administration with respect to technical questions which affect the level of export controls applicable to computer peripherals, components and related test equipment or technology.

General Session

1. Opening remarks by the Chairman.
2. Comments by the public.
3. Up-date on delay in announcement of floppy disk de-control.
4. Up-date on the foreign availability submission re: Floppy disks.
5. ECCN 1572—1" Video Tape: Status of re-defining advisory note 6(C)(3). Video Tape Recorders.
6. ECCN 1565—Plotters: Status of re-defining Supp. No. 1 to 399.1 CCL56.
7. Section 379—Tech Data Regulations: Discussion regarding clarity of recent changes.
8. Public Rule-Making—Discussion regarding practical use within D.O.C.
9. Election of Chairmen: Tech Regulations Sub-Committee and Foreign Availability Sub-Committee.
10. Tutorial Presentation—Tektronix.
11. Introduction of guest attendees.
12. 1986 Charter of CP-TAC.
13. Recommendations for de-control submitted by CDC: Floppy Disks, Mag. Tape, Graphic Displays, Disk Drives.
14. Update on the status of the automated licensing process.
15. New Business.

Executive Session

16. Discussions of matters properly classified under Executive Order 12356, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The general session will be open to the public with a limited number of seats available. A Notice of Determination to close meetings or portions of meetings of the Committee to the public on the basis of 5 U.S.C. 552b(c)(1) was approved on January 10, 1986, in accordance with the Federal Advisory Committee Act. A copy of the Notice is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, U.S. Department of Commerce, (202) 377-4217. For further information or copies of the minutes contact Margaret A. Cornejo, (202) 377-5535.

Dated: April 25, 1986.

Margaret A. Cornejo,

Acting Director, Technical Support Staff, Office of Technology and Policy Analysis.

BILLING CODE 3510-DT-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Requesting Public Comment on Bilateral Textile Consultations With the Government of Hong Kong To Review Trade in Category 651

April 24, 1986.

On April 1, 1986, the Government of the United States requested consultations with the Government of Hong Kong with respect to man-made fiber textile products in Category 651 (pajamas and nightwear of man-made fiber). This request was made on the basis of the agreement, effected by exchange of notes dated June 23, 1982, as amended, between the governments of the United States and Hong Kong relating to trade in cotton, wool and man-made fiber textiles and textile products.

The purpose of this notice is to advise that, if no solution is agreed upon in consultations between the two governments, the United States may request the Government of Hong Kong to limit exports in Category 651, produced or manufactured in Hong Kong and exported to the United States during 1986. The United States reserves the right to control imports at the established level.

Anyone wishing to comment or provide data or information regarding the treatment of Category 651 under the agreement with Hong Kong, or on any other aspect thereof, or to comment on domestic production or availability of textile products included in the category, is invited to submit such comments or information in ten copies to Mr. Ronald I. Levin, Acting Chairman, Committee for the Implementation of Textile Agreements, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230. Because the exact timing of the consultations is not yet certain, comments should be submitted promptly. Comments or information submitted in response to this notice will be available for public inspection in the Office of Textiles and Apparel, Room 3100, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC, and may be obtained upon written request.

Further comment may be invited regarding particular comments or information received from the public which the Committee for the Implementation of Textile Agreements considers appropriate for further consideration.

The solicitation of comments regarding any aspect of the agreement or the implementation thereof is not a waiver in any respect of the exemption contained in 5 U.S.C. 553(a)(1) relating to matters which constitute "a foreign affairs function of the United States."

Leonard A. Mobley,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

Combining Import Limits Established for Certain Cotton Textile Products Produced or Manufactured in India

April 24, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on May 1, 1986. For further information contact Claudia Wolfe, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212.

Background

On December 27, 1985 a notice was published in the **Federal Register** (50 FR 52985), which announced the restraint limits for certain specified categories of

VOL 51 ISS 83 APR 30 1986 UMI

cotton, wool, and man-made fiber textile products, including gingham and other yarn-dyed fabrics in Categories 310 and 318, produced or manufactured in India and exported to the United States during the twelve-month period which began on January 1, 1986 and extends through December 31, 1986. Under the terms of their Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of December 21, 1982, as amended, the Governments of the United States and India have agreed to combine the individual limits of 749,000 square yards and 4,066,000 square yards established, respectively, for Categories 310 and 318 into an overall limit of 4,815,000 square yards for Categories 310 and 318 for the 1986 agreement period. There are no sublimits. Accordingly, in the letter which follows this notice the Chairman of CITA directs the Commissioner of Customs to establish the combined limit.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the TARIFF SCHEDULES OF THE UNITED STATES ANNOTATED (1986).

Leonard A. Mobley,

Acting Chairman, Committee for the Implementation of Textiles Agreements.

April 24, 1986.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, D.C. 20229

Dear Mr. Commissioner: This directive further amends, but does not cancel, the directive of December 23, 1985 which directed you to prohibit entry of cerain cotton, wool and man-made fiber textile products, produced or manufactured in India.

Effective on May 1, 1986, the directive of December 23, 1985 is hereby further amended to combine the previously established limits for cotton textile products in Categories 310 and 318 into a single limit, as follows:

Category	12-month restraint level[1]
310/318	4,815,000 square yards.

[1]The limit has not been adjusted to reflect any imports exported after December 31, 1985.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553.

Sincerely,

Leonard A. Mobley,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

Amending Export Visa Requirement for Certain Cotton Textile Products Produced or Manufactured in India

April 24, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on May 1, 1986. For futher information contact Claudia Wolf, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212.

Background

Under the terms of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of December 21, 1982, as amended, the Governments of the United States and India have agreed to further amend the existing export visa requirement to permit the use on the visas of either the merged Category 310/318, or one or the other of the individual categories in the merger. This amendment will apply to cotton fabrics in Category 310/318 which have been produced or manufactured in India and exported to the United States during the twelve-month period which began on January 1, 1986 and until further notice. Merchandise in Category 310/318, exported before January 1, 1986, may be visaged using the merged Category 310/318, provided all other requirements established under this visa arrangement have been met.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the TARIFF SCHEDULES OF THE UNITED STATES ANNOTATED (1986).

Leonard A. Mobley,

Acting Chairman, Committee for the Implementation of Textile Agreements.

April 24, 1986.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: This directive further amends, but does not cancel, the directive of November 20, 1979, as amended, which established an export visa requirement for certain cotton, wool and man-made fiber textiles and textile products, produced or manufactured in India.

Effective on May 1, 1986 and until further notice, the existing export visa requirement established by directive of November 28, 1979, as amended, is hereby further amended to permit entry for consumption, or withdrawal from warehouse for consumption, in the United States of cotton textile products in Category 310/318 which have been visaed as Category 310/318, or either one of the categories in the combination, if imported on and after January 1, 1986. Cotton textile products in Category 310/318, exported before January 1, 1986, may be visaed using the merged Category 310/318, provided all other requirements established under this visa arrangement have been met.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553.

Sincerely,

Leonard A. Mobley,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

Import Restraint Limit for Certain Man-Made Fiber Textile Products Produced or Manufactured in Korea

April 24, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on May 1, 1986. For further information contact Eve Anderson, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212.

Background

On December 18, 1985, a notice was published in the **Federal Register** (50 FR 52356) which established import control limits for certain cotton, wool and man-made fiber textile products, produced or manufactured in Korea and exported during the twelve-month period which began on January 1, 1986 and extends through December 31, 1986. In the letter which follows this notice, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to also control imports of man-made fiber textile products in Category 649 (brassieres and body-supporting garments), produced or manufactured in Korea and exported during the same twelve-month period, at 500,752 dozen.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the TARIFF SCHEDULES OF THE UNITED STATES ANNOTATED (1986).

Leonard A. Mobley,

Acting Chairman, Committee for the Implementation of Textile Agreements.

April 24, 1986.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: This directive further amends, but does not cancel, the directive issued to you on December 18, 1985 which directed you to prohibit entry of certain cotton, wool and man-made fiber textile products, produced or manufactured in Korea.

Effective on May 1, 1986, the directive of December 18, 1985 is hereby further amended to include a limit for man-made fiber textile products in Category 649 of 500,752 dozen.[1]

To the extent that there is any unfilled balance in the limit for Category 649, goods exported during the 1985 agreement period should be charged to that limit. Goods in excess of that limit should be charged to the limit established for the category during the 1986 agreement period.

Textile products in Category 649 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Leonard A Mobley,

Acting Chairman, Committee for the Implementation of Textile Agreements.

FR Doc. 86-9632 Filed 4-29-86; 8:45 am]

BILLING CODE 3510-DR-M

[1] The limit has not been adjusted to account for any imports exported after December 31, 1985. Charges for Category 649 for the period January 1, 1986 through February 28, 1986 are 3,734 dozen.

Import Limit for Certain Cotton Textile Products Produced or Manufactured in Sri Lanka

April 25, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on May 1, 1986. For further information contact Nathaniel Cohen, Trade Reference Assistant, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212.

Background

On March 3, 1986, a notice was published in the **Federal Register** (51 FR 7314), which established an import restraint limit for cotton skirts in Category 342, produced or manufactured in Sri Lanka and exported during the 90-day period which began on January 31, 1986 and extends through April 30, 1986.

During consultations held under the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of May 10, 1983, as amended, the Governments of the United States and Sri Lanka have agreed to further amend their agreement to establish a specific limit of 59,671 dozen for cotton skirts in Category 342, produced or manufactured in Sri Lanka and exported during the period which began on January 31, 1986 and extends through May 31, 1986. The letter to the Commissioner of Customs which follows this notice implements the agreed amendment.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States annotated (1986).

Leonard A. Mobley,

Acting Chairman, Committee for the Implementation of Textile Agreements.

April 25, 1986.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, D.C. 20229

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive issued to you on February 20, 1986 which directed you to prohibit entry of certain cotton textile products, produced or manufactured in Sri Lanka and exported during the 90-day period which began on January 31, 1986 and extends through April 30, 1986.

Effective on May 1, 1986, the letter of February 20, 1986 is hereby amended to establish a specific limit of 59,671 dozen [1] for cotton skirts in Category 342, produced or manufactured in Sri Lanka and exported during the period beginning on January 31, 1986 and extending through May 31, 1986.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553 (a)(1).

Sincerely,

Leonard A. Mobley,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Officials Authorized To Issue Export Visas for Certain Cotton, Wool and Man-Made Fiber Textile Products Produced or Manufactured in Sri Lanka

April 24, 1986.

Under the terms of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of May 10, 1983 between the Governments of the United States and Sri Lanka, the Government of Sri Lanka has notified the United States Government that Mr. R.M.C. Ranasinghe and Mr. Y.A. Dayaratne have been named to sign export visas issued by the Ministry of Textile Industries in place of Mr. H.B. Herath and Mrs. P.G.P. Abeyratna, who will no longer sign export visas. The purpose of this notice is to advise the public of this change.

Leonard A. Mobley,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

VOL 51 ISS 83 AP 30 1986 UMI

Announcing Import Limits for Certain Cotton, Wool, and Man-Made Fiber Textile Products, Produced or Manufactured in Taiwan

April 24, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on May 1, 1986. For further information contact Kathy Davis, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212.

Background

Under the terms of the bilateral agreement of November 18, 1982, as amended, concerning cotton, wool and man-made fiber textile products, produced or manufactured in Taiwan, a decision has been reached to convert to specific limits in 1986 the levels for certain cotton, wool and man-made fiber textile products in Categories 301, 310/318, 352, parts of 359 (cotton headwear, vests, and infants' sets), 360, 361, 363, 369pt., 436, 440, 442, 443, 611, part of 614, 632, 649, and 651, exported to the United States during the twelve-month period which began on January 1, 1986 and extends through December 31, 1986. The letter to the Commissioner of customs which follows this notice establishes the new specific limits.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26822), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

Leonard A. Mobley,

Acting Chairman, Committee for the Implementation of Textile Agreements.

April 24, 1986.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977 and December 22, 1981; pursuant to the bilateral textile agreement of November 18, 1982, as amended, concerning cotton, wool and man-made fiber textile products from Taiwan; and in accordance with the provisions in Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on May 1, 1986, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, wool and man-made fiber textile products in the following categories, produced or manufactured in Taiwan and exported during the twelve-month period which began on January 1, 1986 and extends through December 31, 1986, in excess of the indicated restraint limits:

Category	Twelve-mo. restraint limit[1]
301	427,438 pounds.
310/318	5,740,000 square yards.
352	876,387 dozen.
359 pt.[2]	4,100,000 pounds.
359 pt.[3]	1,250,500 pounds.
359 pt.[4]	871,459 pounds.
360	609,384 numbers.
361	1,019,900 numbers.
363	12,117,079 numbers.
369 pt.[5]	2,206,083 pounds.
436	4,394 dozen.
440	16,166 dozen.
442	37,471 dozen.
443	3,924 dozen.
611	1,205,461 square yards.
614 pt.[6]	14,273,125 square yards.
632	4,202,500 dozen pairs.
649	959,075 dozen.
651	393,344 dozen.

[1] The restraint limits have not been adjusted to reflect any imports exported after December 31, 1985.

[2] In Category 359, only T.S.U.S.A. numbers 384.0438, 384.0441, 384.0442, 384.0444, 384.0805, 384.0810, 384.0815, 384.0820, 384.0825, 384.3445, 384.3446, 384.3447, 384.3448, 384.5162, 384.5163, 384.5167, 384.5169, 384.5172.

[3] In Category 359, only T.S.U.S.A. numbers 381.0235, 381.0554, 381.3646, 381.5800, 381.5820, 384.0648, 384.0863, 384.4300, 384.4430.

[4] In Category 359, only T.S.U.S.A. numbers 705.3810, 705.3850, 705.4111.

[5] In Category 369, only T.S.U.S.A. numbers 338.5040, 338.5045, 338.5051, 338.5056, 338.5061, 338.5065, 338.5066, 338.5072, 338.5075, 338.5079, 338.5084, 338.5087, 338.5092, 338.5096, and 338.5098.

Sincerely,

Leonard A. Mobley,

Acting Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 86-9630 Filed 4-29-86; 8:45 am]

BILLING CODE 3510-DR-M

Establishing an Import Limit for Certain Cotton Textile Products Produced or Manufactured in Malaysia

April 28, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on April 30, 1986. For further information contact Claudia Wolfe, International trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212.

Background

On February 25, 1986, a notice was published in the **Federal Register** (51 FR 6578) which established an import restraint limit for cotton playsuits and sunsuits in Category 337, produced or manufactured in Malaysia and exported during the ninety-day period which began on January 30, 1986 and extends through April 29, 1986. The notice also stated that, if no mutually satisfactory solution is reached on a level for this category during consultations, the United States Government, pursuant to the agreement, may establish a prorated specific limit for the period immediately following the ninety-day consultation period. Inasmuch as no solution has been reached, the United States Government has decided to establish a prorated specific limit of 22,980 dozen for Category 337 for the period beginning April 30, 1986 and extending through December 31, 1986. The United States remains committed to finding a solution concerning this category. Should such a solution be reached in consultations with the Government of Malaysia, further notice will be published in the **Federal Register**. In the event the limit established for the ninety-day period has been exceeded, such excess amount, if allowed to enter, will be charged to the level established for the designated prorated period.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982, (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26822), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States annotated (1986).

Leonard A. Mobley,

Acting Chairman, Committee for the Implementation of Textile Agreements.

April 28, 1986.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury,
Washington, DC 20229.

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977 and December 22, 1981; pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement, effected by exchange of notes dated July 1 and July 11, 1985, between the Governments of the United States and Malaysia; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on April 30, 1986, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in Category 337, produced or manufactured in Malaysia and exported during the period beginning April 30, 1986 and extending through December 31, 1986, in excess of 22,980 dozen.[1]

Textile products in Category 337 exported during the ninety-day period which began on January 30, 1986 and which are in excess of the level established for that period shall be charged to the prorated level beginning on April 30, 1986.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26822), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Leonard A. Mobley,

Acting Chairman, Committee for the Implementation of Textile Agreements.

DEPARTMENT OF DEFENSE

Department of the Army

Public Information Collection Requirement Submitted to OMB for Review

ACTION: Public Information Collection Requirement Submitted to OMB for Review.

SUMMARY: The Department of Defense has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Each entry contains the following information: (1) Type of submission; (2) Title of Information Collection and Form Number if applicable; (3) Abstract statement of the need for and the uses to be made of the information collected; (4) Type of Respondent; (5) An estimate of the number of responses ; (6) An estimate of the total number of hours needed to provide the information; (7) To whom comments regarding the information collection are to be forwarded; and (8) The point of contact from whom a copy of the information proposal may be obtained.

Extension

Application for a Department of the Army Permit. This program regulates the alteration and quality of U.S. waters. The public submits the application to obtain permission to undertake construction related activities that would affect navigation channels and other U.S. waters. The impacts on navigation, water quality, the environment, and other factors are considered in the Corps review.

Individual or firms making structural changes affecting the navigational waters of the U.S.

Responses: 14,000.

Burden Hours: 70,000.

ADDRESSES: Comments are to be forwarded to Mr. Edward Springer, Office of Management and Budget, Desk Officer, Room 3235, New Executive Office Building, Washington, DC 20503 and Mr. Daniel J. Vitiello, DOD Clearance Officer, WHS/DIOR, 1215 Jefferson Davis Highway, Suite 1204, Arlington, Virginia 22202–4302, telephone number (202) 746–0933.

FOR FURTHER INFORMATION CONTACT: A copy of the information collection proposal may be obtained from Ms. Angela R. Petrarca, DAIM–ADI–M, Room 1C638 The Pentagon, Washington, DC 20310–0700, telephone (202) 695–1671.

Patricia H. Means,

OSD Federal Register Liaison Officer Department of Defense.

April 24, 1986.

BILLING CODE 3810-01-M

Military Traffic Management Command Directorate of Personal Property; International Program

AGENCY: Military Traffic Management Command (MTMC), Army, DOD.

ACTION: Notice of invitation to comment on the solicitation for movement of unaccompanied baggage and crated household goods under the Direct Procurement Method (DPM) between installation transportation offices and water and aerial ports within the continental United States.

SUMMARY: The MTMC is planning to solicit rates for movement of unaccompanied baggage and crated household goods moving between installations and ports. Your comments are requested for inclusion in our final solicitation. Comments from the freight forwarders/carriers, as well as any other interested persons or agencies, are being solicited for the following proposed provisions:

a. Freight forwarders/carriers will be requested to submit a single factor rate to include the following services:

(1) Pickup shipment at local contractor at origin installation, or from origin port.

(2) Surface transportation to meet desired delivery dates.

(3) Delivery to destination shown on Government Bill of Lading as directed by the installation transportation office.

b. Traffic moving under the DPM method of shipment between ports and installation transportation offices will be offered based on the most favorable rate submitted for each traffic channel. The Government reserves the right to use the method of shipment serving the best interest of the Government and service member.

c. Rates submitted will be for a 6-month period with an option for cancellation at designated periods within the cycle.

This invitation consists of ideas and issues identified by MTMC. Any freight forwarder/carrier interested in participating in the program must write to this office in order to receive a copy of the solicitation.

DATE: submit written comments by May 30, 1986.

FOR FURTHER INFORMATION CONTACT:

Mrs. Naomi King or Mr. Russell MacDonald, HQ, Military Traffic Management Command, ATTN: MT–PPC (Room 408), 5611 Columbia Pike, Falls Church, Virginia 22041–5050, Commercial Phone (202) 756–2385.

Address Comments To: HQ, Military Traffic Management Command, ATTN: MT–PPC (Room 408), 5611 Columbia Pike, Falls Church, Virginia 22041–5050, (FILE: DPM SURFACE).

This request for comments and the resulting determinations are being made under the authority of 10 USC 2301–2314 and DOD Directives 4500.9 and 4500.34.

Joseph R. Marotta,

Colonel, General Staff, Director of Personal Property.

Corps of Engineers; Department of the Army

Intent To Prepare a Draft Environmental Impact Statement (DEIS) on Permit Application 85-021 for the Proposed Pamo Dam and Reservoir Project, San Diego County, CA

AGENCY: U.S. Army Corps of Engineers, DOD.

ACTION: Notice of Intent to Prepare a Draft Environmental Impact Statement (DEIS).

SUMMARY: a. *Proposed Action.* The San Diego County Water Authority (SDCWA) has applied to the Corps of Engineers for a permit under Section 404(b)(1) of the Clean Water Act for a proposed emergency water supply project. The SDCWA proposes to construct a dam and reservoir in the Pamo Valley, northeast San Diego County, to supplement the existing emergency and dry year water supply capability of the San Diego Aqueduct system by providing additional local storage capacity for imported water. In addition to its role in regional storage, the Pamo Reservoir would provide the Miramar Water Filtration Plant, the largest in the SDCWA service area, with an adequate emergency supply; presently, this facility has only a minimal emergency supply.

The reservoir would store imported water as well as capture winter runoff from the local watershed and would have a total storage volume of 130,000 acre-feet (af). 100,000 af of this volume would be utilized for storage of imported water for emergency dry-year use, while the remaining 30,000 af would be utilized for storage of local runoff which is expected to produce an average yield of 11,300 af/year. A 66-inch pipeline would be constructed between the reservoir and the First and Second San Diego Aqueducts to pump imported water to the reservoir and to deliver water by gravity to the Miramar Filtration Plant.

The SDCWA also proposes to construct a pipeline between the upstream Sutherland Reservoir and the Pamo Reservoir. The purpose of the pipeline would be to regulate flows from Sutherland Reservoir more efficiently in order to avoid situations where spills over Sutherland Dam occur. A second feature of this portion of the project is the construction of a hydro-electric plant which would be powered by water transported through the pipeline between the Sutherland and Pamo Reservoirs. This facility would produce an estimated 9.3 million kilowatt hours (kwh) of electricity per year. Electricity generated by this project would more than compensate for the energy consumed in pumping imported water to the Pamo Reservoir and would produce a surplus of up to 7.8 million kwh/year which would be sold to the San Diego Gas and Electric Company.

A fishing concession to be operated by the City of San Diego Water Utilities Department is also expected to be located at the Pamo Reservoir. The specific design and opening date for a fishing operation have not been determined at this time.

b. *Alternatives.* The SDCWA has considered several alternatives to the proposed Pamo Dam and Reservoir. They include:

(1) No project,

(2) Improvement of the existing local water delivery system,

(3) Impoundment of natural flow with a new dam in Pamo Valley, with an intertie to San Vicente Reservoir,

(4) Increased storage capacity of Lake Henshaw,

(5) Use of groundwater storage,

(6) Water transfer from the Imperial Irrigation District to the Metropolitan Water District.

(7) Development of a "water banking" system on Lake Mead, and

(8) Storage of excess water in the Chino Basin.

These alternatives will be addressed in the EIS, as would any other reasonable alternatives which could be formulated during the scoping process.

c. *Scoping Process.* The SDCWA prepared an EIR on the proposed project which was completed in March 1984. Public comments were received on this document through letters of comment and verbal comments in public and agency meetings. The Corps released a Public Notice of permit application, dated October 4, 1985, and has received to date approximately 100 letters of comment in response. All of this public input will be considered in the scoping process for the EIS. A range of concerns have been identified thus far, and include:

(1) Potential use of stored water for purposes other than emergencies,

(2) Relationship to other water projects in the region,

(3) Potential growth inducing effects,

(4) Impacts to biological resources and mitigation needs, and

(5) Impacts to cultural resources and mitigation needs.

d. *Future Public Meetings.* A public scoping meeting will be scheduled in the near future to further discuss concerns and identify significant issues for consideration in the DEIS.

e. *Availability of DEIS.* The DEIS is anticipated to be circulated for public review in October 1986.

f. *Address.* Questions and comments about the proposed action and DEIS can be addressed to: Glenn Lukos, Regulatory Functions Branch, U.S. Army Corps of Engineers, P.O. Box 2711, Los Angeles, California 90053.

John O. Roach, II

Army Liaison Officer with the Federal Register.

BILLING CODE 3710-KF-M

To Prepare a Draft Supplemental Environmental Impact Statement; Atchafalaya Basin Floodway System, Morgan City, LA

AGENCY: U.S. Army Corps of Engineers, DOD, New Orleans District; DOD.

ACTION: Notice of Intent to Prepare a Draft Supplemental Environmental Impact Statement (EIS).

SUMMARY: 1. *Proposed Action.* The New Orleans District, Corps of Engineers, is conducting a reevaluation study of the extension of the authorized East Atchafalaya Basin Protection Levee (Avoca Island Levee) feature of the Atchafalaya Basin Floodway System, Louisiana project. The purpose of this study is to evaluate possible solutions to flooding problems in the Morgan City, Louisiana vicinity, that are directly related to operation of the Atchafalaya Basin Floodway.

2. *Alternatives.* a. Two primary approaches to flood control are being considered. One consists of further extension of the existing Avoca Island Levee beyond the Avoca Island cutoff channel. The other consists of construction of a barrier levee and pumping station system that would lie generally along or parallel to the new U.S. Highway 90 presently being built from Houma to Morgan City. This alternative would also include ring levees around the industrial sections of the Morgan City-Amelia area that lie outside of the protected area of the barrier levee.

b. Where appropriate, nonstructural measures such as flood proofing of building, relocation of structures, and regulation of use of the flood-plain are also being evaluated. To offset any significant environmental losses that would be caused by flood control measures, appropriate fish and wildlife or cultural resources mitigation measures are being studied. The alternative of no action, or future conditions without Federal action, is also being evaluated and will serve as the base line for determination of the effects of alternative plans developed.

3. *Scoping Process.* a. *Public Involvement.* Since initiation of the study in 1983, numerous contacts have been made in person and by letter with various local, state, or Federal governmental groups, private interest groups, and individuals to solicit input regarding issues that should be considered in this study. Major emphasis has been given to meeting with interested groups in Terrebonne Parish and the Morgan City area, the locations likely to be affected most by any flood control alternative eventually implemented.

b. *Significant Issues to be Analyzed in the EIS.* A Cost-effective and publicly acceptable solution to flooding problems in the Morgan City vicinity has been sought for many years. Proposed extension of the Avoca Island Levee has stimulated much controversy, with public and agency opinions being split over the potential wisdom of such an action. Many citizens in Terrebonne Parish and some environmental groups believe levee extension would be harmful to their interests in the rich marsh-estuarine region of the Parish. On the other hand, many citizens and businesses in the Morgan City vicinity continue to suffer from damaging floods related to increasingly high water levels in the Lower Atchafalaya River. Increasingly high water levels in the areas northeast of Morgan City also appear to be causing decreased timberland productivity and loss of income to landowners in that zone. To further complicate the issues, apparent land subsidence appears to be aggravating flooding problems. The reevaluation study and Draft Supplemental EIS will attempt to analyze all of these issues and demonstrate how alternative flood control plans would affect both the human and natural environment. It will also show how proposed fish and wildlife or cultural resource mitigation measures may be used to offset or compensate for significant adverse environmental impacts.

c. *Environmental Review and Consultation Requirements.* The Draft Supplemental EIS will be made available to the public and interested state and Federal agencies for a minimum review period of 45 days. Throughout the study process, consultation has occurred with the U.S. Fish and Wildlife Service, National Marine Fisheries Service, Louisiana Department of Wildlife and Fisheries, and other interested local, state and Federal parties. Such consultation will continue in the future.

4. *Scoping Meeting.* Due to the large amount of public involvement that has already occurred during the initial phases of this study, no plans have been made for an additional formal public scoping meeting. Public input will be solicited regarding any additional issues that should be addressed in the EIS by means of Public Scoping Notice requesting submission of written comments.

5. *Availability.* The Draft EIS is currently scheduled to be available to the public in early 1987.

ADDRESS: Questions about the proposed action and Draft Supplemental EIS can be directed to Dr. Thomas M. Pullen, Jr., U.S. Army Corps of Engineers, Environmental Analysis Branch (LMVPD-R), Lower Mississippi Valley Division, P.O. Box 80, Vicksburg, Mississippi 39180-0080, telephone (601) 634-5851 or Mrs. Sue Hawes, U.S. Army Corps of Engineers, Environmental Quality Section (LMNPD-RE), New Orleans District, P.O. Box 60267, New Orleans, Louisiana 70160-0267, telephone (504) 862-2518.

Dated: April 18, 1986.

Eugene S. Witherspoon,

Colonel, Corps of Engineers, District Engineer.

BILLING CODE 3710-84-M

DEPARTMENT OF EDUCATION

Vocational Education National Council Meeting

AGENCY: National Council on Vocational Education, Education.

ACTION: Notice of Public Meeting of the Council.

SUMMARY: This notice sets forth the proposed agenda of a forthcoming meeting of the National Council on Vocational Education. It also describes the functions of the Council. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act, and is intended to notify the general public of its opportunity to attend.

DATE: May 21st and 22nd, 1986.

ADDRESS: Holiday Inn, Crowne Plaza, Los Angeles International Airport, 5985 Century Boulevard, Los Angeles, California 90045, (213) 642-7500.

SUPPLEMENTARY INFORMATION: The National Council on Vocational Education is established under Section 104 of the Vocational Education Amendments of 1968, Pub L. 90-576. The Council is established to:

(A) Advise the President, the Congress, and the Secretary of Education concerning the administration of, preparation of general regulations for, and operation of, vocational education programs supported with assistance under this title;

(B) Review the administration and operation of vocational education programs under this title, including the effectiveness of such programs in meeting the purposes for which they are established and operated, make recommendations with respect thereto, and make annual reports of its findings and recommendations (including recommendations for changes in the provisions of this title) to the Secretary for transmittal to Congress; and

(C) Conduct independent evaluations of programs carried out under the title and publish and distribute the results thereof.

FOR FURTHER INFORMATION CONTACT: Carolyn J. Edwards, Executive Assistant, 2000 L Street, NW., Suite 580, Washington, DC 20036, (202) 634-6110.

Records are kept of all Council proceedings, and are available for public inspection at the above address from the hours of 9:00 A.M. to 4:30 P.M.

Signed at Washington, DC, on April 23, 1986.

James W. Griffith,

Executive Director.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CI86-372-000]

Chevron U.S.A. Inc. and Texas Eastern Transmission Corp.; Application

April 24, 1986.

Take notice that on April 22, 1986, Chevron U.S.A. Inc. ("Chevron") 575 Market Street, San Francisco, California 94105, and Texas Eastern Transmission Corp. ("Texas Eastern"), Post Office Box 2521, Houston, Texas 77252, filed a Joint Application (i) for any necessary Certificates of Public Convenience and Necessity authorizing or an order otherwise approving Chevron to sell quantities of natural gas from certain designated fields to Texas Eastern upon expiration of the contract between Gulf Oil Corporation ("Gulf") and Texas Eastern dated January 6, 1964 ("1964 Contract") and an order approving the

VOL 51 ISS 83 AP 30 1986 UMI

arrangements described therein for the transportation of such natural gas from the designated fields to Texas Eastern's pipeline system and (ii) for an order or orders amending the order of the Federal Power Commission of December 19, 1963, issuing a certificate of public convenience and necessity to Gulf to sell natural gas to Texas Eastern pursuant to the 1964 Contract and "Opinion No. 760 and Order on Deliveries of Gas Under Certificate and Warranty Contract" issued October 15, 1976, in Docket No. CI64-26, to authorize Chevron to sell and deliver natural gas to Texas Eastern in accordance with an amendment dated April 11, 1986, ("1986 Amendment") to the 1964 Contract, all as more fully described in the Joint Application on file with the Commission and open for public inspection.

The proposal of Chevron and Texas Eastern are contained in four agreements, of which the two basic agreements are the 1986 Amendment and the Tail End Agreement, entered into by them on April 11, 1986. It is alleged that these two agreements constitute an arrangement under which the rate of delivery of natural gas under the 1964 Contract will continue at the current level of approximately 400,000 Mcf per day until its expiration, while providing Texas Eastern with substantial additional natural gas supplies from certain designated fields upon expiration of the 1964 Contract.

The Tail End Gas Agreement sets forth in Appendix A the fields and oil and gas leases which Chevron will commit to Texas Eastern for the delivery of natural gas to Texas Eastern upon expiration of the 1964 Contract. It provides the mechanism for executing and the terms and conditions of the Gas Purchase Contracts under which the natural gas underlying those fields and leases will be sold to Texas Eastern upon expiration of the 1964 Contract. Each Gas Purchase Contract will have a term or provide for extension(s) of term which extends from the expiration of the 1964 Contract until the natural gas reserves underlying the field are depleted. If the price of the natural gas is regulated, it will not be more than the applicable maximum price. The terms and conditions will be representative of the terms and conditions of gas purchase contracts being entered into by willing Sellers and willing Buyers of natural gas for offshore natural gas supplies in the Gulf of Mexico in comparable arms-length transactions. It is the intention of the parties that each Gas Purchase Contract be representative of competitive terms and conditions of the market existing during that period. In addition, each Gas Purchase Contract will contain a provision permitting Texas Eastern to reduce the price payable thereunder to the market clearing level of its markets.

The Tail End Gas Agreement also provides the mechanism for entry into and the terms and conditions of the agreements to transport the remaining natural gas reserves from the delivery point in each of the designated fields to Texas Eastern's pipeline system. It is contemplated that such transportation of natural gas will be through Chevron-owned facilities or pursuant to Chevron third-party transportation and/or exchange agreements that are currently transporting natural gas from these fields for delivery to Texas Eastern under the 1964 Contract. The Tail End Gas Agreement provides that each transportation of the remaining natural gas reserves from the designated fields to Texas Eastern's pipeline system will be at just and reasonable rates determined in accordance with the ratemaking methodolgy used by FERC under the Natural Gas Act for comparable transportation service.

The 1986 Amendment changes the 1964 Contract solely in respect of the daily and annual take quantities thereunder. It does not change, *inter alia*, the price, the total quantity of approximately 4.4 Tcf of warranty natural gas deliverable under the 1964 Contract, the fixed term thereof, or the force majeure provisions. Under the 1986 Amendment the Daily Contract Quantity will be reduced from 500,000 to 400,000 Mcf of natural gas, Texas Eastern will be required to take 400,000 Mcf of natural gas per day averaged over each year and 350,000 Mcf of natural gas each day, and Texas Eastern will have the right to take quantities of natural gas in excess of 400,000 Mcf per day if Chevron determines it has excess quantities of natural gas to sell to Texas Eastern. If Chevron fails to deliver quantities of natural gas up to 50,000 Mcf per day in excess of the Daily Contract Quantity of 400,000 Mcf as requested by Texas Eastern, then Texas Eastern's yearly take obligation will be reduced by the quantity of such excess natural gas which Chevron fails to deliver. The eighty percent take or pay provision and the right of Texas Eastern to call for 625,000 Mcf of natural gas deliveries per day will no longer be applicable.

Texas Eastern and Chevron allege that their proposal as set forth in the 1986 Amendment to the 1964 Contract and the Tail End Gas Agreement are in the public interest. Under the 1986 Amendment deliveries will continue under the 1964 Contract at the current level of approximately 400,000 Mcf of natural gas per day which is expected to be maintained until delivery of all of the natural gas under the 1964 Contract. At that delivery rate all of the approximately 4.4 Tcf of natural gas will be delivered in November, 1988, which is approximately one year before the end of the fixed term of the 1964 Contract, assuring that Texas Eastern will be able to take all of the natual gas before the expiration of the fixed term of the 1964 Contract. Under the Tail End Gas Agreement, deliveries of natural gas will continue without interruption from the dedicated fields under market sensitive agreements upon expiration of the 1964 Contract. Texas Eastern estimates that upon expiration of the 1964 Contract, the natural gas reserves underlying the dedicated fields will range from 300 to 500 Bcf and will have a deliverability of between 200,000 and 400,000 Mcf per day. Texas Eastern and Chevron allege that the proposal is clearly beneficial to Texas Eastern and its customers since they will continue to receive the same benefits they have been recently receiving under the 1964 Contract, while receiving the additional substantial benefit of the continuation without interruption upon termination of the 1964 Contract of estimated deliveries ranging from 200,000 to 400,000 Mcf per day from dedicated natural gas reserves estimated to range from 300 to 500 Bcf.

Two other agreements are part of the overall transaction between Chevron and Texas Eastern. They are the Termination of the 1967 Contract and a Transportation Letter Agreement, both dated April 11, 1986. The 1967 Agreement is a surplus gas purchase contract dated July 1, 1967 covering fields utilized to service the 1964 Contract which has been dormant for many years. No natural gas has been delivered under this contract for approximately seventeen years. Chevron is concurrently filing a separate application with FERC for parmission and approval to abandon service under this terminated contract. Authorization to abandon this service is a condition to the effectiveness of the 1986 Amendment and the Tail End Gas Agreement.

Under the Transportation Letter Agreement Texas Eastern agrees to cooperate with Chevron in a good faith effort to minimize Chevron's third-party transportation costs under the 1964 Contract to the extent it is operationally feasible and Texas Eastern's commitments permit it to receive gas at other receipt points and Texas Eastern does not incur any third-party costs. Any necessary authorizations in respect of specific transportation or exchange arrangements will be applied for as such arrangements are entered into.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 12, 1986, file with the Federal Energy regulatory Commission, Washington, DC 20426, a motion to intervene or protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211), as amended. All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CI86-340-000 et al.]

Cities Service Oil and Gas Corp.; Application

April 24, 1986.

Take notice that on April 17, 1986, Cities Service Oil and Gas Corporation (Applicant), of P.O. Box 300, Tulsa, Oklahoma 74102, filed an application as successor in interest, and pursuant to § 157.23(b) for Certificates of Public Convenience and Necessity to render service previously authorized by the Commission under Small Producer Certificate of Public Convenience and Necessity heretofore issued by Oxy Petroleum, Inc., et al., all as more fully shown on Exhibit "A" and on file with the Commission and open to public inspection. Applicant also requests to be substituted for Oxy Petroleum, Inc., in any related proceedings presently pending before the Commission.

Any person desiring to be heard or to make any protest with reference to said application should, on or before May 12, 1986, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to the proceeding herein must file a petition to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

VOL 51 ISS 83 AP 30 1986 UMI

[Docket No. ER86-366-000]

Florida Power Corp.; Amended Filing

April 24, 1986.

Take notice that on April 17, 1986, Florida Power Corporation (Florida Power) tendered for filing information intended to supplement its April 9, 1986 filing in the above docket number. The information includes the second of two agreements between Florida Power and the Florida Municipal Power Agency which was omitted from the original filing.

Any person desiring to be heard or to protest the application should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before May 1, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. SA83-20-001]

Frontier Oil and Refining Co., Petition for Exemption From Incremental Pricing Provisions and for Interim Relief

Issued: April 24, 1986.

On March 27, 1986, Frontier Oil and Refining Company (Frontier) filed with the Federal Energy Regulatory Commission (Commission) a petition for an adjustment from the incremental pricing provisions of Title II of the Natural Gas Policy Act of 1978 (NGPA). 15 U.S.C. 3341-3348 (1982). Frontier seeks an interim and permanent exemption from incremental pricing surcharges for its Cheyenne, Wyoming refinery, to be effective August 1, 1985. 18 CFR 385.1101(a)(2) and 385.1113 (1985).

In its petition, Frontier requests the Commission to grant interim relief immediately, pending further review by the Commission, to grant relief for a minimum period of two years after review by the Commission, and to waive the filing fee set for such petitions, since the basis for the petition is out-of-pocket losses. In its petition, Frontier notes that it is a small, independent oil refiner owning only one refinery with an operating capacity of 35,000 barrels per day in Cheyenne, Wyoming. The refinery is classified as an industrial boiler fuel facility using natural gas for boiler fuel use. 15 U.S.C. 3341 (1982). Frontier notes that the Commission has granted similar relief to Husky Oil Company (Husky), Frontier's predecessor-in-interest in the Cheyenne refinery. The Commission's relief to Husky covered billing months from August 1984 through July 1985.

Frontier argues that interim relief is warranted not only because it is in the public interest but also because denial of the interim relief will result in irreparable injury, special hardship, and inequity to Frontier. Frontier also argues that the permanent relief from the Commission's incremental pricing procedures is warranted to prevent and alleviate special financial hardship. According to Frontier, the facility's out-of-pocket costs, including incremental pricing surcharges, exceed the facility's total sales revenues.

The procedures applicable to the conduct of this adjustment proceeding are found in Subpart K of the Commission's Rules of Practice and Procedure, 18 CFR Part 385, Subpart K (1985). Any person desiring to participate in this adjustment proceeding must file a motion to intervene in accordance with the provisions of Subpart K. All motions to intervene must be filed within fifteen days after publication of this notice in the Federal Register.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. C186-324-000]

Gilliring Oil Co.; Application for Abandonment of Service

April 25, 1986.

Take notice that the Applicant listed herein has filed an application pursuant to section 7 of the Natural Gas Act for authorization to abandon service as described herein.

The circumstances presented in the application meet the criteria for consideration on an expedited basis, pursuant to § 2.77 of the Commission's rules as promulgated by Order No. 436 and 436-A, issued October 9, and December 12, 1985, respectively, in Docket No. RM85-1-000, all as more fully described in the application which is on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said application should on or before 15 days after the date of publication of this notice in the Federal Register, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 385.211, .214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in the proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Kenneth F. Plumb,

Secretary.

Docket No. and date filed	Applicant	Purchaser and location	Price per Mcf	Pressure base
C186-324-000, B, Apr. 9, 1986	Gilliring Oil Co.	Tennessee Gas Pipeline Company, a Division of Tenneco Inc. Agua Dulce Field, Nueces County, Texas	(2)	

[1] Additional information received April 21, 1986.

[2] Applicant, a small producer certificate holder in Docket No. CS71-983, requests authorization to abandon its sale of gas to Tennessee from twenty wells which produce NGPA section 108 and section 104-replacement, biennium, and Post-1974 gas. Applicant states that the gas purchase contract dated July 22, 1948, and the amendment dated March 1, 1971, expired by their own terms on January 1, 1983. Applicant states that the wells should be prudently produced at 1,729 MCF per day. Tennessee advised it is willing to take only 70 Mcf per day from the field and Tennessee further advised it is not willing to take any gas beyond June 1, 1986. Applicant states that Tennessee is not paying for gas not taken. Applicant desires to secure another market for its gas so it may continue gas sales in a prudent and efficient manner without interruption in order to maintain valid leases.

Filing Code: A—Initial Service; B—Abandonment; C—Amendment to add acreage; D—Amendment to delete acreage; E—Total Succession; F—Partial Succession.

BILLING CODE 6717-01-M

[Docket Nos. ER86-316-000 and EL86-21-000]

Southern California Edison Co.; Order Accepting for Filing and Suspending Rates, Noting Intervention, Denying Requests for Summary Disposition, Denying Request for Declaratory Order, Consolidating Dockets, and Establishing Hearing Procedures

Issued: April 23, 1986.

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt and C.M. Naeve.

This order pertains to two related submissions for consideration by this Commission: (1) A petition for declaratory order and complaint filed by the City of Vernon, California (Vernon) in Docket No. EL86-21-000 regarding integration of its interest in Palo Verde Nuclear Generating Station Unit No. 1 (PVNGS 1)[1] as provided by the integrated operations agreement (IOA) between Vernon and Southern California Edison Company (SCE); and (2) two unexecuted agreements submitted for filing by SCE in Docket No. ER86-316-000 to implement the IOA between Vernon and SCE.

A. Docket No. ER86-316-000

On February 24, 1986, SCE submitted for filing two unexecuted agreements: (1) a supplemental agreement providing for the integration of Vernon's entitlement in Palo Verde Nuclear Generating Station No. 1 (PVNGS 1) into the SCE system; and (2) a rate schedule providing for firm transmission service to Vernon of power from PVNGS 1.[2]

The IOA was accepted for filing by the Commission on November 4, 1982, in Docket No. ER82-634-000. The IOA provides for the integration of Vernon's entitlement in PVNGS 1 (including replacement capacity acquired by Vernon from SCR and other parties), and commits SCE to provide replacement energy to Vernon when its resources are unavailable. The IOA also provides for credits to Vernon on its partial requirements bill from SCE for the capacity and energy made available from Vernon's PVNGS 1 interest.[3] SCE's proposed supplement to the IOA provides certain procedures and details relating to the integration of Vernon's PVNGS entitlement and revises the computation of incremental cost to track the resources which will provide the energy. The transmission rate schedule provides for firm wheeling of Vernon's entitlement over SCE's system. The proposed transmission rates are based on SCE's tariff contract rate TN (230 kV network transmission service) and contract rate TP (point-to-point transmission service). SCE also proposes scheduling and dispatching charges for service related to integration of Vernon's interest.

SCE requests waiver of the notice requirements to permit an effective date that corresponds to the date of the Commission's order accepting the agreements for filing.[4]

Notice of SCE's filing was published in the Federal Register [5] with comments due on or before March 13, 1986. On March 5, 1986, Vernon filed a motion to intervene. Vernon supports SCE's request for waiver of the notice requirements, and requests a one day suspension and a hearing. Further, Vernon requests consolidation of this docket with its submission in Docket No. EL86-21-000. Vernon specifically objects to the following aspects of SCE's filing: (1) The computation of Vernon's capacity credits; (2) the revised determination of incremental cost for replacement energy; (3) the charges for scheduling and dispatching services; and (4) use of gross, rather than net, plant for purposes of determining the proposed transmission charges. Vernon also requests that summary disposition be granted to assign an effective date of February 1, 1986, to the filing, and that the Commission direct Edison to effect Vernon's capacity credits as of that date; in the alternative, Vernon requests that the submittals be effective upon acceptance for filing by the Commission. Finally, Vernon expresses concern about the effect of the agreements with regard to the future integration dates of units 2 and 3 of PVNGS.

On March 24, 1986, SCE responded to Vernon's pleading and stated that it does not oppose Vernon's intervention, a one day suspension, evidentiary hearing, or consolidation of this proceeding with Docket No. EL86-21-000. SCE, however, does oppose the request for summary disposition regarding the imposition of an effective date earlier than the date on which the Commission accepts the agreements for filing. In support, SCE states that the IOA requires that the supplemental and transmission agreements be accepted for filing and made effective before Vernon's entitlement in PVNGS may be deemed integrated, and that the integration of this entitlement was conditioned on the execution by both parties of the agreements. Because the parties have been unable to agree upon the terms of these agreements, SCE filed them immediately. SCE states that it is willing to accede to Vernon's alternative request that the effective date of the agreements be the date of acceptance for filing by the Commission provided that this is not construed as a waiver by SCE of its right to later seek to terminate or cancel the rate schedules, if necessary, under section 205 of the FPA.[6] Further, SCE states that the supplemental agreement pertains to all three of the units of PVNGS, including those yet to be activated.

B. Docket No. EL86-21-000

On February 3, 1986, Vernon submitted for filing a complaint [7] and

[1] Vernon owns a 9.2593% interest in each of the three units of PVNGS, including PVNGS 1.

[2] See Attachment for rate schedule designations.

[3] PVNGS 1 commenced commercial operation on January 27, 1986. SCE and Vernon have, for contractual reasons, agreed upon February 1, 1986, as the date of commercial operation.

[4] Both of the proposed agreements state that they shall become effective on the date following their execution by both parties when accepted for filing by the Commission, or such later date, following a hearing, when the agreements are no longer subject to judicial review. However, in its transmittal letter and subsequent pleadings, SCE states that it will recognize as an effective date the date on which the Commission accepts the agreements for filing.

[5] 51 FR 7567 (1986).

[6] SCE states that the purpose of this reservation is to provide it with the opportunity to terminate or cancel either schedule without having to meet the "public interest" standard of the *Mobile-Sierra* doctrine. (*United Gas Pipe Line Co.* v. *Mobile Gas Service Corp.*, 350 U.S. 332 (1956); *FPC* v. *Sierra Pacific Power Co.*, 350 U.S. 348 (1956).)

[7] Vernon's complaint alleged that SCE has failed to file the proposed supplemental integration and

Continued

VOL 51 ISS 83 AP 30 1986 UMI

petition for declaratory order regarding the integration of its ownership interest in PVNGS 1 as of February 1, 1986, pursuant to the IOA between Vernon and SCE. Vernon states the SCE has refused to recognize Vernon's interest in PVNGS under the IOA until the Commission takes action on the filings in Docket No. ER86-316-000. Vernon adds that, since February 1, 1986, the City has been deprived of valuable capacity credits associated with PVNGS on its partial requirements bills rendered by SCE. Vernon also seeks a finding from the Commission that Edison is required to perform services provided for in the IOA in connection with integrating into is operation Vernon's share of PVNGS. Vernon maintained that, absent a timely filing, SCE should have provided service from February 1, 1986, and requested waiver of notice to effect this agreement as of that date. Vernon also alleges discrimination on the ground that SCE has taken no similar action to deprive other municipalities with interests in PVNGS from timely integration into SCE's system.

Notice of Vernon's filing was published in the Federal Register, with comments due on or before February 25, 1986.[1] On February 25, 1986, SCE responded to Vernon's petition, requesting that the Commission deny it. SCE contends again in this docket that the IOA contemplates that the supplemental agreements are to be executed and in place prior to the integration of Vernon's interest into SCE's system and that, since the parties could not agree on these contracts, integration could not take place as of February 1, 1986. SCE claims that providing service prior to filing would place a utility at risk that waiver will not be granted, that it will not be entitled to recover charges for service rendered, and that it will be in violation of the Federal Power Act's and the Commission's notice and filing requirements. With regard to Vernon's claim that it has been prejudiced because SCE has not provided services since February 1, 1986, SCE noted that on February 18, 1986, the parties executed an Interim Purchase Agreement for the purchase by SCE of Vernon's entitlements in PVNGS 1 should the Commission not issue an order providing that the entitlement was integrated as of February 1, 1986. Under the agreement, SCE will pay Vernon an amount equal to the economic benefits which Vernon would have achieved through integration of its PVNGS interest on the commercial operation date of the project. SCE also argues that it would be liable to a claim of discrimination against its other customers if, with respect to Vernon, it alters its position against providing service prior to filing. Finally, SCE claims that it gave Vernon ample opportunity for alternatives to prevent adverse economic impact resulting from delays in integration of PVNGS.

On March 5, 1986, Vernon submitted a motion for summary disposition as to its claim that SCE must integrate the PVNGS 1 resource as of February 1, 1986. Vernon states that no issues of material fact exist which warrant a hearing. Vernon further states that SCE has overstated the risks inherent in providing service prior to filing, suggesting that it has been Commission practice to grant such prior effective dates when supported by the customer.

On March 24, 1986, SCE filed an answer in opposition to Vernon's motion. SCE essentially repeats arguments contained in its answer and its pleadings filed in Docket No. ER86-316-000; *i.e.*, that service should not be effected as of February 1, 1986. SCE contends that Vernon's requested relief be denied and that factual issues be resolved at an evidentiary hearing.

Discussion

Pursuant to Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.214), the timely, unopposed motion to intervene in Docket No. ER86-316-000 serves to make Vernon a party to that docket.

Th Commission will consolidate Docket Nos. ER86-316 and EL86-21, given the common issues of fact and law raised in both dockets and the support for consolidation by both parties.

We shall deny, without prejudice, Vernon's request for a declaratory order, and its motions for summary disposition in both dockets to establish a February 1, 1986 effective date for the supplemental and transmission agreements. Contrary to Vernon's claim, there appear to be numerous issues of material fact that need to be resolved at an evidentiary hearing. We are not prepared to impose a retroactive effective date for the filings in Docket Nos. ER86-316-000, based on our initial review of the IOA, the proposed supplemental and transmission agreements, and the pleadings in these dockets. The Commission is not at this point satisfied that the IOA clearly resolves the effective data question in either party's favor. Further, it is conceivable that other arrangements (such as the February 18 Interim Purchase Agreement) may have provided alternative relief to Vernon. Because of the uncertainty surrounding the IOA, the proposed agreements, and the negotiations between the parties regarding the effective date, we conclude that this matter is an appropriate issue for a hearing. However, given the apparent acquiescence by the parties (without abandoning their principal claims) to an effective date coincident with acceptance for filing by the Commission, we shall assign as an effective date, the date of this order, subject to refund, and to resolution of this matter at hearing.

Our review of the company's filings in Docket No. ER86-316-000 and the pleadings indicates that the submittals have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory or perferential, or otherwise unlawful. Accordingly, we shall accept the submittals for filing and we shall suspend as ordered below.

In West Texas Utilities Co., 18 FERC ¶ 61,189 (1982), we explained that where our preliminary examination indicates that the proposed rates may be unjust and unreasonable, but may not be substantially excessive, as defined in *West Texas*, we would generally impose a nominal suspension. Here, our examination suggests that the proposed rates in Docket No. ER86-316-000 may not yield substantially excessive revenues. Further, the customer desires to have the integration arrangement in effect at the earliest possible date. Therefore, we shall impose a nominal suspension and grant waiver of the notice requirements. SCE's submittal in Docket No. ER86-316-000 will be suspended it to become effective as of the date of this order, subject to refund and to final resolution of the issue of an effective date following an evidentiary hearing. As suggested by SCE, this order has no effect on the company's ability to seek to terminate or cancel its rate schedules, in accordance with section 205 of the FPA and the Commission's regulations.

The Commission orders

(A) Vernon's requests for summary judgment are hereby denied without prejudice.

(B) Vernon's request for a declaratory order with respect to an effective date for integration of its PVNGS interest in SCE's system is hereby denied without prejudice.

(C) SCE's request for waiver of the notice requirements is hereby granted.

(D) SCE's submittals in Docket No. ER86-316-000 are hereby accepted for filing and suspended to become effective, subject to refund and to final determination of an effective date, on the date of this order.

(E) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections 205 and 206 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act (18 CFR Chapter I), a public hearing shall be held concerning the justness and reasonableness of SCE's rates and the effective date for SCE's rate schedules.

(F) Docket Nos. ER86-316-000 and EL86-21-000 are hereby terminated. The evidentiary proceedings established herein are designated as Docket Nos. ER86-316-001 and EL86-21-001 and the latter dockets are consolidated for purposes of hearing and decision.

(G) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conference in this proceeding within approximately fifteen (15) days of the date of this order, in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. Such conference shall be held for purposes of establishing a procedural schedule, including the submission of a case-in-chief by Edison. The presiding judge is authorized to establish procedural dates and to rule on all motions (except motions to dismiss) as provided in the Commission's Rules of Practice and Procedure.

(H) The Secretary shall promptly publish this order in the Federal Register.

By the Commission.

Kenneth F. Plumb,

Secretary.

[1] transmission agreements pursuant to the IOA. Vernon subsequently stated, however, that the complaint portion of its pleading need not be resolved at this time in light of SCE's submission of these documents for filing in Docket No. ER86-316-000.

[1] 51 FR 6302 (a986)

[Docket No. GP86-26-000]

Sunshine Mining Co.; Petition for Declaratory Order

Issued: April 24, 1986.

On April 11, 1986, Sunshine Mining Company (Sunshine) filed a petition for declaratory order pursuant to Rule 207 of the Rules of Practice and Procedure of the Federal Energy Regulatory Commission (Commission), 18 CFR 385.207 (1985), requesting that the Commission determine and declare that for purposes of Section 12 of the Natural Gas Act (NGA), 15 U.S.C. 717k (1982), (i) Sunshine is not a "natural gas company;" (ii) a director of Sunshine, who in fact is not a director of Woods Petroleum Corporation (Woods), will not be deemed to be a director or officer of Woods; and (iii) a director of Sunshine who in fact is not a director of Woods, will not be deemed to be a director or officer of Woods Petroleum Partners (WPP) or Woods Petroleum Operating Partners (WPOP).

In its petition, Sunshine states it is a corporation primarily engaged in the business of mining, refining and marketing precious metals. Sunshine also owns all of the outstanding common stock of four subsidiary corporations that sell or market natural gas in interstate commerce. Sunshine recognizes that these subsidiary corporations are natural gas companies within the meaning of section 2(b) of the NGA. 15 U.S.C. 717a(b) (1982).

Sunshine proposes to combine the oil and gas properties owned by these four subsidiaries into a limited partnership through an offering to exchange units of the limited partnership interests for these oil and gas properties. However, Sunshine states that this limited partnership, WPP, will not own the properties or make any sales of natural gas. Rather, all of the oil and gas properties will be owned, and the business will be conducted, by a second limited partnership, WPOP, of which the initial limited partnership will be the sole limited partner. Sunshine and Woods will be general partners of these two limited partnerships, owning 0.01 percent and 0.99 percent interest in each partnership, respectively. Sunshine notes in its petition that it will have no management powers in either of these limited partnerships. Rather, Woods will be the managing general partner for these two limited partnerships.

According to Sunshine, three national investment banking firms will be retained to provide financial advice and to manage the solicitation of the initial offering for these limited partnerships. Sunshine notes in its petition that one of its directors is an officer for one of these investment banking firms. Sunshine expects this director's investment banking firm may be involved in the future to render services in the offerings of various securities in which Sunshine may be involved either as an acting issuer, as parent to one of its natural gas company subsidiaries acting as issuer, or as non-managing general partner to the limited partnerships acting as issuer.

Therefore, concerned with the absence of applicable judicial and Commission precedent on section 12 of the NGA, Sunshine requests the Commission to declare that present and future securities offerings which may involve Sunshine, or certain of its affiliates, will not result in a violation of section 12 of the NGA by Sunshine's director.

Any person desiring to be heard or to protest this petition should file a motion to intervene or protest in accordance with Rules 214 or 211 of the Commission's Rules of Practice and Procedure. All motions to intervene or protests should be submitted to the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, not later than 30 days following publication of this notice in the Federal Register. All protests will be considered by the Commission but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene in accordance with Rule 214. Copies of the petition filed in this proceeding are on file with the Commission and available for public inspection.

Kenneth F. Plumb,

Secretary.

Transwestern Pipeline Co.; et al.; Notice

April 24, 1986.

Take notice that on April 8, 1986, Exxon Corporation (Exxon), Pennzoil Company and Pennzoil Producing Company (Pennzoil) and Mobil Oil Corporation, Mobil Producing Texas & New Mexico, Inc. and the Superior Oil

VOL 51 ISS 83 APR 30 1986 UMI

Company (collectively Mobil), filed with the presiding judge motions to appeal the presiding judge's ruling of March 24, 1986, denying them late intervention in this proceeding. Pennzoil also filed on the same date an exception and brief on exception to the judge's ruling. The judge issued his order denying late intervention simultaneously with an order certifying to the Commission an offer of settlement of Transwestern Peipline Company (Transwestern).

With the certification of the settlement, the judge transferred to the Commission jurisdiction over the proceeding. Accordingly, the Commission will treat the foregoing April 8, 1986, motions to appeal, which were addressed to the judge, and Pennzoil's brief on exception, as motions to the Commission for reconsideration of the judge's order denying late intervention. Any party wishing to respond to the April 8, 1986, motions will have until May 9, 1986, to do so.

Kenneth F. Plumb,

Secretary.

[FR Doc 86-9697 Filed 4-29-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP83-75-002, et al.]

Natural Gas Certificate Filings; Consolidated System LNG Co., et al.

Take notice that the following filings have been made with the Commission:

1. Consolidated System LNG Company

[Docket No. CP83-755-002]

April 23, 1986.

Take notice that on April 10, 1986, Consolidated System LNG Company (Consolidated LNG), 445 West Main Street, Clarksburg, West Virginia 26301, filed in Docket No. CP83-75-002, pursuant to section 7(b) of the Natural Gas Act of 1938, its second amendment to its application for an order permitting and approving the abandonment of facilities and services filed in Docket No. CP83-75-000, all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

By its application filed in Docket No. CP83-75-000, Consolidated LNG seeks permission and approval to abandon certain facilities and services appurtenant to the liquefied natural gas (LNG) facilities at Cove Point, Maryland. By its first amendatory application filed in Docket No. CP83-75-001 on November 1, 1985, Consolidated LNG deleted from its application its wholly-owned pipeline for transportation of regasified LNG from Loudoun, Virginia, to Perulack, Pennsylvania, known as Line No. PL-1 and related facilities. By this second amendment, Consolidated LNG proposes to delete from its application, its undivided one-half interest in the Loudoun measuring station, located in Loudoun County, Virginia.

The amendment states that Consolidated Gas Transmission Corporation (Consolidated Transmission), an affiliate of Consolidated LNG, has found a use to which these facilities can be put, and, therefore, their abandonment no longer appears to be necessary. The amendatory application states that Consolidated Transmission proposes to utilize the Loudoun measuring station in connection with its proposal in the pending proceeding in Docket No. CP85-756-000 to render sales and transportation services for Baltimore Gas & Electric Company (Baltimore) and Washington Gas Light Company (Washington). The amendment states that Consolidated LNG's share of the Loudoun measuring station had a net book value of $906,928.39 as of December 31, 1985. The amendment further states that in the near future, Consolidated LNG and Consolidated Transmission would file an amendment to their joint application in Docket No. CP86-208-000 for authorization to transfer Consolidated LNG's undivided one-half interest in the Loudoun measuring station to Consolidated Transmission, and Consolidated Transmission would file an amendment to its application in Docket No. CP85-756-000 for authorization, *inter alia*, to operate the facilities in connection with its proposal to serve Baltimore and Washington.

Comment date: May 16, 1986, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

2. Great Lakes Gas Transmission Company

[Docket No. CP86-422-000]

April 21, 1986.

Take notice that on April 8, 1986, Great Lakes Gas Transmission Company (Applicant), 2100 Buhl Building, Detroit, Michigan 48226, filed in Docket No. CP86-422-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing natural gas transportation services for TransCanada PipeLines Limited (TransCanada), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to modify its existing amended gas transportation contract with TransCanada, dated September 12, 1967. Applicant states that the total contract quantity would be increased from a currently authorized 825,000 Mcf of natural gas per day to 887,500 Mcf per day. It is explained that the additional 62,500 Mcf per day would be received near Emerson, Manitoba, and would be delivered by Applicant to TransCanada at an interconnection located near St. Clair, Michigan. Applicant states that the rate would be the effective T-4 contract rate that was filed on February 28, 1986, in Docket No. RP86-35-002. Applicant also states that no new facilities would be required.

Comment date: May 14, 1986, in accordance with Standard Paragraph F at the end of this notice.

3. Northern Natural Gas Company Division of InterNorth, Inc.

[Docket No. CP86-416-000]

April 23, 1986

Take notice that on April 3, 1986, Northern Natural Gas Company, Division of InterNorth, Inc. (Applicant), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP86-416-000, an application pursuant to section 7(c) of the Natural Gas Act, for a certificate of public convenience and necessity authorizing the transportation of natural gas on an interruptible basis for HNG/Inter North Gas Marketing, Inc. (HIGMI), as agent for various purchasers (purchasers), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to transport natural gas for HIGMI, as agent for purchasers, under the terms of a March 24, 1986 gas transportation agreement produced form Eugene Island (EI) Block 372, offshore Louisiana. Applicant states that HIGMI, as agent for purchasers, has contracted to purchase 65 percent of the reserves attributable to EI Block 372, offshore Louisiana, from Cotton Petroleum, Zapata Exploration Company, and Pennzoil Producing Company. Said reserves are subject to drainage from adjacent blocks which are currently producing, it is stated.

Applicant proposes to accept and transport on a best-efforts basis 30,000 Mcf per day for HIGMI, as agent for purchasers. Applicant states that it would receive the gas in EI Block 372 and redeliver such gas to Texas Eastern Transmission Corporation and/or Columbia Gulf Transmission Company in EI Block 342. Applicant states that it would charge HIGMI, as agent for purchasers, 8.71 cents per Mcf received in EI Block 372 for the proposed transportation service. This rate, it is stated, is consistent with the Gulf Coast transportation methodology in Applicant's pending Section 4 rate proceeding in Docket No. RP85-206-000. Applicant states that it would ultimately charge the initial transportation rates approved by the Commission in Docket No. RP85-206-000.

Comment date: May 16, 1986, in accordance with Standard Paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-9643 Filed 4-29-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. QF86-661-000, et al.]

Small Power Production and Cogeneration Facilities; Qualifying Status, Certificate Applications, etc.; Ormesa Geothermal II, et al.

Comment date: Thirty days from publication in the **Federal Register**, in accordance with Standard Paragraph E at the end of this notice.

April 24, 1986.

Take notice that the following filings have been made with the Commission.

1. Ormesa Geothermal II

[Docket No. QF86-661-000]

On April 17, 1986, Ormesa Geothermal II (Applicant), of 500 Dermody Way, Sparks, Nevada 89431, submitted for filing an application for certification of a facility as a qualfying small power production facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The facility will be located at East Mesa KGRA, Imperial County, California. The primary energy source will be geothermal resources. The net electric power production capacity will be 15 megawatts.

2. Johnson Cogeneration, Inc.

[Docket No. QF86-674-000]

On April 10, 1986, A. Johnson Cogeneration, Inc. (Applicant), of 110 East 59th Street, New York, New York 10022, submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located at or adjacent to the Newington Terminal of C. H. Sprague & Son Co. at Newington, New Hampshire. The facility will consist of either a fluidized bed combustor or stoker-fired boilers, and an extraction steam turbine-generator. The extracted steam will be used for petroleum process application at the Newington Terminal of C. H. Sprague & Son Co. The net electric power production capacity of the facility will be 31.5 MW. The primary energy source will be coal. The installation of the facility will commence in 1987.

3. Mobil Joliet Refining Corporation

[Docket No. QF86-662-000]

On April 18, 1986, Mobil Joliet Refining Corporation (Applicant), of P.O. Box 874 Joliet, Illinois 60434 submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The bottoming cycle cogeneration facility will be located at the Joliet Refinery, Route 55 and Arsenal Road, Joliet, Illinois. The facility consists of an expander turbine and motor/generator to operate in tandem with the existing Fluidized Catalytic Cracker (FCC) unit's air blower and steam turbine. The expander turbine will drive the air blower in place of the steam turbine reducing refinery steam and fuel usage. The motor/generator will utilize horsepower in excess of air blower requirements to produce electricity. The maximum power production capacity of expander turbine motor/generator is 11,190 kW. The primary energy source of the cogeneration facility will be waste pressure from the FCC unit. The facility is scheduled for operation in June 1986.

4. Pyropower Corporation and General Electric Company

[Docket No. QF86-664-000]

On April 1, 1986, Pyropower Corporation and General Electric Company (Applicant), of 5120 Shoreham Place, San Diego, California 92122 and 1 River Road, Schenectady, New York 12345 respectively, submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located in Santa Maria, California. The facility will consist of a circulating atmospheric fluidized bed boiler and a multi-extraction steam turbine generating unit. Extraction steam produced by the facility will be used at the Unocal refinery to meet the steam requirement of its two diethanolamine stripper reboilers. The primary energy source of the facility will be petroleum coke. The net electric power production capacity will be 49.9 MW. The installation of the facility will begin in late 1986.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protect with the Federal Energy Regulatory Commission, 825 North Capitol Street NW., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment period. Protests will be

VOL 51 ISS 83 AP 30 1986 UMI

considered by the Commission in determining the appropriate action to be take, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

ENVIRONMENTAL PROTECTION AGENCY

[PF-466; FRL-3009-2]

Pesticide Tolerance Petitions; Ciba Geigy Corp. et al.

AGENCY: Environmental Protection Agency (EPA).
ACTION: Notice.

SUMMARY: EPA has received pesticide, feed, and food additive petitions relating to the establishment and/or amendment of tolerances for certain pesticide chemicals in or on certain agricultural commodities.

ADDRESS: By mail, submit comments identified by the document control number [PF-466] and the petition number, attention Product Manager (PM-21), at the following address:
Information Services Section (TS-757C), Program Management and Support Division, Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.
In person, bring comments to:
Information Services Section (TS-757C), Environmental Protection Agency, Rm. 236, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments filed in response to this notice will be available for public inspection in the Information Services Section office at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT:
By mail: Henry Jacoby, (PM-21), Registration Division (TS-767C), Environmental Protection Agency, Office of Pesticide Programs, 401 M St., SW., Washington, DC 20460.
Office location and telephone number: Room 229, CM#2, 1921 Jefferson Davis Hwy., Arlington, VA 22202, (703-557-1900).

SUPPLEMENTARY INFORMATION: EPA has received pesticide (PP), feed, and food additive petitions (FAP), relating to the establishment and/or amendment of tolerances for certain pesticide chemicals in or on certain agricultural commodities.

I. Initial filings

1. *PP 6F3387.* Ciba Geigy Corp., P.O. Box 18300, Greensboro, NC 27419. Proposes amending 40 CFR 180.408 by establishing tolerances for the combined residues of the fungicide metalaxyl [*N*-(2,6-dimethylphenyl)-*N*-(methoxyacetyl) alanine methyl ester], and its metabolites containing the 2,6-dimethylaniline moiety and *N*-(2-hydroxymethyl-6-methylphenyl)-*N*-(methoxyacetyl) alanine methyl ester each expressed as metalaxyl in or on the following raw agricultural commodities, fruiting vegetables (except cucurbits) at 1.0 part per million (ppm), sugar beets at 0.1 ppm, and sugar beets tops at 0.1 ppm. The proposed analytical method for determining residues is gas chromatography using an alkali flame ionization detector in the nitrogen-specific mode.

2. *FAP 6H5499.* Ciba Geigy Corp. Proposes amending 21 CFR 193.277 (food) and 561.273 (feed) by establishing regulations permitting residues of metalaxyl in or on the commodity tomato pomace (dry) at 20.0 ppm.

II. Amended Petition

PP 5F3250. EPA issued a notice, published in the Federal Register of May 24, 1985 (50 FR 21502), which announced that Janssen Pharmaceuticals P.O. Box 344, Bear Tavern Road, Washington Crossing, NJ 08560, proposed amending 40 CFR 180.413 by establishing tolerances for the combined residues of the fungicide imazalil (1-[2-[2,4-dichlorophenyl)-2-(2-propenyloxy)ethy]-1*H*-imidazole and its metabolite 1-(2,4-dichlorophenyl)-2-(1*H*-imidazole-lyl)-1-ethanol in or on commodities barley (forage), and wheat (forage) at 2.0 ppm.

Janssen Pharmaceuticals has amended the petition by decreasing the tolerance level on barley and wheat forage from 2.0 to 0.5 ppm and by adding barley and wheat hay and straw at 0.5 ppm.

The proposed analytical method for determining residues is gas liquid chromatograpy.

Authority: 21 U.S.C. 346a and 348.

Dated: April 18, 1986.

Douglas D. Campt,
Director, Registration Division, Office of Pesticide Programs.

Pesticide Program; Life Systems, Inc.; Transfer of Data

AGENCY: Environmental Protection Agency, (EPA).
ACTION: Notice.

SUMMARY: This is a notice to certain persons who have submitted information to EPA in connection with pesticide information requirements imposed under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Federal Food, Drug, and Cosmetic Act (FFDCA). Life Systems, Inc. has been awarded a contract to perform work for the EPA Office of Toxic Substances, and will be provided access to certain information submitted to EPA under FIFRA and the FFDCA. Some of this information may have been claimed to be confidential business information (CBI) by submitters. This information will be transfered to Life Systems, Inc. consistent with the requirements of 40 CFR 2.307(h) and 40 CFR 2.308(h)(2) respectively. This action will enable Life Systems, Inc. to fulfill the obligations of the contract and serves to notify affected persons.

DATE: Life Systems, Inc. will be given access to this information no sooner than May 5, 1986.

FOR FURTHER INFORMATION CONTACT:
By mail: William C. Grosse, Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.
Office location and telephone number: Rm. 222, CM#2, 1921 Jefferson Davis Highway, Arlington, VA, (703-557-2613).

SUPPLEMENTARY INFORMATION: Under Contract No. 68-02-4228, Life Systems, Inc., 24755 Highpoint Road, Cleveland, OH 44122, will provide technical support to EPA's Office of Toxic Substances by performing ground water vulnerability assessments, peer review reports and provide expert advice concerning ground water vulnerability and ground water contamination potential of specific chemicals. Chemicals currently identified for review by the contractor are alachlor, aldicarb, carbofuran, cyanazine, and metribuzin. This contract involves no subcontractors.

The Office of Toxic Substances and the Office of Pesticide Programs have jointly determined that the contract herein described involves work that is being conducted in connection with FIFRA, in that pesticide chemicals will be the subject of certain evaluations to be made under this contract. These evaluations may be used in subsequent regulatory decisions under FIFRA.

Some of this information may be entitled to confidential treatment. The information has been submitted to EPA under sections 3, 6, and 7 of FIFRA and obtained under sections 408 and 409 of the FFDCA.

In accordance with the requirements of 40 CFR 2.307(h)(2), the contract with Life Systems, Inc. prohibits use of the information for any purpose other than purpose(s) specified in the contract; prohibits disclosure of the information in any form to a third party without prior written approval from the Agency or affected business; and requires that each official and employee of the contractor sign an agreement to protect the information from unauthorized release. In addition, Life Systems, Inc. is required to submit for EPA approval a security plan under which any CBI will be secured and protected against unauthorized release or compromise. No information will be provided to this contractor until the above requirements have been fully satisfied. Records of information provided to this contractor will be maintained by the Project Officer for this contract in the EPA Office of Toxic Substances. All information supplied to Life Systems, Inc. by EPA for use in connection with this contract will be returned to EPA when Life Systems, Inc. has completed its work.

Dated: April 14, 1986.

Susan H. Sherman,
Acting Director, Office of Pesticide Programs.

Water Quality Criteria; Extension of Public Comment Period

AGENCY: Environmental Protection Agency.
ACTION: Extension of public comment period.

SUMMARY: In the Federal Register of March 11, 1986 (51 FR 8361), the Environmental Protection Agency (EPA) announced the availability for public comment of water quality criteria for aluminum, chloropyrifos, nickel, and pentachlorophenol and asked that public comments be submitted by May 12, 1986. Because of the amount of data to be reviewed and the complexity of the subject, EPA determined that additional time should be allowed for public comment.

DATE: The deadline for submitting written public comments is hereby extended to June 11, 1986.

FOR FURTHER INFORMATION CONTACT:

FEDERAL COMMUNICATIONS COMMISSION

Applications for Consolidated Hearing; Northampton Media Associates et al.

1. The Commission has before it the following mutually exclusive applications for a new FM station:

Applicant, city and State	File No.	MM Docket No.
A. Kenneth R. Carberry et al, d/b/a Northampton Media Associates; Northampton, MA.	BPH-831216AJ	86-120.
B. Joseph John Jarjoura, d/b/a Northeast Communications; Northampton, MA.	BPH-840419IA	
C. Nassbeck Broadcasting Company, Inc.; Northampton, MA.	BPH-840516IA	
D. Cutler Broadcasting, Inc.; Northampton, MA.	BPH-840516ID	

2. Pursuant to section 309(e) of the Communications Act of 1934, as amended, the above applications have been designated for hearing in a consolidated proceeding upon issues whose headings are set forth below. The text of each of these issues has been standardized and is set forth in its entirety in a sample standardized Hearing Designation Order (HDO) which can be found at 48 FR 22426, May 18, 1983. The issue headings shown below correspond to issue headings contained in the referenced sample HDO. The letter shown before each applicant's name, above, is used below to signify whether the issue in question applies to that particular applicant.

Issue Heading and Applicant(s)

1. Air Hazard, B
2. Comparative, A, B, C, D
3. Ultimate, A, B, C, D

3. If there is any non-standardized issue(s) in this proceeding, the full text of the issue and the applicant(s) to which it applies are set forth in an Appendix to this Notice. A copy of the complete HDO in this proceeding may be obtained, by written or telephone request, from the Mass Media Bureau's Contact Representative, Room 242, 1919 M Street, NW., Washington, D.C. 20554. Telephone (202) 632-6334.

BILLING CODE 6712-01-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA-763-DR]

Major Disaster and Related Determinations; Texas

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of Texas (FEMA-763-DR), dated April 23, 1986, and related determinations.

DATED: April 23, 1986.

FOR FURTHER INFORMATION CONTACT: Sewall H.E. Johnson, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, DC 20472, (202) 646-3616.

Notice is hereby given that, in a letter of April 23, 1986, the President declared a major disaster under the authority of the Disaster Relief Act of 1974, as amended (42 U.S.C. 5121 *et seq.*, Pub. L. 93-288), as follows:

I have determined that the damage in certain areas of the State of Texas resulting from severe storms and tornadoes, on April 19, 1986, is of sufficient severity and magnitude to warrant a major disaster declaration under Public Law 93-288. I therefore declare that such a major disaster exists in the State of Texas.

You are authorized to provide Individual Assistance in the affected areas. In order to provide Federal assistance, you are hereby authorized to allocate, from funds available for these purposes, such amounts as you find necessary for Federal disaster assistance and administrative expenses.

The time period prescribed for the implementation of section 313(a), priority to certain applications for public facility and public housing assistance, shall be for a period not to exceed six months after the date of this declaration.

Notice is hereby given that, pursuant to the authority vested in the Director of the Federal Emergency Management Agency under Executive Order 12148, I hereby appoint Mr. Robert D. Broussard of the Federal Emergency Management Agency to act as the Federal Coordinating Officer for this declared disaster.

I do hereby determine the following area of the State of Texas to have been affected adversely by this declared major disaster and is designated eligible as follows:

Nolan County for Individual Assistance only.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance.)

Julius W. Becton, Jr.,

Director, Federal Emergency Management Agency.

BILLING CODE 6717-01-M

FEDERAL HOME LOAN BANK BOARD

[86-425]

Financial Data Reporting System; Agency Information Collection Activities Under OMB Review

Dated: April 24, 1986.

AGENCY: Federal Home Loan Bank Board.

ACTION: Notice.

SUMMARY: The public is advised that the Federal Home Loan Bank Board ("Bank Board" or "Board") has requested Office of Management and Budget approval, pursuant to CFR 1320.12 pertaining to clearance of information requests, of the following changes in the financial reporting requirements for institutions whose accounts are insured by the Federal Saving and Loan Insurance Corporation ("insured institutions"):

(a) Discontinuation of both the Universal Monthly Financial Report, FHLBB Form 1337 and the Sample Monthly Financial Survey, FHLBB Form 1312B after their use to report September 1986 data.

(b) Redesignation of the "Quarterly Financial Report" as the "Thrift Financial Report" containing Sections A, B, C, D, E, F, G, H, I and K corresponding to the same Sections in the present Quarterly Financial Report.

(c) Submission of Thrift Financial Report Sections A through F on a Monthly basis rather than a quarterly basis beginning with data for the month of October 1986. Sections A through F shall be submitted 15 days following the end of the reporting month to the Federal Home Loan Banks.

(d) Minor revisions to Sections A through F to incorporate data items previously contained on either the to-be-discontinued Universal Monthly Financial Report or Sample Monthly Financial Survey.

(e) Continued collection of Sections G, H and K on the same quarterly basis, and section I on the same annual basis as at present. These Sections shall also be submitted 15 days following the end of the reporting month.

Comment: Comments on this information collection request are welcome and must be submitted on or before May 30, 1986. Comments regarding the paperwork-burden aspects of the request should be directed to: Office of Management and Budget, Office of Information and Regulatory Affairs, Washington, DC 20503, Attention: Desk Officer for the Federal Home Loan Bank Board.

The Bank Board would appreciate commenters sending copies of their comments to the Board.

Requests for copies of the proposed information collection request and supporting documentation are obtainable at the Board address given below: Director, Information Services Section, Office of Secretariat, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, DC 20552, Phone: 202-377-6933.

FOR FURTHER INFORMATION CONTACT: Parker Jayne, Assistant Deputy Director, Office of Examinations and Supervision (202-377-6486); or Richard C. Pickering, Deputy Director, Office of Policy and Economic Research (202-377-6770), Federal Home Loan Bank Board, at the above address.

SUPPLEMENTARY INFORMATION: In October 1983, the Federal Home Loan Bank Board modified its financial reporting requirements to provide for detailed financial reporting by insured institutions quarterly rather than semiannually. Coincidentally, the Board indicated its intention to eliminate universe (i.e., reporting by all institutions in the industry) monthly financial reporting by insured institutions but to retain sample surveys.

In November 1984 (Resolution Number 84-660), the Board indicated the need to retain universal monthly reporting by all insured institutions because of the rapid pace of deterioration in financial condition which could be experienced by individual insured thrifts during the three-month period between quarterly reports. At the same time, the Board acknowledged the need to minimize reporting burden on the industry. The Board consequently adopted a new abbreviated Universal Monthly Financial Report form in August 1985 for reporting of July 1985 data.

Subsequent experience has confirmed the key role of monthly financial reporting in the early detection of emerging problem conditions in thrifts. The Board has determined, however, that the current abbreviated Monthly Report does not collect sufficient information to permit adequate monthly monitoring of the financial condition of insured members.

In addition, the Board has become concerned with data reported in error on the Monthly Report as determined by comparisons with reported Quarterly Report data. Correcting these errors have required significant staff effort on the part of the Federal Home Loan Banks, the Federal Home Loan Bank Board and individual institutions.

To address these problems, the Board has decided to discontinue use of the current Universal Monthly Financial Report after reporting of September 1986 data and to begin collecting on a monthly basis Sections A through F of the current Quarterly Report beginning with reporting of October 1986 data. The current Sample Monthly Financial Survey will also be discontinued. Certain data items from this survey and from the current universe monthly report will be incorporated in Section F. (Before implementation in October 1986, other changes to Sections A through F may be required to reflect changes in regulations adopted during that time.)

Under the Board's plan, the Board will redesignate the Quarterly Financial Report as the Thrift Financial Report which will contain Sections A, B, C, D, E, F, G, H, I, and K (corresponding to the same sections of the present Quarterly Financial Report). All institutions will report Sections A through F 15 days following the close of the reporting month. Sections D, E and F will contain income and expense data and activity data each month for the reporting month only (i.e., not for a cumulative period).

As at present, all institutions will report Sections G, H and K quarterly with respect to the quarters ending in March, June, September and December. Similarly, all institutions will report Section I on an annual basis for the calendar year. These Sections will also be reported to the Federal Home Loan Banks 15 days following the close of the reporting period.

These new reporting requirements will not affect or change the type of institution-specific information which is now released under the Freedom of Information Act. Only the type of information which is currently releasable will continue to be releasable using 3-month aggregations where necessary to produce quarterly data. Data which is not releasable will continue to include institution-specific monthly data and institution-specific data for non-quarter end months.

As a result of these changes, thrifts will have one monthly reporting system, rather than overlapping monthly and quarterly systems, for reporting statements of condition, operations and activity data to the Board. This will eliminate duplicative reporting of the same data in different formats and the possibility of inconsistent reporting on two different reports. In particular, institutions will not be required to subtotal detail information prior to submission.

As an alternative, the Board considered adopting an expanded monthly form while at the same time retaining the current Quarterly Financial Report. The Board rejected this option because it did not reduce the potential for inconsistent reporting as exists under the current system of overlapping monthly and quarterly reports. The Board also felt that the extra burden of reporting Sections A through F on a monthly basis was less than the burden associated with creating and maintaining a new, expanded separate monthly report so long as data items in the monthly report must equate to specific data items in a quarterly report.

By the Federal Home Loan Bank Board.

Jeff Sconyers,

Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Formations of; Acquisition by; and Mergers of Bank Holding Companies; Bellwood Bancorp., Inc., et al.

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than May 22, 1986.

A. Federal Reserve Bank of Chicago (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Bellwood Bancorporation, Inc.*, Bellwood, Illinois; to acquire 60 percent or more of the voting shares of First National Bank of Wheaton, Wheaton, Illinois.

2. *The First State Bank of Thornton, Iowa Employee's Stock Ownership Plan and Trust.* Thornton, Iowa; to become a bank holding company by acquiring 51 percent of the voting shares of Thornton Bancshares, Inc., Thornton, Iowa, and thereby indirectly acquire The First State Bank of Thornton, Iowa, Thornton, Iowa.

3. *Ogle County Bancshares, Inc.*, Rochelle, Illinois; to acquire 10 percent of the voting shares of Leland National Bancorp, Inc., Leland Illinois.

4. *Summcorp*, Fort Wayne, Indiana; to acquire 100 percent of the voting shares of the successor by merger of Kendallville Bank & Trust Co., Kendallville, Indiana.

B. Federal Reserve Bank of St. Louis (Delmer P. Weisz, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

VOL 51 ISS 83 AP 30 1986 UMI

1. *Citizens Fidelity Corporation*, Louisville, Kentucky; to acquire 100 percent of the voting shares of the successor by merger of Madison National Bank of Richmond, Richmond, Kentucky.

C. **Federal Reserve Bank of Minneapolis** (Bruce J. Hedblom, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Dakota Bankshares, Inc.*, Fargo, North Dakota; to acquire 28.32 percent of the voting shares of Bankers Financial Corporation, Drake, North Dakota, thereby indirectly acquiring First Bank in Drake, Drake, North Dakota.

D. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Garden Plain Bancshares, Inc.*, Garden Plain, Kansas; to become a bank holding company by acquiring 80 percent or more of the voting shares of Garden Plain State Bank, Garden Plain, Kansas.

2. *Madison Bancshares, Inc.*, Madison, Nebraska; to become a bank holding company by acquiring 94 percent of the voting shares of The Bank of Madison, Madison, Nebraska.

E. **Federal Reserve Bank of Dallas** (Anthony J. Montelaro, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *Extraco Bankshares, Inc.*, Temple, Texas; to acquire 100 percent of the voting shares of Texana Bank, N.A., Waco, Texas.

2. *Southwest Bankers, Inc.*, San Antonio, Texas; to acquire 80 percent of the voting shares of Bank of San Antonio/Medical Center, San Antonio, Texas.

Board of Governors of the Federal Reserve System, April 25, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Applications of Company Engaged in Permissible Nonbanking Activities; Dakota Bancshares, Inc.

The organization listed in this notice has applied under § 225.23(a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23(a)(2) or (f) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Govenors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than May 16, 1986.

A. **Federal Reserve Bank of Minneapolis** (Bruce J. Hedblom, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Dakota Bankshares, Inc.*, Fargo, North Dakota; to acquire Dakota First Trust Company, Fargo, North Dakota, and thereby engage in activities that may be performed by a trust company pursuant to § 225.25(b)(3) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, April 25, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Applications To Engage de Novo in Permissible Nonbanking Activities; Fleet Financial Group, Inc., et al.

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than May 20, 1986.

A. **Federal Reserve Bank of Boston** (Robert M. Brady, Vice President) 600 Atlantic Avenue, Boston, Massachusetts 02106:

1. *Fleet Financial Group, Inc.*, Providence, Rhode Island; to engage *de novo* through its subsidiary Consumer Life Insurance Company, Atlanta, Georgia, in underwriting, as a reinsurer, of credit life and credit accident and health insurance that is directly related to extensions of credit by Fleet Financial Group, Inc., or its subsidiaries, pursuant to § 225.25(b)(9) of the Board's Regulation Y. These activities will be conducted in Alabama, Colorado, Illinois, Indiana, Michigan, Minnesota, Missouri, Ohio, Oklahoma, Utah, and Wisonsin.

B. **Federal Reserve Bank of Chicago** (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Keystone Bancshares, Inc.*, Monona, Iowa; to engage directly in lending activities for the purpose of purchasing loans from its subsidiary, Peoples State Bank, Elkader, Iowa, and its affiliate Union State Bank of Monona, Iowa, and its correspondent banks, National Bank of Waterloo, Waterloo, Iowa and National Bank of Minneapolis, Minnesota. These loans will be farm loans, commercial loans and real estate loans.

C. **Federal Reserve Bank of San Francisco** (Harry W. Green, Vice President) 101 Market Street, San Francisco, California 94105:

1. *Zions Utah Bancorporation*, Salt Lake City, Utah; to engage *de novo* through its subsidary Zions Mortgage Company, Salt Lake City, Utah, in mortgage banking activities, pursuant to § 225.25(b)(1) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, April 25, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Alcohol, Drug Abuse, and Mental Health Administration

Research Grants on Alcohol and Immunology Including Acquired Immunodeficiency Syndrome (AIDS)

AGENCY: National Institute on Alcohol Abuse and Alcoholism, HHS.

ACTION: Issuance of a Special Program Announcement for Research Grants on Alcohol and Immunology including Acquired Immunodeficiency Syndrome (AIDS).

SUMMARY: The National Institute on Alcohol Abuse and Alcoholism (NIAAA) announces the availability of a special program announcement for Research Grants on Alcohol and Immunology including Acquired Immunodeficiency Syndrome (AIDS). These awards will be to support research grants to study the role of heavy alcohol consumption in lowering resistance to infectious diseases. Areas of research interest include epidemiology, immunology, bacteriology, nutrition, virology, and pathology as well as other relevant clinical and biomedical disciplines. In addition, studies of the relation of alcohol consumption as a potential cofactor in the development of AIDS are encouraged. Support may be requested for up to 5 years. It is anticipated that up to $1 million per year will be available to support research grants under this announcement.

Receipt Date for Applications: February 1, June 1, and October 1 of each year.

For a Copy of the Announcement, contact: The National Clearinghouse for Alcohol Information (NCALI), Box 2345, Rockville, Maryland 20852, Telephone: (301) 468-2600.

Robert L. Trachtenberg,

Acting Administrator, Alcohol, Drug Abuse, and Mental Health Administration.

Determination of Regulatory Review Period for Purposes of Patent Extension; Suprol

Correction

In the document concerning Suprol appearing on page 12570 in the issue of

VOL 51 ISS 83 AP 30 1986 UMI

Friday, April 11, 1986, make the following corrections:

1. In the first column, under FOR FURTHER INFORMATION CONTACT, the zip code in the last line should read "20857".

2. In the second column, in paragraph 1, "date and exemption" should read "date an exemption".

3. In the third column, the FR Document number was incorrect and should read "FR Doc. 86-8094".

BILLING CODE 1505-01-M

Health Resources and Services Administration

Redesignation of Illinois Health Service Areas 7 and 8; Settlement Agreement

AGENCY: Health Resources and Services Administration, Public Health Service, HHS.

ACTION: On July 25, 1985, a notice was published in the **Federal Register** (50 FR 30301) announcing the Secretary's decision to redesignate Illinois health service areas 7 and 8. The effective date was to have been September 13, 1985. Subsequent to that announcement, an action was filed in the U.S. District Court, District of Columbia, seeking to have the Secretary's area redesignation decision set aside. On August 30, 1985 (50 FR 35324), it was announced that in order to allow that litigation to proceed in an orderly manner, the Department had agreed to postpone the effective date until October 15, 1985. On October 18, 1985, a notice was published (50 FR 42227) announcing postponement of the effective date of the Secretary's decision to redesignate Illinois health service areas 7 and 8 until further notice, pending the outcome of the litigation.

The Department hereby announces that pursuant to a Settlement Agreement, signed February 27, 1986, between the Secretary and Suburban Cook County-DuPage County Health Systems Agency, Inc., through their respective counsel, the decision to redesignate the two Illinois health service areas has been set aside. DuPage County, Illinois, will continue to be part of Illinois Health Service Area 7, served by Suburban Cook County-DuPage County Health Systems Agency, Inc. The two health systems agencies presently serving Illinois health service areas 7 and 8 will continue to be designated Health Systems Agencies for their respective areas.

Division of Research Resources; Meeting of the Animal Resources Review Committee

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Animal Resources Review Committee, Division of Research Resources, starting at 9:00 a.m. on May 20, 1986, in Conference Room 3 and continuing to adjournment in Conference Room 4 on May 21, National Institutes of Health, Building 31, 9000 Rockville Pike, Bethesda, Maryland 20892.

The meeting will be open to the public on May 20 from 1:00 p.m. to approximately 3:00 p.m. in Conference Room 3, for a brief staff presentation on the current status of the Animal Resources Program and the selection of future meeting dates. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in section 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public from 9:00 a.m. to approximately 12:00 noon and from approximately 3:00 p.m. to 5:00 p.m. on May 20 and from 8:30 a.m. to approximately 12:00 noon on May 21 for the review, discussion, and evaluation of individual grant applications submitted to the Animal Resources Program. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mr. James Augustine, Information Officer, Division of Research Resources, National Institutes of Health, Building 31, Room 5B13, Bethesda, Maryland 20892, (301) 496-5545, will provide a summary of the meeting and a roster of the committee members upon request. Dr. Carl E. Miller, Executive Secretary of the Animal Resources Review Committee, Division of Research Resources, National Institutes of Health, Building 31, Room 5B55, Bethesda, Maryland 20892, (301) 496-5175, will furnish substantive program information upon request.

BILLING CODE 4140-01-M

National Institute of Dental Research; Meeting of the National Advisory Dental Research Council

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the National Advisory Dental Research Council, National Institute of Dental Research, on May 19-20, 1986, Conference Room 4, Building 31A, National Institutes of Health, Bethesda, Maryland. This meeting will be open to the public from 9:00 a.m. to 3:00 p.m. on May 19 for general discussion and program presentations. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, the meeting of the Council will be closed to the public on May 20 from 9:00 a.m. to adjournment for the review, discussion and evaluation of individual grant applications and individual programs and projects conducted by the NIDR Intramural Program. These discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications and Program, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

In accordance with the provisions set forth in section 552b(c)(9)(B), Title 5, U.S. Code, the Council meeting will be closed to the public from 3:00 p.m. to recess on May 19 for discussion and preparation of comments Council wishes to submit to the Director, NIH, for inclusion in the biennial report to Congress.

Dr. Marie U. Nylen, Executive Secretary, National Advisory Dental Research Council, and Director, Extramural Programs, National Institute of Dental Research, National Institutes of Health, Westwood Building, Room 503, Bethesda, Maryland 20892, (telephone 301 496-7723) will furnish roster of committee members, a summary of the meeting, and other information pertaining to the meeting.

BILLING CODE 4140-01-M

National Institute of Allergy and Infectious Diseases; Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the National Advisory Allergy and Infectious Diseases Council, National Institute of Allergy and Infectious Diseases, and its subcommittees on May 19-20, 1986, at the National Institutes of Health, Building 31C, Conference Room 10, Bethesda, Maryland 20892.

The meeting will be open to the public on May 19 from approximately 9:00 a.m. to 9:30 a.m. for opening remarks of the Institute Director and again from 1:30 p.m. to approximately 5:00 p.m. for discussion of procedural matters, Council business, and a report from the Institute Director which will include a discussion of budgetary matters. The primary program discussions will be on Tropical Medicine and International Health. On May 20 the meeting will be open to the public from approximately 8:30 a.m. to 9:30 a.m. for the reports of the Director of the Microbiology and Infectious Diseases Program and the Director of the Immunology, Allergic and Immunologic Diseases Program.

In accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code, and section 10(d) of Pub. L. 92-463, the meeting of the NAAIDC Allergy and Immunology Subcommittee and of the NAAIDC Microbiology and Infectious Diseases Subcommittee will be closed to the public for approximately three hours for the review, evaluation, and discussion of individual grant applications. It is anticipated that this will occur from 9:30 a.m. until approximately 12:30 p.m. on May 19. The meeting of the full Council will be closed from approximately 9:30 a.m. until adjournment on May 20 for the review, evaluation, and discussion of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Ms. Lynn Trible, Office of Research Reporting and Public Response, National Institute of Allergy and Infectious Diseases, Building 31, Room 7A-32, National Institutes of Health, Bethesda, Maryland 20892, telephone (301) 496-5717, will provide summaries of the meetings and rosters of the committees members.

Dr. John W. Diggs, Director, Extramural Activities Program, NIAID, NIH, Westwood Building, Room 703, telephone (301) 496-7291, will provide substantive program information.

BILLING CODE 4140-01-M

Division of Research Grants; Meetings

Pursuant to Pub. L. 92-463, notice is hereby given of the meetings of the following study sections for May through June 1986, and the individuals from whom summaries of meetings and rosters of committee members may be obtained.

These meetings will be open to the public to discuss administrative details relating to study section business for approximately one hour at the beginning of the first session of the first day of the meeting. Attendance by the public will be limited to space available. These meetings will be closed thereafter in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

The Grants Inquires Office, Division of Research Grants, Westwood Building, National Institutes of Health, Bethesda, Maryland 20892, telephone 301-496-7441 will furnish summaries of the meetings and rosters of committee members. Substantive program information may be obtained from each executive secretary whose name, room number, and telephone number are listed below each study section. Since it is necessary to schedule study section meetings months in advance, it is suggested that anyone planning to attend a meeting contract the executive secretary to confirm the exact date, time and location. All times are A.M. unless otherwise specified.

Study section	May-June 1986 meetings	Time	Location
Allergy & Immunology, Dr. Eugene Zimmerman, Rm. 320, Tel. 301-496-7380.	June 19-21	8:30	Holiday Inn, Georgetown, DC.
Bacteriology & Mycology-1, Dr. Milton Gordon, Rm. 304, Tel. 301-496-7340.	June 11-13	8:30	Holiday Inn, Georgetown, DC.
Bacteriology & Mycology-2, Dr. William Branche, Jr., Rm. 306, Tel. 301-496-7981.	June 4-6	8:30	Holiday Inn, Georgetown, DC.
Behavioral Medicine, Dr. Joan Ritterhouse, Rm. 232, Tel. 301-496-7109.	June 11-13	9:00	Holiday Inn, Georgetown, DC.
Biochemical Endocrinology, Dr. Norman Gold, Rm. 226, Tel. 301-496-7340.	June 16-18	8:30	Wellington Hotel, Washington, DC.
Biochemistry-1, Dr. Adolphus P. Toliver, Rm. 316B, Tel. 301-496-7516.	June 5-7	8:30	Linden Hill Hotel, Bethesda, MD.
Biochemistry-2, Dr. Alex Liacouras, Rm. 316A, Tel. 301-496-7516.	June 12-14	8:30	Wellington Hotel, Washington, DC.
Bio-Organic & Natural Products Chemistry, Dr. Michael Rogers, Rm. 5, Tel. 301-496-7107.	June 26-28	9:00	Holiday Inn, Georgetown, DC.
Biophysical Chemistry, Dr. John B. Wolff, Rm. 236B, Tel. 301-496-7070.	June 19-21	8:30	Room 7, Bldg. 31C, Bethesda, MD.
Bio-Psychology, Dr. A. Keith Murray, Rm. 220, Tel. 301-496-7058.	May 19-22	9:00	Ramada Inn, Bethesda, MD.
Cardiovascular & Pulmonary, Dr. Anthony C. Chung, Rm. 2A-04, Tel. 301-496-7316.	June 11-13	8:30	Linden Hill Hotel, Bethesda, MD.
Cardiovascular & Renal, Dr. Rosemary Morris, Rm. 321, Tel. 301-496-7901.	June 16-18	8:30	Holiday Inn, Georgetown, DC.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[AA-14017, AA-8889-A]

Alaska Native Claims Selection; Shumagin Corp.

In accordance with Department regulation 43 CFR 2650.7(d), notice is hereby given that a decision to issue conveyance under the provisions of Sec. 14(a) of the Alaska Native Claims Settlement Act of December 18, 1971 (ANCSA), 43 U.S.C. 1601, 1613(a), will be issued to Shumagin Corporation for approximately 3 acres. The lands involved are in the vicinity of Sand Point, Alaska, within T. 56 S., R. 73 W., Seward Meridian.

A notice of the decision will be published once in the ALEUTIAN EAGLE and once a week for four (4) consecutive weeks, in the ANCHORAGE TIMES. Copies of the decision may be obtained by contacting the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513. ((907) 271–5960).

Any party claiming a property interest which is adversely affected by the decision shall have until May 30, 1986 to file an appeal. However, parties receiving service by certified mail shall have 30 days from the date of receipt to file an appeal. Appeals must be filed in the Bureau of Land Management, Division of Conveyance Management (960), address identified above, where the requirements for filing an appeal can be obtained. Parties who do not file an appeal in accordance with the requirements of 43 CFR Part 4, Subpart E shall be deemed to have waived their rights.

Helen Burleson,

Section Chief, Branch of ANCSA Adjudication.

Proposed Issuance of Recordable Disclaimer of Interest for Lands in San Diego County, CA

Correction

In FR Doc. 86-8407 appearing on page 12932 in the issue of Wednesday, April 16, 1986, make the following correction:

In the second column, first complete paragraph, eighth line, "54°42'30"" should read "54°41'03"".

BILLING CODE 1505-01-M

Coos Bay District Advisory Council Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Meeting of Coos Bay District Advisory Council.

SUMMARY: Notice is hereby given in accordance with Pub. L. 94–579 and 43 CFR, Part 1780 that a meeting of the Coos Bay District Advisory Council will be held on Friday, June 13, 1986, beginning at 10:00 a.m. The meeting will be held in the conference room of the Coos Bay District Office, 333 South Fourth Street, Coos Bay, Ore.

Agenda

The agenda for the meeting will include:

1. Election of officers.
2. Introduction and orientation for new members.
3. BLM Oregon/Washington land exchange policy.
4. Planning for the 1990s land-use and timber-management plan process.
5. The Department of Interior's "Pride in America" program.
6. Updates on the status of old business issues including: The Coos Bay North Spit, The Coos Bay District Road Management Plan, Coos Head, New River, and the BLM/Forest Service management interchange.
7. Arrangements for the next meeting.

The meeting is open to the public and news media. Interested persons may make oral statements to the council from 1:00 p.m. to 1:30 p.m. on Friday, June 13, or file written statements for the council's consideration. Anyone wishing to make an oral statement must notify the District Manager by close of business on Monday, June 2, 1986 (Telephone 503–269–5880).

ADDRESS: Bureau of Land Management, Coos Bay District Office, 333 South Fourth Street, Coos Bay, OR 97420.

Summary minutes of the meeting will be maintained at the District Office and made available during regular business hours (7:45 a.m. to 4:30 p.m.) for public inspection or reproduction at the cost of duplication.

Dated: April 25, 1986.

Richard M. Popp,

Acting District Manager.

T. 13 N., R. 9 W.,
Secs. 10–15, 20, 22–24, 26, 27, and 35.

Containing 30,100 acres, more or less.

In exchange for these lands the United States would acquire an undetermined number of acres of equal value from the State of Arizona. The Bureau of Land Management has identified approximately 65,720 acres in the Kingman Resource Area for reconveyance by the State. These lands are located within wilderness study areas, contain significant wildlife values, and would consolidate public land ownership for easier program management.

The purpose of this Notice of Realty Action is two-fold. First, this action will provide a response of forty-five (45) days during which public comments will be accepted. Secondly, this action, as provided in 43 CFR 2201.1(b), shall segregate the public lands described herein to the extent that they will not be subject to appropriation under the public land laws, including the mining laws, but not the mineral leasing laws. This segregative effect shall terminate upon issuance of patent to such lands, upon publication in the Federal Register of a termination of the segregation, or 2 years from date of this publication, whichever occurs first.

This action is necessary to avoid the occurrence of nuisance mining claims and land use applications that could encumber the public lands while the preparation of an environmental assessment is ongoing. Upon completion of the environmental assessment and land use decision, a Notice of Realty Action shall be published specifying the land to be exchanged and any reservations of record.

SUPPLEMENTARY INFORMATION: Detailed information concerning the exchange including a list of the Federal and State lands is available for review at the Kingman Resource Area Office, 2475 Beverly Avenue, Kingman, Arizona 86401.

For a period of forty-five (45) days, interested parties may submit comments to the District Manager, Phoenix District Office, 2015 West Deer Valley Road, Phoenix, Arizona 85027.

Dated: April 21, 1986.

Marlyn V. Jones,

District Manager.

BILLING CODE 4310-32-M

[U-54841]

Salt Lake District; Realty Action Sale of Public Lands in Wasatch County, Utah

The following described land has been examined and identified as suitable for disposal under section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750, 43 U.S.C. 1713), at no less than the appraised fair market value shown:

T. 2 S., R. 4E., SLM,
Sec. 25, lot 7, containing 3.75 acres.

The appraised fair market value of this tract is $21,750.

The above described land will be sold in order to dispose of lands which because of location and other characteristics are difficult and uneconomical to manage. The sale is consistent with the Bureau's planning system and the public interest will be served by offering these lands for sale.

The lands described are hereby segregated from appropriation under the public land laws, including the mining laws, pending disposition of this action.

The above described land will be sold at 10:00 a.m. on July 9, 1986, without competitive bidding at: Salt Lake District, Bureau of Land Management, 2370 South 2300 West, Salt Lake City, Utah 84119.

The land will be sold directly to Stichting Mayflower Recreational Fonds and Stichting Mayflower Mountain Fonds. The appraised value as shown must be received by the Salt Lake District Office at the date and time shown above. Payment may be made by the principal or a duly qualified agent. Payment shall be by certified check, money order, bank draft or cashier's check made payable to the Department of the Interior, BLM.

At the date of and prior to the sale of the lands, the Stichtings shall relinquish to the United States all interest and rights to the Merling D and Merling D No. 1 unpatented mining claims, UMC numbers 219406 and 219407, respectively.

The terms and conditions applicable to the sale are:

(1) The patent will contain a reservation for ditches and canals and be subject to all valid existing rights including right-of-way U-45963 for a powerline in the name of Utah Power and Light Company.

(2) All minerals will be reserved to the United States including the right of ingress or egress for mineral development.

For a period of 45 days from the date of this notice, interested parties may submit comments to the District Manager, BLM, 2370 South 2300 West, Salt Lake City, Utah 84119. Any adverse comments will be evaluated by the District Manager who may vacate or modify this realty action and issue a final determination. In the absence of any action by the State Director, this realty action will become the final determination of the Department of the Interior.

Dated: April 24, 1986.

John H. Stephenson,

Acting District Manager.

National Park Service

Upper Delaware Citizens Advisory Council Meeting

AGENCY: National Park Service, Interior.

ACTION: Notice of Meeting.

SUMMARY: This notice sets forth the date of the forthcoming meeting of the Upper Delaware Citizens Advisory Council. Notice of this meeting is required under the Federal Advisory Committe Act.

DATE: May 23, 1986, 7:00 p.m.

Inclement weather reschedule date: June 13, 1986.*

ADDRESS: Town of Tusten Hall, Narrowsburg, New York.

FOR FURTHER INFORMATION CONTACT: John T. Hutzky, Superintendent, Upper Delaware Scenic and Recreational River, Drawer C, Narrowsburg, N.Y. 12764–0159. (717) 729–8251.

SUPPLEMENTARY INFORMATION: The Advisory Council was established under section 704(f) of the National Parks and Recreation Act of 1978, Pub. L. 95–625, 16 U.S.C. 1274 note, to encourage maximum public involvement in the development and implementation of the plans and programs authorized by the Act. The Council is to meet and report to the Delaware River Basin Commission, the Secretary of the Interior, and the Governors of New York and Pennsylvania in the preparation of a management plan and on programs which relate to land and water use in the Upper Delaware region. The agenda

*Announcements of cancellation due to inclement weather will be made by radio stations WDNH, WDLC, WSUL, and WVOS.

VOL 51 ISS 83 AP 30 1986 UMI

for the meeting will include continued review of proposed River Management Plan. The meeting will be open to the public.

Any member of the public may file with the council a written statement concerning agenda items. The statement should be addressed to the Upper Delaware Citizens Advisory Council, P.O. Box 84, Narrowsburg, N.Y. 12764. Minutes of the meeting will be available for inspection four weeks after the meeting at the permanent headquarters of the Upper Delaware Scenic and Recreational River, River Road, 1¾ miles North of Narrowsburg, N.Y., Damascus Township, Pennsylvania.

Dated: April 18, 1986.

James W. Coleman, Jr.,

Regional Director, Mid-Atlantic Region.

BILLING CODE 4310-70-M

Intention To Renovate for Commercial Use—Jacob Riis Park Bathhouse—Gateway National Recreation Area

The National Park Service is seeking interested parties to renovate and operate the Riis Park Bathhouse complex within Gateway National Recreation Area in New York City, Borough of Queens, for commercial, business, retail and/or recreational uses. The property includes 113,000 square feet within the bathhouse, a few smaller buildings, and a 9,700 car parking lot. The property is on the Atlantic Ocean at a heavily used beach and is 25 miles from midtown Manhattan.

This property may be leased under the Historic Preservation Act (Pub. L. 96-516) or operated as a concession under the Concession Policy Act (Pub. L. 89-249), depending on the nature of the offers received. In either case, historic preservation tax credits may be available. The property is on the National Register of Historic Places.

A copy of the "Request for Proposal" (RFP) may be obtained by sending a non-refundable payment of $100, payable to the National Park Service. Mail to the National Park Service, Attention: Mr. Gerald L. Kirwan, 15 State Street, Boston, Massachusetts 02109. Refer to RFP-LRD-6-001. The RFP will be released on May 15, 1986. Offers will be accepted until July 15, 1986.

Dated: April 18, 1986.

Steven H. Lewis,

Deputy Director, North Atlantic Region.

BILLING CODE 4310-70-M

Bureau of Reclamation

[Int-Doc 86-20]

Uinta Basin Unit, Colorado River Water Quality Improvement Program; Availability of Planning Report/Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, as amended, the Department of the Interior has prepared a proposed planning report/draft environmental statement on a proposed salinity-control project that would reduce salt loading to the Colorado River system by lining canals and laterals in Duchesne and Uintah Counties in northeastern Utah. Comments on the draft report must be received by the Bureau of Reclamation by the date indicated on the cover page of the document.

Public hearings will be held on June 4, 1986, at the Uinta Basin Area Vocational School, 1100 East Lagoon, Roosevelt, Utah, from 7 p.m. to 10 p.m. These hearings are designed to receive views and comments relating to the environmental impacts of the unit from interested organizations or individuals. Oral statements at the hearings will be limited to a period of 10 minutes per speaker. While speakers cannot trade their time to obtain a longer oral presentation, the person authorized to conduct the hearings may allow any speaker to provide additional oral comments after all persons wishing to comment have been heard.

Speakers will be scheduled according to their time preference, if any, as requested by letter or telephone. Speakers not present when called will lose their privilege in the scheduled order, and their names will be recalled at the end of presentations by the scheduled speakers. Requests for scheduled presentations will be accepted until 4 p.m. on June 3, 1986. Any subsequent requests will be handled on a first-come, first-served basis following the scheduled presentations at the meeting.

Organizations or individuals desiring to present statements at the hearings should contact Jay Henrie, team leader, Bureau of Reclamation, Utah Projects Office, P.O. Box 1338, Provo, Utah 84603, telephone (801) 379-1172, by letter or telephone, and announce their intention to participate. Written comments from those unable to attend and from those wishing to supplement their oral presentations at the hearings should be sent to the Regional Director, Attention UC-730, in Salt Lake City, Utah, by July 28, 1986, in order to be included in the hearing record. Copies of the planning report/draft environmental statement are available for inspection at the following locations:

Director, Office of Environmental Affairs, Bureau of Reclamation, Room 7423, Washington, D.C. 20240, Telephone: (202) 343-4991

Property and Services Branch, Technical Publications and Library Branch, Engineering and Research Center, Code 980, Denver, Colorado 80225, Telephone: (303) 236-5972

Regional Director, Bureau of Reclamation, Upper Colorado Regional Office, P.O. Box 11568, Salt Lake City, Utah 84147, Telephone: (801) 524-5580

Projects Manager Utah, Projects Office, Bureau of Reclamation, 302 East 1860 South, P.O. Box 1338, Provo, Utah 84603, Telephone: (801) 379-1000

Project Construction Engineer, Uinta Basin Construction Office, Bureau of Reclamation, P.O. Box 420, Duchesne, Utah 84021, Telephone: (801) 738-2441

Single copies of the document may be obtained by request to the addresses listed above. Copies also will be available for inspection in libraries in the project vicinity.

Dated: April 2, 1986.

C. Dale Duvall,

Commission.

BILLING CODE 4310-09-M

INTERSTATE COMMERCE COMMISSION

Section 5b Application No. 5; Section 5b Application No. 12

Railroad Interterritorial Agreement; National Railroad Freight Committee Agreement

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Decision.

SUMMARY: The National Railroad Freight Committee (NRFC) filed an agreement under 49 U.S.C. 10706(a) for the joint consideration and standardization of packaging rules, shipping rules, and commodity classification. Modifications of the agreement and the classification system itself are required before the agreement can be approved. Modifications must be made in accordance with the schedule set forth below.

DATES: An amended agreement must be filed by July 29, 1986. Comments on whether the modifications comport with this decision must be filed by August 28, 1986. Replies are due September 17, 1986. Modifications in the classification system must be completed by October 13, 1986.

ADDRESSES: An original and 10 copies should be sent to: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of any comment should be sent to applicants' representative: Norman H. Donald III, 919 Third Avenue, New York, NY 10022.

FOR FURTHER INFORMATION CONTACT:

Elaine A. Sehrt, (202) 275-7899;

or

Louis E. Gitomer, (202) 275-7245.

SUPPLEMENTARY INFORMATION: The National Railroad Freight Committee (NRFC) seeks approval of an agreement under 49 U.S.C. 10706(a) for the joint consideration and standardization of packaging rules, shipping rules, and commodity classification. Section 5b Application No. 5, *Railroad Interterritorial Agreement* is the agreement under which the Uniform Classification Committee (UCC) currently handles national packaging, shipping, and classification matters. (That agreement has received interim approval.) Section 5b Application No. 12, *National Freight Committee Agreement* would transfer these functions of the UCC to the NRFC. Upon approval of the NRFC agreement, to the extent the applications are duplicative, Application No. 12 supersedes Application No. 5.

We are requiring modification of the agreement and the commodity classification system prior to approval. The following subject areas of the agreement must be modified: identification and description of member-carriers; upon meetings and mail voting; confidentiality of independent actions; notice; appeals; antitrust immunity in intrastate matters; and approval for additional rules.

The Uniform Freight Classification System (UFC) must be modified in the following areas: (1) To eliminate consideration of non-transportation related factors; (2) to condense the factors used in classifying to four factors (density, stowability, ease or difficulty of handling, and liability); and (3) to eliminate all related charges.

Antitrust immunity will continue pending final decision, provided that applicant complies with this decision within the timeframes specified.

Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T.S. InfoSystems, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423, or call 289-4357 (DC Metropolitan area) or toll free (800) 424-5403).

This action will not significantly affect either the quality of the human environment or the conservation of energy resources.

This notice and accompanying decision are issued pursuant to 49 U.S.C. 10321 and 10706 and 5 U.S.C. 553.

Decided: April 15, 1986.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Sterrett, Andre, and Lamboley. Commissioner Andre would not have required the agreement to be modified to limit the factors considered in classifications.

James H. Bayne,

Secretary.

BILLING CODE 7035-01-M

[Fourth Revised I.C.C. Order No. P.-88]

Rail Carriers; Central Vermont Railway, Inc.; Passenger Train Operation

To: Central Vermont Railway, Inc.

It appearing, that the National Railroad Passenger Corporation (Amtrak) has established through passenger train service between Washington, D.C. and Montreal, Canada. The operation of these trains requires the use of the tracks and other facilities of Boston and Maine Corporation (BM). The BM Line is temporarily out of service because of a labor dispute. An alternate route is available via the Central Vermont Railway, Inc., between Palmer, Massachusetts and White River Junction, Vermont.

It is the opinion of the Commission that the use of such alternate route is necessary in the interest of the public and the commerce of the people; that notice and public procedure herein are impracticable and contrary to the public interest; and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered,

(a) Pursuant to the authority vested in me by order of the Commission decided January 13, 1986, and of the authority vested in the Commission by section 402(c) of the Rail Passenger Service Act of 1970 (45 U.S.C. 562(c)), Central Vermont Railway, Inc. (VC), is directed to operate trains of the National Railroad Passenger Corporation (Amtrak) between Palmer, Massachusetts and White River Junction, Vermont.

(b) In executing the provisions of this order, the common carriers involved shall proceed even though no agreements or arrangements now exist between them with reference to the compensation terms and conditions applicable to said transportation. The compensation terms and conditions shall be, during the time this order remains in force, those which are voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, the compensation terms and conditions shall be as hereafter fixed by the Commission upon petition of any or all of the said carriers in accordance with pertinent authority conferred upon it by the Interstate Commerce Act and by the Rail Passenger Service Act of 1970, as amended.

(c) *Application*. The provisions of this order shall apply to intrastate, interstate and foreign commerce.

*(d) *Effective date*. This order shall become effective at 11:59 p.m., April 11, 1986.

*(e) *Expiration date*. The provisions of this order shall expire at 11:59 p.m., April 18, 1986, unless otherwise modified, amended, or vacated by order of this Commission.

This order shall be served upon Central Vermont Railway, Inc., and upon the National Railroad Passenger Corporation (Amtrak), and a copy of this order shall be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., April 11, 1986.

Interstate Commerce Commission.

*Change of effective periods.

Rail Carriers; Release of Waybill Data for use in a Study of Rail Market Share of Refrigerated Commodities

The Commission has received a request from Roberts Associates, Inc. (Roberts) on behalf of its client, a rail car leasing company, for permission to use the 1984 and, when available, 1985 ICC Waybill Sample. These data are needed in a study to determine what commodities are moving in the car types leased by Roberts' client. Specifically, they seek to determine the movements of refrigerated commodities between points in the United States. This requires knowledge of the point of origin and point of destination of specific movements at the level of 2-digit Standard Point Location Codes (SPLC) and 7-digit Standard Transportation Commodity Codes (STCC). This information will be used to compare with truck movements between the same 2-digit SPLCs to determine rail share.

The Commission requires rail carriers to file waybill sample information if in any of the past three years they terminated on their lines at least: (1) 4,500 revenue carloads or (2) 5 percent of revenue carloads in any one State (49 CFR Part 1244). From this Waybill File that has satisfied the majority of all our waybill data requests while protecting the confidentiality of proprietary data submitted by the railroads. However, if confidential waybill data are requested, as in this case, we will consider releasing the data are requested, as in this case, we will consider releasing the data only after certain protective conditions are met and public notice is given. More specifically, under the Commission's current policy for handling waybill requests, we will not release any confidential waybill data until after: (1) public notice is provided so affected parties have an opportunity to object and (2) certain requirements designed to protect the data's confidentiality are agreed to by the requesting party (48 FR 40328, September 6, 1983).

Accordingly, if any parties object to this request, they should file their objections (an original and 2 copies) with the Director of the Commission's Office of Transportation Analysis (OTA) within 14 calendar days of the date of this notice. They should also include all grounds for objection to the full or partial disclosure of the requested data. The Director of OTA will consider these objections in determining whether to release the requested waybill data. Any parties who objected will be timely notified of the Director's decision.

Contact: Elaine Kaiser, (202) 275-7003.

James H. Bayne,

Secretary.

BILLING CODE 7035-01-M

Rail Carriers; Release of Waybill Data for use in the Study of Potential Interrailroad Pooling Projects

The Commission has received a request from the Association of American Railroads' Freight Equipment Management Program (FEMP) for permission to use the 1984 and, when available, the 1985 ICC Waybill Sample in conducting a study on the feasibility and benefit of potential interrailroad pooling projects. The study covers potential pooling projects for several car types including gondolas, flatcars, and boxcars. Waybill data are needed to identify loaded origin-destination flow volumes and mileages. This information when combined with empty mileage data and an optimization program, would enable FEMP to determine the potential benefits of improved utilization, such as in pooling projects. No revenue related waybill data are needed.

The Commission requires rail carriers to file waybill sample information if in any of the past three years they terminated on their lines at least: (1) 4,500 revenue carloads or (2) 5 percent of revenue carloads in any one State (49 CFR Part 1244). From this waybill information, the Commission has developed a Public Use Waybill File that has satisfied the majority of all our waybill data requests while protecting the confidentiality of proprietary data submitted by the railroads. However, if confidential waybill data are requested, as in this case, we will consider releasing the data only after certain protective conditions are met and public notice is given. More specifically, under the Commission's current policy for handling waybill requests, we will not release any confidential waybill data until after: (1) public notice is provded so affected parties have an opportunity to object and (2) certain requirements designed to protect the data's confidentiality are agreed to by the requesting party (48 FR 40238, September 6, 1983).

Accordingly, if any parties object to this request, they should file their objections (an original and 2 copies) with the Director of the Commission's Office of Transportation Analysis (OTA) within 14 calendar days of the date of this notice. They should also include all grounds for objection to the full or partial disclosure of the requested data. The Director of OTA will consider these objections in determining whether to release the requested waybill data. Any parties who objected will be timely notified of the Director's decision.

BILLING CODE 7035-01-M

[Order No. 6]

Rail Carriers; Boston and Maine Corp. et al.; Rerouting Traffic

Decided: April 25, 1986.

On April 4, 1986, the Commission issued the above titled order which authorizes the rerouting of traffic normally routed over the Boston and Maine Corporation (BM) and/or Maine Central Railroad Company (MEC). The rerouting was occasioned by a work stoppage and embargo on certain BM and MEC lines.

Since that time connecting carriers have filed tariffs offering new routes for the affected traffic: BM and MEC have modified their embargoes; Guilford Transportation Industries, Inc. (GTI), on April 9, 1986, filed a petition requesting that the above titled order be vacated, and requests have been received to broaden the order to include the Delaware and Hudson Railway Company (DH) and to make the order mandatory.

It appears that the circumstances initially requiring the Commission's action may have changed, and that the continuing necessity for the order should be reconsidered. However, before reconsidering the order's continuation, or its scope, the Commission will allow the carriers named in the order and any other affected parties to provide the Commission with any comments on the continuing need for this authority.

Parties will be given until close of business April 30, 1986, to provide their comments to the Commission on:

(a) How the order is presently being used;

(b) The number of shipments rerouted under this authority since its issuance;

(c) Whether the order in its present form should be vacated and why;

(d) Whether the order should be broadened to include DH, with supporting information on any substantial failure of traffic movement over DH, and,

(e) Whether the presently permissive order should be made mandatory on all Guilford connections.

Comments may be written or telegraphic. Submissions filed since issuance of the Order need not be refiled.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Sterrett, Andre and Lamboley.

James H. Bayne,

Secretary.

NATIONAL SCIENCE FOUNDATION

Measurement Methods and Data Improvement; Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: Advisory Panel on Measurement Methods and Data Improvement.

Date/time: May 19-20, 1986, 9:00 AM to 6:00 PM.

Place: Room 1242, National Science Foundation, 1800 G Street, NW, Washington, DC 20550.

Type of meeting: Closed—May 19-20, 1986, 9:00 AM to 6:00 PM

Contact person: Dr. Murray Aborn, Program Director, Measurement Methods and Data Improvement, Room 312, National Science Foundation, Washington, DC 20550, Telephone (202) 357-7913.

Summary of minutes: May be obtained from the contact person Dr. Murray Aborn at the above address.

Purpose of advisory panel: To provide advice and recommendations concerning support for research and research-related projects in Measurement Methods and Data Improvement.

Agenda: Review and evaluation of research and research-related proposals as part of the award selection process.

Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of section 10(d) of Pub. L. 92-463. The Committee Management Officer was delegated the authority to make such determinations by the Director, NSF, on July 6, 1979.

April 25, 1986.

M. Rebecca Winkler,

Committee Management Officer.

BILLING CODE 7555-01-M

VOL 51 ISS 83 AP 30 1986 UMI

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-455]

Commonwealth Edison Co., Byron Station, Unit 2; Order Extending the Latest Construction Completion Date

On December 31, 1975, the Nuclear Regulatory Commission issued to the Commonwealth Edison Company Construction Permits for Byron Station, Units 1 and 2, located in Ogle County, Illinois and Braidwood Station, Units 1 and 2 in Will County, Illinois.

By letter dated April 19, 1982, Commonwealth Edison Company filed a request for extension of the latest construction completion dates for the Byron Station Construction Permits. It was requested that Unit 1 be extended from June 1, 1982 to October 1, 1984 and Unit 2 be extended from November 1, 1983 to April 1, 1986. These permits were extended to October 1, 1984, and April 1, 1986 for the Byron Station, Units 1 and 2, respectively.

By letter dated February 27, 1986, Commonwealth Edison Company requested an extension of the latest construction completion date for CPPR-131, Byron Station, Unit 2 from April 1, 1986, to June 1, 1987. The applicant stated the extension was needed beyond the April 1, 1986 date because of unanticipated extended construction and turnover for testing periods. The longer construction period than originally planned resulted from primarily focusing resources on completion of Unit 1 of the Byron Station which delayed reallocation of construtions workers to Unit 2. Portions of the construction work force for Unit 2 have occasionally shifted back to Unit 1 to make modifications necessary for plant availability.

The longer construction period for Unit 2 can also be attributed to additional work resulting from changed or new requirements and from testing of Unit 1. Additional system turnover delays have been encountered in complying with NRC environmental qualification requirements for electrical equipment. As equipment deficiencies and component malfunctions occurred during preoperational testing, long procurement times for qualified parts added to the delay.

The requested revised completion date extends beyond the date by which Commonwealth Edison currently expects to load fuel to Byron Unit 2, but the current fuel load schedule has not changed. The revised completion date reflects a conservative estimate of actual completion of Unit 2 should any unanticipated delays in construction actually occur. The applicant has requested an extension from April 1, 1986 to June 1, 1987 to cover such contingencies.

As discussed more fully in the staff's related Safety Evaluation, dated April 24, 1986, we have concluded that good cause has been shown for delay, and that the requested extension is for a reasonable period. We have further concluded that the requested extension involves no significant hazards consideration, and therefore no prior public notice is required.

The NRC staff has prepared an environmental assessment and findings of no significant impact which was published in the Federal Register on April 17, 1986 (51 FR 13117). The NRC staff has concluded that this action will not have a significant impact on the quality of the human environment and therefore no environmental impact statement need be prepared.

The applicant's letter, dated February 27, 1986, and the NRC staff's letter and evaluation, dated April 24, 1986, issued in support of this Order are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC., and at the Rockford Public Library, 215 N. Wyman Street, Rockford, Illinois 61103.

It is hereby ordered that the latest construction completion date for CPPR-131, Unit 2 of the Byron Station be extended from April 1, 1986 to June 1, 1987.

Date of Issuance: April 24, 1986.

For the Nuclear Regulatory Commission.

Thomas M. Novak,

Acting Director Division of PWR Licensing-A

[FR Doc. 86-9691 Filed 4-29-86; 8:45 am]

BILLING CODE 7590-01-M

Applications for Licenses To Export Nuclear Facilities or Materials; Westinghouse Electric Corp. et al.

Pursuant to 10 CFR 110.70 (b), Public notice of receipt of an application, please take notice that the Nuclear Regulatory Commission has received the following applications for export licenses. Copies of the applications are on file in the Nuclear Regulatory Commission's Public Document Room located at 1717 H Street, NW., Washington, D.C.

A request for a hearing or petition for leave to intervene may be filed before May 30, 1986. Any request for hearing or petition for leave to intervene shall be served by the requestor or petitioner upon the applicant, the Executive Legal Director, U.S. Nuclear Regulatory Commission, and the Executive Secretary, U.S. Department of State, Washington, DC 20520.

In its review of applications for licenses to export production or utilization facilities and other nuclear related material, the Commission does not evaluate the health, safety or environmental effects in the recipient nation of the facility or material to be exported. The table below lists all new major applications.

NRC EXPORT APPLICATIONS

Name of applicant, date of application, date received, and application number	End-use	Country of destination
Westinghouse Electric Corp., February 13, 1986; February 13, 1986, February 18, 1986, February 18, 1986, XR-148.	One (1) primary coolant pump for Taiso Vercellese Reactor	Italy.
Combustion Engineering, February 21, 1986, February 21, 1986, February 24, 1986, February 24, 1986, XR-150.	Two (2) light reactors units KNU-11 and KNU-12, 950 MWe (ea)	South Korea.

Dated: this 24th day of April 1986 at Bethesda, Maryland.

For the Nuclear Regulatory Commission.

Marvin R. Peterson,

Assistant Director, Export/Import and International Safeguards, Office of International Programs.

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards; Meeting Agenda

In accordance with the purposes of sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b), the Advisory Committee on Reactor Safeguards will hold a meeting on May 8-10, 1986, in Room 1046, 1717 H Street, NW, Washington, DC. Notice of this meeting was published in the Federal Register on April 22, 1986.

Thursday, May 8, 1986

8:30 A.M.-8:45 A.M.: Report of ACRS Chairman (Open)—The ACRS Chairman will report briefly regarding items of current interest to the Committee.

8:45 A.M.-12:00 Noon: Systems Interactions (Open)—The members of the Committee will hear and discuss the report of its subcommittee regarding the NRC Staff's proposed resolution of USI A-17, Systems Interactions in Nuclear Power Plants. Members of the NRC Staff will participate in the presentations and discussion of this matter.

12:00 Noon-12:30 P.M.: ACRS Subcommittee Activities (Open)—The members will hear and discuss the report of the ACRS subcommittee on Thermal Hydraulic Phenomena regarding proposed revisions to 10 CFR Part 50.46, Acceptance criteria for emergency core cooling systems for light water nuclear power reactors and Appendix K, ECCS evaluation models.

1:30 P.M.-1:50 P.M.: Preparation for Meeting with NRC Commissioners (Open)—The members will discuss proposed comments to the Commissioners regarding the ACRS report dated April 15, 1986, Additional ACRS Comments on Proposed NRC Safety Goal Policy Statement.

2:00 P.M.-3:30 P.M.: Meeting with NRC Commissioners (Open)—The ACRS meeting will adjourn so ACRS members can participate in a meeting of Nuclear Regulatory Commission to discuss ACRS recommendations and comments regarding the proposed NRC Safety Goal Policy Statement, as noted above.

3:45 P.M.-5:30 P.M.: Activities of ACRS Subcommittees (Open)—The members of the Committee will hear and discuss the activities of designated ACRS subcommittees regarding:

- Severe (Class 9) Accidents regarding rebaselining studies for reference nuclear power plants.
- Management of ACRS activities—report of Management Group meetings on April 9, 1986 and May 7, 1986.

Friday, May 9, 1986

8:30 A.M.-10:30 A.M.: Management and Disposal of Radioactive Waste (Open)—The members will hear and discuss the report of its Waste Management Subcommittee regarding matters related to the handling and disposal of high- and low-level radioactive wastes including modeling strategy for high-level waste performance assessment; quality assurance for high-level waste geologic repositories; related research efforts; the NRC low-level waste program mandated by the Low-Level Radioactive Waste Policy Amendments Act of 1985; and the salvaging of contaminated smelted alloys. Members of the NRC Staff will participate in the presentations and discussion.

10:45 A.M.-11:00 A.M.: Future ACRS Activities (Open)—The members will discuss anticipated ACRS subcommittee activity and proposed items for consideration by the full Committee.

11:00 A.M.-12:00 Noon: Decay Heat Removal (Open/Closed)—An ACRS member will brief the Committee regarding the type of bleed and feed system proposed for the Westinghouse Advanced Pressurized Water Reactor.

Portions of this session will be closed as necessary to discuss Proprietary Information related to this matter.

1:00 P.M.-2:45 P.M.: Meeting with Representatives of the Federal Republic of Germany (Closed)—The members will meet with representatives of the Federal Republic of Germany to discuss both high- and low-level radioactive waste standards for radionuclide release limits (dose limits), plans for environmental monitoring, and for modeling in connection with performance assessment in order to assure compliance with the standards and thus to ensure the public health and safety.

This session will be closed to discuss information provided in confidence by a foreign source.

3:00 P.M.-3:30 P.M.: Activities of ACRS Members (Open/Closed)—The members will discussed proposed activities of individual ACRS members and the proposed impact of their assignments as ACRS members.

Portions of this session will be closed as necessary to discuss information the release of which would represent an unwarranted invasion of personal privacy.

3:30 P.M.-4:30 P.M.: Emergency Operating Procedures (Open)—The members will discuss a proposed report to NRC regarding the status of emergency operating procedures at nuclear power plants.

4:30 P.M.-5:00 P.M.: NRC Safety Research Program (Open)—The members of the Committee will discuss the scope, fomat, and schedule for the preparation of the ACRS report to the NRC regarding the proposed NRC safety research and budget for FY 1988-89.

5:00 P.M.-6:00 P.M.: Preparation of ACRS Reports to NRC (Open/Closed)—The members will discuss proposed reports to the NRC regarding matters considered during this meeting.

Portions of this session will be closed as necessary to discuss Proprietary Information applicable to the matter being discussed.

Saturday, May 10, 1986

8:30 A.M.-9:15 A.M.: Appointment of ACRS Member (Closed)—The members will discuss the qualifications of candidates proposed for appointment to the ACRS.

This portion of the meeting will be closed to discuss information the release of which would represent an unwarranted invasion of personal privacy.

9:15 A.M.-9:45 A.M.: Relocation of ACRS (Open)—The Committee will hear and discuss the report of its delegation of ACRS members to discuss the proposed ACRS move to the Bethesda area.

9:45 A.M.-12:00 Noon and 1:00 P.M.-3:00 P.M.: Preparation of ACRS Reports to NRC (Open/Closed)—The members will discuss proposed reports to the NRC regarding matters considered during this meeting.

Portions of this session will be closed as required to discuss Proprietary Information applicable to the matter being discussed.

Procedures for the conduct of and participation in ACRS meetings were published in the Federal Register on October 2, 1985 (50 FR 191). In accordance with these procedures, oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Committee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS Executive Director as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statement. Use of still, motion picture and television cameras during this meeting may be limited to selected portions of the meeting as determined by the Chairman. Information regarding the time to be set aside for this purpose may be obtained by a prepaid telephone call to the ACRS Executive Director, R.F. Fraley, prior to the meeting. In view of the possibility that the schedule for ACRS meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with the ACRS Executive Director if such

VOL 51 ISS 83 APR 30 1986 UMI

rescheduling would result in major inconvenience.

I have determined in accordance with section 10(d) Pub. L. 92–463 that it is necessary to close portions of this meeting as noted above to discuss Proprietary Information (5 U.S.C. 552b(c)(4)), information provided in confidence by a foreign source (5 U.S.C. 552b(c)(4)), and information the release of which would represent a clearly unwarranted invasion of personal privacy (5 U.S.C. 552b(c)(6)).

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted can be obtained by a prepaid telephone call to the ACRS Executive Director, Mr. Raymond F. Fraley (telephone 202/634–3265), between 8:15 A.M. and 5:00 P.M.

Dated: April 24, 1986.

John C. Hoyle,

Advisory Committee, Management Officer.

PACIFIC NORTHWEST ELECTRIC POWER AND CONSERVATION PLANNING COUNCIL

State Agency Advisory Committee; Regular Meeting

AGENCY: The Pacific Northwest Electric Power and Conservation Planning Council (Northwest Power Planning Council).

ACTION: Notice of meeting.

STATUS: Open.

SUMMARY: The Northwest Power Planning Council hereby announces a forthcoming meeting of its State Agency Advisory Committee, to be held pursuant to the Federal Advisory Committee Act, 5 U.S.C. Appendix I, 1–4. Activities will include:

- Action Plan implementation:

—Western Energy Study Workplan

—PUC/IOU Actions

- Power Planning Division's Workplan.
- Decision Analysis Modeling.
- Other issues of interest to the Task Force.

DATE: Tuesday, May 13, 1986, 9:30 a.m.

ADDRESS: The meeting will be held at the World Trade Center; Mezzanine Level; Room 44A; Highway 99 South; Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Jim Litchfield, (503) 222–5161.

Edward Sheets,

Executive Director.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–23171; File No. SR–MSRB–86–6]

Self-Regulatory Organizations; Municipal Securities Rulemaking Board; Order Approving Proposed Rule Change

The Municipal Securities Rulemaking Board ("MSRB"), Suite 800, 1818 N Street, NW., Washington, DC 20036–2491, submitted on March 13, 1986, copies of a proposed rule change pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") and Rule 19b–4 thereunder, to conform the requirements of MSRB rule G–7(b) to Commission Rule 17a–3 under the Act, as amended, so that the Uniform Application for Securities Industry Registration, Form U–4, will continue to satisfy the requirements of rule G–7(b).

Notice of the proposed rule change was given by the issuance of Securities and Exchange Act Release No. 23017 (March 14, 1986) and by publication in the **Federal Register** (51 FR 10130, March 24, 1986). No comments were received.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to the MSRB, and, in particular, the requirements of Section 15B and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: April 23, 1986.

John Wheeler,

Secretary.

[FR Doc. 86–9677 Filed 4–29–86; 8:45 am]

BILLING CODE 8010–01–M

[Release No. 34–23173; File No. SR–NASD–86–19]

Self-Regulatory Organizations; Proposed Rule Change by National Association of Securities Dealers, Inc., Relating to the Meaning of an Existing Rule

Pursuant to section 19(b) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on April 17, 1986 the National Association of Securities Dealers, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The NASD is proposing to amend an interpretation of the Board of Governors, "Forwarding of Proxy and Other Materials," to Article III, Section 1 of the NASD Rules of Fair Practice to change the guidelines for fees that NASD member firms may charge issuers for forwarding proxy and other materials to the issuer's shareholders. The guidelines would be increased as follows: a 10¢ increase for all charges for Initial Proxy and/or Annual Report Mailings, a 10¢ increase for all Charges for Proxy Follow-Up Mailings and a 10¢ increase for all Charges for Interim Report Mailing.

II. Self-Regulatory Organizations Statements Regarding the Proposed Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule changes discussed any comments it received on the proposed rule changes. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections (A), (B), and (C) below of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purposes of, and Statutory Basis for, the Proposed Rule Change

(a) *Purpose.* The purpose of the proposed rule change is to modify certain guidelines set forth in an interpretation of the Board of Governors, "Forwarding of Proxy and Other Materials" as reasonable rates of reimbursement for the forwarding of proxy and annual report mailings to beneficial shareowners.

NASD members who possess or control stock for their customers who are beneficial owners of securities are required by the rules of the NASD to transmit proxy soliciting material, interim reports, and other material to each beneficial owner whenever the issuer or other person shall furnish the material and give satisfactory assurance that it will reimburse member firms for all out-of-pocket expenses, including reasonable clerical expenses.

The processing and transmitting of proxy material and the tabulation of votes demand a substantial amount of clerical work by the member firms. NASD members must be prepared to treat each proxy solicitation or other transmittal of material as an individual exercise demanding adherence to detailed corporate instructions. In most instances time is of the essence, since there is a limited period during which material received must be mailed to beneficial owners and their votes received, tabulated and sent to the issuers in advance of the stockholders' meeting date.

(b) *Basis.* Section 15A(b)(5) of the Act provides that the rules of a national securities association must provide for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility or system which the Association operates or controls. It is the NASD's belief that the amended guidelines provide for the equitable allocation of costs between members and issuers and complies with section 15A(b)(5) of the Act and SEC Release No. 34–20021.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Association does not foresee any burden on competition by this proposed rule change not necessary or appropriate in furtherance of the purpose of the Act.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Comments we neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule changes should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities, and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submissions, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 522 will be available for inspection and copying in the Commission's Public Reference Section, 450 5th Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organizaton. All submissions should refer to the file number in the caption above and should be submitted in May 21, 1986.

For the Commission, by the Division of Market Regulation, pursuant to delegated Authority.

Dated: April 24, 1986.

John Wheeler,

Secretary.

[FR Doc. 86–9678 Filed 4–29–86; 8:45 am]

BILLING CODE 8010–01–M

[Release No. 34–23158; File No. SR–NASD–86–9]

Self-Regulatory Organizations; Proposed Rule Change by National Association of Securities Dealers, Inc.; Relating to the meaning of an Existing Rule

Pursuant to section 19(b) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on April 14, 1986 the National Association of Securities Dealers, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The NASD is proposing to amend an interpretation of the Board of Governors, "Forwarding of Proxy and Other Materials," to Article III, Section 1 of the NASD Rules of Fair Practice to allow NASD member firms to charge issuers a second and final surcharge for start up costs associated with complying with Rules 14b–1(c) and 17a–3(a)(9)(ii) under the Securities Exchange Act of 1934, as amended (the "Act") and a fee of six and one half cents per shareholder name provided to the issuer to recover ongoing costs associated with the implementation of these rules.

II. Self-Regulatory Organizations Statements Regarding the Proposed Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule changes discussed any comments it received on the proposed rule changes. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below of the most significant aspect of such statements.

(A) Self-Regulatory Organization's Statement of the Purposes of, and Statutory Basis for, the Proposed Rule Change

(a) *Purpose.* The proposed amendment establishes a second and final surcharge and an additional fee which may be charged by NASD members to issuers in connection with proxy solicitations for the purpose of recouping the direct and indirect start-up costs and ongoing costs incurred to comply with Rules 14b–1(c) and 17a–3(a)(9)(ii) under the Securities Exchange Act of 1934, as amended (the "Act"). These rules were adopted to improve the ability of issuers to identify and communicate with their shareholders whose securities are held in "street name" accounts of broker-dealers. Rule 17a–3(a)(9)(ii) requires that broker-dealers determine and maintain a record as to whether or not a customer objects to disclosure of his name, address and securities positions to issuers. Rule 14b–1(c) requires firms to provide issuers, upon request and assurance of reimbursement of

VOL 51 ISS 83 AP 30 1986 UMI

reasonable expenses, with names, addresses and security positions of non-objecting beneficial shareholders of the issuer's securities.

The Commission in its Release No. 34-20021 which covered the above-mentioned rules discusses how and by whom the costs associated with this program should be allocated. The Release stated, "The Commission continues to believe that, because the self-regulatory organizations represent the interests of both issuers and brokers, they are in the best position to make a fair allocation of all the costs associated with the amendments, including start-up and overhead costs." The NASD's second and final surcharge and six and one half cent fee per shareholder name provided are an attempt to comply with the SEC's suggestion in this Release and the NASD believes the surcharge and fee are allocated on a fair and equitable basis.

(b) *Basis.* Section 15A(b)(5) of the Act provides that the rules of a national securities association must provide for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facilty of system which the Association operates or controls. It is the NASD's belief that the surcharge requested provides for the equitable allocation of costs between members and issuers and complies with section 15A(b)(5) of the Act and SEC Release No. 34-20021.

(B) Self Regulatory Organization's Statement on Burden on Competition

The Association does not foresee any burden on competition by this proposed rule change not necessary or appropriate in furtherance of these purposes of the Act.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Recieved from Members, Participants, or Others

Comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Commission has approved the foregoing rule change pursuant to a request for accelerated effectiveness as provided for under section 19(b)(2) of the Securities Exchange Act of 1934. The Commission finds good cause to accelerate the proposed rule change in order that NASD member firms may recoup direct and indirect start-up and ongoing cost incurred in connection with the 1986 proxy season.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submissions, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 522 will be available for inspection and copying in the Commission's Public Reference Section, 450 5th Street, N.W., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organizations. All submissions should refer to the file number in the caption above and should be submitted by May 21, 1986.

For the Commission, by the Division of Market Regulation, pursuant to delegated Authority.

John Wheeler,

Secretary.

[FR Doc. 86-9679 Filed 4-29-86; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-23172; File No. 4-284]

Self-Regulatory Organizations, Filing of Proposed Amendment to New York Stock Exchange, Inc. Quarterly Reporting Plan for Minor Disciplinary Rule Violations

Pursuant to Section 19(d)(1) of the Securities Exchange Act of 1934 ("Act") and Rule 19d-1(c)(2) thereunder,[1] notice is hereby given that on March 24, 1986, the New York Stock Exchange, Inc. ("NYSE") filed a proposed amendment to its minor rule violation plan. The Commission previously approved a minor disciplinary rule plan filed by the NYSE on September 15, 1985.[2] The proposed amendment adds violations of NYSE Rule 412 to the list of minor rule violations subject to the plan, pursuant to NYSE Rule 476A.[3] Rule 412 was designed to ensure prompt transfers of customer securities accounts between NYSE member organizations, by requiring that, following a customer request of a transfer of his or her account from one NYSE member organization to another, the transfer must take place within ten business days.[4] Violations of Rule 412 are to be reported to the Commission in a manner identical to all other violations subject to the minor rule violation plan: A quarterly report listing the NYSE internal file number for the case, the SEC file number, name of individual or member organization, nature of the violation, specific rule provision violated, date of the violation, fine imposed, an indication of whether the fine is joint and several, the number of times the rule violation has occurred, and the date of disposition.[5]

Publication of the submission is expected to be made in the **Federal Register** during the week of April 21, 1986. In order to assist the Commission in determining whether to approve the proposed amendments to the plan or institute proceeding to determine whether the proposed amendments should be disapproved, interested persons are invited to submit written data, views and arguments concerning the submission by [insert 21 days from the date of publication]. Persons desiring to make written comments

[1] *See* Securities Exchange Act Release No. 21013 (June 1, 1984), 49 FR 23636. The Commission adopted amendments to paragraph (c) of Rule 19d-1 to allow self-regulatory organizations ("SROs") to submit, for Commission approval, plans for the abbreviated reporting of minor disciplinary infractions. Under the amendments, any disciplinary action taken by the SRO for violation of an SRO rule that has been designated a minor rule violation pursuant to the plan shall not be considered "final" for purposes of section 19(d)(1) of the Act if the sanction imposed consists of a fine not exceeding $2,500 and the sanctioned person has not sought an adjudication, including a hearing, or otherwise exhausted his or her administrative remedies.

[2] *See* Securities Exchange Act Release Nos. 22500 (August 6, 1985), 50 FR 32818 and 23415 (September 15, 1985), 50 FR 38600. The plan relieves the NYSE of the current reporting requirement, imposed by section 19(d)(1) of the Act, for final disciplinary actions, with respect to violations listed under NYSE Rule 476A, which are designated as minor rule violations subject to the plan.

[3] *See* Securities Exchange Act Release No. 21466 (January 25, 1985), 50 FR 5025. The Commission approved NYSE Rule 476A ("Imposition of Fines for Minor violations of Rule") which authorizes the Exchange, in lieu of commencing a disciplinary proceeding before a Hearing Panel, to impose a fine, not to exceed $5,000, on any member, member organization, allied member, approved person or registered or non-registered employee of a member organization for any violation of an Exchange rule which the Exchange determines to be minor in nature. The comprehensive list of minor rule violations is contained in Rule 476A.

[4] *See* Securities Exchange Act Release No. 22863 (November 20, 1985), 50 FR 48936.

[5] The fine schedule under Rule 476A is as follows: (1) First offense, a fine of $500 for an individual and $1,000 for a member organization; (2) second offense, a fine of $1,000 for an individual and $2,500 for a member organization; (3) subsequent fines are $2,500 for an individual and $5,000 for a member organization. Fines in excess of $2,000 are not covered by the minor rule violation reporting plan.

should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 5th St. NW. Washington, D.C. 20549. Reference should be made to File No. *4-284.* Copies of the submission, all subsequent amendments, all written statements with respect to the proposed amendment to the plan which are filed with the Commission, and all written communications relating to the proposed amendment between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room, 450 5th Street, NW., Washington, DC. Copies of the filing and of any subsequent amendments also will be available at the principal office of the NYSE.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: April 23, 1986.

John Wheeler,

Secretary.

[FR Doc. 86-9675 Filed 4-29-86; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-23167; File No. SR-OCC-85-21]

Self-Regulatory Organizations; Options Clearing Corp.; Order Approving Proposed Rule Change

On December 23, 1985, the Options Clearing Corporation ("OCC") filed with the Commission, pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), a proposed rule change that establishes a new margin system for non-equity options. On March 29, 1986, OCC filed amendments to the proposed rule change.[1] The Commission published notice of the proposed rule change on February 3, 1986.[2] No comments were received. This Order approves the proposal.

I. Introduction

The proposed rule change adds a new section 602A to OCC's rules, adopting a new non-equity options ("NEO") margin system amd makes technical and conforming amendments to other OCC Rules and By-Laws to accommodate the new margin system. OCC believes that the new system provides a more accurate basis for margining non-equity options positions than OCC's present system and substantially reduces the potential for over- and under-margining of such positions. OCC states that the system uses options price theory to project the cost of liquidating each portfolio of positions in the event of an assumed "worst case" change in the price of the underlying asset and sets OCC's margin requirements to cover that cost. In addition, options positions on the same underlying asset or on groups of closely-related underlying assets will be margined as integrated portfolios. For the reasons discussed below, the Commission finds the proposed rule change to be consistent with the Act and is approving it. In particular, the Commission finds that the proposal should provide a more refined methodology for calculating margin, resulting in increased protection to OCC against adverse price movement in options' underlying assets, while also providing for substantially reduced margin obligations for OCC Clearing Members.

II. Description

A. OCC's Proposed NEO Margin System

Like OCC's current NEO margin system, the new system calculates margin differently for market professionals and public customers. Each is described below.

1. *Market Professionals: Firm and Market-Maker/Specialist Accounts.*

Under the new system, OCC's Margin Committee will organize all classes of options (*i.e.*, puts and calls, and European and American-style options) on the same underlying asset into "class groups."[3] Where OCC determines that the underlying assets for two or more class groups exhibit close price correlation (*e.g.*, various broad-based stock indices), those class groups will be organized, for margin purposes, into larger "product groups."[4] The positions comprising a product group or class group (if the class group is not part of a larger product group) will be margined as an integrated portfolio.[5]

The first step in calculating margin requirements is to net offsetting positions in each series within each class group [6] (i.e., long and short positions in the same series and type of option) against each other.[7] This can be done in a firm or market-maker/specialist account because OCC has a lien on all long positions in the account to cover the Clearing Member's obligations on short positions in the account. The net long or short position in each series of options is used to calculate the appropriate margin.

Daily margin requirements have two components: "premium margin" and "additional margin." Premium margin is designed to cover the cost of liquidating the positions comprising the group at the previous day's closing prices. "Additional margin" is designed to cover the projected incremental cost of liquidating those positions in the event of, among other things, an adverse change in the price of the underlying asset.

The second step is to calculate premium margin for the remaining net positions in the class group. Premium margin is determined on the basis of the previous day's closing price and represents a position's most current liquidating value or cost to OCC if OCC had to liquidate the position under Chapter 11 of its Rules. Short positions result in a margin requirement and long positions result in a margin credit equal to the position's current liquidating value. Premium margin requirements and credits within a class group are netted yielding either a margin credit or requirement for the group as a whole, depending on whether the positions comprising the class group liquidate to a credit or a deficit.

[1] The amendments delegate authority to the Margin Committee, the Chairman or President of the Corporation to make certain determinations relevant to calculating margin requirements. The amendments also correct a drafting error regarding exercised and assigned foreign currency options and a typographical error in Rule 602A(d)(1).

[2] *See* Securities Exchange Act Release No. 22844 (January 28, 1986), 51 FR 4257 (February 3, 1986).

[3] For example, all OCC-issued options on U.S. Treasury bills—both puts and calls, and American and European-style options—would be margined as a class group.

[4] OCC plans to initiate its margin system using four product groups: (1) S&P 100, S&P 500, New York Composite, Amex Major Market and Value Line indices; (2) OTC indices; (3) 30-year Treasury bonds and 10-year Treasury notes; and (4) all 5-year Treasury notes. OCC states that all of the class groups within these product groups have shown approximately a 96% price correlation during the last year.

[5] When international options are introduced, OCC expects to treat each class of international options as a separate class group (*see* File No. SR-OC-85-13, Securities Exchange Act Release No. 22354 (August 23, 1985), 50 FR 35340 (August 30, 1985)). Furthermore, margin credits for class groups and product groups consisting of international options will not be used to reduce margin requirements for other options positions and vice versa.

[6] The term "series of options" means all option contracts of the same class with the same exercise price, expiration date and unit of trading. *See* OCC By-Law Art. 1, Sec. 1. The term "class of options" means all option contracts of the same type (*i.e.*, put, call, American or European-style) covering the same underlying asset. *Id.*

[7] This procedure is similar to the "Pairing off" of options positions under OCC's current margin system. *See* OCC Rule 601.

VOL 51 ISS 83 AP 30 1986 UMI

The next set of calculations is to determine the appropriate additional margin for a class group. Generally speaking, additional margin is determined by comparing the actual liquidating value of a class group with the theoretical liquidating value of the class group at several predetermined underlying asset prices. One underlying asset price would include the "maximum" anticipated one-day increase in the underlying asset price, as defined below, and another the maximum one-day decrease. Further, to protect against certain trading strategies that may have their greatest potential loss to OCC at a specific strike price (*e.g.*, a butterfly spread), OCC would calculate, using an options pricing model, a theoretical liquidating value for an underlying asset price equal to any option strike price that falls within the boundaries of the first two underlying asset prices set by OCC. Each theoretical liquidating value would be compared to the current liquidating value to determine at which potential underlying asset price OCC is most at risk. The difference between this "worst case" liquidating value and the current liquidating value would be the additional margin required for the class group.

To determine the maximum one-day price movement in the underlying asset that OCC should anticipate (the "margin interval"), OCC will analyze historical price changes in the underlying asset. OCC's criteria for setting the margin interval are designed: (i) To ensure that additional margin is sufficient to protect against a price movement equal to or exceeding at least 95% of the daily price changes in the underlying asset for the last three months or for the previous year, whichever yields the more conservative result from OCC's perspective,[9] and (ii) to ensure that additional margin would be eroded by no more than 70% in the event of an underlying asset price change equal to the average daily price change during that period.

[9] OCC has determined to use one year's worth of data in addition to the three months' data it now uses to provide both a short and long-term analysis of underlying asset price changes, using the higher result of the two to set margin intervals. OCC concluded that neither the short nor long-term observations taken alone, provide a completely accurate picture of the potential price changes for given underlying assets. Using only one year's data might "hide" the effect of recent large price changes; while using only three months' data might be too short a period to capture the true range of prices over which an underlying asset might change. OCC stated that it will adjust, as it currently does, the margin interval on a monthly basis (or more frequently, if necessary) to assure margin adequacy.

Once OCC determines the appropriate margin interval for the class group's underlying asset, OCC will calculate the theoretical liquidating value of the net series positions within the class group at an underlying asset price equal to (i) the current asset price plus the margin interval (the "upside projection"); (ii) the current asset price minus the margin interval (the "downside projection") and (iii) any strike prices between the asset prices in (i) and (ii). To provide additional protection, OCC will presume the per-unit cost of liquidating out-of-the-money short call positions in the upside projection and short put positions in the downside projection would increase by at least 25% of the margin interval.[9]

To calculate the theoretical net liquidating value of the portfolio at the price levels noted above, OCC will rely on an options pricing model.[10] OCC believes that options price theory has practical applications for calculating margin requirements because it can be used to fairly accurately calculate the theoretical value of an option (*i.e.*, potential liquidating value) when the underlying asset value changes.[11]

That process produces two or more projected liquidating values (costs) for the net series positions. The largest upside variations for all the net series positions (*i.e.*, the greatest change in liquidating value, positive or negative, in the event of an upward movement in the price of the underlying asset), are added together to arrive at the total upside variation for the class group, as are the largest downside variations for the net series positions to arrive at the total downside variation for the class group. If an upside or downside variation reflects an increase in liquidating cost or a decrease in liquidating value, that variation is assigned a positive sign for margin calculation purposes (signifying a margin requirement). Variations reflecting a decrease in liquidating cost or an increase in liquidating value are assigned a negative sign (signifying a margin credit).

The additional margin requirement for the class group is an amount equal to either the total upside variation or the total downside variation, whichever is positive (*i.e.*, reflects an increase in liquidating cost or a decrease in liquidating value for the positions comprising the class group). In cases where both variations are positive, the additional margin requirement is the larger of the two; and where both are negative, the additional margin requirement is zero. Unlike premium margin, which can be either positive or negative (*i.e.*, either a margin requirement or credit), additional margin is always either positive or zero (*i.e.*, never a margin credit against premium margin requirements).

The total margin requirement or credit for the class group is an amount equal to the sum of the net premium margin requirement (or credit, if applicable) and the additional margin requirement. If the premium margin is positive, indicating a margin requirement, additional margin will accordingly add to that requirement. If premium margin is negative indicating a margin credit (as would be the case for a class group predominantly comprised of long positions), additional margin will ordinarily reduce the resulting margin credit (but never to less than zero, because the long positions that generated the credit might cease to be assets, but would never become liabilities).

If the class group is part of a larger product group, a further margin calculation is undertaken. First, all negative upside and downside variations for the class groups comprising the product group (*i.e.*, variations reflecting a decrease in liquidating cost or an increase in liquidating value) are reduced by a percentage predetermined by OCC. OCC stated that the purpose of this reduction is to compensate for any lack of correlation in price movements among the class groups comprising the product group. The specific percentage depends on the degree of correlation OCC observed during the previous year for the particular product group involved.

[9] OCC believes that for deep-out-of-the-money short options, the options pricing model may predict that these options values will be insensitive to the potential one-day change in the underlying asset. This would result in no additional margin requirement for that option. However, should the option move much more than expected and approach an "at-the-money relationship" to the underlying asset price, OCC would be unprotected on a short call option with a rapidly rising value. Therefore, OCC believed that some adjustment to the model was necessary to provide for an absolute minimum additional margin amount. OCC stated that its initial research indicated that it is appropriate to increase the per-unit liquidating cost of the option by 25% of the margin interval. OCC further stated that it will continue to research the problem to determine whether further refinements are appropriate.

[10] OCC has informed the Commission that it is using the Cox-Rubinstein options pricing model. Cox-Rubinstein is a refinement of the Black-Scholes model, an equilibrium options pricing model first introduced in 1973. *See generally* J. Cox & M. Rubinstein, *Options Markets*; R. Jarrow & A. Rudd, *Option Pricing*.

[11] Options pricing models can be used to predict, given a set of inputs (*e.g.*, asset's value, time to expiration, interest rate, dividends, volatility and underlying asset price), what the option is theoretically worth at a specified price for the underlying asset.

Next, the upside variations (highest liquidating values/costs in the event of an underlying asset price increase) for all class groups in the product group are added together, as are the downside variations (highest liquidating values/costs in the event of an underlying asset price decrease). The largest combined result that is positive (*i.e.*, reflects a net increase in liquidating cost or a net decrease in liquidating value for the positions comprising the product group) constitutes the additional margin requirement for the product group.

The total margin requirement or credit for the product group as a whole is an amount equal to the sum of the premium margin requirements for each class group in the product group, increased (in the case of a net premium margin requirement) or reduced (in the case of a net premium margin credit) by the additional margin requirement for the product group. In summary, if the positions in a product group (or a class group that was not part of a product group) liquidate to a deficit, the total margin requirement for the group is an amount equal to the sum of that deficit and the additional margin requirement for the group. If the positions in the group liquidate to a credit, the total margin credit for the group is an amount equal to that credit, reduced by the additional margin requirement for the group.

Finally, if the total margin amount for a product group or a class group that was not part of a product group was a credit (*i.e.*, the combined result was negative), 50% of that credit could be applied against the margin requirements for other NEO class groups and product groups in the account.[12] If the account as a whole showed a margin credit, there would be no margin requirement.

2. *Customers' Accounts and Firm Non-Lien Accounts.* OCC does not have a lien on firm non-lien accounts or long positions carried in customer accounts except to the extent that they comprise the long leg of a specific customer's spread (*i.e.*, constitute "unsegregated long positions"). (Commission rules preclude long value credits where the long positions are segregated.)[13]

[12] On March 18, 1986, OCC filed a related proposed rule change that would further modify its proposed NEO margin system. Specifically, the proposal would permit OCC margin credits on equity options positions partially to offset margin requirements on NEO options, and vice versa. *See* File No. SR–OCC–86–5, Securities Exchange Act Release No. 23107 (April 8, 1986), 51 FR 12958 (April 10, 1986).

[13] *See, e.g.*, 17 CFR 240.8c–1(g).

Accordingly, OCC's proposal establishes slightly different procedures for margining these accounts:

1. Segregated long positions will not be offset against short positions in the same series of options, and are assigned no value for margin calculation purposes.

2. In calculating product group margin, premium margin credits for class groups within the product group are reduced to zero.

3. In calculating margin for the account as a whole, margin credits for class groups that are not part of product groups are reduced to zero. (For firm lien and market-maker/specialist accounts these class group credits are applied, after a 50% reduction, against other class and product group margin requirements).

B. OCC's Current Non-Equity Options System

Similar to OCC's proposed NEO margin system, OCC's current system differentiates between firm lien accounts, on the one hand, and customer accounts and firm non-lien accounts, on the other hand. Also, OCC's current system calculates the current liquidating value of a position (which is referred to as premium margin in the proposed system) and adds to that amount a "minimum amount" [14] (referred to as "additional margin" in the new system) to account for any changes in value of the position that OCC could expect during the next day. The first step under the current system is to calculate the current liquidating value of the positions in an account. All long and short positions within the same class of options are paired (*i.e.*,) long calls are paired with short calls and long puts with short puts). Next the marking prices [15] of the paired longs in the class are added together, as are the marking prices for the paired shorts. Current liquidating value for the paired positions is the difference between those two totals. If there is an excess short value, there will be a margin requirement equal to that excess. The marking price of all unpaired short positions in the class is then added to the result obtained above. That amount, for customer and firm non-lien accounts, is the total current liquidating value for the class. For firm lien accounts and market-maker/specialist accounts, one further step is required to determine total current liquidating value: The liquidating value resulting from the calculations above is reduced by 70% of the sum of (1) the excess long value, if any, for the account plus (2) the sum of the marking prices of any unpaired long contracts of the class.[16]

OCC next calculates the appropriate "minimum amount" for the positions. The "minimum amount" is a certain dollar amount per contract determined by OCC, up to a ceiling set forth in OCC Rules 601(h), (i) and (j),[17] which is intended to protect OCC against adverse options and underlying asset price changes. Within the range set out in OCC's Rules, OCC has discretion to determine the appropriate minimum amount and will vary the amount depending on whether, and the degree to which, the option is in- or out-of-the-money.[18]

The minimum amount for the paired positions in a class is the excess of the minimum amounts for the paired short positions in the class over the minimum amounts for paired long positions (*i.e.*, "net minimum"). To arrive at total margin for the class, the minimum amount for any unpaired short positions must be added to the net minimum calculated above and that sum must be added to the current liquidating value calculated above. For firm lien and market/maker specialist accounts, class margin credits are reduced by 50% and are then used to offset margin requirements for other classes.

C. Differences Between the Proposed Margin System and the Current System

There are two principal differences between the current and proposed NEO-margin systems. The first is the reliance under the proposed system on options pricing theory to calculate aggregate margin obligations. Under OCC's current

[14] The calculation of minimum amount is described, *infra*.

[15] A NEO option's marking price is, generally speaking, the cost to liquidate the option. For example, in the case of unexercised and unassigned Treasury bill options, the marking price is the product of the unit of trading and the current highest asked per unit premium quotation for options of the same series; for exercised and assigned index options, the marking price is the difference between the daily underlying security marking price and the aggregate exercise price.

[16] OCC's Rules thus permit unpaired long positions in firm non-lien and market-maker/specialist accounts to offset, to some degree, the premium margin requirement resulting from the sum of excess short positions or unpaired short positions. This reflects OCC's lien on long positions in these accounts. The 30% reduction is intended to protect OCC against possible unfavorable price changes, including a potential decrease in the liquidating value of those long positions during the next business day. Under the proposed system this reduction is replaced by the additional margin concept.

[17] The ceilings were calculated by OCC to protect OCC against 90% of the historically observed price changes in the underlying asset over a given period.

[18] *See* note 9, *supra* for a discussion of the special considerations involved with deep "out-of-the-money" short options.

VOL 51 ISS 83 AP 30 1986 UMI

margin system, margin calculations are made on a largely disaggregate basis in an essentially mechanical effort to identify varying degrees of risk represented by different kinds of offset positions. Thus, after netting out identical long and short positions in the same options class, OCC identifies different kinds of spread positions and accords them varying "spread" margins. Unhedged short positions in the options class are then margined based on the amount they are in- or out-of-the-money. The margin percentage varies for different underlying instruments based on their historical volatility. Under the proposed system, OCC attempts to measure the impact of adverse price movements on all options positions in a particular group (*i.e.*, relating to the same underlying instrument). Hence, in reliance on options price theory, margining is based on aggregate portfolio risk exposure.

The second difference is the proposed provision of margin credit between related options classes through the concept of class and product groups. The purpose of these class and product groups is to allow margin credits on certain positions to offset, at a higher ratio than the present system, margin requirements on closely related positions. Under the current system, margin is calculated on the net position for each class of options.[19] Any resultant margin credit for a class of options is reduced by 50% and can then be applied against margin requirements for other classes of options.[20] Under the new system, OCC organizes options positions into class and product groups. All options on the same underlying asset (*i.e.*, puts, calls, American-style or European-style options (are organized into class groups. Product groups are comprised of those class groups which OCC determines exhibit close price correlation.[21] The new system attempts to recognize the hedge value of various closely related positions by allowing a direct offset of credits within class groups and, within product, allowing an offset to the extent that the class groups show close price correlation. OCC will determine the correlation factor among a product group's class groups; reduce any class group credits to account for the correlation factor; then, with those reduced credits, offset margin requirements for other class groups within the product group.

[19] A "class of options" must be distinguished from "class group." OCC By-Law Art. I, Sec. 1 defines "class of options" to mean all options contracts of the same type covering the same underlying asset. "Type" means the classification of an options contract as either a put, call, American-style or European-style option. *See* OCC By-Law Art. I, Sec. 1. by contrast, "class group" means all classes of options on the same underlying asset.

[20] For customer and firm non-lien accounts under the current system, however, a margin credit on one class cannot be used to offset margin requirements for other classes to any degree because OCC does not have a lien on segregated long positions in those accounts.

[21] *See*, supra note 4, for a description of the product groups. A discussion of price correlation follows.

III. OCC's Rationale

OCC believes that the system reflects modern option price and portfolio theories and substantially reduces the potential for over- and under-margining of non-equity option positions. Although OCC's current NEO system has protected OCC adequately, OCC has sought a more refined methodology to calculate margin. OCC believes that the new system is not only more equitable for its Members (and, in general, will lead to a substantial net reduction in margin requirements for Members), but also offers OCC greater protection than the current system. Furthermore, OCC has been interested for some time in developing a system that would allow cross-margining of related options and futures. OCC believes that the new NEO system is one that can serve as an intermarket margin methodology for futures and options if and when cross-marketing becomes a reality.

IV. Statutory Standards

Under section 19(b)(2) of the Act, the Commission must approve OCC's proposed rule change if it finds OCC's proposal is consistent with the Act and Commission rules applicable to registered clearing agencies. The Commission may not approve OCC's proposal if it is unable to make such a finding.

Section 17A sets out the standards the Commission must use in reviewing proposed rule changes of registered clearing agencies. Section 17A(b)(3) provides, among other things, that a clearing agency shall not be registered by the Commission unless the Commission determines that the rules of the clearing agency are designed to foster cooperation and coordination with persons engaged in the clearance and settlement of securities transactions and to remove impediments to and perfect the mechanism of a national system. Section 17A(b)(3)(F) provides that the rules of a clearing agency must be designed to assure the safeguarding of securities and funds which are in the custody or control of the clearing agency or for which it is responsible. That subsection also provides that the clearing agency's rules be designed to promote the prompt and accurate clearance and settlement of securities transactions and, in general, to protect investors and the public interest. Furthermore, section 17A(b)(3)(I) provides that the rules of a clearing agency must not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

Section 17A also sets forth general objectives with respect to the regulation of registered clearing agencies. In the introductory provision of the Section, Congress directs the Commission to facilitate the establishment of a national system for the prompt and accurate clearance and settlement of securities transactions. Congress further charged the Commission to act in accordance with the following specific Congressional findings:

(A) The prompt and accurate clearance and settlement of securities transactions, including the transfer of record ownership and the safeguarding of securities and funds related thereto, are necessary for the protection of investors and persons facilitating transactions by and acting on behalf of investors.

(B) Inefficient procedures for clearance and settlement impose unnecessary costs on investors and persons facilitating transactions by and acting on behalf of investors.

(C) New data processing and communications techniques create the opportunity for more efficient, effective and safe procedures for clearance and settlement.

(D) The linking of all clearance and settlement facilities and the development of uniform standards and procedures for clearance and settlement will reduce unnecessary costs and increase the protection of investors and persons facilitating transactions by and acting on behalf of investors.

Section 17A(a)(2) directs the Commission in using its authority under the Act to have due regard for the public interest, the protection of investors, the safeguarding of securities and funds, and maintenance of fair competition among brokers, dealers, clearing agencies and transfer agents.

V. Discussion

OCC's margin system is designed, among other things, to protect OCC against an erosion in the value of collateral on which OCC asserts a lien. The collateral must be maintained to protect OCC in the event of member failures to meet their settlement obligations. As discussed above, the proposal would use an options pricing model to project liquidating values of

options positions, given underlying asset price movements within certain ranges, and collect margin payments within those parameters based on a worst-case scenario. An effective margin system cannot protect against the risks of all conceivable or potential market movements, however, because it would increase substantially the costs to Clearing Members of posting margin and reduce their trading activity, without providing realistic incremental safety to the clearing agency. Thus, in assessing the proposal, the Commission must determine whether OCC's system strikes a suitable balance between controlling financial exposure to OCC and imposing excessive business costs on OCC Members.

The Commission believes that OCC's decision to incorporate options price theory as the central element of its NEO margin system represents an important improvement over the current system. If the options pricing model more accurately values options positions, the potential for both under- and over-margining positions can be significantly reduced. Options pricing models are well-accepted method for valuing options and have been widely used in the market. Indeed, for options market-makers, arbitrageurs and other active options market participants, their use in pricing options, effecting trading strategies and measuring risk is virtually essential. A sound options pricing model can reasonably predict changes in an option's value by reference to changes in the value of the underlying assets.

OCC has conducted a margin adequacy study to assess the reliability of its new NEO system compared with the reliability of its present system. To make that assessment, OCC compared its Members' margin requirements during a recent period of significant volatility in which sixteen of twenty-five underlying asset price changes equalled or exceeded their margin intervals.[22] Specifically, OCC compared Members' margin requirements[23] as they would have been calculated under the new system, and as they were calculated under the old system, with OCC's actual exposure. Under the new system, thirteen more accounts would have liquidated to a deficit than under the old system. However, after application of those Member's Clearing Fund deposits, only six deficits remained. Furthermore, deficits under the new system, on average, were significantly lower than under the old system. The average deficit under the old system was $115,910 and under the new system, $88,148, a difference of $27,762 per account. There appeared to be fewer deficits under the old system only because OCC over-margined positions in Members' accounts.[24] Accordingly, the Commission believes that the new model provides more precise risk protection than the old system. Nevertheless, because the adequacy study results appear to cause OCC to place greater reliance on Member clearing fund deposits, the Commission expects OCC to continue to monitor the adequacy of the new system and to make adjustments as necessary.

A crucial element in determining potential options liquidating values under the new system, and thus, additional margin requirements, is the margin interval. As discussed above, the margin interval is the range of intra-day underlying asset price movements for which OCC will calculate potential position liquidating values. It establishes the maximum underlying asset price movement for which the proposed margin system is intended to provide protection to OCC. Too narrow a margin interval could expose OCC to significant exposure if underlying asset prices rise or fall beyond the bounds of the chosen interval. At the same time, however, too broad a margin interval could increase OCC member margin requirements substantially without corresponding safeguarding benefits.

The proposal, as amended, delegates authority to the Chairman, the President or the Margin Committee to set margin intervals. In exercising that authority, however, the Margin Committee would be obliged to act without a strict range: (1) the interval must match or exceed 95% of the daily price movements of the underlying asset in the preceding three months and (2) it must be large enough so that additional margin would not be reduced by more than 70% in the event of a price change in the underlying asset equal to the average daily price change during that period. OCC has indicated that, in applying these criteria, only two or three observations of volatility within a three-month period will be permitted to exceed current margin intervals before the intervals would be revised.

In addition to the three-month observations, OCC will also maintain one year's worth of data on underlying asset price changes and will compare the margin interval calculation for a year's worth of price changes with the margin interval calculation for three months' data. OCC believes that maintaining price change date for both periods will provide important additional protection in setting suitable margin intervals. Moreover, although constant monitoring of price changes within a three-month time frame should reliably detect recent underlying asset price change patterns, it could result in under-margining for products which recently experienced uncharacteristically low volatility.[25] On the other had, reliance soley on a one-year time frame might not give recent rapid changes in the underlying asset price the proper weight in margin interval determinations.[26] Therefore, OCC has determined, and the Commission concurs, that it is prudent to examine both short-range (three month) and long-range (twelve month) volatility and calculate margin intervals based on the period demonstrating the greatest range of underlying asset price changes.

Volatility of the price of the underlying asset is also one of the important variables in the options pricing model. OCC stated that there are two basic methods of estimating such volatility. One is to use the historical volatility of the underlying asset as measured over a given prior period. The other is to use "implied" or "market" volatility of an option, which involves plugging an option's actual price into the model and solving "backwards" for the volatility implied by that price.[27] OCC

[22] The fact that many underlying asset price changes exceeded the margin intervals is significant for two reasons. First, since margin intervals are set so they equal or exceed 95% of the underlying asset price changes for the previous three months, the fact that so many asset price changes were outside their margin intervals indeed indicates that the period was one of extraordinary market movements. Second, it is important to note that OCC will allow, at most, two or three instances of underlying asset price changes which exceed their margin intervals before it will change those margin intervals. *See* discussion, supra.

[23] OCC conducted the test for the period from February 12 through 18, 1986, a recent bull market period which was characterized by great upside movements in most products.

[24] In fact, under the old system, OCC would have collected $212,862,270 more than under the new system. Moreover, since the total potential deficit under the old system was only $267,070 less than the total potential deficit under the new system, OCC would be getting comparatively little for that greater than $200 million margin cushion.

[25] In fact, in subsequent information filed by OCC, OCC revealed that, at least for foreign currencies which have experienced dramatic price changes during the preceding year, margin levels based on one year's worth of date were significantly (20–30%) higher than three month's data.

[26] For example, a week or two of rapidly changing prices in three months' data would have a much greater effect on margin interval determinations than if it were contained in a year's worth of data.

[27] As discussed above, the options pricing model is used to calculate the theoretical worth of an

Continued

VOL 51 ISS 83 AP 30 1986 UMI

stated that because implied volatilities can vary significantly from historical volatilities and because both can vary from day-to-day, there is no single volatility measure that can be considered as a totally reliable predictor of theoretical option values across a range of underlying prices. OCC believes, however, that implied volatility represents the most recent market expectation of future volatility (the market's aggregate view based on current prices) and, as such, represents the more accurate measure.

OCC originally indicated that it intended to use the greater of one-year historical or implied volatility, believing this would provide the most conservative margin calculations. It subsequently determined, however, that historical volatility sometimes has the unintended effect of overvaluing long positions in Members' accounts. Moreover, implied volatility reflects actual market expectations of future volatility (*i.e.*, it relies on the views of market participants, not an OCC officer or committee, to assess whether short-range or long-range price movements are better indicators of likely future volatility). Hence, OCC decided to use implied volatility alone. The Commission is satisfied that using only implied volatility for non-equity options should provide OCC adequate protection in making additional margin determinations.

Another fundamental change in OCC's NEO margin system is the offsetting of margin credits and requirements among the class groups within a product group. The theory underlying allowing margin credits to offset margin requirements within product groups is that certain closely related underlying assets exhibit close price correlation. Market participants rely on these relationships in effecting arbitrage and hedging strategies involving related products.[28] OCC's proposal recognizes the close pricing relationship of related assets. At the same time, OCC's new system correctly recognizes that the hedge values of closely related assets are not perfectly correlated. A direct dollar-for-dollar offset of credits against requirements would leave OCC exposed to great risk in the event that closely related assets do not, in fact, move in tandem. Therefore, the Commission believes that the provision in OCC's Rules requiring that any class group credit (for class groups within product groups) be reduced according to the degree the class groups exhibit price correlation is appropriate. Furthermore, OCC has indicated that, although the class groups within each product group have historically exhibited a 95% or higher correlation, OCC will reduce credits as though the class groups exhibited a lower correlation as an additional safeguard.[29] The Commission is satisfied that this extra cushion will protect OCC in the event of an uncharacteristic move in the price of the underlying assets.

Finally, in addition to requiring a high statistical correlation among a product group's class groups, OCC will require that the class groups be rationally and economically related to one another. The same factors that affect one class group must be the same that affect the other class groups. For example, the indices must represent the same general segment of the market and contain enough stocks so that no one stock or industry dominates. For Treasury securities this means that they must be at the same general end of the yield curve.

Cost Implications to OCC Clearing Members

Congress, in Section 17A, instructed the Commission, among other things, to avoid encouraging clearance and settlement procedures that impose unnecessary costs on investors and persons facilitating transactions. In this regard, the Commission believes that the proposed OCC NEO margin system represents a substantial improvement over OCC's current margin system. One of OCC's principal objectives in developing this new system was to make margin contributions more economically rational for its Clearing Members. The Commission believes OCC has achieved this objective: Under the new system OCC's margin requirements more reliably predict OCC's actual exposure. At the same time, OCC's proposal should result in a significant overall reduction in margin requirements for OCC Clearing Members without adversely affecting OCC's risks. In fact, the OCC margin adequacy study described above showed that the new NEO margin system resulted in an overall reduction of Member margin requirements of $212,882,278 for the period chosen, a 23% reduction. Furthermore, for 134 out of 152 Members, margin decreased, with the largest decrease totalling $80,666,678 or 45% of that Member's actual margin requirement. (OCC noted, furthermore, that that particular Member's NEO positions still liquidated to an excess.)

The Commission recognizes that, by relying on an options pricing model that is much more sophisticated than the current margin formulae, OCC is introducing an increased level of complexity into the margin calculation process. The Commission is satisfied, however, that conversion to the new system should not result in significant start-up or continuing costs to Clearing Members. Most Member firms already use one or more options pricing models in their current trading and investment programs and OCC has indicated that it intends to make the software it will use for its calculations available to its Members. Finally, to facilitate conversion, OCC plans to provide Clearing Members, before shifting to the new system, at least two weeks of parallel calculations using both the old and new system to facilitate conversion.

OCC's new system provides a single, rational approach to calculating margin requirements, regardless of how complex Member's hedging, arbitrage and related strategies may be. The Commission therefore believes that the costs to Members of converting to the new system should not be significant and, more importantly, clearly will be outweighed by the benefit to Clearing Members of a fairer, more predictive system reducing overall margin obligations while providing superior protection to OCC.[30]

---

option when the underlying asset value and the option's volatility, among other things, are known. The model can also be used, therefore, to calculate the volatility of a particular option by: (1) plugging into the formula the underlying asset value and the historically observed option price for that underlying asset price; and (ii) solving the equation with volatility as the unknow variable.

[28] For example, a trader with a short call position in a Treasury bond option might seek to hedge that position by purchasing call options on a different Treasury bond. Similarly, a trader who believes a particular call option series on one broad-based stock index is over-priced might seek to engage in an arbitrage transaction by selling calls on a different, but closely correlated stock index.

[29] The following are the product groups OCC will establish and the haircuts among the member class groups:

(i) S & P 100, S & P 300, New York Composite, Amex Major Market and Value Line Indices — 80%

(ii) OTC Indices — 70%

(iii) 30-year Treasury Bonds and 10-year Treasury notes — 85%

(iv) 5-year Treasury notes — 90%.

[30] OCC has indicated that the proposed NEO margin system, once in place, easily could be adapted to permit cross-margining of related future and options positions. The Commission is not faced, at this time, with any specific proposals for futures/options cross-margining, although OCC has discussed such an initiative informally with both the Commodity Futures Trading Commission and the SEC. Without addressing the merits or any of the legal or regulatory questions raised by cross-margining under the federal commodities or securities laws, the Commission finds the potential of the proposed NEO margin system to be used for cross-margining to be a significant added advantage.

VI. Conclusion

For the reasons discussed above, the Commission finds that the proposed rule change in File No. SR–OCC–85–21 is consistent with the Act. In particular, the Commission finds that the proposed rule change is consistent with Section 17A and the rules and regulations applicable to clearing agencies.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change be, and hereby is approved.

By the Commission.

Dated: April 22, 1986.

John Wheeler,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-22174; File Nos. SR-PCC-85-05 and PSDTC-85-05]

Self-Regulatory Organizations; Pacific Clearing Corp. and Pacific Securities Depository Trust Co.; Order Withdrawing Proposed Rule Changes

On October 17, 1985, Pacific Clearing Corporation ("PCC") and Pacific Securities Depository Trust Company ("PSDTC") filed with the Commission, pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), proposed rule changes to permit the PCC/PSDTC to charge non-member entities for account numbers and symbols assigned by PCC/PSDTC for Pacific Stock Exchange ("PSE") audit trail purposes. Notice of the proposed rule changes was published on November 6, 1985.[1] No comments were received. By letters dated March 21, 1986, PCC and PSDTC requested that the proposed rule changes be withdrawn. PCC and PSDTC stated that after internal review and discussions with Commission staff, PCC and PSDTC concluded that because PSE must maintain the audit trail, it would be more appropriate for PSE to file, at a later date, a similar filing charging PSE Members directly for the account numbers and symbols.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change be, and hereby is, withdrawn.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

Dated: April 24, 1986.

John Wheeler,

Secretary.

[FR Doc. 86-9661 Filed 4-29-86; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-22175; File No. SR-PSE-86-05]

Filing and Accelerated Approval of Proposed Rule Change by the Pacific Stock Exchange, Inc. Relating to the Restrictions and Duties of Members and Member Clerks While on the Trading Floor

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on April 3, 1986, the Pacific Stock Exchange Incorporated ("PSE" or the "Exchange") filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Pacific Stock Exchange Incorporated ("PSE or "Exchange") proposes to amend section 39(b) and add to it Commentary .03 and Commentary .04 of Rule VI of the Rules of the Board of Governors to specify the duties and restrictions of the member clerks, as well as the responsibility of the member to adequately supervise his or her clerks.

Besides amending the body of section 39 to impose upon the member a stated duty to adequately supervise his or her clerks and to ensure that the clerks are adhering to all applicable rules, Commentaries .03 and .04 state more specifically what those clerks duties are. They will state as follows: (additions are italicized)

Commentary:

.03 While on the Trading Floor, clerks shall display at all times the badge(s) supplied to them by the Exchange. Any Market-Maker clerk who writes up an option order on the Options Floor must give his employer a copy of that order before it is delivered; the employer must retain the copy on his person until it is executed. A clerk receiving a phone order must initial, must mark as opening or closing and must time-stamp the order.

.04 A clerk shall remain at a booth assigned to his employer or assigned to his employer's clearing firm unless he is: (1) entering or leaving the trading floor; (2) transmitting or checking the status of an order or reporting a fill; (3) standing in the same crowd as his employer who is a Market Maker or Floor Broker; (4) supervising his firm's clerks if he is a floor manager; or (5) acting as a stock clerk. Only stock clerks and Market Maker or Floor Broker clerks may stand in or near a trading crowd; in the latter case, the Market Maker or Floor Broker must be present in the same trading crowd. Terminals on the trading floor (except quote terminals or those located in the booths) may not be used by a clerk unless his employer is a Market Maker or Floor Broker who is standing near the terminal.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections (A), (B) and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for the Proposed Rule Change

One of the primary objectives of Rule VI, section 39, is the restriction against non-member trading. However, because of the lack of specific restrictions placed upon the clerks of members, a misunderstanding of the clerk's limitations occurs. In this regard, the PSE proposes to define where the clerks may or may not go while on the Options Trading Floor.

In order to ensure that the member clerk is not entering orders on his own, the proposed rule change imposes requirements on the clerk to present a copy of each order to his or her employer, who must retain the copy until execution. This requirement will serve the purpose of reminding members and clerks of their respective obligations.

Finally, the Exchange has added specific language to the body of section 39, that makes this rule applicable to the members obligations to adequately supervise an employee. This language will place an additional incentive on the members' supervisory role.

---

VOL 51 ISS 83 AP 30 1986 UMI

(B) Self-Regulatory Organization's Statement on Burden on Competition.

The proposed rule change imposes no burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

Written comments on the proposed rule change were neither solicited nor received. However, the proposed rule change was considered and approved by the Board of Governors at its meeting on November 21, 1985.

III. Date of Effectiveness of the Proposed Rule Change

Because the proposed rule change is intended to clarify the duties of PSE members' clerks and thereby prevent unauthorized trading, the Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of Section 6 [1] and the rules and regulations thereunder. The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication in the **Federal Register** because the proposal amends the stated policies and practices of the PSE with respect to the administration of an existing PSE rule. In addition, the Commission notes that the proposal is substantially similar to an existing rule of the Chicago Board Options Exchange, Inc. (CBOE Rule 6.20).

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[2] that the proposed rule change is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[3]

Dated: April 24, 1986.

John Wheeler,

Secretary.

BILLING CODE 8010-01-M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Environmental Impact Statement; Wayne-Duplin-Sampson Counties, NC

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of Intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed highway project in Wayne, Duplin and Sampson Counties, North Carolina.

FOR FURTHER INFORMATION CONTACT: Roy C. Shelton, District Engineer, Federal Highway Administration, 310 New Bern Avenue, P.O. Box 26806, Raleigh, North Carolina 27611, Telephone (919) 856-4330.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the North Carolina Department of Transportation (NCDOT), will prepare an environmental impact statement (EIS) on a proposed highway project in Wayne, Duplin and Sampson Counties. The proposed action would be the construction of a fully controlled US 117 connector from the Mount Olive Bypass in Wayne County through Duplin County to proposed I-40 in Sampson County. The proposed project is needed to provide a connector to I-40 from the Mount Olive-Goldsboro vicinity. This will allow quicker access to the Wilmington area or the Raleigh area via I-40.

The project consists of widening the existing 2 lane US 117 to a 4 lane divided facility from NC 55 at Mount Olive to the existing 4 lane section at Calypso. From this point a 4 lane divided facility will be build on new location to connect with I-40.

Alternatives under consideration include (1) the "no-build," and (2) a fully controlled access highway, part of which will be on new location.

Letters describing the proposed action and soliciting comments are being sent to appropriate Federal, State and local agencies. A public meeting has been held in the study area. A public hearing will also be held. Information on the time and place of the public hearing will be provided in the local news media. The draft EIS will be available for public and agency review and comment at the time of the hearing. No formal scoping meeting is planned at this time.

To ensure that the full range of issues related to the proposed action are addressed and all significant issues identified, comments and questions concerning the proposed action should be directed to the FHWA at the address provided above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning and Construction. The provisions of OMB Circular No. A-95 regarding State and local clearinghouse review of Federal and federally assisted programs and projects apply to this program)

Roy C. Shelton,

District Engineer.

VETERANS ADMINISTRATION

Agency Form Under OMB Review

AGENCY: Veterans Administration.

ACTION: Notice.

The Veterans Administration has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). This document contains a reinstatement and lists the following information: (1) The department or staff office issuing the form, (2) the title of the form, (3) the agency form number, if applicable, (4) how often the form must be filled out, (5) who will be required or asked to report, (6) an estimate of the number of responses, (7) an estimate of the total number of hours needed to fill out the form, and (8) an indication of whether section 3504(h) of Pub. L. 96-511 applies.

ADDRESSES: Copies of the form and supporting documents may be obtained from Nancy C. McCoy, Agency Clearance Officer (732), Veterans Administration, 810 Vermont Avenue, NW., Washington, DC 20420, (202) 389-2146. Comments and questions about the items on the list should be directed to the VA's OMB Desk Officer, Dick Eisinger, Office of Management and Budget, 726 Jackson Place, NW, Washington, DC 20503, (202) 395-7316.

DATES: Comments on the information collection should be directed to the OMB Desk Officer within 60 days of this notice.

Dated: April 24, 1986.

By direction of the Administrator.

Randall H. Bryant II,

Executive Assistant to the Associate Deputy Administrator for Management.

Reinstatement

Railroad Retirement Board	5
Securities and Exchange Commission	6

1

FEDERAL DEPOSIT INSURANCE CORPORATION

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 5:11 p.m. on Thursday, April 24, 1986, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to:

(A)(1) receive bids for the purchase of certain assets of and the assumption of the liability to pay deposits made in The First National Bank of Bandera, Bandera, Texas, which was closed by the Deputy Comptroller of the Currency, Office of the Comptroller of the Currency, on Thureday, April 24, 1986; (2) accept the bid for the transaction submitted by Bandera Bank, Bandera, Texas, a newly-chartered State nonmember bank; (3) approve the applications of Bandera Bank, Bandera, Texas, for Federal deposit insurance and for consent to purchase certain assets of and assume the liability to pay deposits made in The First National Bank of Bandera, Bandera, Texas; and (4) provide such financial assistance, pursuant to section 13(c)(2) of the Federal Deposit Insurance Act (12 U.S.C. 1823(c)(2)), as was necessary to facilitate the purchase and assumption transaction; and

(B)(1) receive bids for the purchase of certain assets of and the assumption of the liability to pay deposits made in First National Bank of Irving, Irving, Texas, which was closed by the Deputy Comptroller of the Currency, Office of the Comptroller of the Currency, on Thursday, April 24, 1986; (2) accept the bid for the transaction submitted by City National Bank of Irving, Texas; and (3) provide such financial assistance, pursuant to section 13(c)(2) of the Federal Deposit Insurance Act (12 U.S.C. 1823(c)(2)), as was necessary to facilitate the purchase and assumption transaction.

In calling the meeting, the Board determined, on motion of Director C.C. Hope, Jr. (Appointive) and seconded by Mr. Robert J. Herrmann, acting in the place and stead of Director Robert L. Clarke (Comptroller of the Currency), that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not required consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting pursuant to subsections (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

Dated: April 25, 1986.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

SECURITIES AND EXCHANGE COMMISSION

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–409, that the Securities and Exchange Commission will hold the following meetings during the week of May 5, 1986:

An open meeting will be held on Tuesday, May 6, 1986, at 10:00 a.m., in Room 1C30, followed by a closed meeting.

An open meeting will be held on Wednesday, May 7, 1986, at 1:00 p.m., as previously announced in 51 FR 15859.

The Commissioners, Counsel to the Commissioners, the Secretary of the Commission, and recording secretaries will attend the closed meeting. Certain staff members who are responsible for the calendared matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c)(4), (8), (9)(A) and (10) and 17 CFR 200.402(a)(4), (8), (9)(i) and (10), permit consideration of the scheduled matters at a closed meeting.

Commissioner Grundfest, as duty officer, voted to consider the items listed for the closed meeting in a closed session.

The subject matter of the open meeting scheduled for Tuesday, May 6, 1986, at 10:00 a.m., will be:

1. Consideration of whether to issue a release adopting technical amendments to Rule 3A–02 of Regulation S–X, "Consolidated financial statements of the registrant and its subsidiaries." For further information, please contact Robert J. Kueppers at (202) 272–2130.

2. Consideration of whether to approve staff recommendations which would temporarily suspend the requirements to use current prices in applying the ceiling test under the full cost accounting method. Under these recommendations, registrants using other than current prices in applying the test would be required to provide certain disclosures. For further information, please contact John W. Albert at (202) 272–2130 or James W. Ford, Jr., at (202) 272–2553.

3. Consideration of whether to adopt amendments to Rule 31–1 under the Securities Exchange Act of 1934 to exempt OTC/Exchange-Traded NMS Securities transactions from payment of Section 31 fees. For further information, please contact Leland H. Goss, at (202) 272–2827.

4. Consideration of whether to authorize the issuance of a Request for Proposals ("RFP") for the operational Edgar system. The RFP would require the capability for electronic filing and processing of most filings processed by the Divisions of Corporation Finance and Investment Management. In addition, the RFP would require the capability for widespread access by the public to the Edgar data base. For further information, please contact David Copenhafer at (202) 272–3794.

The subject matter of the closed meeting scheduled for Tuesday, May 6, 1986, following the 10:00 a.m. open meeting, will be:

Regulatory matter bearing enforcement implications.
Settlement of injunctive action.
Institution of injunctive actions.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Jacqueline Higgs at (202) 272–2149.

John Wheeler,

Secretary.

April 25, 1986.

Part II

Department of Health and Human Services

Food and Drug Administration

21 CFR Parts 335 and 369

Antidiarrheal Drug Products for Over-the-Counter Human Use; Tentative Final Monograph; Proposed Rulemaking

UMI

VOL 51 ISS 83 AP 30 1986 UMI

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Parts 335 and 369

[Docket No. 78N-0360]

Antidiarrheal Drug Products for Over-the-Counter Human Use; Tentative Final Monograph

AGENCY: Food and Drug Administration.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Food and Drug Administration (FDA) is issuing a notice of proposed rulemaking in the form of a tentative final monograph that would establish conditions under which over-the-counter (OTC) antidiarrheal drug products (products that treat or control the symptoms of diarrhea) are generally recognized as safe and effective and not misbranded. FDA is issuing this notice of proposed rulemaking after considering the report and recommendations of the Advisory Review Panel on OTC Laxative, Antidiarrheal, Emetic, and Antiemetic Drug Products and public comments on an advance notice of proposed rulemaking that was based on those recommendations. This proposal deals only with antidiarrheal drug products and is part of the ongoing review of OTC drug products conducted by FDA.

DATES: Written comments, objections, or requests for oral hearing on the proposed regulation before the Commissioner of Food and Drugs by June 30, 1986. New data by April 30, 1987. Comments on the new data by June 30, 1987. These dates are consistent with the time periods specified in the agency's revised procedural regulations for reviewing and classifying OTC drugs (21 CFR 330.10). Written comments on the agency's economic impact determination by August 28, 1986.

ADDRESS: Written comments, objections, new data, or requests for oral hearing to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: William E. Gilbertson, Center for Drugs and Biologics (HFN-210), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-295-8000.

SUPPLEMENTARY INFORMATION: In the Federal Register of March 21, 1975 (40 FR 12902) FDA published, under § 330.10(a)(6) (21 CFR 330.10(a)(6)), an advance notice of proposed rulemaking to establish a monograph for OTC laxative, antidiarrheal, emetic, and antiemetic drug products, together with the recommendations of the Advisory Review Panel on OTC Laxative, Antidiarrheal, Emetic, and Antiemetic Drug Products, which was the advisory review panel responsible for evaluating data on the active ingredients in these drug classes. Interested persons were invited to submit comments by June 19, 1975. Reply comments in response to comments filed in the initial comment period could be submitted by July 18, 1975.

In a notice published in the Federal Register of March 21, 1980 (45 FR 18336), the agency advised that it had reopened the administrative record for OTC antidiarrheal drug products to allow for consideration of data and information that had been filed in the Dockets Management Branch after the date the administrative record previously had officially closed. The agency concluded that any new data and information filed prior to March 21, 1980 should be available to the agency in developing a proposed regulation in the form of a tentative final monograph.

In accordance with § 330.10(a)(10), the data and information considered by the Panel were put on public display in the Dockets Management Branch (HFA-305), Food and Drug Administration (address above), after deletion of a small amount of trade secret information. Data and information received after the administrative record was reopened have also been put on display in the Dockets Management Branch. In response to the advance notice of proposed rulemaking, 10 drug manufacturers, 2 trade associations, and 1 State planning and budget office submitted comments on antidiarrheal drug products. Copies of the comments received are on public display in the Dockets Management Branch.

The advance notice of proposed rulemaking, which was published in the Federal Register on March 21, 1975 (40 FR 12902), was designated as a "proposed monograph" in order to conform to terminology used in the OTC drug review regulations (21 CFR 330.10). Similarly, the present document is designated in the OTC drug review regulations as a "tentative final monograph." Its legal status, however, is that of a proposed rule. In this tentative final monograph (proposed rule) to establish Part 335 (21 CFR Part 335) FDA states for the first time its position on the establishment of a monograph for OTC antidiarrheal drug products. Final agency action on this matter will occur with the publication at a future date of a final monograph, which will be a final rule establishing a monograph for OTC antidiarrheal drug products.

This proposal constitutes FDA's tentative adoption of the Panel's conclusions and recommendations on OTC antidiarrheal drug products as modified on the basis of the comments received and the agency's independent evaluation of the Panel's report. Modifications have been made for clarity and regulatory accuracy and to reflect new information. Such new information has been placed on file in the Dockets Management Branch (address above). These modifications are reflected in the following summary of the comments and FDA's responses to them.

The OTC procedural regulations (21 CFR 330.10) now provide that any testing necessary to resolve the safety or effectiveness issues that formerly resulted in a Category III classification, and submission to FDA of the results of that testing or any other data, must be done during the OTC drug rulemaking process before the establishment of a final monograph. Accordingly, FDA will no longer use the terms "Category I" (generally recognized as safe and effective and not misbranded), "Category II" (not generally recognized as safe and effective or misbranded), and "Category III" (available data are insufficient to classify as safe and effective, and further testing is required) at the final monograph stage, but will use instead the terms "monograph conditions" (old Category I) and "nonmonograph conditions" (old Categories II and III). This document retains the concepts of Categories I, II, and III at the tentative final monograph stage.

The agency advises that the conditions under which the drug products that are subject to this monograph would be generally recognized as safe and effective and not misbranded (monograph conditions) will be effective 12 months after the date of publication of the final monograph in the Federal Register. On or after that date, no OTC drug product that is subject to the monograph and that contains a nonmonograph condition, i.e., a condition that would cause the drug to be not generally recognized as safe and effective or to be misbranded, may be initially introduced or initially delivered for introduction into interstate commerce unless it is the subject of an approved application. Further, any OTC drug product subject to this monograph that is repackaged or relabeled after the effective date of the monograph must be in compliance with the monograph regardless of the date the product was initially introduced or initially delivered for introduction into interstate commerce. Manufacturers are encouraged to comply voluntarily with the monograph at the earliest possible date.

In the advance notice of proposed rulemaking for OTC antidiarrheal drug products (published in the Federal Register of March 21, 1975; 40 FR 12902), the agency suggested that the conditions included in the monograph (Category I) be effective 30 days after the date of publication of the final monograph in the Federal Register and that the conditions excluded from the monograph (Category II) be eliminated from OTC drug products effective 6 months after the date of publication of the final monograph, regardless of whether further testing was undertaken to justify their future use. Experience has shown that relabeling of products covered by the monograph is necessary in order for manufacturers to comply with the monograph. New labels containing the monograph labeling have to be written, ordered, received, and incorporated into the manufacturing process. The agency has determined that it is impractical to expect new labeling to be in effect 30 days after the date of publication of the final monograph. Experience has shown also that if the deadline for relabeling is too short, the agency is burdened with extension requests and related paperwork.

In addition, some products will have to be reformulated to comply with the monograph. Reformulation often involves the need to do stability testing on the new product. An accelerated aging process may be used to test a new formulation; however, if the stability testing is not successful, and if further reformulation is required, there could be a further delay in having a new product available for manufacture.

The agency wishes to establish a reasonable period of time for relabeling and reformulation in order to avoid an unnecessary disruption of the marketplace that could not only result in economic loss, but also interfere with consumers' access to safe and effective drug products. Therefore, the agency is proposing that the final monograph be effective 12 months after the date of its publication in the Federal Register. The agency believes that within 12 months after the date of publication most manufacturers can order new labeling and reformulate their products and have them in compliance in the marketplace. However, if the agency determines that any labeling for a condition included in the final monograph should be implemented sooner, a shorter deadline may be established. Similarly, if a safety problem is identified for a particular nonmonograph condition, a shorter deadline may be set for removal of that condition from OTC drug products.

All "OTC Volumes" cited throughout this document refer to the submissions made by interested persons pursuant to the call-for-data notice published in the Federal Register of February 8, 1973 (38 FR 3614) or to additional information that has come to the agency's attention since publication of the advance notice of proposed rulemaking. The volumes are on public display in the Dockets Management Branch.

I. The Agency's Tentative Conclusions on the Comments

A. General Comments

1. One comment objected to the Panel's recommendation that the quantity of each active ingredient be stated in OTC drug product labeling, on the grounds that section 502(e)(1)(A) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 352(e)(1)(A)) provides for quantitative ingredient labeling only for prescription drugs.

The agency agrees that other than for certain specifically named substances, the act currently requires quantitative ingredient labeling only for prescription drugs. The tentative final monograph does not require active ingredient labeling. However, the agency advises that the Panel's recommendation is consistent with that of the National Advisory Drug Committee, which advocates that all OTC drugs be labeled with a quantitative statement of the active ingredients. It is also consistent with the recommendation in 21 CFR 330.1(j) that the labeling of an OTC drug product contain the quantitative amount of each active ingredient, expressed in terms of the dosage unit stated in the directions for use.

Drug manufacturers who are members of The Proprietary Association, the trade association that represents approximately 85 OTC drug manufacturers who reportedly market between 90 and 95 percent of the volume of all OTC drug products sold in the United States, have been voluntarily including the quantities of active ingredients on OTC drug labels for a number of years (Ref. 1). The agency commends these voluntary efforts and urges all other OTC drug manufacturers to voluntarily label their products in accordance with The Proprietary Association's guidelines.

Reference

(1) "Proprietary Association Adopts Voluntary Disclosure of Inactive Ingredients," News Release, The Proprietary Association, Washington, DC, May 14, 1984, copy included in OTC Volume 00DTFM.

2. Several comments objected to the Panel's recommendation that all inactive ingredients be listed on the labeling, arguing that such a listing would be meaningless, confusing, and misleading to most consumers.

The agency advises that neither the March 21, 1975 advance notice of proposed rulemaking nor the monograph in this tentative final rule requires that all inactive ingredients be listed in OTC drug labeling. However, the agency agrees with the Panel that listing of inactive ingredients in OTC drug product labeling would be in the public interest. Consumers with known allergies or intolerances to certain ingredients would then be able to identify substances that they may wish to avoid.

The Proprietary Association recently announced that its member companies would voluntarily begin to list inactive ingredients in the labeling of OTC drug products under guidelines established by the Assoication (Ref. 1). The agency commends these voluntary efforts and urges all other OTC drug manufacturers to voluntarily label their products in accordance with The Proprietary Association's guidelines.

(1) "Proprietary Association Adopts Voluntary Disclosure of Inactive Ingredients," News Release, The Proprietary Association, Washington, DC, May 14, 1984, copy included in OTC Volume 00DTFM.

3. Two comments contended that FDA does not have the authority to establish substantive rules.

The agency addressed this issue in paragraphs 85 through 91 of the preamble to the procedures for classification of OTC drug products, published in the Federal Register of May 11, 1972 (37 FR 9464) and in paragraph 3 of the preamble to the tentative final monograph for antacid drug products, published in the Federal Register of November 12, 1973 (38 FR 31260). FDA reaffirms the conclusions stated there. Subsequent court decisions have confirmed the agency's authority to issue substantive regulations by rulemaking. See, e.g., *National Nutritional Foods Association* v. *Weinberger*, 512 F.2d 688, 696-98 (2d Cir. 1975) and *National Association of Pharmaceutical Manufacturers* v. *FDA*, 487 F. Supp. 412 (S.D.N.Y. 1980), *aff'd*, 637 F.2d 887 (2d Cir. 1981).

4. Several comments urged a greater role for pharmacists in the sale of OTC drugs. One comment recommended that OTC drugs be available only through

VOL 51 ISS 83 APR 30 1986 UMI

pharmacies, and two suggested that any labeling which suggests consultation with a physician should mention a pharmacist as a viable alternative.

These issues were fully discussed in the preamble to the proposal to revise requirements for drug interaction warnings on OTC drug products (see the Federal Register of June 4, 1974 (39 FR 19860)). These views will not be restated here. However, the agency notes that § 330.1(g) (21 CFR 330.1(g)) requires that labeling for OTC drugs include a warning to seek professional assistance in case of accidental overdose. The pharmacist is one of the health professionals that a consumer might choose to consult.

5. One comment noted that on several pages of the Panel's recommended monograph the abbreviation "gm" is used for gram, yet 21 CFR 201.62(1) (formerly 21 CFR 1.102(d)) states that the only abbreviation which may be used for gram is "g."

The situation outlined in the comment was an editorial oversight. The OTC drug labeling regulations cited in the comment permit the use of "g" as the only abbreviation for gram. For clarity, metric units have been fully written out in this tentative final monograph.

6. One comment stated that the Panel's recommendations violate the objectives and philosophy of the OTC drug review and that the Panel failed to discharge its obligations by placing many long-established antidiarrheal ingredients and antidiarrheal combinations in Category III. Other comments contended that the Panel did not consider the extent-of-use and consumer-acceptance data or the professional opinion surveys of physicians and pharmacists submitted for products containing ingredients placed in Category III.

The agency believes that the Panel's recommendations for OTC antidiarrheal drug products are fully in accord with the objectives of the OTC drug review as stated in the applicable regulations (21 CFR Part 330). The Panel reviewed all of the data submitted for each antidiarrheal active ingredient, including marketing histories and information on the extent of use by consumers. In placing antidiarrheal ingredients or combinations in Category III, the Panel concluded that the available data were insufficient to permit classification in Category I or Category II at the time it reviewed those drugs. The agency has also evaluated these data, marketing histories, and information on extent of use, as well as more recent data and information, in reaching its conclusions in this tentative final monograph.

B. General Comments on Antidiarrheal Drug Products

7. One comment disagreed with the definition of "diarrhea" recommended by the Panel in § 335.3(a): "The abnormally frequent passage of watery stools, self-limiting (24 to 48 hours) usually with no identifiable cause." The comment argued that this definition is vague and does not provide any assistance for individuals interested in designing protocols and conducting tests for antidiarrheals. The comment added that evaluations of diarrhea are best determined by a subjective, case-by-case approach and that the definition of the condition should be related to the individual and his or her personal bowel habits, not to the "average" person. The comment proposed the following definition of diarrhea: "An increase in the frequency, fluidity, or volume of bowel movements, relative to the usual habit of each individual."

The agency agrees that the Panel's definition of diarrhea does not provide criteria for use in designing protocols or conducting clinical trials. Therefore, the definition of diarrhea in this tentative final monograph has been revised to read: "*Diarrhea.* A condition characterized by increased frequency of excretion of loose, watery stools (three or more daily) during a limited period (24 to 48 hours), usually with no identifiable cause." This revised definition suggests criteria, i.e., decreased frequency of excretion and/or improved consistency of stools, which can be used in designing clinical protocols to establish the effectiveness of an OTC antidiarrheal drug. In addition, the definition of antidiarrheal has been revised to read: "*Antidiarrheal.* A drug that can be shown by objective measurement to treat or control (stop) the symptoms of diarrhea." The agency believes that this emphasis on relief of symptoms more accurately reflects the expectations for an OTC antidiarrheal and is therefore helpful in designing testing protocols for OTC antidiarrheal drugs.

8. One comment suggested that the term "high fever" in the Panel's recommended warning in § 335.50(c)(1), "Do not use . . . in the presence of high fever" . . .," be clarified by stating a specific temperature, i.e., over 102° F (oral) or 103° F (rectal), in order to provide specific directions.

The agency believes that the use of the term "high fever" is inappropriate for inclusion in the warning. OTC antidiarrheal drug products are intended to be used for the treatment of acute nonspecific diarrhea that is not associated with fever (any temperature above 98.6 °F), because the presence of fever may be indicative of a serious condition that is not amenable to treatment with such products. Because consumers understand the term "fever" to mean any temperature over 98.6° F, there is no need to specify a specific temperature. Therefore, the agency is proposing in this tentative final monograph that the warning in § 335.50(c)(1) read as follows: "Do not use . . . in the presence of fever. . . ."

9. Two comments stated that the Panel's request that the mechanism of action for antidiarrheal ingredients be determined is unnecessary because, as the Panel recognized, there are many safe and effective ingredients whose precise mechanisms of action are unknown (40 FR 12934). One comment added that as long as a product can be shown to be safe and effective, there should be no requirement to demonstrate a precise mechanism of action.

The agency agrees that the precise mechanism of action of an antidiarrheal ingredient need not be demonstrated as long as there is sufficient evidence of safety and effectiveness for its intended use. However, development of such information is certainly encouraged.

10. One comment suggested that the Panel's use of the phrase "to increase the bulk of the stool" as an example of recommended labeling might be misleading when used in the context of antidiarrheal products, because that description is usually associated with laxatives.

The Panel used the phrase "to increase the bulk of the stool" only as an example and did not include it in the labeling requirements for antidiarrheal drug products in § 335.50(a) of its recommended monograph. However, the agency believes that antidiarrheal drug products should be clearly labeled to reflect their intended results because not all antidiarrheal active ingredients have the same effect. Some ingredients may actually control or stop diarrhea. Other ingredients may only improve the consistency of the bowel movement or reduce the number of bowel movements without actually affecting other factors contributing to the diarrheal process, such as increased water content and weight of stools or loss of electrolytes, bile salts, etc. There is no objection to the OTC marketing of antidiarrheal drug products that provide only symptomatic relief of diarrhea because providing symptomatic relief is the intent of these products. However, it is important that consumers be told which action the drug exerts. Therefore, the agency is recommending the following indications for use for these drug products: (1) "For the treatment of diarrhea" or "Controls (stops) diarrhea"; (2) "Reduces the number of bowel movements in diarrhea"; (3) "Improves consistency of loose, watery bowel movements in diarrhea." One or more of these indications may be included in the labeling of OTC antidiarrheal drug products, depending on the results of studies conducted on the ingredient contained in the product. The agency also recognizes that there are other symptoms that are secondary to diarrhea, such as abdominal pain or cramps, and that some antidiarrheal ingredients may also act to relieve these symptoms. The agency has no objection to including information of this type in the indications for OTC antidiarrheal drug products, provided that the results of studies conducted on the ingredients contained in the product support this inclusion. However, the agency does not believe that relief of symptoms that are secondary to diarrhea can be considered as primary indications for use of an OTC antidiarrheal drug product. Therefore, indications for relief of symptoms secondary to diarrhea will be allowed in the labeling of an OTC antidiarrheal drug product only when the product meets the criteria of one or more of the above three indications for OTC antidiarrheal drug products being proposed in this tentative final monograph. The tentative final monograph specified the allowable indications proposed for each ingredient included in the monograph.

C. Comments on Specific Antidiarrheal Active Ingredients

11. One comment asserted that the Panel's recommended pediatric dosage statement for polycarbophil, which provides a dosage for children 3 years of age and under, is in conflict with the Panel's general warning in § 335.50(c)(1), which limits the use of antidiarrheals to children 3 years of age and older unless directed by a physician. The comment urged that the general warning as applied to polycarbophil be revised to delete the phrase "or infants or children under 3 years unless directed by a physician."

The comment is correct that the Panel's recommended pediatric dosage statement for polycarbophil is in conflict with its general warning. The Panel's general warning is in accord with the agency's recommended warning in § 369.20 (21 CFR 369.20), which limits the use of antidiarrheal drug products to children 3 years of age and older, unless directed by a physician. The agency has, therefore, determined that pediatric doses of this ingredient for children under 3 years of age will not appear in the OTC drug labeling, but will be included only in professional labeling. Consumers will be instructed in the OTC drug labeling to consult a doctor for this dosage information.

12. Two comments contended that the studies cited by the Panel in support of the Category I classification of polycarbophil in the treatment of diarrhea do not meet the Panel's own criteria for establishing effectiveness. One of the comments added that the Panel had apparently applied a dual standard of classification in placing polycarbophil and the opiates in Category I although they have not been shown to be effective in double-blind studies for the list of objective parameters prescribed by the Panel for kaolin and pectin. The comment contended that there are no differences in the clinical endpoints which would account for this apparent dual standard for kaolin and pectin vis-a-vis polycarbophil and the opiates. A third comment defended the studies on polycarbophil as having been performed by well-qualified investigators whose findings were carefully documented and published in reputable medical journals. The comment contended that no other OTC antidiarrheal ingredient has been the subject of such competent and well-documented evaluation.

The agency has reviewed the studies cited by the Panel to support the Category I classification of polycarbophil (40 FR 12926). Although the comment is correct that the polycarbophil studies do not demonstrate that polycarbophil is effective for all the objective parameters listed by the Panel, the studies do provide objective evidence that polycarbophil is effective in improving consistency of watery bowel movements and in decreasing the frequency of bowel movements. As discussed in comment 10 above, the agency recognizes that not all OTC antidiarrheals have the same effect. The agency has no objection to the OTC marketing of products which relieve only certain symptoms of diarrhea provided the labeling of the product clearly indicates the expected action. Although there are similarities between the data for polycarbophil and the data for kaolin and pectin, as described in comment 23 below, the kaolin-pectin data have certain deficiencies that prevent conclusions from being drawn at this time. If those deficiencies are remedied, then kaolin and pectin may be placed in Category I. The agency believes that the Panel did not apply a dual standard in its classifications and concurs with the Panel's conclusions. As discussed in comment 20 below, because opiate ingredients may be marketed OTC only in combination in accordance with § 329.20(a)(1) and because no combinations of opiates with other ingredients are in Category I at this time, opiate ingredients are placed in Category III in this document.

13. Two comments questioned whether the calcium salt of polycarbophil should be included in the monograph, noting that two of the studies cited by the Panel in support of its Category I classification of polycarbophil involved calcium polycarbophil (40 FR 12926). A third comment submitted data elucidating the role of the calcium in calcium polycarbophil and supporting the safety and effectiveness of this ingredient (Ref. 1). The comments explained that inclusion of calcium polycarbophil in the monograph would permit the formulation of polycarbophil in liquid as well as solid dosage forms, because calcium polycarbophil is not hydrosorptive and can be used in a liquid medium.

Calcium polycarbophil is a simple salt of polycarbophil in which calcium has been substituted for the acidic hydrogen ions. Following ingestion, the calcium salt is converted to acidic polycarbophil when the calcium is replaced by hydrogen ions of the stomach acid. Polycarbophil is then made available to exert its maximal hydrosorptive effect during intestinal transit (Ref. 2). Because the calcium ion does not alter either the chemical or pharmacological effect of polycarbophil, calcium polycarbophil can be considered to be therapeutically identical to polycarbophil (Ref. 1). Therefore, the agency is proposing to include calcium polycarbophil in the tentative final monograph.

(2) Rutledge, M.L., et al., "Clinical Comparison of Calcium Polycarbophil and Kaolin-Pectin Suspension in the Treatment of Acute Childhood Diarrhea," *Current Therapeutic Research*, 23:443–447, 1978.

14. One comment contended that polycarbophil, which is a hydrosorptive agent, might be contraindicated in treatment of diarrhea, especially in children, because of the danger that hydrosorption might heighten systemic electrolyte loss and dehydration. The comment further contended that the studies on which the Panel based its evaluation of polycarbophil did not adequately measure stool water content or electrolyte loss.

VOL 51 ISS 83 AP 30 1986 UMI

The comment submitted no data to support its contention that polycarbophil, as a hydroscorptive agent, might heighten systemic electrolyte loss and dehydration. However, because of the danger of rapid electrolyte imbalance and dehydration in infants and children as a result of diarrhea, the agency believes that no OTC antidiarrheal drug product should be used in children under the age of 3 years, or for more than 2 days in anyone over 3 years of age, except under the advice of a physician. Although the studies cited by the Panel did not adequately measure stool water content or electrolyte loss, no clinically significant side effects were reported either when polycarbophil was used in children for the treatment of acute nonspecific diarrhea (Refs. 1 and 2) or in adults for chronic constipation for up to 2 years (Ref. 3). Moreover, one of the studies cited by the Panel suggests that polycarbophil exhibits the capacity to decrease the abnormally rapid transit of the intestinal contents (Ref. 4). This would possibly allow for the increased absorption of water and electrolytes back into the systemic circulation. Therefore, the agency concludes that there is no basis for the contraindication of polycarbophil in treating symptoms of diarrhea.

15. One comment cited a clinical study submitted to the Panel in 1974 (Ref. 1) and submitted a new clinical study (Refs. 2, 3, and 4) in support of the effectiveness of attapulgite. The comment requested that attapulgite be reclassified from Category III to Category I for use as an OTC antidiarrheal.

The agency has evaluated all of the data and concludes that they are adequate to support the reclassification of attapulgite from Category III to Category I for use as an OTC antidiarrheal.

In the 1974 double-blind randomized placebo-controlled study, the effectiveness of tablets containing 600 milligrams (mg) attapulgite and 50 mg pectin was compared with placebo in subjects with acute gastroenteritis and diarrhea, characterized by abdominal pain and/or discomfort with watery bowel movements (Ref. 1). Four tablets were administered initially with four tablets to be taken after each diarrheal stool. Patients were given report forms to record frequency and consistency of stools as well as frequency of cramps and the duration and severity of pain.

This study was originally submitted to the Advisory Review Panel on OTC Laxative, Antidiarrheal, Emetic and Antiemetic Drug Products, which concluded that the study showed the combination of attapulgite and pectin to be more effective than placebo. However, because there was no assessment of individual ingredients, the study cannot be used to demonstrate the effectiveness of attapulgite alone.

The newly submitted clinical study (Refs. 2, 3, and 4) is identical in format to the 1974 study (Ref. 1), except that it employed a dose of 2 tablets each containing 600 mg attapulgite alone versus placebo. Fifty patients were randomly assigned attapulgite or placebo at the initial visit. Results of the study indicated that the subjects of the active group had significantly fewer bowel movements, better stool consistency, and fewer cramps than the subjects of the placebo group ($p < .0001$). Based on the results of this study, the agency is proposing the following indications for this ingredient: (1) "Reduces the number of bowel movements in diarrhea," and (2) "Improves consistency of loose, watery bowel movements in diarrhea." The following indication may also be used in the labeling of attapulgite products: "Relieves cramps in diarrhea." As discussed in comment 10 above, this indication may be used in addition to one or both of the other indications but may not be used alone.

Although the 1974 study utilized a higher dosage of attapulgite, the agency believes that based on the Panel's recommendations, the results of the new study, and the dosages currently promoted on the marketed products submitted for evaluation, the use of attapulgite should be limited to the following oral dosage:

Adults and children 12 years of age and over: oral dosage is 1,200 mg after initial bowel movement, 1,200 mg after each subsequent bowel movement, not to exceed 6,400 mg in 24 hours. Children 6 to under 12 years of age: oral dosage is 600 mg after initial bowel movement, 600 mg after each subsequent bowel movement, not to exceed 4,200 mg in 24 hours. Children 3 to under 6 years of age: oral dosage is 300 mg after initial bowel movement, 300 mg after each subsequent bowel movement, not to exceed 2,100 mg in 24 hours.

The agency's detailed comments and evaluations on the data are on file with the Dockets Management Branch (Ref. 5).

16. One comment stated that it would be difficult or impossible to demonstrate the effectiveness of an antidiarrheal agent in vivo in humans by objective double-blind studies because of the self-limiting nature (24 to 48 hours) of acute nonspecific diarrhea. The comment added that, because of the difficulty in conducting clinical studies, evidence developed in double-blind, placebo-controlled primate studies using kaolin and pectin should be sufficient to establish the effectiveness of kaolin and pectin alone and in combination as antidiarrheal agents. The comment pointed out that FDA has endorsed other types of efficacy tests (e.g., an in vitro efficacy test in the monograph for OTC antacid drug products) in situations where human studies are difficult to perform.

This comment is incorrect. Adequate clinical studies in acute nonspecific diarrhea have been carried out in humans and have been submitted to the agency. (See comment 23 below.) Thus, there is no reason to rely solely on primate studies to reach conclusions about the effectiveness of an antidiarrheal drug in humans. The agency concludes that clinical studies in humans are required to establish the effectiveness of OTC antidiarrheal drugs.

17. One comment submitted a clinical study (Ref. 1) and detailed statistical analyses of that study (Refs. 2 and 3) in support of the effectiveness of bismuth subsalicylate. The comment requested that bismuth subsalicylate be reclassified from Category III to Category I for use as an OTC antidiarrheal.

The agency has evaluated all of the data and concludes that they are insufficient to support the reclassification of bismuth subsalicylate from Category III to Category I for use as an OTC antidiarrheal.

In the clinical study submitted the effectiveness of bismuth subsalicylate was compared with placebo in the symptomatic treatment of diarrhea in a double-blind placebo-controlled study among students attending a Mexican University. The study was conducted in two sequential 48 hour phases. Students in Phase I were given a 30-milliliter (mL) dose of a bismuth subsalicylate preparation every ½ hour for eight doses for a total dose of 4.2 g, and students in Phase II were given twice this dose. The objective parameters assessed were frequency, consistency, weight, and water content of the stools. Results of the study indicate that frequency was the only objective parameter that improved after use of the drug. The data were analyzed for the periods 4 to 24 hours and 4 to 48 hours after initiation of the study. For the reasons stated below, the Phase II study will not be further evaluated.

Although no statistically significant difference was shown in the Phase I study for the 4 to 48 hour period, analysis of the data suggests that bismuth subsalicylate may reduce the number of bowel movements in diarrhea when compared to placebo for the time period 4 to 24 hours. However, because no formal protocol was submitted with the study, the agency is unable to determine whether the analyzes performed are consistent with the initial intended objectives of the study. The agency does not believe that it is appropriate to exclude the 0 to 4 hour data from the analysis or to focus on any particular time period, considering that the study was conducted over a 2-day period. The agency's detailed evaluation and comments on the data are on file in the Dockets Management Branch (Refs. 4 through 7).[1]

Although the Panel's report states that bismuth subsalicylate is safe for OTC use in amounts up to 8g (40 FR 12930), the agency believes, for the reasons stated below, that should bismuth subsalicylate be included in the final monograph its dosage should be limited to the following: Adults and children 14 years of age and over: oral dosage is 525 mg every ½ to 1 hour, not to exceed 4,200 mg in 24 hours. Children 10 to under 14 years of age: oral dosage is 350 mg every ½ to 1 hour, not to exceed 2,800 mg in 24 hours. Children 6 to under 10 years of age: oral dosage is 175 mg every ½ to 1 hour, not to exceed 1,400 mg in 24 hours. Children 3 to under 6 years of age: oral dosage is 87.5 every ½ to 1 hour, not to exceed 700 mg in 24 hours. Children under 3 years of age: consult a doctor.

Recent reports on the literature (Refs. 8 through 11) indicate that the salicylate moiety is readily absorbable from bismuth subsalicylate. For this reason, the agency believes the higher dose used in the Phase II study presents a potential for toxicity without a compensating therapeutic benefit. Although the amount of salicylate absorbed from the lower dose used in the Phase I study does not present a safety problem when bismuth subsalicylate is taken alone, the agency is concerned that if products containing this drug were taken with other salicylate-containing products, such as aspirin, the increased blood plasma salicylate concentration could result in adverse side effects. Additionally, the salicylate in bismuth subsalicylate is readily absorbable and salicylates are known to interact with certain other drugs, e.g., anticoagulants, uricosuric drugs. For these reasons, should bismuth subsalicylate be included in the final monograph, the agency will consider requiring the following warning in the monograph for all products containing bismuth subsalicylate: "This product contains salicylate. Do not take this product with other salicylate-containing products, such as aspirin, unless directed by a doctor. If you are taking a prescription drug for anticoagulation (thinning the blood), diabetes, gout, or arthritis, do not take this product unless directed by a doctor." In addition, because bismuth-containing products cause the stools to darken in color and cause a temporary darkening of the tongue (Refs. 12, 13, and 14), the agency will also consider requiring that the following statement be included in the labeling of all products containing bismuth subsalicylate: "This product may cause the stool to darken or cause a temporary darkening of the tongue."

[1] Industry has responded to FDA's concern regarding the need for additional data and is in the process of conducting additional studies (Comment No. PR0002, Docket No. 78N–036D, Dockets Management Branch).

18. One comment suggested that the entire paragraph dealing with bismuth subsalicylate labeling claims (40 FR 12931) should be stricken from the Panel's report because the Panel confused the use of a single ingredient for multiple symptoms and the use of multiple ingredients for multiple symptoms. The comment stated that although bismuth subsalicylate is used for treating symptoms of nausea, indigestion, upset stomach, and diarrhea, it is not necessary for a patient to suffer from more than one of these symptoms concurrently for bismuth subsalicylate to be used rationally.

The agency agrees that it is not necessary for a patient to suffer concurrently from more than one of the symptoms described above in order for bismuth subsalicylate to be used rationally. However, the use of bismuth subsalicylate as an antidiarrheal is the only claim discussed in this document. Claims for the treatment of other symptoms, such as nausea, indigestion, or upset stomach, may be included in labeling if the ingredient is proven

VOL 51 ISS 83 AP 30 1986 UMI

effective for each symptom in other rulemakings. The use of bismuth subsalicylate for the treatment of nausea was discussed in the tentative final monograph for OTC antiemetic drug products, published in the Federal Register of July 13, 1979 (44 FR 41084). Bismuth subsalicylate used for the treatment of upset stomach due to overindulgence in food and alcohol was reviewed by the Advisory Review Panel on OTC Miscellaneous Internal Drug Products, in its advance notice of proposed rulemaking published in the Federal Register of October 1, 1982 (47 FR 43540).

19. One comment stated that the Panel's classification of a product containing *Lactobacillus acidophilus* and sodium carboxymethylcellulose as a combination was in error, noting that the initial submission to the Panel did not make it clear that the sodium carboxymethylcellulose acts as a pharmaceutical necessity by coating and matrixing the lactobacillus organisms to protect them from stomach acid and to transport them to the intestine.

The agency has reviewed the submission to the Panel and notes that sodium carboxymethylcellulose was listed along with *Lactobacillus acidophilus* as an ingredient in the product. Although the label did not specifically claim sodium carboxymethylcellulose as an active ingredient, the Panel assumed it was an active ingredient and reviewed it as such. Although the comment makes it clear that the sodium carboxymethylcellulose in the product is present as a pharmaceutical necessity, the Panel recognized that sodium carboxymethylcellulose can increase the viscosity of fluids and, therefore, might be rational for inclusion in antidiarrheal drug products. However, data were insufficient to establish effectiveness of this ingredient, and the Panel classified it in Category III. The agency concurs with the Panel's conclusions. While the agency has no objection to the use of sodium carboxymethylcellulose as an inactive ingredient in antidiarrheal drug products, the products should be labeled to avoid the appearance that sodium carboxymethylcellulose is an active ingredient.

20. One comment stated that the Panel's recommended monograph is not consistent with existing regulations (21 CFR 329.20(a)(1)) that require the presence of another nonnarcotic active ingredient in OTC drug preparations containing opiates. Another comment expressed the hope that opiates would remain in Category I despite the fact that regulations do not permit OTC marketing of these ingredients as single active ingredient products.

The Panel's recommended monograph is not inconsistent with existing regulations. Section 335.10(a)(2) of that monograph cites the requirements of § 329.20(a)(1), which states that pharmaceutical preparations containing not more than 100 mg of opium per 100 mL or per 100 g may be exempt from prescription status, *provided* that such preparations contain one or more nonnarcotic active medicinal ingredients in sufficient proportion to confer upon the preparation valuable medicinal qualities other than those possessed by the narcotic drug alone. Although the Panel placed opiate ingredients in Category I (for use in combination), the data were insufficient for the Panel to classify any combination of an opiate and other active ingredients in Category I. No new data on such combinations were submittted to the FDA, and the agency concurs with the Panel's Category III classification of these combinations. Therefore, opiate ingredients are placed in Category III in this document and are not included in the tentative final monograph. However, if data are received to support any such opiate-containing combination in accordance with § 329.20(a)(1), opiates will be included in the final monograph. (See comment 22 below.)

21. One comment suggested that the requirement stated in § 329.20(a), that a narcotic-containing product also contain one or more nonnarcotic active medicinal ingredients, is not consistent with the Panel's recommended limitation of antidiarrheal combination products to two active ingredients at 40 FR 12932. The Comment proposed that § 329.20(a) be changed to read, "Provided that the preparations * * * contain one additional (but no more than one) nonnarcotic active medicinal ingredient," etc.

As discussed in comment 27 below, an antidiarrheal combination drug product may contain two or more active ingredients so long as it meets the agency's combination policy. Therefore, the inconsistency has been resolved without any need to modify § 329.20(a).

22. Two comments stated that the Panel's placement of paregoric, which contains six ingredients, in Category I as a single active ingredient is inconsistent and not in keeping with the OTC drug review concept of an ingredient by ingredient review. Citing § 329.20(a), one comment stated that an active ingredient in paregoric in addition to opium must be recognized in order for paregoric to be exempt from prescription status. However, to do so would mean placing paregoric in Category II because the other ingredient would not have been reviewed by the Panel. In addition, the comment stated that camphor should be deleted from the paregoric formula because the alternate name "camphorated tincture of opium" for paregoric implies that camphor at one time was thought to be an active ingredient in the paregoric formula. Therefore, according to the Panel, camphor cannot now be claimed as an inactive ingredient without proper documentation. Also, if camphor is considered inactive, the labeling of paregoric as "camphorated tincture of opium" would be illegal because inactive ingredients must not be emphasized or identified as active ingredients in the labeling or in the advertisement of such products.

The agency acknowledges that the Panel placed "camphorated tincture of opium" in parentheses after paregoric in its recommended monograph. However, the name "camphorated tincture of opium" has not been included in the official compendia since 1960 (USP XVI), and "paregoric" is the official compendial name. Therefore, "camphorated tincture of opium" as an alternate name for paregoric is not allowed, and the comment's argument regarding emphasizing an inactive ingredient in the labeling is moot.

Paregoric is an official article in the USP XXI and is a formulation of six ingredients—powdered opium, anise oil, benzoic acid, camphor, diluted alcohol, and glycerin (Ref. 1). However, only the powered opium is considered to be active as an antidiarrheal. Although the other ingredients when combined with powdered opium constitute what is recognized as paregoric, they do not contribute to the antidiarrheal effect of the product and are considered to be inactive ingredients. Therefore, paregoric is considered to be a single active ingredient formulation and when used alone is a prescription item (See 37 FR 6734; April 4, 1972). Although the Panel listed paregoric, tincture of opium, and powdered opium as allowable sources of opium, the Panel did not provide specific dosages for each individual preparation, but instead based the dosage on the opium component (40 FR 12943). As discussed in comment 20 above, opiate ingredients are not being included in the tentative final monograph. However, should combinations containing an opiate and other active ingredients be included in the final monograph, manufacturers may market their products in the formulation of their choice using any of the allowable sources of opium (i.e., paregoric, tincture of opium, or powdered opium) provided that the dosage is equivalent to the opium dosage provided in the monograph.

D. Comments on Antidiarrheal Combinations

23. One comment submitted three new clinical studies and two literature references on the effectiveness of kaolin and pectin in fixed combination for the treatment of acute nonspecific diarrhea (Refs. 1 through 5). The comment requested reclassification of kaolin and pectin in combination from Category III to Category I for the treatment of acute nonspecific diarrhea.

After evaluating all of the available data, the agency concludes that they are insufficient to reclassify kaolin and pectin, alone or in combination, in Category I for the treatment of acute nonspecific diarrhea.

The study by Portnoy seems to indicate some possible benefit in terms of a greater number of formed stools and a smaller number of liquid stools from either the kaolin-pectin combination or pectin alone (Ref. 1). However, because no data were submitted on frequency and consistency of stools prior to accession and randomization or on admission, it is impossible to establish and assess the baseline comparability of the study groups or otherwise statistically evaluate the study.

A study of 61 outpatients in Guadalajara, Mexico, showed virtually no difference in soft-stool frequency between the kaolin-pectin combination and placebo (Ref. 2). The study had relatively few patients (61 in 7 treatment groups) and cannot provide a definitive answer on effectiveness of kaolin and pectin either alone or in combination.

The third study, the United States multicenter study, is a double-blind, randomized, placebo-controlled study of a kaolin-pectin suspension in the treatment of acute nonspecific diarrhea (Ref. 3). The study showed a marginal increase in the frequency of formed stools and improved consistency of stools with the kaolin-pectin suspension compared to placebo, but showed no effect for these ingredients on overall stool frequency. In addition, the study failed to evaluate the ingredients kaolin and pectin separately; therefore, the study cannot be used to demonstrate that each ingredient makes a contribution to the claimed effect of the product.

The two literature references (Refs. 4 and 5) mentioned the use of the kaolin-pectin combination among other ingredients in the treatment of diarrhea, but they contained no specific information that would establish the effectiveness of the combination.

The agency's detailed comments and evaluations on the data are on file with the Dockets Management Branch (Ref. 6).[2]

24. One comment requested reclassification of pectin as an antidiarrheal adjunct in a product in which it is used in combination with tincture of opium, which the Panel recommended as a Category I active ingredient. The comment contended that even though the Panel concluded that the effectiveness data are insufficient to classify pectin and a Category I antidiarrheal, it is a useful adjunct which used in combination with an ingredient such as tincure of opium. The comment cited a number of literature articles in support of its request (Ref. 1).

The General Guidelines of OTC Drug Combination Products (Ref. 2) state that an ingredient claimed to be a pharmacological adjuvant will be considered an active ingredient, and that such an ingredient may be included in addition to one or more principal active ingredients only if it meets the combination policy in all respects. None of the articles offers data to demonstrate that pectin makes a contribution to the product, a requirement of the OTC drug combination policy as specified in § 330.10(a)(4)(iv). Therefore, the combination will remain in Category III.

[2] Industry has responded to FDA's concern regarding the need for additional data and is in the process of conducting additional studies (Comment No. LET008, Docket No. 78N–036D, Dockets Management Branch).

25. Two comments suggested that morphine and codeine be considered as ingredients in Category I combination antidiarrheal drug products. One comment pointed out that the antidiarrheal action of opium is attributable to its morphine content and that the other ingredients in opium contribute insignificantly to any therapeutic effect. The second comment noted that, similar to morphine, codeine exhibits inhibitive effects on the small intestine and colon, but with fewer side effects (Ref. 1). The comment suggested that an antidiarrheal drug product combining codeine with another active ingredient, possibly kaolin, would be effective and safe for OTC use.

The agency is aware of the constipating effects of both morphine and codeine. However, no data on any drug product used for the treatment of acute, nonspecific diarrhea, containing either morphine or codeine, have been submitted to the Panel or the agency for review. Therefore, neither morphine nor codeine is included in the monograph at this time.

26. Two comments requested that a combination of polycarbophil and powdered opium, USP be classified in Category I. The comments pointed out that, although both ingredients were recommended as Category I as single ingredients, the Panel did not make any provision for combining them. The comments stated that such a combination is therapeutically rational because the powdered opium acts to inhibit the motility of the intestine and through this action prolongs the transit time of polycarbophil; the prolonged transit time would allow the polycarbophil to exert its maximum hydrosorptive effect.

The agency's General Guidelines for OTC Drug Combination Products (Ref. 1)

VOL 51 ISS 83 AP 30 1986 UMI

permit combining two Category I active ingredients from the same therapeutic category that have different mechanisms of action if the combination meets the OTC combination policy in all respects and the combination is on a benefit-risk basis equal to or better than each of the active ingredients used alone at its therapeutic dose. However, no data to support the comment's rationale for the combination of polycarbophil and powdered opium, USP have been submitted to the Panel or to the agency. Data demonstrating the combination to be generally recognized as safe and effective must be submitted in order for it to be included in the monograph.

Reference

(1) "Food and Drug Administration General Guidelines for OTC Drug Combination Products," September 1978, Docket No. 78D-0322, Dockets Management Branch.

27. Several comments objected to the Panel's Category II classification of all combination products containing more than two active ingredients. The comments contended that the Panel presented no scientific data to support limiting a product to two active ingredients. Others objected to this limit as being unnecessarily restrictive, arbitrary, and not in agreement with the OTC combination policy set forth in § 330.10(a)(4)(iv). One comment urged that combination products that contain more than two active ingredients, but do not contain a Category II ingredient, be reclassified as Category III so that they might be tested for safety and effectiveness.

The agency agrees with the comments that a fixed limit need not be set on the number of active ingredients an antidiarrheal drug product may contain. However, adequate justification must be presented for the inclusion of each active ingredient in a combination product. Both the General Guidelines for OTC Drug Combination Products (Ref. 1) and the regulations at § 330.10(a)(4)(iv) provide that an OTC drug product may combine two or more safe and effective active ingredients provided the product meets the combination policy in all respects.

Three of the combinations that the Panel placed in Category II are combinations of three active ingredients. Each of the ingredients was placed by the Panel in Category I or Category III as a single ingredient. The combinations are activated attapulgite, pectin, and hydrated alumina powder; kaolin, hydrated alumina powder, and pectin; and paregoric, pectin, and kaolin. The Panel determined that the ingredients in these products are safe, but concluded that adequate data were lacking to establish their effectiveness. The agency believes it reasonable to move these three combination products, which contain no Category II ingredients, from Category II to Category III. The revised procedures for classifying OTC drugs, published in the Federal Register of September 29, 1981 (46 FR 47730), provide for the submission of new data and information for up to 12 months after publication of a tentative final monograph to support any condition excluded from the proposal.

Reference

(1) Food and Drug Administration, "General Guidelines for OTC Drug Combination Products," September 1978 Docket No. 78D-0322, Dockets Management Branch.

28. One comment noted that, although the Panel's report discussed criteria for antidiarrheal combinations, no provision was made in the recommended monograph for antidiarrheal combinations. The comment recommended that a new subsection for combinations of active antidiarrheal ingredients be established in the monograph.

The intended purpose of an OTC drug monograph is to set forth those specific conditions under which drugs that are subject to the monograph are generally recognized as safe and effective for OTC use and not misbranded. The Panel did not include any antidiarrheal combinations in its monograph because the data were insufficient for any of the combinations that were reviewed to be generally recognized as safe and effective. At this time, the agency concurs with the Panel's decision. Should data establishing the safety and effectiveness of any antidiarrheal combination be received in the comment and new data periods following publication of this tentative final monograph, the agency will state the conditions for such combination product(s) in the final monograph.

E. Comments on Data Pertinent to Antidiarrheal Ingredient Evaluation

29. Several comments objected to the Panel's recommended testing guidelines at 40 FR 12933 for establishing the safety and effectiveness of antidiarrheal ingredients. The comments contended that the testing guidelines do not provide adequate time to complete the required testing; the guidelines for antidiarrheals were apparently taken virtually verbatim from a similar provision for laxatives appearing elsewhere in the panel's report, and there is no basis for this apparent incorporation by reference; the guidelines do not adequately describe what test should be conducted or which data should be developed in order to move Category III ingredients to Category I; under the guidelines, manufacturers would not be allowed to use other well-controlled and well-designed studies to obtain necessary data; and many of the testing procedures listed in the guidelines require long-term use of antidiarrheal drug products to obtain the complete data required, thus contradicting the Panel's warning against use of antidiarrheal drug products for more than 2 days.

The agency has not addressed specific testing guidelines in this document. In revising the OTC drug review procedures relating to Category III, published in the Federal Register of September 29, 1981 (46 FR 47730), the agency advised that tentative final and final monographs will not include recommended testing guidelines for conditions that industry wishes to upgrade to monograph status. Instead, the agency will meet with industry representatives at their request to discuss testing protocols. The revised prodecures also state the time in which test data must be submitted for consideration in developing the final monograph. (See also part II. paragraph A. 2. below—*Testing of Category II and Category III conditions.*)

II. The Agency's Tentative Adoption of the Panel's Report

A. Summary of Ingredient Categories and Testing of Category II and Category III Conditions

1. *Summary of ingredient categories.* The agency has reviewed all claimed active ingredients submitted to the Panel, as well as other data and information available at this time, and has proposed the recategorization of attapulgite from Category III to Category I and opiate ingredients (in combination) from Category I and Category III for use as OTC antidiarrheal active ingredients. As a convenience to the reader, the following list is included as a summary of the categorization of antidiarrheal active ingredients recommended by the Panel and the proposed categorization by the agency.

Antidiarrheal active ingredients	Panel	Agency
Alumina powder, hydrated	III	III
Atropine sulfate	III	III
Attapulgite, activated	III	I
Bismuth subnitrate	III	III
Bismuth subsalicylate	III	III
Calcium carbonate precipitated	III	III
Calcium hydroxide	III	III
Calcium polycarbophil	NLC[1]	I
Charcoal, activated	III	III
Glycine [2]	II	II
Homatropine methylbromide	III	III
Hyoscyamine sulfate	III	III
Kaolin	III	III
Lactobacillus acidophilus	III	III
Lactobacillus bulgaricus	III	III
Opiate ingredients (for use in combination):		
Opium powder	I	III
Opium, tincture of	I	III
Paregoric	I	III
Pectin	III	III
Phenyl salicylate (salol)	III	III
Polycarbophil	I	I
Potassium carbonate	II	II
Rhubarb fluidextract	II	II
Scopolamine hydrobromide	II	II
Sodium carboxymethylcellulose	III	III
Zinc phenolsulfonate	III	III

[1] Not classified by Panel.
[2] Although "aminoacetic acid" was the name designated by the Panel for this ingredient, "glycine" is the official title for this ingredient in the "USAN and the USP dictionary of drug names, 1985."

2. Testing of Category II and Category III conditions. The agency's position regarding the Panel's testing guidelines is discussed in comment 29 above. Interested persons may communicate with the agency about the submission of data and information to demonstrate the safety or effectiveness of any antidiarrheal ingredient or condition included in the review by following the procedures outlined in the agency's policy statement published in the Federal Register of September 29, 1981 (46 FR 47740) and clarified April 1, 1983 (48 FR 14050). That policy statement includes procedures for the submission and review of proposed protocols, agency meetings with industry or other interested persons, and agency communications on submitted test data and other information.

B. Summary of the Agency's Changes in the Panel's Recommendations

FDA has considered the comments and other relevant information and concludes that it will tentatively adopt the Panel's report and recommended monograph with the changes described in FDA's responses to the comments above and with other changes described in the summary below. A summary of the changes made by the agency follows.

1. Because of the number of changes that have been made, as summarized below, many of the section and paragraph numbers have been redesignated in this tentative final monograph. In addition, Subpart D has been redesignated as Subpart C, and the labeling sections are placed under Subpart C.

2. The following changes have been made to conform to the format and Content of other recent OTC drug tentative final monographs:

a. A "statement of identity" section has been added and identifies the product as an antidiarrheal.

b. The dosage information for each active ingredient has been moved to the directions section for the respective antidiarrheal ingredient.

c. In an effort to simplify OTC drug labeling, the agency proposed in a number of tentative final monographs to substitute the word "doctor" for "physician" in OTC drug monographs on the basis that the word "doctor" is more commonly used and better understood by consumers. Based on comments received to these proposals, the agency has determined that final monographs and any applicable OTC drug regulation will give manufacturers the option of using either the word "physician" or the word "doctor." This tentative final monograph proposes that option.

3. The definitions for antidiarrheal and diarrhea have been revised. (See comment 7 above.)

4. The phrase "high fever" has been replaced with the word "fever" in the general warning for OTC antidiarrheals in § 335.50(c)(1). (See comment 8 above.)

5. The agency recognized that not all OTC antidiarrheals have the same effect and believes that consumers should be aware of the intended results from the use of the products. The agency has proposed expanded indications for use in the tentative final monograph accordingly. (See comment 10 above.)

6. The pediatric dosage for children 3 years of age and under for polycarbophil is proposed in the tentative final monograph under professional labeling only. (See comment 11 above.)

7. The agency has reclassified activated attapulgite from Category III to Category I. (See comment 15 above.)

8. Should bismuth subsalicylate be included in the final monograph, the agency will consider proposing that the directions for use be revised and additional warnings be included in the labeling. (See comment 17 above.)

9. In accordance with § 329.20(a)(1) opiate ingredients may be marketed for OTC use in combination only. Because no data have been submitted to support combinations of opiates and other active ingredients, opiates will not be included in the tentative final monograph. (See comment 20 above.)

10. The Panel recommended in its report that Category I antidiarrheal combination drug products be limited to two Category I active ingredients. The agency has determined that an OTC antidiarrheal drug product may combine two or more safe and effective active ingredients in accordance with the provisions set forth in § 330.10(a)(4)(iv) and the agency's General Guidelines for OTC Drug Combination Products. (See comment 27 above.)

11. The agency has revised the dosage for polycarbophil in the monograph to reflect the dosage used in studies submitted for evaluation. This dosage is also the same as that currently promoted on marketed products.

12. The sodium, potassium, and magnesium warnings have been deleted from the monograph because none of the active antidiarrheal drugs in the monograph contain these ingredients.

The agency proposes to revoke the existing warning statement in § 369.20 for diarrhea preparations at the time that this monograph becomes effective.

The agency has examined the economic consequences of this proposed rulemaking in conjunction with other rules resulting from the OTC drug review. In a notice in the Federal Register of February 8, 1983 (48 FR 5806), the agency announced the availability of an assessment of these economic impacts. The assessment determined that the combined impacts of all the rules resulting from the OTC drug review do not constitute a major rule according to the criteria established by Executive Order 12291. The agency therefore concludes that not one of these rules, including this proposed rule for OTC antidiarrheal drug products, is a major rule.

The economic assessment also concluded that the overall OTC drug review was not likely to have a significant economic impact on a substantial number of small entities as defined in the Regulatory Flexibility Act, Public Law 96-354. That assessment included a discretionary Regulatory Flexibility Analysis in the event that an individual rule might impose an unusual or disproportionate impact on small entities. However, this particular rulemaking for OTC antidiarrheal drug products is not expected to pose such an impact on small businesses. Therefore, the agency certifies that this proposed rule, if implemented, will not have a significant economic impact on a substantial number of small entities.

The agency invites public comment regarding any substantial or significant economic impact that this rulemaking would have on OTC antidiarrheal drug products. Types of impact may include, but are not limited to, costs associated with product testing, relabeling, repackaging, or reformulating. Comments regarding the impact of this rulemaking on OTC antidiarrheal drug products should be accompanied by appropriate documentation. Because the agency has not previously invited specific comment on the economic impact of the OTC drug review on antidiarrheal drug products, a period of

VOL 51 ISS 83 AP 30 1986 UMI

120 days from the date of publication of this proposed rulemaking in the Federal Register will be provided for comments on this subject to be developed and submitted. The agency will evaluate any comments and supporting data that are received and will reassess the economic impact of this rulemaking in the preamble to the final rule.

The agency has determined that under 21 CFR 25.24(c)(6) (April 26, 1985; 50 FR 16636) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

Exclusivity of Labeling

In the Federal Register of April 22, 1985 (50 FR 15810) the agency proposed to change its "exclusivity" policy for the labeling of OTC drug products that has existed during the course of the OTC drug review. Under this policy, the agency has maintained that the terms that may be used in an OTC drug product's labeling are limited to those terms included in a final OTC drug monograph.

The proposed rule would establish three alternatives for stating the indications for use in OTC drug labeling while all other aspects of OTC drug labeling (i.e., statement of identity, warnings, and directions for use) would continue to be subject to the existing exclusivity policy. The proposed rule for OTC antidiarrheal drug products included in this document incorporates the exclusivity proposal by providing for the use of other truthful or nonmisleading statements in the product's labeling to describe the indications for use. After considering all comments submitted on the proposed revision to the exclusivity policy, the agency will announce its final decision on this matter in a future issue of the Federal Register. The final rule for OTC antidiarrheal drug products will incorporate the final decision on exclusivity of labeling.

Interested persons may, on or before June 30, 1986, submit to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, written comments, objections, or requests for oral hearing before the Commissioner. A request for an oral hearing must specify points to be covered and time requested. Written comments on the agency's economic impact determination may be submitted on or before August 28, 1986. Three copies of all comments, objections, and requests are to be submitted, except that individuals may submit one copy. Comments, objections, and requests are to be identified with the docket number found in brackets in the heading of this document and may be accompanied by a supporting memorandum or brief. Comments, objections, and requests may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday. Any scheduled oral hearing will be announced in the Federal Register.

Interested persons, on or before April 30, 1987, may also submit in writing new data demonstrating the safety and effectiveness of those conditions not classified in Category I. Written comments on the new data may be submitted on or before June 30, 1987. These dates are consistent with the time and periods specified in the agency's final rule revising the procedural regulations for reviewing and classifying OTC drugs, published in the Federal Register of September 29, 1981 (46 FR 47730). Three copies of all data and comments on the data are to be submitted, except that individuals may submit one copy, and all data and comments are to be identified with the docket number found in brackets in the heading of this document. Data and comments should be addressed to the Dockets Management Branch (HFA–305) (address above). Received data and comments may also be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

In establishing a final monograph, the agency will ordinarily consider only data submitted prior to the closing of the administrative record on June 30, 1987. Data submitted after the closing of the administrative record will be reviewed by the agency only after a final monograph is published in the Federal Register, unless the Commissioner finds good cause has been shown that warrants earlier consideration.

List of Subjects

21 CFR Part 335

Over-the-counter drugs, Antidiarrheal drug products.

21 CFR Part 369

Over-the-counter drugs, Warning and caution statements.

Therefore, under the Federal Food, Drug, and Cosmetic Act and the Administrative Procedure Act and under 21 CFR 5.11, it is proposed that Subchapter D of Chapter I of Title 21 of the Code of Federal Regulations be amended as follows:

PART 335—ANTIDIARRHEAL DRUG PRODUCTS FOR OVER-THE-COUNTER HUMAN USE

1. By adding new Part 335, to read as follows:

Subpart A—General Provisions

Sec.
335.1 Scope.
335.3 Definitions.

Subpart B—Active Ingredients

335.10 Antidiarrheal active ingredients.

Subpart C—Labeling

335.50 Labeling of antidiarrheal drug products.
335.80 Professional labeling.

Authority: Secs. 201(p), 502, 505, 701, 52 Stat. 1041–1042 as amended, 1050–1053 as amended, 1055–1056 as amended by 70 Stat. 919 and 72 Stat. 948 (21 U.S.C. 321(p), 352, 355, 371); 5 U.S.C. 553; 21 CFR 5.11.

Subpart A—General Provisions

§ 335.1 Scope.

(a) An over-the-counter antidiarrheal drug product in a form suitable for oral administration is generally recognized as safe and effective and is not misbranded if it meets each condition in this part and each general condition established in § 330.1.

(b) References in this part to regulatory sections of the Code of Federal Regulations are to Chapter I of Title 21 unless otherwise noted.

§ 335.3 Definitions.

As used in this part:

(a) *Antidiarrheal.* A drug that can be shown by objective measurement to treat or control (stop) the symptoms of diarrhea.

(b) *Diarrhea.* A condition characterized by increased frequency of excretion of loose, watery stools (three or more daily) during a limited period (24 to 48 hours), usually with no identifiable cause.

Subpart B—Active Ingredients

§ 335.10 Antidiarrheal active ingredients.

The active ingredient of the product consists of any of the following when used within the dosage limits established for each ingredient in § 335.50(d):

(a) Attapulgite, activated.
(b) Calcium polycarbophil.
(c) Polycarbophil.

Subpart C—Labeling

§ 335.50 Labeling of antidiarrheal drug products.

(a) *Statement of identity.* The labeling of the product contains the established name of the drug, if any, and identifies the products as an "antidiarrheal."

(b) *Indications.* The labeling of the product states, under the heading "Indications," any of the phrases listed in this paragraph, as appropriate. Other truthful and nonmisleading statements, describing only the indications for use that have been established and listed below, may also be used, as provided in § 330.1(c)(2), subject to the provisions of section 502 of the act relating to misbranding and the prohibition in section 301(d) of the act against the introduction or delivery for introduction into interstate commerce of unapproved new drugs in violation of section 505(a) of the act.

(1) *For products containing attapulgite, activated, identified in § 335.10(a).* (i) "Reduces the number of bowel movements in diarrhea."

(ii) "Improves consistency of loose, watery bowel movements in diarrhea."

(iii) "Relieves cramps in diarrhea." This indication is permitted only in addition to one or both of the indications identified in § 335.50(b)(1)(i) or (ii).

(2) *For products containing calcium polycarbophil or polycarbophil identified in § 335.10 (b) or (c).* (i) "Reduces the number of bowel movements in diarrhea."

(ii) "Improves consistency of loose, watery bowel movements in diarrhea."

(c) *Warnings.* The labeling of the product contains the following warnings under the heading "Warnings:" "Do not use for more than 2 days, or in the presence of fever, or in children under 3 years of age unless directed by a doctor."

(d) *Directions.* The labeling of the product contains the following information under the heading "Directions":

(1) *For products containing attapulgite, activated identified in § 335.10(a).* Adults and children 12 years of age and over: oral dosage is 1,200 milligrams after initial bowel movement, 1,200 milligrams after each subsequent bowel movement, not to exceed 8,400 milligrams in 24 hours. Children 6 to under 12 years of age: oral dosage is 600 milligrams after initial bowel movement, 600 milligrams after each subsequent bowel movement, not to exceed 4,200 milligrams in 24 hours. Children 3 to under 6 years of age: oral dosage is 300 milligrams after initial bowel movement, 300 milligrams after each subsequent bowel movement, not to exceed 2,100 milligrams in 24 hours. Children under 3 years of age: consult a doctor.

(2) *For products containing calcium polycarbophil or polycarbophil identified in § 335.10 (b) or (c).* Dosages are based on the polycarbophil equivalent. Adults and children 12 years of age and over: oral daily dosage is 1 gram 4 times a day or 2 grams 3 times a day or as needed, not to exceed 6 grams in 24 hours. Children 6 to under 12 years of age: oral daily dosage is 0.5 to 1 gram 3 times a day or as needed, not to exceed 3 grams in 24 hours. Children 3 to under 6 years of age: oral daily dosage is 0.33 to 0.5 grams 3 times a day or as needed, not to exceed 1.5 grams in 24 hours. Children under 3 years of age: consult a doctor.

(e) The word "physician" may be subatituted for the word "doctor" in any of the labeling statements in this section.

§ 335.80 Professional labeling.

The labeling provided to health professionals (but not to the general public) may contain the following additional dosage information for products containing the active ingredient identified below:

For products containing calcium polycarbophil or polycarbophil identified in § 335.10 (b) or (c). Dosages are based on the polycarbophil equivalent. Children under 3 years of age: oral daily dosage is 166.6 milligrams to 333.3 milligrams 3 times a day or as needed, not to exceed 1 gram in 24 hours.

PART 369—INTERPRETIVE STATEMENTS RE WARNINGS ON DRUGS AND DEVICES FOR OVER-THE-COUNTER SALE

2. The authority citation for Part 369 continues to read as follows:

Authority: Secs. 502, 503, 506, 507, 701, 52 Stat. 1050 as amended, 1052 as amended, 53 Stat. 854, 55 Stat. 851, 59 Stat. 463 as amended, 52 Stat. 1055 as amended (21 U.S.C. 352, 353, 356, 357, 371); 21 CFR 5.11.

3. In § 369.20 *Drugs; recommended warning and caution statements,* by removing the entry for "Diarrhea Preparations."

Frank E. Young,
Commissioner of Food and Drugs.

Dated: April 1, 1986.

Otis R. Bowen,
Secretary of Health and Human Services.

Part III

Department of Agriculture

Cooperative State Research Service

7 CFR Part 3401

Rangeland Research Grants Program; Administrative Provisions; Final Rule

VOL 51 ISS 83 AP 30 1986 UMI

DEPARTMENT OF AGRICULTURE

Cooperative State Research Service

7 CFR Part 3401

Rangeland Research Grants Program; Administrative Provisions

AGENCY: Cooperative State Research Service, USDA.

ACTION: Final rule.

SUMMARY: This document establishes Part 3401 of Title 7, Subtitle B, Chapter XXXIV of the Code of Federal Regulations, for the purpose of administering the Rangeland Research Grants Program conducted under authority of Section 1480 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended (7 U.S.C. 3333). The issuance of this rule establishes the procedures to be followed annually in the solicitation of research grant proposals, the evaluation of such proposals, and the award of research grants under this program.

EFFECTIVE DATE: April 30, 1986.

FOR FURTHER INFORMATION CONTACT: Terry J. Pacovsky, Chief, Grants Administrative Management, Office of Grants and Program Systems, U.S. Department of Agriculture, Room 112, Justin Smith Morrill Building, 15th and Independence Avenue, SW., Washington, DC 20251. (Telephone: (202) 475-5024.)

SUPPLEMENTARY INFORMATION:

Paperwork Reduction

Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)), the collection of information requirements contained in this rule has been approved under OMB Document No. 0525-0001.

Classification

This rule has been reviewed under Executive Order 12291, and it has been determined that it is not a major rule because it does not involve a substantial or major impact on the Nation's economy or on large numbers of individuals or businesses. There will be no major increase in cost or prices for consumers, individual industries, Federal, State, or local governmental agencies, or geographic regions. It will not have a significant economic impact on competitive employment, investment, productivity, innovation, or on the ability of U.S. enterprises to compete with foreign-based enterprises in domestic or export markets. In addition, it will not have a significant impact on a substantial number of small entities as defined in the Regulatory Flexibility Act, Pub. L. 96-534 (5 U.S.C. 601).

Regulatory Analysis

Not required for this rulemaking.

Environmental Impact Statement

This regulation does not significantly affect the environment. Therefore, an environmental impact statement is not required under the National Environmental Policy Act of 1969.

Catalog of Federal Domestic Assistance

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.200. For the reasons set forth in the Final rule related Notice to 7 CFR Part 3015, Subpart V, 48 FR 29115, June 24, 1983, this program/activity is excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

Background and Purpose

Under the authority of section 1480 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended, (7 U.S.C. 3333), the Secretary of Agriculture is authorized to make grants to land-grant colleges and universities, State agricultural experiment stations, and colleges, universities, and Federal laboratories having a demonstrable capacity in rangeland research.

This rule establishes Part 3401 of Title 7, Subtitle B, Chapter XXXIV of the Code of Federal Regulations, for the purpose of administering the Rangeland Research Grants Program.

On February 25, 1986, the Department published a Notice in the Federal Register (51 FR 6700) proposing the establishment of this regulation and inviting comments from interested individuals and organizations. Comments were requested by March 27, 1986. No comments were received.

Change

The Department changed section 3401.5, "Indirect Costs and Tuition Remission Costs," to make the rule consistent with the statutory language. This section as revised clarifies the fact that while the law expressly prohibits the payment of indirect costs and tuition remission costs to "State cooperative institutions" such restriction does not apply to Federal laboratories.

List of Subjects in 7 CFR Part 3401

Grant programs—agriculture, Grant administration.

The Department therefore amends Title 7, Subtitle B, Chapter XXXIV of the Code of Federal Regulations by adding Part 3401 to read as follows:

CHAPTER XXXIV—COOPERATIVE STATE RESEARCH SERVICE, DEPARTMENT OF AGRICULTURE

PART 3401—RANGELAND RESEARCH GRANTS PROGRAM

Sec.

3401.1 Applicability of regulations.
3401.2 General regulations.
3401.3 Eligibility requirements.
3401.4 Matching fund requirement.
3401.5 Indirect costs and tuition remission costs.

Authority: Sec. 1470 of the National Agricultural Research, Extension and Teaching Policy Act of 1977 (7 U.S.C. 3316).

§ 3401.1 Applicability of regulations.

(a) The regulations of this part apply to rangeland research grants awarded under the provisions of section 1480 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended (7 U.S.C. 3333) to land-grant colleges and universities, State agricultural experiment stations, and colleges, universities, and Federal laboratories having a demonstrable capacity in rangeland research. The Secretary, or his or her designee, shall determine and announce, through publication of a Notice in the Federal Register each year, research program areas for which proposals will be solicited to the extent that funds are available.

(b) The regulations of this part do not apply to research grants awarded under any other authorization.

§3401.2 General regulations.

For purposes of this part, the provisions found at Part 3400 of this chapter, excluding the provisions listed in paragraphs (a) through (g) of this section, are applicable to the administration of this research program.

(a) Section 3400.1.

(b) Paragraph 3400.3(a).

(c) The last sentence of paragraph 3400.4(c)(11).

(d) The parenthetical phrase in the last sentence of paragraph 3400.7(c).

(e) Paragraph 3400.7(d)(1).

(f) Paragraph 3400.7(d)(2).

(g) Paragraph 3400.7(d)(3).

§3401.3 Eligibility requirements.

Except where otherwise prohibited by law, any land-grant college and university, State agricultural experiment station, and college, university, and Federal laboratory having a demonstrable capacity in rangeland research shall be eligible to apply for and receive a project grant under this

part, provided that the applicant qualifies as a responsible grantee under the criteria set forth in § 3400.3(b).

§ 3401.4 Matching fund requirement.

In accordance with section 1480 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended (7 U.S.C. 3333), except in the case of Federal laboratories, each grant recipient must match the Federal funds expended on a research project based on a formula of 50 percent Federal and 50 percent non-Federal funding.

§3401.5 Indirect costs and tuition remission costs.

Pursuant to section 1473 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended (7 U.S.C. 3319), funds made available under this program to recipients other than Federal laboratories shall not be subject to reduction for indirect costs or for tuition remission. Indirect costs and tuition remission costs, except in the case of Federal laboratories, are not allowable costs for purposes of this program.

Done at Washington, DC, this 24th day of April 1986.

John Patrick Jordan,

Administrator, Cooperative State Research Service.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 51 FR 12345.

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: May 15; at 9 am.

WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC.

RESERVATIONS: Laurence Davey, 202-523-3517

Rules and Regulations

Federal Register
Vol. 51, No. 84
Thursday, May 1, 1986

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

7 CFR Part 246

Selected Provision of the Food Package Regulations for the Special Supplemental Food Program for Women, Infants and Children (WIC Program)

Correction

In FR Doc. 86-8723, beginning on page 13207, in the issue of Friday, April 18, 1986, make the following correction.

1. On page 13207, first column, in the summary seventeenth line, "VI" should read "IV", in the twentieth line "IV" should read "VI", and in the twenty-seventh line after "forth" insert "in".
2. On the same page, third column, first line, "in" should read "on".
3. On page 13208, first column, fifth line, "Program" should read "Programs".
4. On the same page, first column, § 246.10(c)(4)(i), fifth line, after "pasteurized" insert "fluid".

BILLING CODE 1505-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 86-NM-19-AD; Amdt. 39-5297]

Airworthiness Directives; Boeing Model 747 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action publishes in the Federal Register and makes effective as to all persons an amendment adopting a new airworthiness directive (AD) which was previously made effective to all known U.S. owners and operators of certain Boeing Model 747 airplanes by individual telegrams. The AD requires repetitive inspections of the external fuselage skin for cracks adjacent to stringers 23 and 24A, between body station 240 and 400, and requires repetitive inspections of body frame structure in certain areas in the forward fuselage section. Failure of the skin and adjacent frames could result in depressurization of the fuselage.

DATES: Effective May 19, 1986. As to all persons except those persons to whom it was made immediately effective by telegraphic AD T86-03-51, issued February 16, 1986, which contained this amendment. Compliance as prescribed in the body of the AD, unless already accomplished.

ADDRESSES: The service bulletin specified in this AD may be obtained upon request to the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Owen Schrader, Airframe Branch, ANM-120S; telephone (206) 431-2923. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: On January 31, 1986, the FAA issued Telegraphic AD T86-02-53 which requires repetitive inspections of the external fuselage skin for cracks adjacent to stringers 23 and 24A, on both the left and right side of the airplane, between body station 240 and 400, on airplanes which have accumulated 10,000 or more landings. The AD was prompted by the discovery of cracking of three adjacent frames on one airplane. This was an interim action pending development of further nondestructive inspection techniques. To date, the inspections have revealed no skin cracks. However, since issuance of AD T86-02-53, there were additional reports of cracked body frames in the nose section on twelve airplanes as a result of internal inspections of this area. These findings indicated that additional action was necessary to prevent possible cabin decompression.

The Boeing Company issued Service Bulletin 747-53A2265, dated February 14, 1986, that describes the specific inspection procedures to be used to inspect body frame structure and skin for cracking between stringer 34L up over the crown to stringer 34R between body stations 200 to 520.

On February 16, 1986, the FAA issued telegraphic AD T86-03-51, which superseded AD 86-02-53, and requires additional inspections of Boeing Model 747 series airplanes in accordance with Boeing Service Bulletin 747-53A2265.

Information collection requirements contained in this regulation have been approved by the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96-511) and have been assigned OMB Control Number 2120-0056.

Since it was found that immediately corrective action was required, notice and public procedure thereon were impracticable and contrary to public interest, and good cause existed to make the AD effective immediately by individual telegrams issued February 16, 1986, to all known U.S. owners and operators of certain Boeing Model 747 airplanes. These conditions still exist and the AD is hereby published in the Federal Register as an amendment to § 39.13 of Part 39 of the Federal Aviation Regulations to make it effective as to all persons.

The FAA has determined that this regulation is an emergency regulation that is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required).

Aviation safety, Aircraft.

VOL 51 ISS 84 MY 1 1986 UMI

Adoption of Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following new airworthiness directive:

Boeing: Applies to Model 747 series airplanes, certificated in any category. To detect body structure cracking in the nose section that could lead to decompression, accomplish the following, unless already accomplished:

A. For airplanes that have accumulated 14,000 landings or more, within 25 landings after receipt of this AD perform an external close visual inspection of the fuselage skin lap splice at stringer 23 and the fuselage skin along stringer 24A between body stations 240 and 400 on both the left and right side of the fuselage. Repeat the inspections thereafter at intervals not to exceed 60 landings until inspected in accordance with paragraph D. or E., below.

Note: Per MSG-3, definition of close visual (detailed) inspection method: Close intensive visual inspections of highly defined structural details or locations searching for evidence of structural irregularity. Adequate lighting and, where necessary, inspection aids such as mirrors, etc., surface cleaning and access procedures may be required to gain proximity.

B. For airplanes that have accumulated 10,000 landings but less than 14,000 landings, within 50 landings after the receipt of this AD, perform an external close visual inspection of the fuselage skin lap splice at stringer 23 and the fuselage skin along stringer 24A between body station 240 and 400 on both the left and right side of the fuselage. Repeat the inspections thereafter at intervals not to exceed 120 landings until inspected in accordance with paragraph D. or E., below.

C. If, as a result of the inspections required in paragraphs A. and B., above, the fuselage skin is found cracked, a visual inspection for cracks of the frames from stringer 20 to stringer 28 from fuselage station 240 and 440 on both sides of the airplane must be made before further flight.

D. For airplanes, line numbers 86 through 603, perform a visual or X-ray inspection for cracking of the body structure and skins in the following areas: on the main deck between body stations 240 and 400 from the window belt to the floor, both left and right; between body stations 200 and 240 from stringer 13A to 14E; and at the body station 360 frame web at stringer 3L; in accordance with Boeing Service Bulletin 747-53A2285, dated February 14, 1986, or later FAA-approved revisions, in accordance with the following schedule:

1. On airplanes that have accumulated more than 14,000 landings as of the receipt of this AD, inspect within 100 landings after the receipt of this AD.

2. On airplanes that have accumulated 12,000 to 14,000 landings as of the receipt of this AD, inspect within 200 landings after the receipt of this AD.

3. On airplanes that have accumulated fewer than 12,000 landings as of the receipt of this AD, inspect within 14,000 landings after the receipt of this AD, or prior to the accumulation of 10,000 landings, whichever occurs later.

E. For airplanes, line numbers 1 through 87, perform a visual or X-ray inspection for cracking of the body structure and skins from body station 360 through 380 from stringer 23 to the main deck floor, in accordance with Boeing Service Bulletin 747-53A2285, dated February 14, 1986, or later FAA-approved revisions, in accordance with the schedule described in paragraph D., above.

F. Repeat the inspections required by paragraphs D. and E., above, at the following intervals:

1. If the immediately prior inspection was accomplished using visual methods, perform the next inspection within the next 3,000 landings.

2. If the immediately prior inspection was accomplished using X-ray methods, perform the next inspection within the next 1,500 landings.

G. If any cracking is found, repair prior to further flight in accordance with FAA-approved procedures, unless the provisions of Section III, Paragraph G., of Boeing Service Bulletin 747-53A2285, dated February 14, 1986, are met.

H. For the purpose of complying with this AD, the number of landings may be determined to equal the number of pressurization cycles where the cabin pressure was greater than 2.0 PSI.

I. Upon request of an operator, an assigned FAA Principal Maintenance Inspector, subject to prior approval of the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, may adjust the inspection time in this AD to permit compliance at an established inspection period of that operator, if the request contains substantiating data to justify the change for that operator.

J. Alternate means of compliance which provide an acceptable level of safety may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

K. Aircraft may be ferried unpressurized to a base for maintenance in accordance with §§ 21.197 and 21.199 of the Federal Aviation Regulations.

L. Report a complete description of the findings of each inspection required by paragraphs D. and E., above, within 48 hours after that inspection to: The Boeing Commercial Airplane Company, Attention: Director, 747 Customer Support Engineering, P.O. Box 3707, Seattle, Washington, 98124-2207.

All persons affected by this directive who have not already received the appropriate service document from the manufacturer may obtain copies upon request to Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. This document may also be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective May 19, 1986. As to all persons, except those persons to whom it was made immediately effective by telegraphic AD T86-03-51, dated January 31, 1986.

This supersedes telegraphic AD T86-02-53, dated January 31, 1986.

Issued in Seattle, Washington, on April 23, 1986.

David E. Jones,

Acting Director, Northwest Mountain Region.

---

14 CFR Part 39

[Docket No. 86-NM-42-AD; Amdt. 39-5296]

Airworthiness Directives; Gates Learjet Model 55 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule, request for comments.

SUMMARY: This action amends an existing airworthiness directive (AD) which currently applies to Gates Learjet Model 55 airplanes, except for those on which certain specified modifications have been accomplished. The existing AD requires increasing the minimum landing distances by inserting revised information in the Airplane Flight Manual (AFM) and provides for certain modifications which constitute terminating action for the landing distance increases. Modifications referenced as an exception in the existing AD have been determined to create an unsafe condition for airplanes on which thrust reversers have been installed. This revision to the AD expands the applicability of the existing AD to require those airplanes previously excepted to accomplish a modification. The FAA has determined that those incorrect modifications installed on airplanes equipped with thrust reversers may have the effect of shutting off anti-ice bleed air during flight if a thrust reverser unlock indication is experienced. This condition, if not corrected, could result in loss of wing anti-icing capability.

DATES: Effective May 19, 1986.

Comments must be received by May 19, 1986.

ADDRESSES: Send comments in duplicate to FAA, Northwest Mountain Region, Office of the Regional Counsel, ANM-7, Attention: Airworthiness Rules Docket 86-NM-42-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from Gates Learjet Corporation, P.O. Box 7707, Wichita, Kansas 67277. This information may be examined at FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at FAA, Central Region, Wichita Aircraft Certification Office, 1801 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas.

FOR FURTHER INFORMATION CONTACT: Bennett L. Sorensen, Aerospace Engineer, Wichita Aircraft Certification Office, 1801 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas 67209; telephone (316) 946-4433.

SUPPLEMENTARY INFORMATION: This amendment amends AD 85-22-08, Amendment 39-5166 (50 FR 45096; October 30, 1985), as amended by Amendment 39-5223 (AD 85-22-08R1). AD 85-22-08 originally required increasing the minimum landing distances by inserting revised information in the Airplane Flight Manual (AFM), and provided for certain modifications (Gates Learjet Service Bulletin (SB) 55-27-7, Airplane Modification Kit (AMK) 55-84-7A, or Airplane Accessory Kit (AAK 55-83-4)), to constitute a final action that restores the original landing distances. After issuing the original AD, the FAA determined that these modifications (SB 55-27-7 or AMK 55-84-7A) accomplished on airplanes equipped with thrust reversers may have had the hazardous effect of shutting off anti-ice bleed air during flight if a thrust reverser unlock indication is experienced. After the problem with the thrust reverser equipped airplanes was found, Gates Learjet issued SB 55-27-7A (dated December 12, 1985) and AMK 55-84-7B (dated December 12, 1985). These modifications accomplish the intent of SB 55-27-7 and AMK 55-84-7A (the modifications called out in the original AD) without creating the incidental unsafe condition.

The original AD was amended by Amendment 39-5223 in three areas: (1) To allow the correct modification (SB 55-27-7A or AMK 55-86-7B) to be installed as a terminating action for the AD for all affected Model 55 airplanes; (2) to allow SB 55-27-7 or AMK 55-84-7A to remain as a terminating action for non-thrust reverser-equipped airplanes; and (3) to require that thrust reverser-equipped airplanes have the incorrect modification (SB 55-27-7 or AMK 55-85-7A) removed. However, the applicability statement of the amended AD should have been revised to be consistent with the provisions of the amendment. Consequently, the removal of the incorrect modification was not required for thrust reverser-equipped airplanes, and those airplanes that had the incorrect modification were inadvertently excepted in the applicability statement. This amendment revises the applicability statement to properly exclude only those airplanes that have the correct modifications accomplished. It should be noted that Airplane Accessory Kit 55-83-4 (unchanged), referred to in AD 85-22-08 and AD 85-22-08R1, does not create the unsafe conditions and, therefore, continues to accomplish the intent of the original AD.

Since this situation is likely to exist or develop on other airplanes of the same type design, this amendment requires removal of the incorrect modifications from airplanes equipped with thrust reversers, by revising the provisions of the applicability statement of AD 85-22-08R1.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

Although this action is in the form of a final rule, which involves an emergency, and thus, was not preceded by notice and public procedure, interested persons are invited to submit such written data, views, or arguments as they may desire regarding this AD. Communications should identify the docket number and be submitted in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel, ANM-7, Attention: Airworthiness Rules Docket No. 86-NM-42-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. All communications received before the closing date will be considered by the Administrator, and the AD may be changed in light of the comments received.

The FAA has determined that this regulation is an emergency regulation that is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Executive Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required).

Adoption of the Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

2. By amending Amendment 39-5223 (51 FR 3029; January 23, 1986), AD 85-22-08R1, to change the applicability statement as follows:

"**Gates Learjet Corporation:** Applies to Model 55 airplanes, serial numbers 55-003 through 55-086, except those incorporating Service Bulletin 55-27-7A, Airplane Modification Kit 55-84-7B, or Airplane Accessory Kit 55-83-4."

This Amendment becomes effective May 19, 1986.

Issued in Seattle, Washington, on April 23, 1986.

David E. Jones,

Acting Director, Northwest Mountain Region.

[FR Doc. 86-9705 Filed 4-30-86; 8:45 am]

BILLING CODE 4910-13-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 271

[Docket No. RM80-53]

Natural Gas Policy Act; Maximum Lawful Prices and Inflation Adjustment Factors

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Order of the Director, OPPR.

SUMMARY: Pursuant to the authority delegated by 18 CFR 357.307(i), the Director of the Office of Pipeline and Producer Regulation revises and publishes the maximum lawful prices prescribed under Title I of the Natural Gas Policy Act (NGPA) for the months of May, June and July, 1986. Section

VOL 51 ISS 84 MY 1 1986 UMI

101(b)(6) of the NGPA requires that the Commission compute and publish the maximum lawful prices before the beginning of each month for which the figures apply.

EFFECTIVE DATE: May 1, 1986.

FOR FURTHER INFORMATION CONTACT: Raymond A. Beirne, Acting Director, OPPR, (202) 357–8500.

Publication of Prescribed Maximum Lawful Prices Under the Natural Gas Policy Act of 1978; Order of the Director, OPPR, Issued: April 23, 1986.

Section 101(b)(6) of the Natural Gas Policy Act of 1978 (NGPA) requires that the Commission compute and make available maximum lawful prices and inflation adjustments prescribed in Title I of the NGPA before the beginning of any month for which such figures apply.

Pursuant to this requirement and § 375.307(l) of the Commission's regulations, which delegates the publication of such prices and inflation adjustments to the Director of the Office of Pipeline and Producer Regulation, the maximum lawful prices for the months of May, June, and July, 1986 are issued by the publication of the price tables for the applicable quarter. Pricing tables are found in § 271.101(a) of the Commission's regulations. Table I of § 271.101(a) specifies the maximum lawful prices for gas subject to NGPA sections 102, 103(b) (1) and (2), 105(b)(3), 106(b)(1)(B), 107(c)(5), 108 and 109. Table II of § 271.101(a) specifies the maximum lawful prices for sections 104 and 106(a) of the NGPA. Table III of § 271.102(c) contains the inflation adjustment factors. The maximum lawful prices and the inflation adjustment factors for the periods prior to May 1986 are found in the tables in §§ 271.101 and 271.102.

List of Subjects in 18 CFR Part 271

Natural gas.

Raymond A. Beirne,

Acting Director, Office of Pipeline and Producer Regulation.

PART 271—[AMENDED]

18 CFR Part 271 is amended as follows:

1. The authority citation for Part 271 continues to read as follows:

Authority: Department of Energy Organization Act, 42 U.S.C. 7101 *et seq.*; Natural Gas Policy Act of 1978, 15 U.S.C. 3301–3432; Administrative Procedure Act, 5 U.S.C. 553.

§ 271.101 [Amended]

2. Section 271.101(a) is amended by inserting the maximum lawful prices for May, June, and July, 1986 in Tables I and II.

TABLE I—NATURAL GAS CEILING PRICES: MAXIMUM LAWFUL PRICE PER MMBTU FOR DELIVERIES

[Other than NGPA §§ 104 and 106(a)]

Subpart of Part 271	NGPA Section	Category of Gas	May 1986	June 1986	July 1986
B	102	New Natural Gas, Certain OCS Gas [4]	$4.264	$4.287	$4.310
C	103(b)(1)	New Onshore Production Wells [5]	3.089	3.106	3.113
	103(b)(2)	New Onshore Production Wells [6]	3.682	3.697	3.712
E	105(b)(3)	Intrastate Existing Contracts	4.212	4.232	4.252
F	106(b)(1)(B)	Alternative Maximum Lawful Price for Certain Intrastate Rollover Gas [1]	1.775	1.777	1.781
G	107(c)(5)	Gas Produced from Tight Formations [2]	6.196	6.212	6.226
H	108	Stripper Gas	4.565	4.590	4.615
I	109	Not Otherwise covered	2.566	2.572	2.578

[1] Section 271.802(a) provides that for certain gas sold under an intrastate rollover contract the maximum lawful price is the higher of the price paid under the expired contract, adjusted for inflation or an alternative Maximum Lawful Price specified in the Table. This alternative Maximum Lawful Price for each month appears in the this row of Table I. Commencing January 1, 1985, the price of some intrastate rollover gas is deregulated. (See Part 272 of the Commission's regulations.)

[2] The maximum lawful price for tight formation gas is the lesser of the negotiated contract price or 200% of the price specified in Subpart C of Part 271. The maximum lawful price for tight formation gas applies on or after July 16, 1979. (See § 271.703 and § 271.704.)

[3] Commencing January 1, 1985, the price of natural gas finally determined to be new natural gas under section 109(c) is deregulated. (See Part 272 of the Commission's regulations.)

[4] Commencing January 1, 1985, the price of some natural gas finally determined to be natural gas produced from a new, onshore production well under section 103 is deregulated. (See Part 272 of the Commission's regulations.)

TABLE II—NATURAL GAS CEILING PRICES: NGPA §§ 104 AND 106(a) (SUPART D, PART 271)

Category of natural gas	Type of sale or contract	May 1986	June 1986	July 1986
Maximum lawful price per MMBtu for deliveries made in:				
Post-1974 gas	All producers	$2.586	$2.572	$2.578
1973–1974 Biennium gas	Small producer	2.170	2.175	2.180
	Large producer	1.658	1.662	1.666
Interstate Rollover gas	All producers	.954	.956	.958
Replacement contract gas or recompletion gas.	Small producer	1.217	1.220	1.223
	Large producer	.935	.937	.939
Flowing gas	Small producer	.881	.619	.620
	Large producer	.518	.519	.520
Certain Permian Basin gas	Small producer	.728	.728	.730
	Large producer	.844	.845	.846
Certain Rocky Mountain gas	Small producer	.728	.729	.730
	Large producer	.618	.619	.620
Certain Appalachian Basin gas	North subarea contracts dated after 10–7–86	.567	.568	.569
	Other contracts	.542	.543	.544
Minimum rate gas [1]	All producers	.320	.321	.322

[1] Prices for minimum rate gas are expressed in terms of dollars per Mcf, rather than MMBtu.

§ 271.102 [Amended]

3. Section 271.102(c) is amended by inserting the inflation adjustment for the months of May, June, and July, 1986 in Table III.

TABLE III—INFLATION ADJUSTMENT

Month of delivery 1986	Factor by which price in preceding month is multiplied
May	1.00222
June	1.00222
July	1.00222

[FR Doc. 86–9455 Filed 4–30–86; 8:45 am]

BILLING CODE 6717–01–M

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 101

[T.D. 86–93]

Change in Hours of Customs Service Provided at Neche, ND

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Change of hours of service.

SUMMARY: This document reduces the hours of service currently provided at the Customs port of entry at Neche, North Dakota, located on the U.S.-Canadian border, in the Pembina, North Dakota, Customs District.

Because the traffic at Neche does not justify the current 8:00 a.m. to midnight schedule, service between 8:00 a.m.–9:00 a.m. and 10:00 p.m.–midnight is being eliminated. The Customs port of Pembina, just 16 miles east of Neche, is in operation 24 hours daily and can easily absorb any additional workload.

This change will enable Customs to obtain more efficient use of its personnel, facilities, and resources. Further, it will not have any major adverse impact on industry, transportation, or the local population.

EFFECTIVE DATE: June 2, 1986.

FOR FURTHER INFORMATION CONTACT: Bernie Harris, Office of Inspection and Control, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, DC 20229 (202–566–5157).

SUPPLEMENTARY INFORMATION:

Background

Section 101.6, Customs Regulations (19 CFR 101.6), provides that each Customs office shall be open for the transaction of Customs business between the hours of 8:30 a.m. and 5:00 p.m. on all days of the year except Saturdays, Sundays, and national holidays. It also provides that services performed outside a Customs office generally shall be furnished between the hours of 8:00 a.m. and 5:00 p.m. However, because of local conditions, different but equivalent hours may be necessary to maintain adequate and efficient service.

The Customs port of entry of Neche, North Dakota, located on the U.S.-Canadian border in the Pembina, North Dakota, Customs District is currently open and staffed from 8:00 a.m. to midnight, daily. A recent survey showed that there is an average daily total of less than 10 trucks and other vehicles entering the U.S. through Neche from Canada during the hours of 8:00 a.m.–9:00 a.m. and 10:00 p.m.–midnight. The Customs port of entry at Pembina, North Dakota, which is 16 miles east of Neche, is open for operation 24 hours daily.

Due to the minimal traffic using the port of entry, and current budgetary constraints, Customs published a notice in the **Federal Register** on November 5, 1985 (50 FR 45957), proposing the elimination of those 3 hours of service at the port of Neche. The proposal was consistent with Customs nationwide efforts to obtain more efficient use of personnel, facilities, and resources, and would save one full-time position. In addition, the reduction in hours would not have any major adverse impact on industry, transportation, or the local residents because of the close proximity to Pembina which could easily absorb any additional workload. Public comments were invited on the proposal.

Discussion of Comments

There were 21 responses to the proposal, including one containing a petition signed by 167 area residents. All of the commenters opposed the reduction; some for personal reasons, others for business reasons.

Personal reasons for opposing the change included the disruption to schedules, increased travel time, and the possible weakening of cultural and social ties between U.S. and Canadian neighbors.

Business reasons cited included inconvenience to shoppers and the possible negative impact the change might have on future economic growth.

Although Customs sympathizes with persons inconvenienced by the reduced hours, there does not appear to be a potential significant impact on either area residents or businesses. Eliminating the 3 hours specified is in keeping with Customs goal of using our limited resources as efficiently as possible. Customs realizes that every reduction in hours of service is an inconvenience to some person or business in the area affected. However, based on the minimal amount of traffic using Neche during the hours being eliminated, Customs believes the saving of one full-time position and the more efficient use of personnel, facilities, and resources is justified in this instance.

Accordingly, after consideration of the comments, and further review of the matter, Customs has determined that it is necessary to make the change as proposed.

Change in Hours of Service

Customs service at the port of entry of Neche, North Dakota, will be provided between the hours of 9:00 a.m.–10:00 p.m. daily. No service will be provided from 8:00 a.m.–9:00 a.m., or from 10:00 p.m.–midnight.

Drafting Information

The principal author of this document was John Doyle, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

William von Raab,

Commissioner of Customs.

Approved: April 8, 1986.

Francis A. Keating II,

Assistant Secretary of the Treasury.

[T.D. 86–92]

Certification of Cargo Containers and Road Vehicles Pursuant to International Conventions

AGENCY: Customs Service, Treasury.

ACTION: Final rule.

SUMMARY: This document amends the Customs Regulations to reflect the transfer of functions concerning certification of containers and road vehicles for transportation under Customs seal, pursuant to international Customs conventions, from the Secretary of Transportation (acting through the Coast Guard) to the Secretary of the Treasury (acting through the Customs Service). This transfer is mandated by E.O. 12445 of October 17, 1983.

EFFECTIVE DATE: June 2, 1986.

FOR FURTHER INFORMATION CONTACT: Donald Reusch, Office of Regulations and Rulings (202–566–5706) or Arnold L. Sarasky, Office of Inspection and Control, (202–566–8648), U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, DC 20229.

SUPPLEMENTARY INFORMATION:

Background

By Executive Order 11459, published in the **Federal Register** (34 FR 5057), March 11, 1969, the President designated the Secretary of Transportation to take all necessary actions to administer the approval and certification of containers and vehicles for International Transport of Goods Under Cover of TIR Carnets (TIR Convention), done at Geneva on January 15, 1959 (TIAS 6633), and the Customs Convention on Containers, done at Geneva on May 18, 1956 (TIAS 6634). Actual administration was undertaken by the Commandant of the U.S. Coast Guard and regulations setting forth the specific requirements are contained in title 49, Code of Federal Regulations, Parts 420 through 424 (49 CFR Parts 420 through 424).

On October 17, 1983, the President signed E.O. 12445, transferring the administration of approval and certification of containers and road vehicles to the Secretary of the Treasury. In addition to the two Conventions previously mentioned, the E.O. mandates the administration of a third, the Customs Convention on the International Transport of Goods Under Cover of TIR Carnets (TIR Convention), done at Geneva on November 14, 1975 (TIAS), which replaces the 1959 convention as to signatories to both conventions and to those conventions as modified, amended, or otherwise supplemented from time to time. Since the U.S. has recently acceded to the Customs Convention on Containers, 1972, provisions which supplement the 1956 convention are included in this document.

Under the certification program, containers (under the terms of the container convention), and containers and road vehicles (under the terms of the TIR convention), or proposed designs for such conveyances, may be submitted to various certifying authorities worldwide for approval. Three such certifying authorities, all named in the regulations, are designated by the Commissioner of Customs to perform the examination and certification functions for the U.S. The regulations set forth the specifics of the certification program, and the approval of a conveyance would merely expedite its movement along with its merchandise.

The regulations by which the Coast Guard administered this area did not reflect the provisions of the TIR Convention, 1975, or the Customs Convention on Containers, 1972, and did not distinguish between Convention provisions applicable to road vehicles and those applicable to containers. The five parts previously codified in the Coast Guard Regulations (49 CFR Parts 420–424), are re-designated as Subparts A through F of new Part 115, Customs Regulations (19 CFR Part 115). References to Commandant of the Coast Guard are changed to Commissioner of Customs, and section references within the regulations are changed to reflect the recodification.

VOL 51 ISS 84 MY 1 1986 UMI

The regulations do not include the Oceanographic Society, Inc., which was listed in § 421.1, Coast Guard Regulations (46 CFR 421.1), as a designated Certifying Authority. They cannot be located and are therefore presumed to no longer exist.

On May 15, 1985, Customs published a notice in the **Federal Register** (50 FR 20227), proposing to add the new Part 115 to the regulations and inviting the public to submit comments on the proposal by July 15, 1985.

After analysis of the comments received and further consideration of the matter, the proposal is being adopted with certain changes which have been prompted by suggestions submitted by the commenters. These changes will be discussed in the analysis of the comments received which follows.

Analysis of Comments

Three comments were received in response to the May 15, 1985, **Federal Register** notice. The comments were made in regard to specific sections of the proposed regulations, rather than in general terms.

Two commenters expressed concern over the wording of § 115.2(b) as concerns the physical location of certifying authorities. The proposal provided that a conveyance be presented for approval in a country where the owner is a resident or is established. This was said to be too restrictive, considering existing convention language.

We agree. Accordingly, the language of § 115.2(b) has been changed to permit presentation for approval to any certifying authority to whom an owner or operator is able to present a conveyance.

Two commentors discussed problems with § 115.3(a), which defines "certifying authority" for the purposes of Part 115. It is stated that the section should make it clear that such an "authority" be incorporated or established in the U.S., and be "qualified" to perform the tasks required. In line with these points, we have changed § 115.3(a) to reflect that a certifying authority must be a U.S. company which is competent to carry out all necessary responsibilities.

One commenter objects to the definition of a container as being fully or partially enclosed. This requirement is, however, a direct quote from Chapter I, Article 1(e)(i) of the TIR Convention.

One commenter inquired about the meaning of the phrase "an extended production run" in § 115.8(d), the section dealing with supplementary examinations of road vehicles approved by design type. We consider the phrase to mean a continuous production run of many units over a long period of time, as well as a new production run following the conclusion of a previous run.

Two commenters found a portion of § 115.9 to be cumbersome. The section provides for approval of containers under either of two international container conventions. The commenters believe that the potential need for separate certificates for each container certified could be burdensome and suggest that the possibility of a consolidated form be explored.

We do not believe that the adherence to both conventions will cause a problem. The requirements of both the 1975 TIR and the 1972 Container Conventions are virtually the same. Although there might have been some problem without the inclusion in the regulations of the 1972 Convention because the older convention did not provide for design type approval and reference to it was for information purposes, that problem will no longer exist with inclusion of the 1972 convention. Since the U.S. is a contracting party to both conventions, we believe that we must provide for possible utilization of either or both. In this regard, it is noted that the certificate of approval of both conventions is the same and that check boxes on the certificate and forms utilized by the certifying authority are all that is needed to avoid any possible problem. Insofar as there might be some small difference between the technical requirements of each convention, the certifying authority will normally be able to discharge its functions by complying with the requirements of either convention. We believe that we have made sufficient changes in the language of § 115.9 to eliminate any of the problem areas perceived by the commenters.

One commenter pointed out that § 115.10, relating to approval of containers, contains erroneous cross-references to sections of Part 115 dealing with road vehicles. These incorrect references have been deleted.

One party considers the § 115.11(a) grant of authority to the Commissioner to approve fees established by each certifying authority to be unwarranted. This provision is merely carried over from the long-standing regulations by which the Coast Guard administered this program.

The same commenter believes that as maximum limit should be placed on the length of time a certifying authority must maintain approval files. It is our position that the records should be maintained indefinitely since there may be a need to check, for example, a series of defects common to one production run of vehicles or containers.

A commenter points out certain inconsistencies in §§ 115.25, 115.26, and 115.27, in that in two sections "manufacturers" or "owners" may seek approval of containers by design type, where as "owners" are no mentioned in the third section. We have examined these provisions in light of the Container Convention which provides for "manufacturers" only, seeking such approval. Accordingly, we have deleted references to "owners" in those sections.

All of the commenters expressed problems with §§ 115.28(f), and 115.63(e), which contain identical language concerning the application for approval by design type of containers and road vehicles. Both sections would require a statement that the applicant is a resident of, or established in, the U.S.

Under a procedure which was not in existence when the May 15, 1985, notice was published, U.S. certifying authorities will now be authorized to approve containers and road vehicles manufactured in non-contracting countries. Accordingly, the provision to which the commenters took exception is no longer needed and has been deleted from §§ 115.28(f) and 115.63(e).

One commenter states that § 115.32(a)(2), (3), and (4), needs some adjustment. The section contains the information which must be displayed on a container's metal approval plate. It is stated that (a)(2) does not provide for the identity of the certifying authority, and that (a)(3) and (4) overlap each other. As to (a)(2), we agree, and have added language to provide for the inclusion of a two digit identifying code. As to (a)(3) and (a)(4), we disagree. Paragraph (a)(3) provides for the model or type of container, whereas (a)(4) provides for the manufacturer's serial number. Accordingly, no change has been made to § 115.32(a)(3) and (4).

A commenter notes that § 115.39, as proposed, gives the impression that containers manufactured in non-contracting countries may need to be physically produced in a country other than the place of manufacture in order to be inspected. We agree, and have changed the section to make it clear that a container may be submitted for inspection in the country of manufacture.

It is noted that § 115.40 makes no reference to the 1972 Convention on Containers. This was an oversight and the appropriate reference has been added to the section.

One party suggests that § 115.42 should require a container approval plate to contain a number assigned by the certifying authority if the manufacturer's number is unknown. We wish to point out that the manufacturer's number should always be available, otherwise the acceptability of the approval plate itself would be in doubt.

Finally, a commenter points out our erroneous use of the word "containers" in § 115.66(a)(1). We have made the necessary correction by substituting the word "vehicles".

Executive Order 12291

This document does not meet the criteria for a "major rule" as specified in section 1(b) of E.O. 12291. Accordingly, a regulatory impact analysis is not required.

Paperwork Reduction Act

The collection of information requirements in the amendments are subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501). Therefore, they have been submitted to and approved by the Office of Management and Budget and assigned control number 1515–0145. Accordingly, Part 178, Customs Regulations (19 CFR Part 178), which lists the information collections contained in the regulations and the control numbers assigned by OMB, is being amended to include this control number.

Regulatory Flexibility Act

Pursuant to section 3 of the Regulatory Flexibility Act (Pub. L. 96–353, 5 U.S.C. 301 *et seq.*), it is hereby certified that the regulations set forth in this document will not have a significant economic impact on a substantial number of small entities. Accordingly, it is not subject to the regulatory analysis or other requirements of 5 U.S.C. 603 and 604.

Drafting Information

The principal author of this document was Larry L. Burton, Regulations Control Branch, Office of Regulations and Rulings, Customs Headquarters. However, personnel from other Customs offices participated in its development.

List of Subjects

19 CFR Part 115

Cargo vessels, Coastal zone, Freight, Harbors, Maritime carriers, Vessels.

19 CFR Part 178

Reporting and recordkeeping requirements, Paperwork requirements, Collections of information.

Amendments to the Regulations

Chapter I of title 19, Code of Federal Regulations (19 CFR Chapter I), is amended by adding a new Part 115 as set forth below and amending Part 178, Customs Regulations (19 CFR Part 178), in the following manner:

PART 178—APPROVAL OF INFORMATION COLLECTION REQUIREMENTS

1. The authority citation for Part 178 continues to read as follows:

Authority: 5 U.S.C. 301, 19 U.S.C. 1624, 44 U.S.C. 3501 *et seq.*

2. Section 178.2 is amended by inserting the following in the appropriate numerical sequence according to the section number under the columns indicated:

§ 178.2 Listing of OMB control numbers.

19 CFR section	Description	OMB Control No.
Part 115	Information to obtain certification that containers/road vehicles meet construction requirements.	1515–0145

Title 19, Code of Federal Regulations, Part 115 is added to read as follows:

PART 115—CARGO CONTAINER AND ROAD VEHICLE CERTIFICATION PURSUANT TO INTERNATIONAL CUSTOMS CONVENTIONS

Subpart A—General

115.1 Purpose.
115.2 Application.
115.3 Definitions.
115.4 Conflicting provisions.

Subpart B—Administration

115.6 Designated Certifying Authorities.
115.7 Designation of additional Certifying Authorities.
115.8 Certifying Authorities responsibilities—road vehicles.
115.9 Certifying Authorities responsibilities—containers.
115.10 Certificate of approval.
115.11 Establishment of fees.
115.12 Records maintained by Certifying Authority.
115.13 Records to be furnished Customs.
115.14 Meeting on program.
115.15 Reports by road vehicle or container manufacturer.
115.16 Notification of Certifying Authority by manufacturer.
115.17 Appeal to Commissioner of Customs.
115.18 Decision of Commissioner of Customs final.

Subpart C—Procedures for Approval of Containers by Design Type

115.25 General.
115.26 Eligibility.
115.27 Where to apply.
115.28 Application for approval.
115.29 Plan review.
115.30 Technical requirements for containers by design type.
115.31 Examination, inspection, and testing.
115.32 Approval plates.
115.33 Termination of approval.

Subpart D—Procedures for Approval of Containers After Manufacture

115.37 General.
115.38 Application.
115.39 Eligibility.
115.40 Technical requirements for containers.
115.41 Certificate of approval for containers approved after manufacture.
115.42 Approval plates.
115.43 Termination of approval.

Subpart E—Procedures for Approval of Individual Road Vehicles

115.48 General.
115.49 Application.
115.50 Eligibility.
115.51 Technical requirements.
115.52 Approval.
115.53 Certificate of approval.
115.54 Renewal of certificate.
115.55 Termination of approval.

Subpart F—Procedures for Approval of Road Vehicles by Design Type

115.60 General.
115.61 Eligibility.
115.62 Where to apply.
115.63 Application for approval.
115.64 Plan review.
115.65 Technical requirements for road vehicles by design type.
115.66 Examination, inspection, and testing.
115.67 Approval certificate.
115.68 Termination of approval.

Authority: 5 U.S.C. 301, 19 U.S.C. 66, 1624; E.O. 12445 of October 17, 1983.

Subpart A—General

§ 115.1 Purpose.

This chapter establishes procedures for certifying containers and road vehicles in conformance with the Customs Convention on Containers (1956) (TIAS 6634), the Customs Convention on the International Transport of Goods Under Cover of TIR Carnets (1959) (TIAS 6633), the Customs Convention on the International Transport of Goods Under Cover of TIR Carnets, November 14, 1975 (TIAS), and the Customs Convention on Containers, 1972 (TIAS), by applying the procedures and technical conditions set forth in the annexes to these conventions.

§ 115.2 Application.

(a) Certification of containers and road vehicles for international transport under Customs seal is voluntary. This chapter does not require certification of containers and road vehicles.

(b) The Customs Convention on the International Transport of Goods Under Cover of TIR Carnets (TIR Convention), January 15, 1959 (20 UST 184, TIAS 6633), requires that the approval of road vehicles be made by competent authorities of the country in which the owner or carrier is a resident or is established, and that containers should be either similarly approved, or approved by the competent authority of the country where it is first used for transport under Customs seal. The Customs Convention on Containers, May 18, 1956 (20 UST 301, TIAS 6634),

VOL 51 ISS 84 MY 1 1986 UMI

requires that the approval of containers be made by competent authorities of the country in which the owner is a resident or is established or by those of the country where the container is used for the first time for transport under Customs seal. The TIR Convention, 1975, generally provides that a road vehicle, for which approval at a stage after manufacture is desired, shall be approved by the competant authority where the vehicle owner or operator is established or located, or where the vehicle is registered. Such approval under the TIR Convention, 1975, or, for containers, the Customs Convention on Containers, 1972, may be accomplished by the competent authority of the country in which the owner or operator is able to produce the conveyance. The 1975 TIR Convention and the Customs Convention on Containers, 1972, also provide that the Certifying Authority of the country of manufacture, if that country is a contracting party to the Convention, may approve a series of road vehicles or containers presented for design type approval. The procedures for applying for certification are contained in §§ 115.28, 115.38, 115.49, and 115.63 of this part.

§ 115.3 Definitions.

For the purpose of this part:

(a) *Certifying Authority.* "Certifying Authority" means a nonprofit firm or association, incorporated or established in the U.S., which the Commissioner finds competent to carry out the functions of this part and which he designates to certify containers and road vehicles for international transport under Customs seal.

(b) *Commissioner.* "Commissioner" means the Commissioner of Customs.

(c) *Container.* "Container" means an article of transport equipment (lift van, portable tank, or other similar structure).

(1) Fully or partially enclosed to constitute a compartment intended for containing goods;

(2) Of a permanent character and strong enough to be suitable for repeated use;

(3) Specifically designed to facilitate the carriage of goods by one or more modes of transport, without intermediate reloading;

(4) Designed for read handling, particularly its transfer from one mode of transport to another;

(5) Designed to be easily filled and emptied; and

(6) Having an internal volume of 1 cubic meter (35.3 cubic feet) or more.

(d) *Manufacturer.* "Manufacturer" means an organization or person constructing containers or road vehicles for certification in accordance with this chapter.

(e) *Prototype.* "Prototype" means a sample unit of a series of identical containers or road vehicles all built, so far as practical, under the same conditions.

(f) *Road vehicle.* "Road Vehicle", as defined in Chapter 1, Article 1 of the Customs Convention on the International Transport of Goods Under Cover of TIR Carnets (TIR Convention), November 14, 1975 (TIAS), means not only any power-driven road vehicle but also any trailer or semi-trailer designed to be coupled to it.

(g) *Customs and TIR/Container Plan.* "Customs and TIR/Container Plan" means the designer's drawing of a vehicle (for TIR purposes) or container (for TIR and Container Convention purposes) that illustrates each requirement in §§ 115.30, 115.40, 115.51, or 15.65, as appropriate to this part.

(h) The definitions in the subject Conventions shall be considered applicable to terms not specifically defined above.

§ 115.4 Conflicting provisions.

The provisions of the most recent TIR/Container Convention shall apply in the event of conflict between it and an earlier TIR/Container Convention covered by these regulations.

Subpart B—Administration

§ 115.6 Designated Certifying Authorities.

(a) The American Bureau of Shipping, 45 Eisenhower Dr., Paramus, New Jersey 07652.

(b) International Cargo Gear Bureau, Inc., 17 Battery Place, New York, New York 10004.

(c) The National Cargo Bureau, Inc., One World Trade Center, Suite 2757, New York, New York 10048.

§ 115.7 Designation of additional Certifying Authorities.

(a) The Commissioner may designate as a Certifying Authority any nonprofit firm or association that he finds competent to carry out the functions of §§ 115.8 through 115.14 of this subpart.

(b) Any designation as Certifying Authority may be terminated by the Commissioner.

§ 115.8 Certifying Authorities responsibilities—road vehicles.

(a) *General.* Road vehicles may be approved individually or by design type.

(b) *Individual approval.* The Certifying Authority to whom a road vehicle is submitted for approval shall inspect such road vehicle produced in accordance with the general rules contained in Annex 3 of the TIR Convention, 1975.

(c) *Design type approval.* The Certifying Authority to whom a road vehicle is submitted for design type approval shall examine the drawings and detailed design specifications submitted with the application for approval. The Certifying Authority shall advise the applicant of any changes that must be made to the proposed design type in order that approval may be granted. The Certifying Authority shall examine one or more vehicles to confirm that such vehicles comply with the technical conditions contained in Annex 2 of the TIR Convention, 1975. The Certifying Authority shall notify the applicant of its decision to grant design type approval, and it shall issue an approval certificate complying with Annexes 3 and 4 of the TIR Convention, 1975.

(d) *Supplementary examinations.* If a road vehicle approved by design type is the subject of an extended production run under one certificate of approval, the Certifying Authority shall confirm by examination of one or more road vehicles during the manufacturing process, or by other means, that such vehicles continue to meet the approved drawings and detailed design specifications and the technical requirements of Annex 2 of the TIR Convention, 1975.

For the purposes of this section, an extended production run shall be considered a continuous run of many units over long periods of time, as well as a new run following the completion of a previous run.

§ 115.9 Certifying Authorities responsibilities—containers.

(a) *General.* Containers may be approved for transport under seal by design type at the manufacturing stage or, otherwise, at a stage subsequent to manufacture.

(b) *Design type approval.* The Certifying Authority to whom a container is submitted for design type approval shall examine the drawings and detailed design specifications submitted with the application for approval. The Certifying Authority shall advise the applicant of any changes that must be made to the proposed design type so that approval may be granted. The Certifying Authority shall examine one or more containers to confirm that such containers comply with the technical requirements of Part 1, Annex 7, TIR Convention, 1975, and Annex 4 of the Customs Convention on Containers, 1972. The Certifying Authority shall issue a certificate authorizing the applicant to affix an approval plate, as described in Appendix 1 to Part II, Annex 7 of the TIR Convention, 1975, and Annex 5 of the Customs Convention on Containers, 1972, for all containers manufactured in conformity with the specifications of the type of container approved. This certificate shall comply with the model certificate in Appendix 2, Part II, Annex 7 of the TIR Convention, 1975, and Appendix 2 of Annex 5 of the Customs Convention on Containers, 1972.

(c) *After manufacture.* The Certifying Authority to whom containers are submitted for approval after manufacture, shall examine as many containers as necessary to ascertain that they comply with the technical conditions prescribed in Part 1, Annex 7, TIR Convention, 1975, and Annex 5 of the Customs Convention on Containers, 1972. The Certifying Authority shall issue a certificate of approval authorizing the applicant to affix an approval plate to the specific number or series of containers being approved. The certificate shall comply with the model certificate of approval in Appendix 3, Part II, Annex 7, TIR Convention, 1975, and Appendix 3, Annex 5, Customs Convention on Containers, 1972.

(d) *Supplementary examinations.* If a container approved by design type is the subject of an extended production run or several production runs under one certificate of approval, the Certifying Authority shall confirm by examination of one or more containers during the manufacturing process, or by other means, that such containers continue to meet the approved drawings and detailed design specifications and the technical requirements of Annex 7 of the TIR Convention, 1975, and Annex 4 of the Customs Convention on Containers, 1972. For the purposes of this section, an extended production run shall be considered as a continuous run of many units over long periods of time, as well as a new run following completion of a previous run.

§ 115.10 Certificate of approval.

A Certifying Authority shall issue a certificate of approval by design type for a specified number or unlimited series of containers that are approved in accordance with the procedures contained in §§ 115.29, 115.31, 115.38, and 115.41, and road vehicles that are approved in accordance with the procedures contained in §§ 115.49, 115.52, 115.63, and 115.66 of this part.

(a) *Road vehicles.* A Certifying Authority shall issue a certificate of approval conforming to the model in Annex 4 of the 1975 TIR Convention for vehicles submitted for individual or design type approval, if satisfied that the vehicles comply with the technical conditions prescribed in Annex 2 of the TIR Convention, 1975.

(b) *Containers.*—(1) *Approval after Manufacture.* A Certifying Authority shall issue a certificate of approval conforming to the model in Appendix 3, Part II to Annex 7 of the TIR Convention, 1975, and Appendix 3 to Annex 5 of the Customs Convention on Containers, 1972, for containers approved at a stage after manufacture, when it has been ascertained that the containers comply with the technical conditions prescribed in Annex 7 of the TIR Convention, 1975, and Annex 4 of the Customs Convention on Containers, 1972. The certificate shall be valid for the number of containers approved.

(2) *Design type approved.* A Certifying Authority shall issue a single certificate of approval conforming to the model in Appendix 2, Part II to Annex 7 of the TIR Convention, 1975, and Appendix 2 to Annex 5 of the Customs Convention on Containers, 1972, for containers approved by design type when it has been ascertained that the container type complies with the technical conditions prescribed in Annex 7 of the 1975 TIR Convention, and Annex 4 of the Customs Convention on Containers, 1972. The certificate shall be valid for all containers manufactured in conformity with the specifications of the type approved.

(c) *Provisions common to both approval procedures.* The certificate of approval issued pursuant to paragraphs (a) and (b) of this section shall be valid for either the specific number of containers approved, or for an unlimited series of containers of the approved type.

§ 115.11 Establishment of fees.

(a) Each Certifying Authority shall establish and file with the Commissioner a schedule of fees for the performance of the certification procedures under this chapter. The fees shall be based on the costs (including transportation expense) actually incurred by the Certifying Authority. The fees are subject to approval by the Commissioner before their use by the Certifying Authority.

(b) Each Certifying Authority shall make available a schedule of its fees approved by the Commissioner. In addition, the schedules of approved fees for all the Certifying Authorities are available from the Headquarters, U.S. Customs Service, Office of Inspection and Control, 1301 Constitution Avenue, NW., Washington, DC 20229.

§ 115.12 Records maintained by certifying authority.

(a) Each Certifying Authority shall maintain—

(1) A copy of each individual certificate of approval issued, together with a copy of the plans and the application to which the approval refers, along with any information submitted by the manufacturer and/or owner or operator for the certification of a container or a road vehicle.

(2) A record of each serial number assigned and affixed by the manufacturer to the road vehicles and containers manufactured under a design type approval, and containers approved at a stage after manufacture.

(b) The Commissioner may examine the Certifying Authority's files required by paragraph (a) of this section.

§ 115.13 Records to be furnished Customs.

Each Certifying Authority shall furnish the Headquarters, U.S. Customs Service, Office of Inspection and Control, 1301 Constitution Avenue, NW., Washington, DC 20229, unless waived by Customs;

(a) A copy of each issued certificate of approval for containers and road vehicles and a copy of the plans and application to which the approval refers;

(b) A copy of each issued individual approval for a container or road vehicle.

§ 115.14 Meeting on program.

If determined necessary by Customs, each Certifying Authority's representative for certification functions shall meet, after notice, with the Commissioner to review their administration of the certification program.

§ 115.15 Reports by road vehicle or container manufacturer.

Each manufacturer shall forward to the appropriate Certifying Authority, quarterly or when otherwise requested by that Authority:

(a) The registration number or other identifying information on road vehicles, or serial numbers assigned to containers manufactured under a certificate of approval by design type; and

(b) An attestation that each road vehicle or container to which a serial number was assigned was manufactured in full compliance with the certificate of approval by design type.

§ 115.16 Notification of Certifying Authority by manufacturer.

In order that the Certifying Authority can schedule an appropriate inspection, a manufacturer shall give notification to that Authority before each production

VOL 51 ISS 84 MY 1 1986 UMI

run of road vehicles or containers to be built pursuant either to plans approved by the Certifying Authority, or revised plans (approved or unapproved).

§ 115.17 Appeal to Commissioner of Customs.

(a) Any manufacturer, carrier, or owner may, within 30 days after he has been notified by a Certifying Authority of an adverse determination, including any review provided, appeal that determination to the Commissioner.

(b) Any determination which is appealed remains in effect pending a decision by the Commissioner.

§ 115.18 Decision of Commissioner of Customs final.

The decision of the Commissioner on any matter appealed to him is final.

Subpart C—Procedures for Approval of Containers by Design Type

§ 115.25 General.

The Certifying Authority shall, at the request of a manufacturer, evaluate containers for approval by design type during the manufacturing stage.

§ 115.26 Eligibility.

Any manufacturer of containers to be manufactured in a type series from standard design and specifications so that each container has identical characteristics, may apply for approval by design type.

§ 115.27 Where to apply.

A manufacturer may apply for approval of a container by design type to a Certifying Authority of the country in which the container is manufactured if such country is a contracting party to the TIR Convention, 1975, or the Customs Convention on Containers, 1972.

§ 115.28 Application for approval.

Each application by a manufacturer or an owner for certification of a container by design type must include:

(a) Three copies, each no larger than 3 feet by 4 feet, of the customs and TIR/Container plan;

(b) Customs and TIR/Container plan number;

(c) Three copies of the specifications which include the following information:

(1) The name and address of the manufacturer and the owner; and

(2) A description of the container including the—

(i) Type of construction;

(ii) Dimensions;

(iii) Material of construction;

(iv) Coating system used;

(v) Identification marks and numbers; and

(vi) Tare weight;

(d) The location and date for inspection; and

(e) A statement signed by the manufacturer that:

(1) A container of the design type concerned is available for inspection and approval by the Certifying Authority before, during, and after the production run;

(2) Notification will be given to the Certifying Authority of each change in the design before adoption; and

(3) Each container will be marked with:

(i) The metal plate required in § 115.32;

(ii) The identification number or letter of the design type assigned by the manufacturer; and

(iii) The serial number of the container assigned by the manufacturer.

§ 115.29 Plan review.

(a) A manufacturer or owner who wants containers to be approved by design type must submit the plans and specifications for the container to the Certifying Authority.

(b) The Certifying Authority examining the plans and specifications submitted in accordance with paragraph (a) of this section shall:

(1) Approve the plans and specifications in accordance with the requirements of § 115.30 and arrange to inspect a container in accordance with § 115.31; or

(2) Advise the applicant of any necessary changes to be made for compliance with the requirements of § 115.30.

(c) If changes in the design of the container are made during production but after approval of the plans and specifications by the Certifying Authority and furnish it with "as-built" drawings of the container so that the plans can be reviewed and one or more containers inspected during the production stage to confirm that they continue to comply with the requirements of § 115.30.

§ 115.30 Technical requirements for containers by design type.

The plans and specifications of a container submitted in accordance with the requirements contained in §115.29, and the one or more containers inspected in accordance with the requirements of § 115.31, must comply with the requirements of Annex 7 of the Customs Convention on the International Transport of Goods Under Cover of TIR Carnets (TIR Convention), November 14, 1975 (TIAS), and Annex 4 of the Customs Convention on Containers (Container Convention), December 2, 1972. Copies of Annex 7 and Annex 4 may be obtained from the Headquarters, U.S. Customs Service, Office of Inspection and Control, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

§ 115.31 Examination, inspection, and testing.

(a) Before the issuance of a certificate of approval by design type, the Certifying Authority shall:

(1) Make a physical examination of one or more containers of the production series concerned;

(2) Assure itself as to the adequacy of the manufacturer's system to control quality of materials used, manufacturing methods, and finished containers; and

(3) Require the manufacturer to make available to the Certifying Authority records of material, including affidavits furnished by suppliers.

(b) The Certifying Authority shall conduct such examinations, inspections, and tests of the production run containers as it deems necessary.

§ 115.32 Approval plates.

The manufacturer shall affix, in a clearly visible place on or near one of the doors or other main openings of each container manufactured to the approved design, a metal approval plate measuring at least 20 by 10 centimeters (7.8 by 3.9 inches). The following shall be embossed on or stamped into the surface of the approval plate:

(a) "Approved for transport under Customs seal."

(b) "USA/(number of the certificate of approval)/(last two digits of year of approval)." (e.g. "USA/1600/84" means "United States of America certificate of approval number 1600, issued in 1984)." A two digit alpha suffix may be added to the certificate of approval number to identify the Certifying Authority, e.g., USA/1600–AB/85, USA/1600–IB/85.

(c) Identification of the type of container and of the number of the container in the type series.

(d) The serial number assigned to the container by the manufacturer (manufacturer's number).

§ 115.33 Termination of approval.

Any container, the essential features of which are changed, shall no longer be covered by the design type approval. Such a container may be made available to a Certifying Authority for inspection and individual approval in accordance with subpart D of the part. However, repairs in kind do not constitute a change of the essential features.

Subpart D—Procedures for Approval of Containers After Manufacture

§ 115.37 General.

This subpart provides for the approval and certification of containers after manufacture, and for those altered so as to void their design type approval.

§ 115.38 Application.

A written request for approval of a container after manufacture may be made by the owner or operator to a Certifying Authority and must include the following:

(a) Three copies, each no longer than 3 feet by 4 feet, of the Customs and TIR/Container plan;

(b) Customs and TIR/Container plan number;

(c) Three copies of the specifications which include the following information:

(1) Type of container;

(2) Name and business address of applicant;

(3) Identification marks and numbers;

(4) Tare weight;

(5) Nominal overall dimensions in centimeters;

(6) Type of construction and essential particulars of structure (nature of materials, coating system used, parts which are reinforced, whether bolts are riveted or welded, and similar matters); and

(7) Proposed location and date for inspection of the container.

§ 115.39 Eligibility.

The owner or operator may submit containers to be approved after the manufacturing stage to:

(a) The Certifying Authority of the country of manufacture if such country is a contracting party to the Convention.

(b) The Certifying Authority of the country where the owner or operator is resident or established, when such Certifying Authority has representatives located in the country of manufacture, which is a noncontracting party to the Convention.

(c) The Certifying Authority of the country where a container is used for the first time for transport of merchandise under Customs seal or where it is otherwise physically located.

§ 115.40 Technical requirements for containers.

A container that is submitted for inspection for approval after manufacture, must comply with the requirements of Annex 7 of the Customs Convention on the International Transport of Goods Under Cover of TIR Carnets (TIR Convention), November 14, 1975 (TIAS) and Annex 4 of the Customs Convention on Containers (Container Convention), December 2, 1972. Copies of Annex 7 and Annex 4 may be obtained from the Headquarters, U.S. Customs Service, Office of Inspection and Control, 1301 Constitution Avenue, NW., Washington, DC 20229.

§ 115.41 Certificate of approval for containers approved after manufacture.

The Certifying Authority shall issue an individual certificate of approval for each container that meets the requirements in § 115.40.

§ 115.42 Approval plates.

(a) The owner or operator applicant shall, upon receipt of a certificate of approval from the Certifying Authority, affix an approval plate in the manner specified for containers approved by design type (see § 115.32).

(b) Although an entry is not required in the space provided for type identifiers on an approval plate for containers approved after manufacture, identification number and letters indicating that a series of containers comply with the same specifications may be placed in such space. This may be used to assist in the identification of a series of containers in which a common defect may be discovered subsequent to certification. In such case the approval number on the plate shall be altered by an addition to the second or third element of such number. The specific method of altering the approval number may be established by each Certifying Authority, for containers approved by it, and communicated to the U.S. Customs Service.

(c) Two possible methods of accomplishing this are:

(1) Placing an "X" in front of the numeric portion of the middle element of the approval number, e.g., USA/X123–IB/85.

(2) Placing a suffix at the end of the approval number, e.g, USA/123–AB/85–01.

§ 115.43 Termination of approval.

Approval of a container terminates upon a change in the container by a major repair or alteration of any of the essential features required in § 115.40. Repairs by replacement in kind do not constitute a change of the essential features.

Subpart E—Procedures for Approval of Individual Road Vehicles

§ 115.48 General.

This subpart provides for the approval and certification of individual road vehicles that comply with the technical requirements in § 115.51.

§ 115.49 Application.

A written request for approval of an individual road vehicle may be made by the owner, or carrier to a Certifying Authority and must include:

(a) Three copies, each no larger than 3 feet by 4 feet, or the Customs and TIR plan;

(b) Customs and TIR plan number;

(c) Three copies of the specifications which include the following information:

(1) Type of vehicle;

(2) Name and business address of owner or operator;

(3) Name of the manufacturer;

(4) Chassis number;

(5) Engine number (if applicable);

(6) Registration number;

(7) Particulars of construction;

(8) Any photos or diagrams required by the Certifying Authority to facilitate approval; and

(9) A proposed place and date for inspection of the road vehicle.

§ 115.50 Eligibility.

A road vehicle may be submitted for inspection by its owner or operator to a Certifying Authority of the country in which the owner or operator is a resident or is established, or where the vehicle is registered.

§ 115.51 Technical requirements.

A road vehicle that is submitted for inspection for individual approval must comply with the requirements of Annex 2 of the Customs Convention on the International Transport of Goods Under Cover of TIR Carnets (TIR Convention), November 14, 1975, (TIAS). Copies of Annex 2 may be obtained from the Headquarters, U.S. Customs Service, Office of Inspection and Control, 1301 Constitution Avenue, NW., Washington, DC 20229.

§ 115.52 Approval.

The Certifying Authority shall issue a certificate of approval, valid for 2 years, to each road vehicle that complies with the applicable requirements in § 115.51.

§ 115.53 Certificate of approval.

A certificate of approval must be kept on the vehicle as evidence of approval.

§ 115.54 Renewal of certificate.

A certificate of approval may be renewed if the Certifying Authority determines by inspection every 2 years that the vehicle continues to comply with the applicable requirements in § 115.51.

§ 115.55 Termination of approval.

Approval of a road vehicle terminates:

(a) Upon expiration of the certificate of approval; or

VOL 51 ISS 84 MY 1 1986 UMI

(b) Upon a change in the road vehicle by a major repair or alteration of any of the essential features required in § 115.51. Repairs by replacement in kind do not constitute a change of the essential features.

Subpart F—Procedures for Approval of Road Vehicles by Design Type

§ 115.60 General.

This subpart provides for the approval and certification of road vehicles manufactured by design type.

§ 115.61 Eligibility.

Any manufacturer of road vehicles which are being manufactured in a type series from a standard design and specifications, so that each road vehicle has identical characteristics, may apply for an approval by design type.

§ 115.62 Where to apply.

A manufacturer may apply for approval of a road vehicle by design type to a Certifying Authority of the country in which the road vehicle is manufactured, if such country is a contracting party to the TIR Convention, 1975.

§ 115.63 Application for approval.

Each application by a manufacturer for certification of a road vehicle by design type must include:

(a) Three copies, each no larger than 3 feet by 4 feet, of the Customs and TIR plan;

(b) Customs and TIR plan number;

(c) Three copies of the specifications which include the following information:

(1) The name and address of the manufacturer and the owner; and

(2) A description of the road vehicle including the:

(i) Particulars of construction;

(ii) Dimensions;

(iii) Construction materials; and

(iv) Marks and numbers, including chassis, engine, and registration numbers.

(d) A statement signed by the manufacturer that:

(1) It will present vehicles of the type concerned to the Certifying Authority which that Authority may wish to examine;

(2) Permit the Certifying Authority to examine further units at any time during or after the production run;

(3) Notify the Certifying Authority of each change in the design or specifications before adoption;

(4) Mark the road vehicles in a visible place with the identification number or letters of the design type and the serial number of the vehicle in the type series manufacturer's number; and

(5) Keep a record of vehicles manufactured according to the design type.

§ 115.64 Plan review.

(a) A manufacturer or owner who wants road vehicles to be approved by design type must submit the plans and specifications of the road vehicles to the Certifying Authority.

(b) The Certifying Authority that examines the plans and specifications submitted in accordance with paragraph (a) of this section shall:

(1) Approve the plans and specifications in accordance with the requirements of § 115.65 and arrange to inspect a road vehicle in accordance with § 115.66; or

(2) Advise the applicant of any necessary changes to be made for compliance with the requirements of § 115.65.

(c) If changes in design of the road vehicle are made during production but after approval of the plans and specifications by the Certifying Authority, the manufacturer shall immediately notify the Certifying Authority and furnish it with "as-built" drawings of the road vehicle so that the plans can be reviewed and one or more road vehicles inspected during the production stage to confirm that they continue to comply with the requirements of § 115.65.

§ 115.65 Technical requirements for road vehicles by design type.

The plans and specifications of a road vehicle that are submitted in accordance with the requirements contained in § 115.64, and the one or more road vehicles that are inspected in accordance with the requirements of § 115.66, must comply with the requirements of Annex 2 of the Customs Convention on the International Transport of Goods Under Cover of TIR Carnets (TIR Convention), November 14, 1975 (TIAS). Copies of Annex 2 may be obtained from the Headquarters, U.S. Customs Service, Office of Inspection and Control, 1301 Constitution Avenue, NW., Washington, DC 20229.

§ 115.66 Examination, inspection, and testing.

(a) Before the issuance of a certificate of approval by design type, the Certifying Authority shall:

(1) Make a physical examination of one or more vehicles of the production series concerned;

(2) Assure itself as to the adequacy of the manufacturer's system to control quality of materials used, manufacturing methods, and finished road vehicles; and

(3) Require the manufacturer to make available to the Certifying Authority records of materials, including affidavits furnished by suppliers.

(b) The Certifying Authority shall conduct such examinations, inspections, and testing of the production run road vehicles as it deems necessary.

§ 115.67 Approval certificate.

The holder of the approval certificate shall, before using the vehicle for the carriage of goods under the cover of a TIR Carnet, fill in as may be required on the approval certificate:

(a) The registration number given to the vehicle (item No. 1); or

(b) In the case of a vehicle not subject to registration, particulars of his name and business address (item No. 8). (See Annex 4 of the Convention for model of certificate of approval.)

§ 115.68 Termination of approval.

Any road vehicle whose essential features are changed shall no longer be covered by the design type approval. Such a road vehicle may be made available to a Certifying Authority for inspection and individual approval in accordance with subpart E of this part. However, repairs in kind do not constitute a change of the essential features.

William von Raab,

Commissioner of Customs.

Approved: April 17, 1986.

Francis A. Keating, II,

Assistant Secretary of the Treasury.

BILLING CODE 1505-01-M

Food and Drug Administration

21 CFR Part 176

[Docket No. 85F-0262]

Indirect Food Additives; Paper and Paperboard Components

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the food additive regulations to provide for the safe use of cationic soy protein hydrolyzed (hydrolyzed soy protein isolate modified by treatment with 3-chloro-2-hydroxypropyltrimethylammonium chloride) in the manufacture of paper and paperboard used in the packaging of dry food. This action responds to a petition filed by Ralston Purina Co.

DATES: Effective May 1, 1986; objections by June 2, 1986.

ADDRESS: Written objections to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Edward J. Machuga, Center for Food Safety and Applied Nutrition (HFF-335), Food and Drug Administration, 200 C Street SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: In a notice published in the **Federal Register** of June 25, 1985 (50 FR 26271), FDA announced that a petition (FAP 5B3865) had been filed by Ralston Purina Co., Checkerboard Square, St. Louis, MO 63164, proposing that § 176.180 *Components of paper and paperboard in contact with dry food* (21 CFR 176.180) be amended to provide for the safe use of cationic soy protein hydrolyzed (hydrolyzed soy protein isolate modified by treatment with 3-chloro-2-hydroxypropyltrimethylammonium chloride) in the manufacture of paper and paperboard used in the packaging of dry food.

FDA has evaluated the data in the petition and other relevant material. The agency concludes that the proposed food additive use is safe, and that the regulations should be amended as set forth below.

In accordance with § 171.1(b) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Center for Food Safety and Applied Nutrition (address above) by appointment with the information contact person listed above. As provided in 21 CFR 171.1(b), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

The agency has carefully considered the potential environmental effects of this action and has concluded that the action will not have a significant impact on the human environment and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday. FDA's regulations implementing the National Environmental Policy Act (21 CFR Part 25) have been replaced by a rule published in the **Federal Register** of April 26, 1985 (50 FR 16636, effective July 25, 1985). Under the new rule, an action of this type would require an abbreviated environmental assessment under 21 CFR 25.31a(b)(1).

Any person who will be adversely affected by this regulation may at any time on or before June 2, 1986 file with the Dockets Management Branch (address above) written objections thereto. Each objection shall be separately numbered, and each numbered objection shall specify with particularity the provisions of the regulation to which objection is made and the grounds for the objection. Each numbered objection on which a hearing is requested shall specifically so state. Failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held. Failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Docket Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 176

Food additives, Food packaging.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Director of the Center for Food Safety and Applied Nutrition, Part 176 is amended as follows:

PART 176—INDIRECT FOOD ADDITIVES: PAPER AND PAPERBOARD COMPONENTS

1. The authority citation for 21 CFR Part 176 continues to read as follows:

Authority: Secs. 201(s), 409, 72 Stat. 1784-1788 as amended (21 U.S.C. 321(s), 348); 21 CFR 5.10 and 5.61.

2. In § 176.180(b)(2) by alphabetically inserting a new item in the list of substances to read as follows:

§ 176.180 Components of paper and paperboard in contact with dry food.

27 CFR Part 5

[T.D. ATF-228; re: Notice Nos. 486 & 505]

Elimination of the 500 Milliliter Metric Standard of Fill for Distilled Spirits

AGENCY: Bureau of Alcohol, Tobacco and Firearms (ATF), Treasury.

ACTION: Treasury decision, final rule.

SUMMARY: This final rule eliminates the 500 ml size container from the metric standards of fill for distilled spirits. This reduces the total number of authorized metric standards of fill for distilled spirits from eight to seven. This action is in response to our analysis of the metric sizes and to comments on Notice No. 486 (September 23, 1983, 48 FR 43346). This action will be completed in a phase-out period ending June 30, 1989. Beginning July 1, 1989, importers and bottlers will no longer be able to import or bottle distilled spirits in 500 ml containers

FOR FURTHER INFORMATION CONTACT: Edward A. Reisman, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms, 1200 Pennsylvania Avenue NW., Washington, DC 20226 (202-566-7626).

SUPPLEMENTARY INFORMATION:

Summary

375 and 500 milliliter standards of fill. On September 23, 1983, ATF published Treasury Decision ATF-146 (48 FR 43319) adopting the 100 ml size and 375 ml size as standards of fill for distilled spirits. These two metric standards of fill became effective for use in interstate and foreign commerce on January 3, 1984. Concurrent with this Treasury decision, ATF published Notice No. 486 (48 FR 43346) relating to the 375 ml size and 500 ml size.

A major concern with the 375 ml and 500 ml sizes was the similarity in bottle size and shape even though the volumetric difference is 125 ml, or slightly over four fluid ounces. Because of this concern, ATF issued Notice No. 486 which requested comments on whether bottlers should be allowed the option of bottling their products in either the 375 ml size or 500 ml size, but not both; or whether the 500 ml size should be eliminated as a standard of fill for distilled spirits.

After carefully studying the issues, ATF has decided to phase-out the 500 ml metric standard of fill, for the following reasons:

1. The comments were overwhelmingly in favor of elimination of that size.

2. There have been reports of consumer confusion between the 375 ml and 500 ml sizes. Because of the closeness in fill and bottle shape, consumers are having difficulty distinguishing between the two sizes when purchasing distilled spirits products at retail.

3. Retailers and wholesalers strongly objected to the continuance of the 500 ml standard of fill. They claimed that even the members of the alcohol beverage industry were having difficulty distinguishing between the 375 ml and 500 ml sizes. These retail dealers and wholesalers also claimed that stocking both sizes was causing unnecessary additional costs in storage, handling and displaying. They said that the new 375 ml size filled the market need that was previously satisfied by the 500 ml size.

4. One of the purposes for adopting the metric standards of fill in the United States was to reduce the number of confusing bottle sizes available to the consumer. The new metric sizes were intended to offer consumers a rational range of size choices that were easy to distinguish on the store shelf and which could be easily differentiated.

Elimination of the 500 ml size helps prevent size proliferation in the number of metric sizes needed for distilled spirits products. This action eliminates one unnecessary size and leaves a simple rational set of metric bottle sizes to choose from.

Since the introduction of metric bottle sizes in the United States, two additional sizes, the 100 ml and 375 ml sizes, were added because there was strong industry and consumer demand for them. Although there was strong demand to add each of these new metric sizes, it has unfortunately resulted in size proliferation. Elimination of the 500 ml size will help to rectify the problem.

Background

500 ml Metric Standard of Fill. The 500 ml size metric standard of fill was authorized by T.D. ATF-25 (January 6, 1976, 41 FR 1063). That Treasury decision established the original metric standards of fill for distilled spirits in the United States, effective January 1, 1980. The six original sizes were 1.75 liters, 1 liter, 750 ml, 500 ml, 200 ml and 50 ml. Prior to the Treasury decision the Bureau published a Notice of Proposed Rulemaking and Public Hearing in the Federal Register on July 16, 1975.

The Notice contained proposals made by both the Distilled Spirits Council of the United States and ATF. The sizes were adopted on the basis of evidence received at public hearings and in written comments.

375 ml Metric Standard Of Fill. The 100 ml and 375 ml sizes were authorized as metric standards of fill in 1984. In 1981, Bacardi Imports, Inc. petitioned ATF to allow the 375 ml size to be used in interstate and foreign commerce. This petition was supported by various segments of the distilled spirits industry. Bacardi Imports, Inc. maintained in their petition that there was a consumer demand for the 375 ml size and that it would facilitate the international market since Canada, the United Kingdom, and the European Economic Community (EEC) utilize the 375 ml size as one of their standards of fill.

ATF proposed the 375 ml size as a standard of fill for distilled spirits on August 16, 1982 (Notice No. 417; 47 FR 35521). 48 comments were received in response to that notice, of which 37 supported the 375 ml size and 11 were opposed. Seven of the supporters of the 375 ml size wanted industry members to have the option of bottling the 375 ml or 500 ml size but not both sizes. Nine of the supporters of the 375 ml size wanted the 500 ml size eliminated if the 375 ml size was adopted.

Based on these comments, ATF adopted the 375 ml size, effective January 3, 1984, but decided to air the possibility of eliminating or restricting the 500 ml size.

Notice No. 486. In Notice No. 486, September 23, 1983, ATF requested comment from all interested persons on the alternatives raised by the commenters during rulemaking on the 375 ml size. ATF requested comments on the the following specific issues:

(a) Would retention of the 500 ml size lead to consumer confusion or deception because of its similarity to the 375 ml size?

(b) Since there is only slightly over four fluid ounces difference between the 375 ml size and the 500 ml size, is there a need to have both sizes? Would the 375 ml size fulfill the market need for the 500 ml size?

(c) In the event the 500 ml size is eliminated as a standard of fill, what is a reasonable transition period to allow for a use-up of present inventories of this bottle size?

(d) Does the greater benefit to both industry and the consumer exist with both sizes in the market without qualification since it allows greater flexibility in bottling and wider size choices on purchase?

(e) Would repeat purchases negate any confusion or deception that may arise between the 375 ml size and 500 ml size? Does the option of having a purchase choice between the 375 ml size and the 500 ml size outweigh any confusion or deception that may arise?

Extension of Comment Period. The comment period for Notice No. 486 was scheduled to close on March 23, 1984, but was extended by Notice No. 505, March 21, 1984 (49 FR 10563) until January 2, 1985. ATF granted this extension at the request of The Distilled Spirits Council of the United States (DISCUS) and the National Association of Beverage Importers (NABI) who wanted a one year extension to give industry time to make an informed choice through market surveys based on consumer preferences and purchases.

Analysis of Comments. 133 comments were received. 108 of the comments generally were opposed to the retention of the 500 ml size. 24 wanted the 500 ml size retained. The majority (98) of the comments came from wholesalers and retailers.

Foreign Governments	0	2

The National Liquor Stores Association and the Wine & Spirits Wholesalers of America wanted the 500 ml size rescinded. The National Association of Beverage Importers, the U.S. Metric Association and the Kentucky Wholesale Liquor Dealers wanted the 500 ml size retained. Six state authorities commented. Kentucky, Vermont, Wyoming, Arkansas and Massachusetts favored rescision of the 500 ml size while Iowa favored its retention. Two foreign governments, Germany and France, favored retention of the 500 ml size.

Comments Favoring Elimination Of The 500 ml Size

The basic objection to the 500 ml size was that the 375 ml and 500 ml sizes cause consumer confusion because both sizes have similar shapes and heights. Many commenters said the 375 ml size fulfills the market need for the 500 ml size. The majority of commenters said that there is no greater benefit to industry and consumers to have both sizes even though it would allow greater flexibility in bottling and permit wider consumer choices.

Most commenters said that the option of having a purchase choice between the 375 ml and 500 ml size does not outweigh any confusion or deception that may arise. Some commenters said that the 500 ml size was not a good seller and never a popular container size with the public as compared to other available metric sizes. Ten commenters responded to the question in the notice on a reasonable transition period to allow a use-up of the 500 ml size container. The time requested varied from three months to three years. The following are some specific comments on that issue:

A U.S. distiller said that the 500 ml size is too close to the 750 ml size and does not give the consumer enough of a choice.

A wholesaler stated that existence of both the 500 ml and 375 ml sizes will cause additional costs in storage, handling and displaying these smaller, yet similar quantity sized containers.

A wholesaler said that many wholesalers and retailers claim that adding new metric sizes adds increased inventories, often resulting in financial difficulties. A retail liquor dealer conducted a survey on the 375/500 ml size issue with 250 of their regular customers. The vote resulted in 214 in favor of only one size, the 375 ml, and 36 in favor of the other options.

A state commented that a proliferation in bottle sizes being introduced into the market will cause many customers to have a difficult time trying to compare prices and make economical purchases.

Another state said the introduction of the 375 ml size makes it necessary for the consumer to choose a new bottle size. The consumer would have to evaluate its cost from among a confusing number of container sizes so closely related in size and price that only the most discerning shoppers will choose wisely.

A retail liquor store association stated that the varying bottle shapes between the 375/500 ml sizes may be confusing and misleading to the consumer.

A wholesale liquor dealer association stated that due to space limitations, retailers can stock either the 375 or 500 ml size but not both.

A number of wholesalers said that the 375 ml size will present the best value to the consumer by being half the size of the 750 ml bottle. They also said it will also be easy for the consumer to distinguish by size and price between the 375 ml and 750 ml size. Many of them also claimed that there was no public demand for both the 375 ml and 500 ml sizes.

A wholesaler said that a recent survey of their key retail accounts has indicated that retailers will stock only one size because of inventory, shelf space and cost limitations.

Many retailers said that a consumer who wants one of those sizes is going to be satisfied with the other. Many of them said that the elimination of the 500 ml size would be in the best interest to all.

Comments Favoring Retention of the 500 ml Size

An importer said that retention of the 500 ml size would allow the consumer a wider range of size choices and that the enhanced competition should benefit both industry and consumers. They also said that most sales are made in size grouping and are clearly marked on the shelves in retail liquor stores. The importer noted that net content statements are required to appear in a legible manner on bottles.

One importer claimed that the exclusion of the 500 ml bottle size from the standards of fill would create a non-tariff trade barrier.

Another importer said the elimination of the 500 ml would unfavorably affect the ability to market proprietary brands of distilled spirits. In the past two years they have found increased demand by consumers for both the 500 ml and 375 ml size. They claim this is due to higher prices and the proliferation of imported proprietary products in the United States.

A bottler and wholesaler said that the elimination of the 500 ml would create a void because the difference in retail price between the 375 ml and 750 ml could be as much as $3.50. The same commenter said that the consumer would benefit from the higher degree of marketing flexibility achieved from the free use of both sizes on the market place. The commenter said that some industry members have a substantial investment in their bottle molds and in the equipment specially adapted for use with the 500 ml size. The commenter said that prohibiting the use of the 500 ml size would jeopardize these investments.

A foreign distiller claimed that both the 375 ml and 500 ml bottle sizes are required by various parts of the industry since they serve different purposes. The distiller said the ratio of size difference between the 375 ml and 500 ml size is exactly the same as that between the 750 ml and 1 liter sizes. In addition, the distiller claimed that the 500 ml size is a less expensive way of buying a recognizable brand of distilled spirits, whereas the 375 ml clearly is a small or half bottle. The distiller also said that by allowing both sizes, industry has greater flexibility and the consumer a wider choice to pick from. The distiller stated that familiarity with a product on repeat purchase should eliminate any possible confusion.

A U.S. distiller said that they continue to experience strong consumer demand for both sizes. They claim a greater benefit to both industry and consumers exists with both sizes in the market since it allows a greater flexibility in bottling and wider size choices on purchase. They also said that both sizes are critical to some brands of distilled spirits.

Another U.S. distiller said that the industry best serves the consumer with a broad selection of sizes to fit varied consumer needs.

A French government official stated that the 500 ml size makes an intermediate price for the consumer who can't afford, in a larger size, those expensive liqueurs in which France is well represented.

VOL 51 ISS 84 MY 1 1986 UMI

An association favored retention of the 500 ml size as a rational metric size and opposed introduction of the 375 ml size.

One commenter said that the elimination of the 500 ml size will create a higher retail price-point position between the 750 ml and 200 ml bottle for the 375 ml bottle. This would mean higher consumer cost per milliliter for the 375 ml bottle. The commenter concluded that the consumer's options are reduced and purchase costs increased because of the elimination of the 500 ml size.

An importer stated that the market place should dictate whether the 500 ml size remains a viable option for American consumers. They now oppose any regulations which restrict the ability to market both sizes.

Conclusion

Based on all the comments received, ATF believes that retention of the 500 ml size would lead to consumer confusion because of its similarity to the 375 ml size.

There is no need for both the 375 ml and 500 ml sizes since there is only a slight difference between the two, and the 375 ml size will fulfill the market need for the 500 ml size. A greater benefit does not exist to either industry or the consumer with both sizes on the market because of the confusion that may develop. While it is possible that future purchases may negate confusion or deception that may arise between the two sizes, it is also possible that they may not because of the closeness of size.

Two of the reasons for the conversion from U.S. measure to metric standards of fill were to reduce the large number of sizes available to the consumer and to eliminate consumer confusion over them.

The majority of comments from the wholesalers and retailers indicated their strong opposition to the 500 ml size not only because the potential confusion that might be experienced by the alcohol beverage industry and consumers but the concurrent use of the 500 ml size and the 375 ml size is creating expensive and complicated inventory problems (storage, handling, and displaying) for the entire wholesale/retail tier of the industry.

We do not feel that a non-tariff trade barrier is created by the phase-out of the 500 ml size because there is still available to bottlers in foreign countries the option of using the 375 ml size standard of fill. Therefore, there would not be differing bottling requirements for domestic and foreign bottlers. Of all the comments received (including those from importers and foreign governments), only one importer raised the non-tariff trade barrier issue.

ATF is rescinding the 500 ml standard of fill for distilled spirits. Since the majority of comments from the industry indicate that the existence of both the 500 ml and the new 375 ml size are creating confusion from the wholesale/retail industry level and the public, ATF believes the elimination of the 500 ml size is the best alternative.

Effective Date: ATF is making this regulation effective July 1, 1989. ATF believes this three year phase-out period will allow industry to make the necessary preparations to eliminate the 500 ml size container, prior to the mandatory phase-out date, will be authorized to be marketed after the mandatory date. No spirits may be imported into this country in the 500 ml size containers unless they are accompanied by a certificate of statement that they were bottled prior to the mandatory date.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to an initial and final regulatory analysis (5 U.S.C. 603, 604) are not applicable to this final rule because it will not have a significant economic impact on a substantial number of small entities. This final rule will not have significant secondary or incidental effects on a substantial number of small entities, or impose, or otherwise cause, a significant increase in the reporting, recordkeeping, or other compliance burdens on a substantial number of small entities.

Accordingly, it was certified under the provisions of section 3 of the Regulatory Flexibility Act (5 U.S.C. 605 (b)), in the notice of proposed rulemaking leading to this final rule that regulations would not have a significant economic impact on a substantial number of small entities.

Executive Order 12291

It has been determined that this final rule is not a "major rule" within the meaning of Executive Order 12291, 45 FR 13193 (1981) because it will not have:

(a) An annual effect on the economy of 100 million dollars or more;

(b) It will not result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and

(c) It will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Paperwork Reduction Act

The provisions of the Paperwork Reduction Act of 1980, Pub. L. 96-511, 44 U.S.C. Chapter 35, and its implementing regulations, 5 CFR Part 1320, do not apply to this final rule because no requirement to collect information is imposed.

Drafting Information

The principal author of this document is Edward A. Reisman of the FAA, Wine and Beer Branch.

List of Subjects in 27 CFR Part 5

Advertising, Consumer protection, Customs duties and inspection, Imports, Labeling, Liquors, Packaging and containers.

Authority and Issuance

Part 5—Labeling and Advertising of Distilled Spirits is amended to read as follows:

Paragraph 1. The authority citation in Part 5 is revised to read as follows:

Authority: 26 U.S.C. 5301, 7805; 27 U.S.C. 205.

Par. 2. Section 5.47a is amended by revising paragraph (a) (by qualifying the 500 ml size in the metric standards of fill) to read as follows:

§ 5.47a Metric standards of fill (distilled spirits bottled after December 31, 1979).

(a) *Authorized standards of fill.* The standards of fill for distilled spirits are the following:

1.75 liters
1.00 liter
750 milliliters
500 milliliters (Authorized for bottling until June 30, 1989)
375 milliliters
200 milliliters
100 milliliters
50 milliliters

* * * * *

Par. 3 Section 5.53 is amended by adding a paragraph (b) providing for the importation of 500 ml bottles of distilled spirits bottled prior to July 1, 1980, to read as follows:

§ 5.53 Certificate of nonstandard fill.

* * * * *

(b) Distilled spirits imported in 500 ml containers shall not be released from Customs custody after June 30, 1989:

(1) Unless the distilled spirits are accompanied by a certificate issued by the government of the appropriate foreign country, stating that the distilled spirits were bottled or packed prior to July 1, 1989; or

(2) Unless the distilled spirits are being withdrawn from a Customs bonded warehouse or foreign trade zone into which entered on or before June 30, 1989.

Signed: December 17, 1985.

Stephen E. Higgins,

Director.

Approved: April 11, 1986.

Francis A. Keating II,

Assistant Secretary (Enforcement).

BILLING CODE 4810-31-M

DEPARTMENT OF JUSTICE

28 CFR Part 21

[Order No. 1133-86]

Witness Fees

AGENCY: Department of Justice.

ACTION: Final rule.

SUMMARY: This rule revises the regulations for the payment of fees and expenses of witnesses in order to rationalize the fee system for federal witnesses. The revision reflects the current attendance fee of $30 a day and establishes witness transportation and per diem expenses at the same rates as those received by Government employees. In addition, the revision delineates the various classes of aliens who are eligible and ineligible to receive the witness fees and expenses.

EFFECTIVE DATE: April 21, 1986.

FOR FURTHER INFORMATION CONTACT: James E. Williams, Associate Director, Finance Staff, on Telephone Number (202) 633-5538.

SUPPLEMENTARY INFORMATION: On October 25, 1985, the Department of Justice proposed to revise Part 21 of Title 28, Code of Federal Regulations to conform to 28 U.S.C. 1821. The revision contains a new section of definitions to ensure a common understanding of the applicable terms.

In addition, the procedure for computation of the fees and allowances of witnesses is stated in this Part. Fact witness travel is linked to the travel allowances of Government employees. However, it is considered impractical to have fact witnesses travel under the quarter day rule which applies to Government employees. A procedure has been devised to pay fact witnesses the approximate travel expenses Government employees would be entitled to for performing similar travel.

Finally, the Department of Justice revised the certification of attendance of witnesses to include United States Trustees, United States District Judges for criminal *in forma pauperis* proceedings, United States Parole Commission Hearing Examiners in parole proceedings, and the Executive Assistant or Administrative Officer of the President's Commission on Organized Crime.

Interested parties were invited to participate in these rule making proceedings by submitting written comments on the proposal. One comment was received and accepted regarding the designation of a highway mileage guide (Part 21.5). In addition, the reference to the President's Commission on Organized Crime was deleted because the Commission's term has expired. Other than those changes, this rule is the same as that proposed in the notice.

The Department of Justice has determined that this rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs to consumers or others; and will not have significant adverse effects on competition, employment, investment, productivity, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This is not a rule within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601-612.

List of Subjects in 28 CFR Part 21

Courts, Government employees, Travel and transportation expenses.

By virtue of the authority vested in me, as Attorney General, by 28 U.S.C. 509 and 510; 5 U.S.C. 301 and 5751, and 8 U.S.C. 1103, Part 21 of Title 28, Code of Federal Regulations, is amended to read as follows:

1. The authority citation for Part 21 is added to read as follows:

Authority: 28 U.S.C. 509, 510, 1821-1825, 5 U.S.C. 301.

2. Part 21 is revised to read as follows:

PART 21—WITNESS FEES

Sec.
21.1 Definitions.
21.2 Employees of the United States serving as witnesses.
21.3 Aliens.
21.4 Fees and allowances of fact witnesses.
21.5 Use of table of distances.
21.6 Proceedings *in forma pauperis*.
21.7 Certification of witness attendance.

§ 21.1 Definitions.

(a) *Agency Proceeding.* An agency process as defined by 5 U.S.C. 551 (5), (7) and (9).

(b) *Alien.* Any person who is not a citizen or national of the United States.

(c) *Judicial Proceeding.* Any action or suit, including any condemnation, preliminary, informational or other proceeding of a judicial nature. Examples of the latter include, but are not limited to, hearings and conferences before a committing court, magistrate, or commission, grand jury proceedings, pre-trial conferences, depositions, and coroners' inquests. It does not include information or investigative proceedings conducted by a prosecuting attorney for the purpose of determining whether an information or charge should be made in a particular case. The judicial proceeding may be in the District of Columbia, a State, or a territory or possession of the United States including the Commonwealth of Puerto Rico or the Trust Territory of the Pacific Islands.

(d) *Pre-trial Conference.* A conference between the Government Attorney and a witness to discuss the witness' testimony. The conference must take place after a trial, hearing or grand jury proceeding has been scheduled but prior to the witness' actual appearance at the proceeding.

(e) *Residence.* The term "residence" is not limited to the legal residence, but includes any place at which the witness is actually residing and at which the subpoena or summons is served. If the residence of the witness at the time of appearance is different from the place of subpoena or summons, the new place of residence shall be considered the witness' residence for computation of the transportation allowance; but, if the witness is on a business or vacation trip at the time of appearance, the witness shall be paid for travel from the place of service if this does not result in the witness being paid for more travel than is actually performed.

(f) *Summons.* An official request, invitation or call, evidenced by an official writing of the court, authority, or party responsible for the conduct of the proceeding.

§ 21.2 Employees of the United States serving as witnesses.

(a) *Applicability.* This section applies to employees of the United States as defined by 5 U.S.C. 2105, except those whose pay is disbursed by the Secretary of the Senate or the Clerk of the House of Representatives.

(b) *Entitlement to Travel Expenses.*—(1) *Official Capacity.* An employee is entitled to travel expenses (in accordance with § 21.2(c)) in connection with any judicial or agency proceeding with respect to which the employee is summoned (and is authorized by the employee's agency to respond to such

VOL 51 ISS 84 MY 1 1986 UMI

summons), or is assigned by his or her agency: (i) To testify or produce official records on behalf of the United States, or (ii) to testify in his or her official capacity or produce official records on behalf of a party other than the United States. The witness appropriation of the Department of Justice is not available for expenses incurred under these conditions.

(2) *Unofficial Capacity, Federal Involvement.* An employee is entitled to travel expenses (in accordance with § 21.2(c)) in connection with any judicial or agency proceeding with respect to which the employee is summoned to testify on behalf of the United States. If an employee is summoned to testify on behalf of a party other than the United States, the employee's travel expenses shall be payable by the court, authority, or party which caused the employee to be summoned.

(3) *Unofficial Capacity, No Federal Involvement.* An employee who appears as a witness in any judicial proceeding in an unofficial capacity in which there is no Federal involvement is not authorized Government travel expenses and may retain reimbursement for expenses which he or she receives from the court, authority or party which caused the employee to be summoned.

(c) *Allowable Travel Expenses.* An employee qualifying for payment of travel expenses by virtue of being called in an official capacity or on behalf of the United States shall be paid at rates and in amounts allowable for other purposes under the provisions of 5 U.S.C. 5702–5705 and applicable regulations prescribed thereunder by the Administrator, General Services, and the employing agency. Such payment shall be reduced to the extent that the travel expenses are paid to the employee for his or her appearance by the court, authority, or party which caused the employee to be summoned as a witness in an official capacity on behalf of a party other than the United States.

(d) *Payment and Reimbursement.*—(1) *Payable by the Employing Agency.* If an employee serves as a witness, and the case involves the activity in connection with which he or she is employed, the travel expenses are payable from the appropriation of the employing agency. The Comptroller General has defined the extent to which the case must be related to the agency's activity as a condition to the agency's responsibility for payment in 23 Comp. Gen. 47, 49 (1943), which states "the employing agency is required to pay . . . the traveling expenses incurred by the witness only where the information or facts ascertained by the employee as part of his official duties forms the basis of the case, or where the proceeding is predicated upon a law that that agency is required to administer." In 39 Comp. Gen. 1, 2 (1959), the Comptroller General determined that if an employee testifies regarding facts and information he or she acquires in the course of his or her assigned duties, the employing agency is responsible for the payment of the employee's travel expenses. In these instances, the witness appropriation of the Department of Justice is not available for payment of expenses.

(2) *Payable by the Department of Justice.* If an employee appears on behalf of the United States in an unofficial capacity in a judicial proceeding involving the Department of Justice, the employee's travel expenses are payable by the Department of Justice. The employing agency may advance or pay the travel expenses of the employee and later obtain reimbursement from the Department of Justice by submitting an appropriate bill together with a copy of the approved advance or travel voucher.

(e) *Leave and Attendance Fee.*—(1) *Leave.* An employee is considered to be in official duty status when appearing as a witness in his or her official capacity or on behalf of the United States in an unofficial capacity. An employee is entitled to court leave when he or she appears as a witness in an unofficial capacity not on behalf of the United States, and the United States, the District of Columbia, or a State or local government is a party to the case. An employee must use annual leave or leave without pay to appear as a witness when the United States, the District of Columbia, or a State or local government is not a party.

(2) *Attendance Fee.* An employee who appears on behalf of the United States is not entitled to receive an attendance fee. An employee who appears on behalf of a party other than the United States while in official duty status or while on court leave should request an attendance fee from the court, authority, or party which caused the employee to be summoned. Such fee shall be remitted to the employing agency. An employee who must use annual leave or leave without pay to appear as a witness may retain an attendance fee which he or she receives.

§ 21.3 Aliens.

(a) *Aliens Entitled to Payment of $30 Per Day.* The following aliens are entitled to witness fees and allowances provided in § 21.4:

(1) Aliens lawfully admitted for permanent residence (documentary evidence: Form I–151 or Form 1–551, Alien Registration Receipt Card);

(2) Aliens lawfully admitted in one of the nonimmigrant categories described in 8 U.S.C. § 1101(a)(15) (documentary evidence: unexpired Form 1–94, Arrival-Departure Record). But see below § 21.3(b);

(3) Aliens admitted as refugees under 8 U.S.C. 1157 and aliens granted asylum under 8 U.S.C. 1158 (documentary evidence: Form I–94, Arrival Departure Record, indicating admission as refugee under 8 U.S.C. 1157 or granting asylum under 8 U.S.C. 1158, employment authorized);

(4) Aliens who have rendered themselves amenable to deportation proceedings, but have not admitted deportability or have not been determined to be deportable pursuant to Section 242 of the Immigration and Nationality Act (8 U.S.C. 1252).

(b) *Aliens Entitled to Payment of $1 Per Day.* An alien who is "excludable" in accordance with 8 U.S.C. § 1226, but whose removal is stayed by the Attorney General (in accordance with 8 U.S.C. 1227(d)) because: (1) The testimony of the alien is necessary on behalf of the United States in the prosecution of offenders against the United States, or (2) the testimony of the alien is necessary on behalf of an indigent criminal defendant in accordance with Rule 17(b) of the Federal Rules of Criminal Procedures, is entitled to a $1 per day witness fee. No other fees and allowances are authorized.

(c) *Aliens Not Entitled to Payment.* An alien who has been paroled into the United States for prosecution pursuant to 8 U.S.C. 1182(d)(5) (documentary evidence: Form I–94, Arrival-Departure Record, Parole Edition), or an alien who has admitted belonging to a class of aliens who are deportable, or an alien who has been determined pursuant to 8 U.S.C. 1252(b) to be deportable (documentary evidence: decision by a Special Inquiry Officer, Board of Immigration Appeals, or court), is prohibited from receiving fees and allowances in accordance with 28 U.S.C. 1821(e).

(d) *Doubtful Cases.* If the Immigration and Naturalization Service advises that the alien has admitted deportability, or that he or she was paroled into the United States for prosecution, or that deportation proceedings have been completed against the alien with a result favorable to the Government, no payment under 28 U.S.C. § 1821 may be made.

§ 21.4 Fees and allowances of fact witnesses.

The fees and allowances of fact witnesses, other than those covered by § 21.2, attending at any judicial proceeding, shall be a follows:

(a) *Fee.* A witness shall be paid an attendance fee of $30 per day for each day's attendance. A witness shall also be paid the attendance fee for the time necessarily occupied in going to and returning from the place of attendance. However, if both attendance and travel occur on the same day, a witness is entitled to only one fee.

(b) *Allowable Transportation Expenses.* A witness shall be entitled to transportation expenses based on the means of transportation reasonably utilized (based on the nature, duration, location and distance of travel) and the distance necessarily traveled from and to such witness' residence by the shortest practical route and the fastest means of transportation available in going to and returning from the place of attendance. Additional costs incurred (including attendance fees and subsistence allowances) because of a slower means of transportation must be justified for consideration.

(1) A witness who travels by regularly scheduled common carrier shall be paid for the actual expenses of transportation at the most economical rate reasonably available. A receipt or other evidence of actual cost shall be furnished.

(2) A witness who travels by privately owned vehicle shall be paid a transportation allowance equal to the mileage allowance paid for official travel of employees of the Federal Government under the provisions of 5 U.S.C. 5704. However, when two or more witnesses travel in the same privately owned vehicle, only the witness incurring the expense shall receive the mileage allowance.

(3) A witness incurring incidental transportation expenses, such as taxi fares between the place of attendance, residence or lodging and the carrier terminals; bridge, road and tunnel tolls; ferry fares; and parking fees shall be paid in full for such expenses. Receipts or other evidence of actual payment are required for *all parking fees* (if available) and all other single items costing more than $25.

(4) First-class travel by witnesses requires the same justification and approval required for first-class travel by employees of the Federal Government.

(c) *Subsistence Allowance.* A witness (other than a witness detained *in custody*) who is required to be away from his or her residence *overnight* is entitled to a subsistence allowance. A witness who *is not* required to be away from his or her residence overnight *is not* entitled to a subsistence allowance. The witness' subsistence allowance shall not exceed either the per diem rate or the actual subsistence allowance rate prescribed for Government employees for the place of attendance. These rates are established by the Administrator, General Services, for areas within the conterminous United States; the Secretary of Defense for areas of the United States other than conterminous; or the Secretary of State as published in the Standardized Regulations (Government Civilians, Foreign Areas) for foreign areas. The witness' subsistence allowance shall consist of a meal and miscellaneous expense portion and a lodging portion. *When an overnight stay is required,* the witness shall be entitled to: (1) The meal and miscellaneous expense portion for each day (or partial day) the witness is required to remain away from his or her residence and (2) the lodging portion for each night the witness is required to incur a lodging expense. The meal and miscellaneous expense portion shall be 50% of the authorized subsistence allowance rate rounded to the next whole dollar in an actual subsistence rate area, or 45% of the per diem rate rounded to the next whole dollar in a per diem area. The lodging portion shall be the difference between the meal and miscellaneous expense portion and the authorized rate.

(d) *Detained Witness Fee.* A witness (other than an alien covered by § 21.3) detained *in custody* pursuant to 18 U.S.C. 3149 for want of security for his or her appearance shall receive subsistence *in kind* and shall be paid a single daily attendance fee for each day the witness is detained. A witness in custody for purposes other than 18 U.S.C. 3149 is ineligible to receive the attendance and subsistence fees provided by this section.

§ 21.5 Use of table of distances.

Mileage payable to witnesses under 28 U.S.C. 1821 shall be computed on the basis of odometer readings or the highway distances as stated in the Rand McNally Standard Highway Mileage Guide or in any generally accepted highway mileage guide which contains a shortline nationwide table of distances. However, with respect to travel in areas for which no such highway mileage guide exists, mileage payable under 28 U.S.C. 1821 shall be based on the lesser of either (a) the route of travel actually employed or (b) a usually traveled route.

§ 21.6 Proceedings in Forma Pauperis.

28 U.S.C. 1915 provides for the commencement, prosecution or defense of any suit, action, or proceeding without prepayment of fees and costs. Witnesses shall attend as in other cases.

(a) *Civil Cases.* There are currently no provisions for payment of witnesses called by the indigent. If the indigent party prevails, witness fees and expenses may be taxed as costs in accordance with 28 U.S.C. 1920.

(b) *Criminal Cases.* Rule 17(b), Federal Rules of Criminal Procedure, requires that fact witnesses *subpoenaed* on behalf of an indigent defendant be paid in the same manner as witnesses called on behalf of the Government. The attendance must be certified by the presiding officer of the court. The expenses of Federal Government employees are treated in the same manner as they are treated when the employee is called by a Government attorney.

§ 21.7 Certification of witness attendance.

In any case in which the United States Department of Justice, or office or organization thereof, is a party, the Department of Justice shall pay all fees and allowances of witnesses, except for those witnesses as defined in § 21.2, paragraph (d)(1), on the certification of the following officials: The United States Attorney, an Assistant United States Attorney, a United States Trustee, or the United States Department of Justice attorney who actually conducts the case. In criminal proceedings *in forma pauperis* or in proceedings before a United States Commissioner, United States Magistrate or United States Parole Commission Hearing Examiner, the Department of Justice shall pay all fees and allowances of witnesses on the certification of the United States District Judge hearing the case or such Commissioner, Magistrate, or Hearing Examiner.

Dated: April 21, 1986.

Edwin Meese III,

Attorney General.

DEPARTMENT OF THE TREASURY

Fiscal Service

31 CFR Part 306

General Regulations Governing United States Securities

AGENCY: Bureau of the Public Debt, Fiscal Service, Treasury.

ACTION: Final rule.

SUMMARY: This amendment permits the delivery by means other than registered mail of registered securities issued by the Department of the Treasury on all transactions except original issue. In cases other than original issue, shipments are made by the Department at the risk of, but not the expense of, the owner. Currently, these are sent by registered mail to establish receipt. However, unless the registered owner requests it and pays for it in advance, shipments are uninsured. Certified mail would serve the same purpose as registered mail in establishing whether the addressee received the package and would be at considerably less expense to the United States. While owners of securities being reissued in registered form have the option of requesting delivery by any means, the present regulations specify that in cases where owners make no special request, the Department will deliver the securities by registered mail. Registered mail was specified because, at the time the regulations were originally promulgated, the only way that the Department could establish whether an article mailed by it was received by the addressee was to send it by registered mail. Certified mail offers the same service at considerably less expense. Because the Department cannot anticipate what similar services may be offered by the Postal Service in the future, it believes the regulations should provide for the use of any means of delivery. Registered security owners will still be able to request that a certain form of delivery be used, including insured registered mail, if they make prior arrangements with the agency to which the original securities were presented.

EFFECTIVE DATE: May 1, 1986.

FOR FURTHER INFORMATION CONTACT: Margaret Marquette, Attorney-Adviser, Divisions Office, Office of the Chief Counsel, Bureau of the Public Debt, (202) 447-9859.

SUPPLEMENTARY INFORMATION:

Executive Order 12291

Because this document relates to agency management it is not subject to Executive Order 12291. Accordingly, a regulatory impact analysis is not required.

Paperwork Reduction Act

The Paperwork reduction Act, Pub. L. 96-511, 94 Stat. 2812 (44 U.S.C. Chapter 35) does not apply to this rule because it does not contain information collection requirements which necessitate approval by the Office of Management and Budget.

Regulatory Flexibility Act

Because no notice of proposed rulemaking is required for this document it is not subject to the Regulatory Flexibility Act (5 U.S.C. 601).

Administrative Procedure Act

This regulation relates to agency management and is therefore not subject to the notice and public comment procedures and the delayed effective date requirements of the Administrative Procedure Act (5 U.S.C. 553(a)(2)).

The Department has determined that to maximize the savings which will be realized by using certified rather than registered mail for shipping securities, the new rule should be instituted at the earliest possible date.

List of Subjects in 31 CFR Part 306

Federal Reserve System Government securities.

PART 306—[AMENDED]

Accordingly, 31 CFR Part 306 is amended as follows:

1. Authority citation for part 306 is revised to read as follows:

Authority: R.S. 3706; 40 Stat. 288, 502, 844, 1309; 42 Stat. 321; 46 Stat. 20; 48 Stat. 343; 49 Stat. 20; 50 Stat. 481; 52 Stat. 477; 53 Stat. 1359; 56 Stat. 189; 73 Stat. 622; 85 Stat. 5, 74 (31 U.S.C. 738a, 739, 752, 752a, 753, 754, 754a, and 754b); 98 Stat. 936, 939, 941, 942, 944 to 947 (31 U.S.C. 3102 to 3104, 3107, 3108, 3111, 3121 to 3123, 3125, 3129); 5 U.S.C. 301.

2. Section 306.3 is amended by revising paragraph (e) to read as follows:

§ 306.3 Transportation charges and risks in shipment of securities.

* * * * *

(e) Bearer securities issued on transactions other than original issue will be delivered by registered mail, covered by insurance, at the owner's risk and expense, unless called for in person by the owner or his agent. Registerd securities issued on such transactions will be delivered by certified mail or by any other means, at the risk of, but without expense to, the registered owner. Should delivery by a particular means be desired, advance arrangements should be made with the official agency to which the original securities were presented.

Gerald Murphy,

Acting Fiscal Assistant Secretary.

BILLING CODE 4810-11-M

DEPARTMENT OF DEFENSE

Department of the Navy

32 CFR Part 706

Certifications and Exemptions Under the International Regulations for Preventing Collisions at Sea, 1972; Amendment

AGENCY: Department of the Navy, DOD.

ACTION: Final rule.

SUMMARY: The Department of the Navy is amending its certifications and exemptions under the International Regulations for Preventing Collisions at Sea, 1972 (72 COLREGS), to reflect that the Secretary of the Navy has determined that USS MOBILE BAY (CG 53) is a vessel of the Navy which, due to its special construction and purpose, cannot comply fully with 72 COLREGS without interfering with its special function as a naval cruiser. The intended effect of this rule is to warn mariners in waters where 72 COLREGS apply.

EFFECTIVE DATE: April 22, 1986.

FOR FURTHER INFORMATION CONTACT: Captain Richard J. McCarthy, JAGC, U.S. Navy Admiralty Counsel, Office of the Judge Advocate General Navy Department, 200 Stovall Street, Alexandria, VA 22332-2400, Telephone number: (202) 325-9744.

SUPPLEMENTARY INFORMATION: Pursuant to the authority granted in 33 U.S.C. 1605, the Department of the Navy amends 32 CFR Part 706. This amendment provides notice that the Secretary of the Navy has certified that USS MOBILE BAY (CG 53) is a vessel of the Navy which, due to its special construction and purpose, cannot comply fully with 72 COLREGS: Annex I, section 3(a), pertaining to the location of the forward masthead light in the forward quarter of the ship, and Annex I, section 3(a), pertaining to the horizontal distance between the forward and aft masthead lights. Full compliance with the above-mentioned 72 COLREGS provisions would interfere with the special functions and purposes of the vessel. The Secretary of the Navy has also certified that the above-mentioned lights are located in closest possible compliance with the applicable 72 COLREGS requirements.

Moreover, it has been determined, in accordance with 32 CFR Parts 296 and 701, that publication of this amendment for public comment prior to adoption is impracticable, unnecessary, and contrary to public interest since it is based on technical findings that the placement of lights on this vessel in a manner differently from that prescribed herein will adversely affect the vessel's ability to perform its military functions.

List of Subjects in 32 CFR Part 706

Marine Safety, Navigation (Water), Vessels.

PART 706—[AMENDED]

Accordingly, 32 CFR Part 706 is amended as follows:

1. The authority citation for 32 CFR Part 706 continues to read:

Authority: 33 U.S.C. 1605.

§ 706.2 [Amended]

1. Table Five of § 706.2 is amended by adding the following vessel:

Vessel	Number	Forward masthead light less than the required height above hull. Annex I, sec. 2(a)(i)	Aft masthead light less than 4.5 meters above forward masthead light. Annex I, sec. 2(a)(ii)	Masthead lights not over all other lights and obstructions. Annex I, sec. 2(f)	Vertical separation of masthead lights used when towing less than required by Annex I, sec. 2(a)(ii)	Aft masthead lights not visible over forward light 1,000 meters ahead of ship in all normal degrees of trim. Annex I, sec. 2(b)	Forward masthead light not in forward quarter of ship. Annex I, sec. 3(a)	After masthead light less than ½ ship's length aft of forward masthead light. Annex I, sec. (3)(a)	Percentage horizontal separation attained
USS MOBILE BAY	CG 53						X	X	36

Dated: April 22, 1986.

Approved:

John Lehman,

Secretary of the Navy.

Proposed Rules

Federal Register
Vol. 51, No. 84
Thursday, May 1, 1986

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

SMALL BUSINESS ADMINISTRATION

13 CFR Part 121

Small Business Size Standards; Correction

AGENCY: Small Business Administration.

ACTION: Proposed rule correction.

SUMMARY: This document corrects an SBA notice to retain the 1,000-employee size standard for shipbuilding and ship repair activities which was published in the **Federal Register** on February 28, 1986, 51 FR 7077. This notice was mistakenly identified in the **Federal Register** as a proposed rule. This correction document changes the ACTION line to read "Decision not to Propose a Rule Change," as SBA believes that this wording would provide the clearest indication of SBA's intent to the general public.

FOR FURTHER INFORMATION CONTACT: Andrew Canellas, Director, Size Standard Staff, Small Business Administration, 1441 L Street, NW., Washington, DC 20416, (202) 653–6373.

The following correction is made in FR DOC. 86–4411 appearing on 7077 in the issue of February 28, 1986.

On Page 7077 the introductory section is corrected by revising it to read as follows:

SMALL BUSINESS ADMINISTRATION

Shipbuilding and Ship Repair Size Standards

AGENCY: Small Business Administration.

ACTION: Decision not to Propose a Rule Change.

Dated: April 22, 1986.

Charles L. Heatherly,

Acting Administrator.

BILLING CODE 8025–01–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 86–NM–30–AD]

Airworthiness Directives; McDonnell Douglas Model DC–10–10, –10F, –15, –30, –30F, –40, and KC–10A (Military) Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes a new airworthiness directive (AD) that would require modification of flight compartment crew seat life vests on certain McDonnell Douglas Model DC–10 and KC–10A (Military) series airplanes. This proposal is prompted by reports of holes in life vests caused by the life vest chafing against a metal plate sewn on the inside forward flap of the storage pouch. This proposed AD is needed to minimize the potential for damage to crew seat life vests that would render the vest useless in an emergency.

DATE: Comments must be received no later than June 23, 1986.

ADDRESS: Send comments on the proposal in duplicate to Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel, ANM–7, Attention: Airworthiness Rules Docket No. 86–NM–30–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168. The applicable service information may be obtained from McDonnell Douglas Corporation, Lakewood Boulevard, Long Beach, California 90846, Attention: Director, Publications and Training, C1–L65 (54–60). This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or 4344 Donald Douglas Drive, Long Beach, California.

FOR FURTHER INFORMATION CONTACT: Mr. Jerald R. Berube, Aviation Safety Inspector, Manufacturing Inspection Branch, ANM–160L, FAA Northwest Mountain Region, Los Angeles Aircraft Certification Office, 4344 Donald Douglas Drive, Long Beach, California 90808; telephone (213) 514–6341.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communication received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposal contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel, ANM–7, Attention: Airworthiness Rules Docket No. 86–NM–30–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

Discussion

Two operators have reported several instances of holes in crew seat life vests. Investigation revealed that the holes in the life vests were caused by chafing of the vests against a metal plate (with two grommets installed) sewn on the inside forward flap of the storage pouch. Additional damage to the vests can be caused by the screws that attach the pouch to the seat back. Holes, if worn through both air compartments of a life vest, would render the vests useless in an emergency. The seats affected by this problem include those of the pilot, co-pilot, flight engineer, and first observer; model numbers 1056, 1057, and 1058; serial numbers 001 through 907, and 911; manufactured by Aircraft Mechanics, Inc.

Aircraft Mechanics, Inc. issued Service Bulletin 25–DL–10/678–24, dated May 20, 1984, which describes inspection and modification of Aircraft Mechanics, Inc., seats, model numbers 1056, 1057, and 1058. This modification will minimize the potential for damage to crew seat life vests.

Since this condition is likely to exist or develop on other airplanes of the same type design, an airworthiness directive (AD) is being proposed which would require modification of crew seats on McDonnell Douglas DC–10 and KC–10A (Military) series airplanes in accordance with the service bulletin referred to above.

It is estimated that 194 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 3 manhours per airplane to accomplish the required action, and that the average labor cost would be $40 per manhour. Parts required for the modification would be provided by the seat manufacturer upon request. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $23,280.

For these reasons, the FAA has determined that this document: (1) Involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities because few, if any, Model DC–10 and KC–10A (Military) series airplanes are operated by small entities. A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulation as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.85.

2. By adding the following new airworthiness directive:

McDonnell Douglas: Applies to McDonnell Douglas Model DC–10–10, –10F, –15, –30, –30F, –40 and KC–10A (Military) series airplanes, certificated in any category, equipped with Aircraft Mechanics, Inc., crew seats, model numbers 1056, 1057, and 1058, having serial numbers 001 through 907 and 911. Compliance required as indicated, unless previously accomplished.

To preclude the potential of damage to crew seat life vests, accomplish the following:

A. Within 12 months after the effective date of this AD inspect the life vest. If any signs of chafing are found, replace before further flight with a serviceable unit.

B. Within 12 months after the effective date of this AD, modify and re-identify the crew seat in accordance with the accomplishment instructions of Aircraft Mechanics, Inc., Service Bulletin 25–DC–10/678–24, dated May 20, 1984, or later revision approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region.

C. Alternate means of compliance which provide an acceptable level of safety may be used when approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this proposal who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to the McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Director, Publications and Training, C1–L65 (54–60). These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at 4344 Donald Douglas Drive, Long Beach, California.

Issued in Seattle, Washington, on April 23, 1986.

David E. Jones,

Acting Director, Northwest Mountain Region.

BILLING CODE 4910–13–M

14 CFR Part 39

[Docket No. 86–NM–29–AD]

Airworthiness Directive; Sperry SPZ–7000 Digital Automatic Flight Control System

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to amend an existing airworthiness directive (AD) applicable to the Sperry SPZ–7000 Digital Automatic Flight Control System installed in any helicopter, including, but not limited to, Sikorsky and S.N.I.A.S. helicopters. The existing AD imposes a restriction on use of the Sperry SPZ–7000 Digital Automatic Flight Control Systems in the instrument landing system (ILS) mode, and includes terminating action for the restriction on Sikorsky helicopters. This amendment is needed to establish terminating action for the restriction on S.N.I.A.S. Model AS–365N helicopters.

DATE: Comments must be received no later than June 23, 1986.

ADDRESSES: Send comments on the proposal in duplicate to Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel, ANM–7, Attention: Airworthiness Rules Docket No. 86–NM–29–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168. The applicable service information may be obtained from Sperry Flight Systems, Avionics Division, P.O. Box 29000, Phoenix, Arizona 85038. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the Western Aircraft Certification Office, 15000 Aviation Boulevard, Hawthorne, California.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Thompson, Aerospace Engineer, Systems & Equipment Section, ANM–173W, FAA, Northwest Mountain Region, Western Aircraft Certification Office; telephone (213) 297–1375. Mailing address: FAA, Northwest Mountain Region, Western Aircraft Certification Office, ANM–173W, P.O. Box 92007, Worldway Postal Center, Los Angeles, California 90009–2007.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communication received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposal contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

VOL 51 ISS 84 MY 1 1986 UMI

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket No. 86-NM-28-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

Discussion

This notice proposes to amend Airworthiness Directive (AD) 85-07-03 Amendment 39-5026 (50 FR 13015; April 2, 1985), which currently imposes a restriction on engagement of the Sperry SPZ-7000 Digital Automatic Flight Control System ILS mode of operation more than 2,000 feet above ground level. The AD was needed to preclude improper excursions from the glide slope during ILS approach. The SPZ-7000 Digital Automatic Flight Control Systems are known to be installed on helicopters, including, but not limited to, Sikorsky Model S-76A helicopters modified in accordance with Supplemental Type Certificate (STC) No. SH2218NM, and S.N.I.A.S. Model AS-365N helicopters modified in accordance with STC No. SH2215NM. The SPZ-7000 Digital Automatic Flight Control System installed in the Sikorsky helicopter has a FZ-700 computer, part number 7003138-002, as a component; the S.N.I.A.S. Model AS-365N helicopter has a FZ-700 computer, part number 7003138-001, installed in place of the part number 7003138-002. These different components are tailored to accommodate the helicopter flight and operational differences. Sperry corrected the problem in the Digital Automatic Flight Control Systems with the 7003138-002 computer and AD 85-07-03 was issued with terminating action for the restriction imposed on the Sikorsky helicopter.

Since issuing Amendment 39-5026, the manufacturer has developed a change (modification "F") to the Sperry SPZ-7000 Digital Automatic Flight Control System with FZ-700 computer, part number 7003138-001, which the FAA has determined corrects the glide slope tracking problem applicable to the S.N.I.A.S. Model AS-365N helicopter. Therefore, the FAA proposes to amend Amendment 39-5026 by removing the restriction on Sperry SPZ-7000 Digital Automatic Flight Control System with FZ-700 computer, part number 7003138-001 with modification "F" incorporated, installed in S.N.I.A.S. Model AS-365N helicopters modified in accordance with STC No. SH2215NM.

For other models of helicopters, incorporation of Sperry SPZ-7000 Digital Automatic Flight Control System with FZ-700 computer, part number 7003138-001 with modification "F," may be approved as terminating action for the restriction if the system's effectivity can be demonstrated as an alternate means of compliance, under paragraph C. of the AD.

It is estimated that five helicopters of U.S. registry would be affected by this AD, that it would take approximately two manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of the AD on the U.S. operators is estimated to be $400.

For these reasons, the FAA has determined that this document: (1) Involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities because there is essentially no expense involved in removing the restriction. A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft, Air transportation, Safety.

The Proposed Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a); 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983); 14 CFR 11.89.

2. By amending Airworthiness Directive 85-07-03, Amendment 39-5026 (50 FR 13015; April 2, 1985), by revising paragraph B. to read as follows:

B. Installation of FZ-700 computers, P/N 7003138-002 with modification "E" incorporated, on Sikorsky S-76A helicopters; or P/N 7003138-001 with modification "F" incorporated, on S.N.I.A.S. Model AS-365N helicopters; constitutes terminating action for the requirement of paragraph A. of this AD.

All persons affected by this proposal who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Sperry Flight Systems, Avionics Division, P.O. Box 29000, Phoenix, Arizona 85038. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the Western Aircraft Certification Office, 15000 Aviation Boulevard, Hawthorne, California 90250.

Issued in Seattle, Washington, on April 23, 1986.

David E. Jones,

Acting Director, Northwest Mountain Region.

BILLING CODE 1505-01-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 31

[CC Docket 86-111, FCC 86-146]

Common Carrier Services; Separating Cost of Regulated Telephone Services From Cost of Nonregulated Activity

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: Telephone companies engage in both regulated and nonregulated activities. Rates for their regulated services are generally designed to cover costs and to provide an opportunity to earn a return on investment. Under the Communications Act of 1934, the Federal Communications Commission must assure that the rates for interstate telephone services are "just and reasonable." For rates to be reasonable, it is necessary that the expenses and investment for nonregulated activities be excluded from the rate regulation process. This Notice of Proposed Rulemaking is intended to develop rules for separating the costs of regulated telephone services from the costs of other telephone company activities, so that only the cost of regulated service will be borne by the ratepayers for that service. The Commission seeks comment on (1) proposed cost allocation rules for allocating costs between regulated and nonregulated activities; (2) rules governing transactions between telephone companies and their affiliates; and (3) changes in the manner in which nonregulated activities are reflected in the prescribed accounts of telephone companies.

DATES: Comments are due on or before June 30, 1986, and reply comments are due on or before July 30, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Jane Jackson, Accounting and Audits Division, Common Carrier Bureau (202) 632-7500.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rulemaking, CC Docket 86-111, adopted April 3, 1986, and released April 17, 1986. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor International Transcription Service, (202) 857-3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Summary of Notice of Proposed Rulemaking

By this Notice we seek comment on methods of separating the costs of regulated telephone service from the costs of the nonregulated activities of telephone companies and their affiliates. We intend to (1) establish rules and standards for cost allocations; (2) establish rules for transactions between a regulated telephone company and its corporate affiliates; and (3) establish the accounting procedures, reporting requirements, and other mechanisms, needed for implementation and monitoring of the cost allocation and transfer pricing rules.

Cost Allocations. The essential elements of our cost allocation proposal are: (1) Cost allocation standards and guidelines, to be adopted by this Commission; (2) written cost allocation manuals, to be developed by the companies in accordance with our standards and guidelines; and (3) an oversight and enforcement mechanism which supplements our own audit capability with independent review of both the cost allocation manuals and of the manner in which companies implement the procedures set out in those manuals.

We seek comment on two alternative sets of cost allocation standards. Alternative #1 is based on relative use concepts similar to those which underlie the Jurisdictional Separations Manual (Part 67 of the Commission's Rules). Under Alternative #1, cost allocation manuals would be organized according to Part 31 accounting classifications. A draft model cost allocation manual of this type appears in Appendix 1 of the NPRM. We would require companies to file their manuals with this Commission and to implement them as soon as they are filed. The Common Carrier Bureau would conduct an initial review of each manual and would inform companies as soon as possible of deficiencies. Further review, which would include an opportunity for public comment, would be undertaken after the filing of the initial independent audit reports. A different procedure may be warranted if we decide to eliminate some or all of the existing separate subsidiary requirements for the provision of CPE and enhanced services. We intend to monitor the results of cost allocations, to include review of cost allocations in routine audit processes, and to require each company to submit each year the report of an independent auditor attesting that the company has designed and implemented its cost allocation manual in manner consistent with regulatory requirements.

The cost allocation standards proposed as Alternative #2 would rely on service-specific cost studies and demand forecasts to develop plant cost allocations based on projected utilization, rather than on actual relative use. Under Alternative #2, cost allocation manuals would be organized on a service-by-service basis rather than on an account-by-account basis. We would propose, as under Alternative #1, staff monitoring, Commission audits, and independent audits. Under Alternative #2, however, Commission staff would focus on comparing actual use and forecasted use in order to validate the allocation factors used to assign common costs to each of the various nonregulated activities.

We invite comment on all aspects of the basic proposals summarized above, and on the following specific cost allocation issues: use of fully distributed costing for nonregulated activities; time reporting procedures; the extent to which investment once allocated to nonregulated services should be permitted to enter the ratebase; treatment of combined marketing costs; treatment of overheads; allocation of depreciation reserves; treatment of common costs incurred in holding companies and other telephone company affiliates.

Transactions with affiliates. We seek comment on a proposal to add a new § 31.01-10 to the General Instructions of Part 31. Under the proposal, all transactions between the regulated activity and its affiliates would be recorded at market prices. If market prices are not determinative from prevailing price lists or tariffs, however, assets or services purchased by the regulated activity from an affiliated entity would be recorded on the regulated books at the lower of their cost or their fair market value. On the other hand, if assets or services not determinative from prevailing price lists or tariffs are sold by the regulated activity to the nonregulated activity the sale would be recorded on the regulated books at the higher of cost or fair market value. The proposed sections 31.01-10 would also require the allocation of income taxes between the regulated activity and its affiliates.

Accounting for Nonregulated Activities. We prescribe in Part 31 two accounts for nonregulated activities. Account 106 is an asset account entitled "Nonregulated Investment." Account 317 is a profit and loss account entitled "Income from Nonregulated Activities." Costs associated with nonregulated activities are initially recorded directly in the nonregulated set of accounts or in accounts for regulated operations. All nonregulated costs which are initially recorded in accounts for regulated operations, except for costs representing the nonregulated shares of investments in items of common plant, are transferred to Account 106 at the end of each month. We have not yet specified how companies should account for common plant investment; to do so is a goal of the instant proceeding.

It is our tentative conclusion that a single nonregulated accounting scheme may not be appropriate for every possible type of nonregulated activities. We therefore propose to amend Part 31 in such a way as to allow us to determine separately what should be the accounting treatment for each of the following types of nonregulated activity:

(1) *Incidental activities.* We propose to continue the traditional accounting treatment of incidental activities. We propose to adopt the following criteria for determing whether an activity is "incidental": (a) the activity should be an outgrowth of regulated operations; (b) the revenues from all incidental activities should not exceed .05% of the operating company's total revenues.

VOL 51 ISS 84 MAY 1 1986 UMI

(2) *Activities never subject to tariff.* We propose to continue the current requirement that telephone companies engaged in these traditionally nonregulated activities maintain separate books of accounts and allocate to these activities a fully distributed share of common costs.

(3) *Preemptively detariffed services.* To date, this Commission has preemptively deregulated two categories of telephone company service, of CPE and of enhanced services. We propose to continue to require application of our nonregulated accounting and cost allocation rules for CPE and enhanced services.

(4) *Activities detariffed in the interstate jurisdiction only.* Recently this Commission detariffed interstate billing and collection services, but did not preempt state regulation of intrastate billing and collections. Pending adoption of generic cost allocation rules in the instant proceeding, we requested local exchange carriers to calculate the costs of interstate billing and collections in compliance with Parts 67 and 69 of our Rules.

We believe we should consider on a case-by-case basis the appropriate costing and accounting approach for each service we detariff. We have tentatively concluded that costs attributable to unregulated billing and collection for interstate services should be removed after, rather than before, investment and expenses have been apportioned in accordance with jurisdictional separation procedures. If this procedure is adopted, the Part 69 apportionment procedures could be used to determine costs attributable to an interstate billing and collection category. Other procedures such as marginal costing could also be used.

(5) *Services detariffed by a state.* Our current accounting rules, read literally, could treat detariffed basic services the same as any nonregulated activity. We believe that this result probably would not be appropriate, particularly for detariffed local exchange services such as Centrex. One approach we might take is to amend our rules for accounting for, and allocating costs to, nonregulated activities so that those rules do not apply to services deregulated by a state. Another approach might be to retain a requirement that our separate accounting and cost allocation rules be used for detariffed services, but to allow waivers of that requirement.

We propose two alternative mechanisms for separating the cost of common plant between regulated and nonregulated activities. The first is based on the existing "separate books of account" approach. All common expenses initially recorded in operating accounts would be credited to those accounts and debited to Account 106 just as they are now. Nonregulated use of common plant would be accounted for by compensating the regulated activities for that use. The compensation amount would be charged as an expense to Account 106 and credited as income to Account 526, other operating revenues. The amount of compensation would be calculated as follows: The carrier would follow cost allocation standards and procedures to determine how much of the investment in common plant would be attributed to nonregulated activities. The carrier would then apply the authorized interstate rate of return and income tax factors to that portion of investment.

Under alternative #2, a carrier would use operating accounts for all services provided through the telecommunications network and non-operating accounts (i.e., accounts 106 and 317) for its non-network (*e.g.*, real estate, CPE) services. Costs associated with non-network services will be treated the same way as they would be treated under alternative #1. After closing its books the carrier would assign and allocate the costs and revenues associated with the network services between its regulated and nonregulated operations, following the procedures set out in its cost allocation manual. Costs attributable to nonregulated services would be removed from operating accounts prior to jurisdictional separations, but would remain in the books of account for financial purposes. The carrier would routinely report the regulated and nonregulated network amounts to the Commission. We invite comment on all aspects of these accounting proposals.

We certify that the Regulatory Flexibility Act is not applicable to the rules we are proposing in the proceeding. We do recognize, however, that the proposals we have put forth for comment herein were developed with the larger telephone companies in mind. We therefore solicit comment on the extent to which any rules we adopt in this proceeding should include modifications or exceptions for small telephone companies.

The proposal contained herein has been analyzed with respect to the Paperwork Reduction Act of 1980 and found to impose new or modified requirements or burdens upon the public. Implementation of any new or modified requirement or burden will be subject to approval by the Office of Management and Budget as prescribed by the Act.

This is a nonrestricted notice and comment rulemaking proceeding, *see* 47 CFR 1.231.

Accordingly, it is ordered, pursuant to the provisions of section 4(i), 201(b), 218, 219, and 220(a) of the Communications Act of 1934, as amended, 47 U.S.C. Secs. 154(i), 201(b), 218, 219 and 220(a), that there is hereby instituted a notice of proposed rulemaking into the foregoing matters.

It is further ordered, that interested persons may file comments on the proposals discussed in this Notice on or before June 30, 1986. Reply comments shall be filed on or before July 30, 1986. In accordance with the provisions of § 1.419 of the Commission's Rules and Regulations, 47 CFR 1.419, an original and five (5) copies of all comments shall be furnished to the Commission. Copies of the comments will be available for public inspection in the Commission's Docket Reference Room, 1919 M Street, NW., Washington, DC.

It is further ordered, pursuant to Section 220(i), that the Secretary shall serve a copy of this Notice on each state commission.

Federal Communications Commission.

William J. Tricarico,

Secretary.

Notices

Federal Register
Vol. 51, No. 84
Thursday, May 1, 1986

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Federal Grain Inspection Service

Designation Renewal of Cedar Rapids Grain Service, Inc. (IA), et al

AGENCY: Federal Grain Inspection Service (FGIS), USDA.

ACTION: Notice.

SUMMARY: This notice announces the designation renewal of Cedar Rapids Grain Service, Inc. (Cedar Rapids), Champaign-Danville Grain Inspection Departments, Inc. (Champaign), and Springfield Grain Inspection Department (Springfield), as official agencies responsible for providing official services under the U.S. Grain Standards Act, as Amended (ACT).

EFFECTIVE DATE: June 1, 1986.

ADDRESS: James R. Conrad, Chief, Review Branch, Compliance Division, Federal Grain Inspection Service, U.S. Department of Agriculture 1400 Independence Avenue, SW., Room 1647 South Building, Washington, DC 20250.

FOR FURTHER INFORMATION CONTACT: James R. Conrad, telephone (202) 447-8525.

SUPPLEMENTARY INFORMATION: This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12291 and Departmental Regulation 1512-1; therefore, the Executive Order and Departmental Regulation do not apply to this action.

FGIS announced that Cedar Rapids', Champaign's, and Springfield's designations terminate on May 31, 1986, and requested applications for official agency designation to provide official services within specified geographic areas in the December 2, 1985, **Federal Register** (50 FR 49435). Applications were to be postmarked by January 2, 1986. Cedar Rapids and Champaign were the only applicants for their respective designations and each applied for designation renewal in the areas currently assigned to those agencies. FGIS received two applications for the Springfield area. Springfield applied for designation renewal in the area currently assigned to that agency, except for OK Grain Company, Litchfield, Montgomery County. Southern Illinois Grain Inspection Service, Inc. (Southern Illinois), Fairview Heights, Illinois, applied for designation for OK Grain Company, Litchfield, Montgomery County.

FGIS announced the applicant names and requested comments on the same in the February 3, 1986, **Federal Register** (51 FR 4203). Comments were to be postmarked by March 20, 1986. No comments were received regarding Cedar Rapids', Champaign's, and Springfield's designation renewal, or regarding Southern Illinois' designation.

FGIS evaluated all available information regarding the designation criteria in section 7(f)(1)(A) of the Act, and in accordance with section 7(f)(1)(B), determined that Cedar Rapids, Champaign, and Springfield are able to provide official services in the geographic area for which FGIS is renewing their designation. Effective June 1, 1986, and terminating May 31, 1989, Cedar Rapids and Campaign will provide official inspection services in their specified geographic area, which is the entire area previously described in the December 2 **Federal Register**.

Also effective those dates, Springfield will provide official inspection services to the entire geographic area it applied for in the February 3 **Federal Register**. FGIS also determined that Southern Illinois is able to provide official services in the geographic area for which it applied and FGIS is designating it. Effective June 1, 1986, and terminating September 30, 1987 (the termination of Southern Illinois' present designation), Southern Illinois will provide official inspection services to the area it applied for in the February 3 **Federal Register**. Southern Illinois' present designation is amended accordingly.

In another action, Schneider Inspection Service, Inc. (Schneider), requested amendment of its designation to delete a portion of its assigned geographic area. Champaign was named to provide service on an interim basis to that area until FGIS could decide which official agency to designate for the specified geographic area. FGIS requested applications for official agency designation in that portion of Iroquois County, Illinois, previously assigned to Schneider, in the September 20, 1985, **Federal Register** (50 FR 38147). Applications were to be postmarked by October 21, 1985, and Champaign was the only applicant.

FGIS announced the applicant name and requested comments on the same in the December 2, 1985, **Federal Register** (50 FR 49436). Comments were to be postmarked by January 16, 1986. No comments were received regarding Campaign's designation.

FGIS evaluated all available information regarding the designation criteria in section 7(f)(1)(A) of the Act, and in accordance with section 7(f)(1)(B), determined that Campaign is able to provide official services in the geographic area for which FGIS is designating it. In addition to the geographic area described in the December 2 **Federal Register**, effective June 1, 1986, and terminating May 31, 1989, Campaign will provide official inspection services in that portion of Iroquois County, which was previously described in the September 20 **Federal Register**.

A specified service point, for the purpose of this notice, is a city, town, or other location specified by an agency for the performance of official inspection of Class X or Class Y weighing services and where the agency and one or more of its inspectors or weighers is located. In addition to the specified service points within the assigned geographic area, an agency will provide official services not requiring an inspector or weigher to all locations within its geographic area.

Interested persons may contact the Review Branch, specified in the address section of this notice, to obtain a list of an agency's specified service points. Interested persons also may obtain a list of the specified service points by contacting the agency at the following address:

Cedar Rapids Grain Service, Inc., 1114-55th Avenue, S.W., Cedar Rapids, IA 52404;

Champaign-Danville Grain Inspection Department, Inc., 527 E. Main Street, Danville, IL 61832;

Springfield Grain Inspection Department, 1301 North Fifteenth Street, Springfield, IL 62702.

(Pub. L. 94-582, 90 Stat. 2867, as amended (7 U.S.C. 71 *et seq.*))

VOL 51 ISS 84 MY 1 1986 UMI

Dated: April 23, 1986.

BILLING CODE 3410-EN-M

Request for Comments on Designation Applicants in the Geographic Area Currently Assigned to Fremont Grain Inspection Department, Inc. (NE) and Titus Grain Inspection, Inc. (IN)

AGENCY: Federal Grain Inspection Service (FGIS), USDA.

ACTION: Notice.

SUMMARY: This notice requests comments from interested parties on the applicants for official agency designation in the geographic area currently assigned to Fremont Grain Inspection Department, Inc. (Fremont), and Titus Grain Inspection, Inc. (Titus).

DATE: Comments to be postmarked on or before June 16, 1986.

ADDRESS: Comments must be submitted, in writing, to Lewis Lebakken, Jr., Information Resources Staff, Resources Management Division, Federal Grain Inspection Service, U.S. Department of Agriculture, Room 1661 South Building, 1400 Independence Avenue, SW., Washington, DC 20250. All comments received will be made available for public inspection at the above address during regular business hours (7 CFR 1.27(b)).

FOR FURTHER INFORMATION CONTACT: Lewis Lebakken, Jr., telephone (202) 382-1738.

SUPPLEMENTARY INFORMATION: This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12291 and Departmental Regulation 1512-1; therefore, the Executive Order and Departmental Regulation do not apply to this action.

FGIS requested applications for official agency designation to provide official services within specified geographic areas in the March 3, 1986, **Federal Register** (51 FR 7301). Applications were to be postmarked by April 2, 1986. Fremont and Titus were the only applicants for their respective designations and applied for designation renewal in the area currently assigned to those agencies.

This notice provides interested persons the opportunity to present their comments concerning the designation applicants. All comments must be submitted to the Information Resources Staff, Resources Management Division, specified in the address section of this notice.

Comments and other available information will be considered in making a final decision. Notice of the final decision will be published in the **Federal Register**, and the applicants will be informed of the decision in writing.

Pub. L. 94-582, 90 Stat. 2867, as amended (7 U.S.C. 71 *et seq.*))

Dated: April 23, 1986.

J.T. Abshier,

Director, Compliance Division.

BILLING CODE 3410-EN-M

Request for Designation Applicants to Provide Official Services in the Geographic Area Currently Assigned to Cairo Grain Inspection Agency, Inc. (IL)

AGENCY: Federal Grain Inspection Service (FGIS), USDA.

ACTION: Notice.

SUMMARY: Pursuant to the provisions of the U.S. Grain Standards Act, as Amended (Act), official agency designations shall terminate not later than triennially and may be renewed according to the criteria and procedures prescribed in the Act. This notice announces that the designation of one agency will terminate, in accordance with the Act, and requests applications from parties, including the agency currently designated, interested in being designated as the official agency to provide official services in the geographic area currently assigned to the specified agency. The official agency is Cairo Grain Inspection Agency, Inc.

DATE: Applications to be postmarked on or before June 2, 1986.

ADDRESS: Applications must be submitted to James R. Conrad, Chief, Review Branch, Compliance Division, Federal Grain Inspection Service, U.S. Department of Agriculture, 1400 Independence Avenue, SW., Room 1647 South Building, Washington, DC 20250. All applications received will be made available for public inspection at the above address during regular business hours.

FOR FURTHER INFORMATION CONTACT: James R. Conrad, telephone (202) 447-8525.

SUPPLEMENTARY INFORMATION: This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12291 and Departmental Regulation 1512-1; therefore, the Executive Order and Departmental Regulation do not apply to this action.

Section 7(f)(1) of the Act specifies that the Administrator of FGIS is authorized, upon application by any qualified agency or person, to designate such agency or person to provide official services after a determination is made that the applicant is better able than any other applicant to provide official services in an assigned geographic area.

Cairo Grain Inspection Agency, Inc. (Cairo), 4007 Sycamore Street, Cairo, IL 62914, was designated under the Act as an official agency to provide inspection functions on November 1, 1983.

The official agency's designation terminates on October 31, 1986. Section 7(g)(1) of the Act states that official agencies' designations shall terminate not later than triennially and may be renewed according to the criteria and procedures prescribed in the Act.

The geographic area presently assigned to Cairo, in the States of Illinois, Kentucky, and Tennessee, pursuant to section 7(f)(2) of the Act, which may be assigned to the applicant selected for designation, is as follows:

In Illinois, the area includes Randolph County (southwest of State Route 150 from the Mississippi River north to State Route 3); Jackson County (southwest of State Route 3 southeast to State Route 149; State Route 149 east to State Route 13; State Route 13 southeast to U.S. Route 51; U.S. Route 51 south to Union County); and Alexander, Johnson, Hardin, Massac, Pope, Pulaski, and Union Counties.

In Kentucky, the area includes Ballard, Calloway, Carlisle, Fulton, Graves, Hickman, Livingston, Lyon, Marshall, McCracken, and Trigg Counties.

In Tennessee, the area includes Benton, Dickson, Henry, Houston, Humphreys, Lake, Montgomery, Obion, Stewart, and Weakley Counties.

The following locations, outside of the foregoing contiguous geographic area, are presently assigned to Cairo and are part of this geographic area assignment: Hopkinsville Elevator Company, Inc., Hopkinsville; and the L&N Railroad Siding on Alternate U.S. Route 41, 5 miles south of Hopkinsville, both in Christian County, Kentucky.

Exceptions to the described geographic area are the following locations situated inside Cairo's area which have been and will continue to be serviced by Memphis Grain and Hay Association: Continental Grain Co., Tiptonville; West Tennessee Soya, Tiptonville; and Planters Gin, Ridgely; all in Lake County, Tennessee.

Interested parties, including Cairo, are hereby given opportunity to apply for official agency designation to provide the official services in the geographic area, as specified above, under the

provisions of section 7(f) of the Act and section 800.196(d) of the regulations issued thereunder. Designation in the specified geographic area is for the period beginning November 1, 1986, and ending October 31, 1989. Parties wishing to apply for designation should contact the Review Branch, Compliance Division, at the address listed above for forms and information.

Applications and other available information will be considered in determining which applicant will be designated to provide official services in a geographic area.

(Pub. L. 94-582, 90 Stat. 2867, as amended (7 U.S.C. 71 *et seq.*))

Dated: April 23, 1986.

J.T. Abshier,

Director, Compliance Division.

BILLING CODE 3410-EN-M

Soil Conservation Service

Environmental Statements; Lick Creek Watershed, IL

AGENCY: Soil Conservation, USDA.

ACTION: Notice of finding of no significant impact.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental statement is not being prepared for the Lick Creek Watershed, Sangamon and Morgan Counties, Illinois.

FOR FURTHER INFORMATION CONTACT: John J. Eckes, State Conservationist, Soil Conservation Service, 301 North Randolph Street, Champaign, Illinois 61820, Telephone (217) 398-5267.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impact on the environment. As a result of these findings, John J. Eckes, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The project concerns are erosion, sedimentation, water quality, water quantity, and resource base degradation. The planned works of improvement include conservation tillage sytems, terraces, grassed waterways, grade stabilization structures, land use change, and field border strips.

The Notice of Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developing during the environmental assessment are on file and may be reviewed by contacting John J. Eckes.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register**.

(This activity is listed in the Catalog of Federal Domestic Assistance under No. 10.904—Watershed Protection and Flood Prevention—and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials.)

Dated: April 22, 1986

BILLING CODE 3410-16-M

DEPARTMENT OF COMMERCE

[Docket Nos. 1625-01, 1625-02, 1625-03, 1625-04, and 1625-05]

Albert A. Goldberg, et al.; Order Vacating Temporary Denial Order

In the Matter of: Albert A. Goldberg, International Affiliates Co. Inc., National-Tronics Company, Sarfraz A. Mir and S.J. Enterprises; Respondents.

By a Temporary Denial Order issued November 19, 1981, 46 FR 57716 (November 25, 1981), upon request of the U.S. Department of Commerce, the following Respondents were temporarily denied all privileges of participating in any manner or capacity in the export or reexport of U.S.-origin commodities or technical data.

Albert A. Goldberg, President,
International Affiliates Co., Inc.
and
National-Tronics Company, 134 West 32nd Street, New York, New York 10001
Sarfraz A. Mir, Managing Director, S.J. Enterprises, 15—Block 14 Super Market, F-6, Islamabad, Pakistan
and

VOL 51 ISS 84 MY 1 1986 UMI

37–B School Road, 58–9, Islamabad, Pakistan
S.J. Enterprises, 15—Block 14 Super Market, F–6, Islamabad, Pakistan
and
P.O. Box 1361, Islamabad, Pakistan

The Temporary Denial Order extended its denial provisions also, because of relationships of ownership or of affiliation with the Respondents, to the following business organizations.

Gorex Corporation Inc., 134 West 32nd Street, New York, New York 10001
Inter-Tronics Co., Inc., 134 West 32nd Street, New York, New York 10001
ITL Corporation Inc., 134 West 32nd Street, New York, New York 10001
S.J. Enterprises, 10 Wahbat Road, Lahore, Pakistan
S.J. Enterprises, 13–A, Mohammad Ali Housing Society, Miran Mohammad Shad Road, Carachi, Pakistan.

By Order of February 3, 1982, 47 FR 6681 (February 16, 1982), one more business organization was added to this list: K.S. and Associates, 37–B School Road, F/8–1, Islamabad, Pakistan.

The Respondents moved to vacate the Temporary Denial Order, and various filings ensured. The Department has now filed a statement that it does not oppose a vacating of the Temporary Denial Order as to Sarfraz A. Mir, S.J. Enterprises, and K.S. and Associates. Further, the Department's filing noted that Albert A. Goldberg died in 1985 and that National-Tronics Company and International Affiliates Co., Inc. no longer exist, and suggested that, as to these three Respondents, and as to the business organizations related to them, it would now be approrpiate to vacate the Temporary Denial Order.

Based on these representations made by the Department and on a review of the whole record, I conclude that the public interest for which the Temporary Denial Order was issued no longer requires that it be maintained, and that it should be vacated.

Accordingly, it is hereby ordered that, effective immediately, the November 19, 1981 Temporary Denial Order is vacated.

A copy of this Order Vacating the Temporary Denial Order shall be published in the **Federal Register**.

Dated: April 25, 1986.

Thomas W. Hoya,

Administrative Law Judge.

International Trade Administration

DEPARTMENT OF THE INTERIOR

Office of the Secretary

[Docket No. 51185–6041]

Allocation of Duty-Exemptions for Calendar Year 1986 Among Watch Producers Located in the Virgin Islands and Guam

AGENCY: Import Administration, International Trade Administration, Department of Commerce; and Office of the Secretary, Department of the Interior.

ACTION: Allocation of duty-exemptions for calender year 1986 among producers located in the Virgin Islands and Guam.

SUMMARY: This action allocates 1986 duty-exemptions for watch producers located in the Virgin Islands and Guam pursuant to Pub. L. 97–446.

FOR FURTHER INFORMATION CONTACT: Faye Robinson, (202) 377–1660.

SUPPLEMENTARY INFORMATION: Pursuant to Pub. L. 97–446, the Departments of the Interior and Commerce (the Departments) share responsibility for the allocation of duty exemptions among watch assembly firms in the insular possessions and the Northern Mariana Islands. The Departments established for 1986 a total quantity of watches and watch movements which could be entered free of duty from the insular possessions and the Northern Mariana Islands of 8,500,000 units, 4,500,000 of which could be allocated to Virgin Islands producers, 1,000,000 to Guam producers, 500,000 to American Samoa producers and 500,000 to Northern Mariana Islands producers (51 FR 14980).

The criteria for the calculation of the 1986 duty-exemption allocations among insular producers are set forth in § 303.14 of the regulations (15 CFR Part 303) as amended on April 22, 1986 (51 FR 14980).

The Departments have verified the data submitted on application form ITA–334P by producers in the territories and inspected the current operations of all producers in accordance with § 303.5 of the regulations.

The verification established that in calendar year 1985 the Virgin Islands watch assembly firms shipped 2,554,334 watches and watch movements into the customs territory of the United States under General Headnote 3(a) of the Tariff Schedules of the United States. The dollar amount of corporate income taxes paid by Virgin Islands producers during calendar year 1985, less penalty payments and refunds and subsidies, plus the creditable wages paid by the industry during calendar year 1985 to residents of the territory totalled $4,162,086.

There is only one producer in Guam. Publication of the Guam data, accordingly, would disclose competitively sensitive information.

The calendar year 1986 Virgin Islands annual allocations set forth below are based on the data verified by the Departments in the Virgin Islands and Guam and are made in accordance with the formula governing the allocation of the duty-exemptions set forth in § 303.14 of the regulations. The allocations reflect: (1) Adjustments made in data supplied on the producers' annual application forms (ITA Form-334P) as a result of the Departments' verification; and in the Virgin Islands allocation (2) Reallocation of duty-exemptions which have been voluntarily reliquished by some producers pursuant to § 303.6(b)(2) of the regulations.

The duty-exemption allocations for calendar year 1986 in the Virgin Islands are as follows:

Name of firm	Annual allocation
1. Belair Quartz, Inc	500,000
2. Hampden Watch Co., Inc	300,000
3. Master Time Co., Inc	650,000
4. Progress Watch Co., Inc	900,000
5. Unitime, Industries, Inc	610,000
6. Tropex, Inc	450,000

The duty-exemption allocation for Guam is as follows:

Name of firm	Annual allocation
Timewise Ltd	500,000

John L. Evans,

Deputy to the Deputy Assistant Secretary for Import Administration, Department of Commerce.

Kittie J. Baier,

Deputy Assistant Secretary for Territorial and International Affairs, Department of Interior.

DEPARTMENT OF COMMERCE

International Trade Administration

[A–588–505]

Dynamic Random Access Memory Semiconductors of 256 Kilobits and Above (256K and Above DRAMs) From Japan; Postponement of Final Antidumping Duty Determination

AGENCY: International Trade Administration, Import Administration Commerce.

ACTION: Notice of Postponement of Final Antidumping Duty Determination.

SUMMARY: This notice informs the public that we have received requests from all of the respondents in this investigation to postpone the final determination, as permitted in section 735(a)(2)(A) of the Tariff Act of 1930, ("the Act") (19 U.S.C. 1673d(a)(2)(A)). Based on these requests, we are postponing our final determination as to whether sales of 256K and above DRAMs from Japan have occurred at less than fair value until not later than August 1, 1986. We are also postponing our public hearing from April 18, 1986 until May 16, 1986.

EFFECTIVE DATE: May 1, 1986.

FOR FURTHER INFORMATION CONTACT: Stephen Munroe, Office of Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377–2923.

SUPPLEMENTARY INFORMATION: On December 6, 1985, the Department of Commerce ("the Department") initiated an antidumping duty investigation under section 732(a) of the Act, to determine whether 256K and above DRAMs from Japan were being, or were likely to be, sold at less than fair value within the meaning of section 731 of the Act, and whether these imports are materially injuring, or are threatening material injury to a United States industry, or are materially retarding the establishment of a United States industry (50 FR 51450, December 17, 1985). On January 22, 1986, the International Trade Commission determined that there is a reasonable indication that imports of 256K and above DRAMs are materially injuring, or are threatening to materially injure a U.S. industry (51 FR 4661, Feb. 6, 1986). On March 19, 1986, we published a preliminary determination of sales at less than fair value with respect to this merchandise (51 FR 9475). The notice stated that if the investigation proceeded normally, we would make our final determination by May 27, 1986.

Pursuant to section 735(a)(2)(A) of the Act, all of the respondents in this investigation requested an extension of the final determination date. The respondents are qualified to make such a request because they account for a significant proportion of exports of the merchandise to the United States. If exporters who account for a significant proportion of exports of the merchandise under investigation properly request an extension after an affirmative preliminary determination, we are required, absent compelling reasons to the contrary, to grant the requests.

Accordingly, we are granting the requests and postponing our final determination until not later than August 1, 1986.

Public Comment

In accordance with § 353.47 of our regulations (19 CFR 353.47), if requested, we will hold a public hearing to afford interested parties an opportunity to comment on this preliminary determination at 10 a.m. on May 16, 1986, at the U.S. Department of Commerce, Room B–841, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Individuals who wish to participate in the hearing must submit a request to the Deputy Assistant Secretary, Import Administration, Room B–099, at the above address within 10 days of this notice's publication. Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed. In addition, prehearing briefs, or supplements to prehearing briefs that have previously been submitted, in at least 10 copies must be submitted to the Deputy Assistant Secretary by May 9, 1986. Oral presentations will be limited to issues raised in the briefs. All written views should be filed in accordance with 19 CFR 353.46.

This notice is published pursuant to section 735(d) of the Act.

The United States International Trade Commission is being advised of this postponement, in accordance with section 735(d) of the Act.

Dated April 25, 1986.

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

CONSUMER PRODUCT SAFETY COMMISSION

Steering Committee on Methylene Chloride; Meeting

AGENCY: Consumer Product Safety Commission.

ACTION: Notice of meeting.

SUMMARY: The Commission announces the third meeting of the Steering Committee on Methylene Chloride. The Commission's staff is working with this committee to assist industry, consumer interest representatives, and other interested parties in developing ways to reduce consumer exposure to methylene chloride, a chemical used in certain paint strippers, spray paints, and other consumer products. The meeting is open to the public, and all persons attending are invited to participate in the meeting.

DATE: The meeting will be May 16, 1986, at 8:00 a.m.

ADDRESS: The meeting will be at the National Paint and Coatings Association, 1500 Rhode Island Avenue, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Ms. Sandy Bradshaw, Office of Program Management, Consumer Product Safety Commission, Washington, DC 20207; telephone (301) 492–6554.

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Science Board; Closed Meeting

ACTION: Notice of Advisory Committee Meeting.

SUMMARY: The Defense Science Board will meet in closed session on 14–15 May 1986 in the Pentagon, Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Research and Engineering on scientific and technical matters as they affect the perceived needs of the Department of Defense. At this meeting the Board will discuss interim findings and tentative recommendations resulting from onging Task Force activities associated with Strategic, Tactical, Intelligence/Command, Control and Communications, and Technology Issues. The Board will also discuss plans for future consideration of scientific and technical aspects of specific strategies, tactics, and policies as they may affect the U.S. national defense posture.

In accordance with section 10(d) of the Federal Advisory Committee Act, Pub. L. No. 92–463, as amended (5 U.S.C. App. II, (1982)), it has been determined that this DSB Task Force meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1982), and that accordingly these meetings will be closed to the public.

April 25, 1986.

BILLING CODE 3910-01-M

Cancellation of Intent To Prepare an Environmental Impact Statement for a Proposed Military Operations Area (MOA) Near Lake Louise, Alaska

The Alaskan Air Command has suspended activities for the establishment of a military flight training area west of Lake Louise, Alaska. The additional military operations area was proposed in 1982 when the Alaskan Air Command was to receive a training system known as Air Combat Maneuvering Instrumentation. The system uses ground-based sensors to track and record aircraft flight maneuvers, and provides a highly accurate, three-dimensional video display of all maneuvers during air combat training.

The uncertainty over federal funding and the system's high cost has made near term acquisition of the system for Alaska very questionable. For this reason, the Alaskan Air Command has suspended current efforts to establish Lake Louise Military Operations Area. Another notice of intent to prepare an EIS will be published when the proposal becomes financially feasible.

For further information contact: Lt. Col. T.G. Tilma, Chief, Public Affairs, HQ AAC/PA, Elmendorf AFB, AK 99506–5001, telephone (907) 552–2228.

Department of the Navy

Secretary of the Navy's Advisory Board on Education and Training (SABET); Notice of Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. app.), notice is hereby given that the Secretary of the Navy's Advisory Board on Education and Training (SABET) will meet at the Sheraton Hotel on Orme, Columbia Pike Road, Washington, DC on 10, 11, 12 June 1986.

The purpose of SABET is to advise the Secretary of the Navy on policy concerning all facets of education and training for Navy and Marine Corps personnel. This meeting is a follow on to the November meeting which provided an overview of the Naval Medical Command. Follow-on policy issues related to military medicine will be discussed.

The meeting will commence at 2:30 p.m. on 10 June to review the agenda. Regular sessions will run 11 June from 8:00 a.m. until 5:00 p.m. The 12 June executive session will commence at 8:30 a.m. and terminate at 11:00 a.m. All sessions are open to the public.

For further information concerning this meeting, contact Mrs. Carol Osborn (Code 00A1), Professional Assistant to the Principal Civilian Advisory on Education and Training, CNET, Naval Air Station, Pensacola, Florida 32508, telephone (904) 453–4394.

Dated: April 28, 1986.

William F. Ross, Jr.,
Lieutenant, JAGC, U.S. Naval Reserve Federal Register Liaison Officer.

DEPARTMENT OF EDUCATION

Agency Information Collection Activities Under OMB Review

AGENCY: Department of Education.

ACTION: Notice of Proposed Information Requests.

SUMMARY: The Director, Information Resources Management Service invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1980.

DATES: Interested persons are invited to submit comments on or before June 2, 1986.

ADDRESSES: Written comments should be addressed to the Office of Regulatory Affairs, Attention: Desk Officer, Department of Education, Office of Management and Budget, 726 Jackson Place, NW., Room 3208, New Executive Office Building, Washington, DC 20503. Requests for copies of the proposed information collection requests should be addressed to Margaret B. Webster, Department of Education, 400 Maryland Avenue, SW., Room 4074, Switzer Building, Washington DC 20202.

FOR FURTHER INFORMATION CONTACT: Margaret B. Webster (202) 426–7304.

SUPPLEMENTARY INFORMATION: Section 3517 of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with an agency's ability to perform its statutory obligations.

The Director, Information Resources Management Service publishes this notice containing proposed information collection requests to the submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Agency form number (if any); (4) Frequency of the collection; (5) The affected public; (6) Reporting burden; and/or (7) Recordkeeping burden; and (8) Abstract. OMB invites public comment at the address specified above. Copies of the requests are available from Margaret Webster at the address specified above.

Dated: April 28, 1986.

George P. Sotos,
Director, Information Resources Management Service.

Office of Special Education and Research

Type of Review: New
Title: Longitudinal Study of a Sample of Handicapped Students
Agency Form Number: B20–15P
Frequency: Annually
Affected Public: Individuals or households; State or local governments; Non-profit institutions
Reporting Burden:
Responses: 16,355
Burden Hours: 4,223
Recordkeeping Burden:
Recordkeepers: 0
Burden Hours: 0
Abstract: The study will collect data on the education, employment, and independent living status of a sample of handicapped youth while in school and upon entering adult life. Results will inform the Department and Congress about the transitional progress of handicapped students from special education to work. The affected public includes handicapped youth, parents, local educational agencies, and vocational rehabilitation agencies.

Office of Postsecondary Education

Application Notice for Transmittal of Applications for the National Institute of Handicapped Research Fellowships for Fiscal Year 1986

AGENCY: Department of Education.

BEST COPY AVAILABLE

VOL 51 ISS 84 MY 1 1986 UMI

ACTION: Application Notice for Transmittal of Applications for the National Institute of Handicapped Research Fellowships for Fiscal Year 1986.

Programmatic and Fiscal Information

The Secretary invites applications for new research fellowships in selected priority areas for fiscal year 1986 under the National Institute of Handicapped Research.

The secretary has determined that there are specific area in which research is needed, and has set aside funds to provide fellowship assistance for research in these specific areas.

The Secretary expects to award one Distinguished Fellowship in each of the priority areas that are included in the Notice of Final Funding Priorities for Research Fellowships under the National Institute of Handicapped Research that was published on April 25, 1986 at 51 FR 15663–15665.

Potential applicants are advised to consult the Notice of Final Funding Priorities for Research Fellowships for a detailed description of the scope of the research to be included in each of these priorities.

NIHR expects to make approximately $300,000 available to award six fellowships under this program. NIHR expects to award stipends of up to $50,000 plus $1,500 for expenses in connection with the fellowship, to each successful applicant. All awards will be for a one-year period.

However, these estimates do not bind the U.S. Department of Education to any specific number of awards or to the amount of any award unless that amount is otherwise specified by statute or regulations.

Closing Date for Transmittal of Applications

Applications for new awards must be mailed or hand-delivered on or before July 3, 1986.

Applications sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention: (CFDA No. 84.133F), 400 Maryland Avenue, SW., Washington, DC 20202.

Each late applicant will be notified that its application will not be considered.

Applications that are hand-delivered must be taken to the U.S. Department of Education, Application Control Center, Room 3633, Regional Office Building #3, 7th and D Streets, SW., Washington, DC.

The Application Control Center will accept hand-delivered applications between 8:00 a.m. and 4:30 p.m. (Washington, DC time) daily, except Saturdays, Sundays, and Federal holidays.

Applicable Regulations: Regulations applicable to this program include the following:

(a) The regulations governing the Research Fellowship Program of the National Institute of Handicapped Research in 34 CFR Part 350.

(b) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Parts 74, 75, 77, and 78.

Application Forms:

Application forms and further information are expected to be available within one week from the date of this notice. These may be obtained by writing to or calling the National Institute of Handicapped Research, U.S. Department of Education, 400 Maryland Avenue, SW., Switzer Office Building, Mailstop 2304, Washington, DC 20202, (Attention: Fellowship Unit), Telephone (202) 732–1207. Deaf and hearing impaired individuals may call (202) 732–1198 for TTY services. Requests should refer to applications for Fellowships, 84.133F.

Further Information: For further information contact Ms. Rheable Edwards, National Institute of Handicapped Research, U.S. Department of Education, 400 Maryland Avenue, SW., Switzer Office Building, Room 3070, Washington, DC 20202, Telephone (202) 732–1200; deaf and hearing impaired individuals may call (202) 732–1198 for TTY services.

Program Authority: (29 U.S.C. 762).

BILLING CODE 4000-01-M

National Institute of Handicapped Research; Transmittal of Applications for New Research and Demonstration Projects and Knowledge Dissemination and Utilization Projects for Fiscal Year 1986; Correction

AGENCY: Department of Education.

ACTION: Correction Notice.

SUMMARY: An application notice establishing closing dates for the transmittal of applications for new awards under the Research and Demonstration Program and the Knowledge Dissemination and Utilization Projects Program of the National Institute of Handicapped Research was published in the Federal Register on April 11, 1986 at 51 FR 12542. That notice was in error in setting the anticipated period of support and the approximate funding level for a Research and Demonstration project in Financing Home Care for Seriously Disabled and Chronically Ill Children. NIHR expects to award up to $175,000 per year for up to three years for that priority area.

FURTHER INFORMATION: For further information contact Betty Jo Berland, National Institute of Handicapped Research, U.S. Department of Education, 400 Maryland Avenue, SW., Switzer Office Building, Room 3070, Washington, DC 20202, Telphone (202) 732–1139; deaf and hearing impaired individuals may call (202) 732–1198 for TTY services.

DEPARTMENT OF ENERGY

Office of Energy Research

Magnetic Fusion Advisory Committee; Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770), notice is hereby given of the following meeting:

Name: Magnetic Fusion Advisory Committee.

Date and Time: Wednesday, May 21, 1986, 9:00 am–5:00 pm, Thursday, May 22, 1986, 9:00 am–3:00 pm.

Location: Argonne National Laboratory, Building 203, Auditorium, 9700 South Cass Avenue, Argonne, Illinois 60439.

Contact: Rosalie H. Weller, Office of Fusion Energy, Office of Energy Research (ER–50), U.S. Department of Energy, Mail Stop G–236, Washington, DC 20545, Phone: (301)–353–3347.

Purpose of the Committee: To provide advice to the Secretary of Energy on the Department's Magnetic Fusion Energy Program, including periodic reviews of elements of the program and recommendations of changes based on scientific and technological advances or other factors; advice on long-range plans, priorities, and strategies to demonstrate the scientific and engineering feasibility of fusion; advice on recommended appropriate levels of funding to develop those strategies and to help maintain appropriate balance between competing elements of the program.

Agenda Outline

Wednesday, May 21, 1986—9:00 AM

1. Status Report on CIT Engineering and Proposal Planning—Furth, Schmidt (PPPL)
2. Report of Panel XVI on Mirror Program
   A. Review of Charge—Ribe (Univ. of Washington)
   B. Panel Findings/Recommendations—Forsen (Bechtel)
3. MFAC Comments

Lunch

4. Public Comment
5. MFAC Discussion of Panel XVI Findings and Recommendations
6. Presentation on ANL Fusion Program—Baker (ANL)

Adjourn 5:00 PM

Thursday, May 22, 1986—9:00 AM

1. Panel XVI—MFAC Response
2. Status Report on International Collaboration
   A. Recent Progress—Clarke (DOE)
   B. TWP Meeting—Gottlieb (Grumman)
3. Briefing by Panel XV on the Technical Planning Activity
   A. Review of Charge—Ribe (Univ. of Washington)
   B. Summary of Initial TPA Review—Weitzner (NYU)

Lunch

4. MFAC Comments
5. Public Comment
6. Other Business

Adjourn 3:00 PM

Public Participation: The meeting is open to the public. Written statements may be filed with the Committee either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Rosalie Weller at the address or telephone number listed above. Requests must be received five days prior to the meeting and reasonable provision will be made to include the presentation on the agenda. The Chairperson of the Committee is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Minutes: Available for public review and copying approximately 30 days following the meeting at the Public Reading Room, Room 1E190, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, between 8:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC, on April 28, 1986.

J. Robert Franklin,

Deputy Advisory Committee Management Officer.

Federal Energy Regulatory Commission

[Docket No. CP86-424-000]

Crown Zellerbach Corp. and Gaylord Container Limited; Errata Notice and Notice of Application

April 23, 1986.

April 16, 1986.

In paragraph four of notice published April 24, 1986 (51 FR 15536), change "May 12, 1986" to "May 5, 1986". Sentence should read, "Any person desiring to be heard or to make any protest with reference to said application should on or before May 5, 1986, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10).

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

Office of Hearings and Appeals

Issuance of Decisions and Orders; Week of March 10 Through March 14, 1986

During the week of March 10 through March 14, 1986, the decisions and orders summarized below were issued with respect to applications for relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

Remedial Order

Oklahoma Refining Co., 3/10/86; *HRO—0302, KRD—0008, KRH—0008*

On February 13, 1986, the Economic Regulatory Administration (ERA) of the Department of Energy filed a Motion to Withdraw the Proposed Remedial Order (PRO) issued to Oklahoma Refining Company on May 31, 1985. After considering the ERA's motion and the firm's response, the OHA determined there was good cause to permit the ERA to withdraw the PRO without prejudice to the issuance of a new PRO. Specifically, the dismissal order found that granting the request to withdraw in order to permit ERA to perform additional investigation would allow the agency to correct possible errors in its legal or factual analysis prior to judicial review. The determination also found that Oklahoma Refining would not be prejudiced by the withdrawal of the PRO.

Request for Modification and/or Rescission

Economic Regulatory Administration, 3/10/86; *KRR—0007*

The Economic Regulatory Administration (EPA) sought reconsideration of a denial of its Motion to Place Documents under Seal in a decision and order issued by the Office of Hearings and Appeals on February 11, 1986, in connection with enforcement proceedings against National Hydrocarbons Group, Inc. ERA wished to prevent disclosure of data from 1980 indicating how title to crude oil shipped through the Shell Ship Shoal pipeline passed from one entity to another. The Office of Hearings and Appeals held that ERA had not provided a compelling reason for reconsideration of the previous decision, and the possibility of competitive harm from release of the data was no longer sufficient reason to prevent public disclosure of the data. Accordingly, the Motion was denied.

Motions for Discovery

Edwin Milton Jones, Jr., Dennis Van Matthew, 3/14/86; *HRD—0015, HRD—0226*

On August 2, 1984, Edwin Milton Jones, Jr. (Jones) and Dennis Van Matthew (Matthew) filed Motions for Discovery in connection with their respective Statement of Objections to a Proposed Remedial Order (PRO) issued to them by the Economic Regulatory Administration (ERA) on April 24, 1984. In the PRO, the ERA alleges that Jones and Matthew, acting as officers of Southwest Petrochem, Inc. (Petrochem) violated the "anti-layering" provisions of 10 CFR Part 212, Subpart L. In their Motions for Discovery, Jones and Matthew sought extensive discovery pertaining to: (1) The Petrochem audit and (2) documents which relate to ERA's preparation of the PRO. In addition, Jones and Matthew sought to depose a principal DOE auditor identified in the PRO. The OHA concluded that Jones' and Matthew's Motions for Discovery should be granted to the extent that their requests, encompassed final audit workpapers which underlie the PRO's allegations. The OHA denied Jones' and Matthew's broad requests as being irrelevant to discover documents that encompassed materials beyond the scope on the ERA's audit of Petrochem. Furthermore, the OHA concluded that Jones and Matthew had sought ERA's production of documents principally to support their legal interpretation of the layering rule, rather than to address material factual issues in dispute. Finally, the OHA held that Jones and Matthew had failed to make the requisite showing for the granting of a deposition by demonstrating that they were unable to obtain the information sought through one of the other discovery means. Jones and Matthew were granted permission to

VOL 51 ISS 84 MY 1 1986 UMI

supplement their present Motions for Discovery, however, in the event that ERA failed to provide them with the final audit workpapers showing the manner in which the overcharges alleged in the PRO were calculated.

Thriftway Co., 3/10/86; KRD-0004

The Thriftway Company filed a Motion for Discovery in connection with a Proposed Remedial Order (PRO) which the Economic Regulatory Administration (ERA) issued to the firm on June 28, 1985. The PRO alleges that Thriftway violated 10 CFR 211.67(e)(2) (1976) in its claim for small refiner bias entitlements for crude oil processed by another refiner pursuant to a processing agreement. Thriftway requested administrative record and contemporaneous construction discovery from the ERA, as well as admissions and answers to interrogatories from two other companies involved in the transactions at issue. The DOE found that (i) only the publicly available administrative record was relevant to Thriftway's claims; (ii) that the circumstances did not warrant the extraordinary device of contemporaneous construction discovery; and (iii) that proof of facts which Thriftway sought to prove through discovery from the other parties to the transaction would not aid Thriftway in its defense of the ERA's charges. The DOE therefore denied Thriftway's Motion for Discovery.

Interlocutory Order

Economic Regulatory Administration, 3/13/86; KRZ-0027

In connection with a Proposed Remedial Order (PRO) issued to Consolidated Materials, Inc., Stonewalk Corporation (Stonewalk), Jahncke Service, Inc. and CLB Enterprises, Inc., on February 28, 1986, the Economic Regulatory Administration (ERA) filed a Motion to Amend the PRO and a Motion to John Donald E. Baxter to the PRO proceedings. In considering the motions, the Office of Hearings and Appeals (OHA) determined that ERA had not presented a *prima facie* case of personal liability in the Motion to Join Mr. Baxter. Specifically, OHA found that ERA had not demonstrated that Mr. Baxter controlled either Stonewalk's organization or its operations at the time of the violation alleged in the PRO proceeding, or shown that Mr. Baxter had enjoyed substantial benefit as a result of the alleged violations. OHA also found that even if the PRO recipients are insolvent, as alleged, that fact in itself would not support joinder. Accordingly, OHA denied ERA's Motion to Join and its Motion to Amend the PRO.

Refund Applications

Gulf Oil Corp./Stuart Gulf Service Station, et al., 3/13/86; RF40-01124, et al.

The DOE issued a Decision and Order concerning five Applications for Refund filed by retailers and resellers that were direct purchasers of Gulf Oil Corporation petroleum products. Each firm applied for a refund based on the procedures outlined in *Gulf Oil Corp.*, 12 DOE ¶ 85,048 (1984), governing the disbursement of settlement funds received from Gulf pursuant to a 1978 consent order. In accordance with those procedures, each applicant demonstrated that it would not have been required to pass through to customers a cost reduction equal to the refund claimed. After examining the applications and supporting documentation submitted by the applicants, the DOE concluded that they should receive a total refund of $12,354, consisting of $10,467 in principal and $1,887 in interest.

Little America Refining Co./Towne Pump Stations, 3/12/86; RF112-160

The DOE granted a refund from the Little America Refining Company (Larco) deposit escrow account to Towne Pump Stations. The applicant, a retailer of Larco covered products, submitted a claim for less than $5,000, and was therefore not required to submit a detailed showing of injury. Accordingly, the DOE granted Towne Pump Stations a refund of $870, representing $584 principal and $286 in interest.

MAPCO, Inc./Northern Illinois Gas Co., 3/13/86; RF108-1

Northern Illinois Gas Company (NI-Gas), an ultimate consumer who converted natural gas liquids into pipeline-quality synthetic natural gas at its Aux Sable SNG refining plant, filed an Application for Refund in the MAPCO special refund proceeding based upon the principles and procedures set forth in *Peoples Energy Corp., et al.* In considering the application, the DOE determined that of the purchase volumes specified in the refund application, 1,302,908,416 gallons of ethane and 335,874 gallons of butane were not relevant since ethane was not a covered product and the butane purchases had occurred after butane was decontrolled effective January 1, 1980. On the basis of the remaining purchase volumes, NI-Gas was found to be entitled to a refund consisting of $1,189,810.94 in principal of $900,689.35 in accrued interest.

National Helium Corp./IN., National Helium Corp./MO., National Helium Corp. FL, 3/13/86; RQ3-259, RQ3-260, RQ3-261

The Office of Hearings and Appeals (OHA) of the Department of Energy (DOE) issued a Supplemental Order authorizing the DOE's Office of the Controller to disburse National Helium funds previously approved in *National Helium Corp./Missouri*, 13 DOE ¶ 85,255 (1985), to the States of Indiana, Missouri and Florida. The OHA authorized total disbursements in principal and interest of $30,036 to Indiana and $3,568 each to Missouri and Florida.

National Helium Corp./OH, 3/13/86; RQ3-258

The Office of Hearings and Appeals (OHA) of the Department of Energy (DOE) issued a Supplemental Order authorizing the DOE's Office of the Controller to disburse National Helium funds previously approved in *National Helium Corp./Ohio.*, 13 DOE ¶ 85,255 (1985), to the State of Ohio. the OHA authorized a total disbursement of $570,445.03 in principal and interest to Ohio.

Standard Oil Co. (IN)/Northville Industries Corp., 3/12/86; RF21-12578, RF21-12579

Northville Industries Corporation filed two applications in which it sought refunds of a portion of the funds obtained by the DOE through a consent order entered into with Standard Oil Company (Indiana) (Amoco). Having purchased Amoco petroleum products on an irregular basis during the consent order period, the DOE determined that Northville had been a spot purchaser during the consent order period. In view of the rebuttable presumptions in *Amoco* against refunds to spot purchasers, the firm's applications were denied.

Standard Oil Co. (IN)/Runnfeldt & Belmont Service Station, 3/13/86; RF21-3818

The DOE issued a Decision and Order granting a refund from the Standard Oil Company (Indiana) (Amoco) deposit fund escrow account to the Runnfeldt & Belmont Service Station, a retailer of Amoco motor gasoline. The firm applied for a refund based upon the presumption of injury outlined in *Office of Special Counsel*, 10 DOE ¶ 85,048 (1982). In considering the application, the DOE concluded that the firm should receive a refund based upon the total volume of its motor gasoline purchases. The total refund granted to Runnfeldt & Belmont is $2,019.

Dismissals

The following submissions were dismissed:

Company name	Case No.
Chevron USA, Inc	RF125-9
Michael Caolo & Associates	RF125-8

Copies of the full text of these decisions and orders are available in the Public Reference Room of the Office of Hearings and Appeals, Room 1E-234, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except federal holidays. They are also available in *Energy Management: Federal Energy Guidelines*, a commercially published loose leaf reporter system.

Cases Filed; Week of March 28 Through April 4, 1986

During the Week of March 28 through April 4, 1986, the exception or other relief listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Under DOE procedural regulations, 10 CFR Part 205, any person who will be aggrieved by the DOE action sought in these cases may file written comments on the application within 10 days of service of notice, as prescribed in the procedural regulations. For purposes of the regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, DC 20585.

George B. Breznay,

Director, Office of Hearings and Appeals.

April 21, 1986.

List of Cases Received by the Office of Hearings and Appeals

[Week of Mar. 28 through Apr. 4, 1986]

Date	Name and location of applicant	Case No.	Type of submission
Mar. 28, 1986	National Helium/Missouri, Webster/Missouri, Vickers Energy/Missouri Jefferson City, Missouri.	RM3-21, RM48-22, RM1-23	Request for modification/rescission in second stage refund proceedings. If granted: The November 5, 1985 and the March 13, 1986 Decisions and Orders (Case Nos. RQ3-197, RQ3-260, RQ48-198 and RQ1-199) issued to Missouri would be modified regarding the state's refund application submitted in the National Helium, Webster Oil and the Vickers Energy second stage refund proceedings.
Mar. 31, 1986	Listo Petroleum, Inc., Washington, DC	KRO-0140, KRH-0140	Request for evidentiary hearing and motion for discovery. If granted: Discovery would be granted and an evidentiary hearing would be convened in connection with the statement of objections submitted by Listo Petroleum, Inc. in response to the Proposed Remedial Order (Case No. KRO-0140) issued to Listo Petroleum, Inc.
Apr. 1, 1986	Keystone Fuel Oil Company, Washington, DC	KER-0009	Request for modification/rescission. If granted: The March 26, 1986, Decision and Order (Case No. HEE-0104) issued to Keystone Fuel Oil Company by the Office of Hearings and Appeals would be modified regarding the firm's request for exception relief.
Apr. 3, 1986	Mountain Fuel Supply Company, Washington, DC	KEF-0025	Implementation of special refund procedures. If granted: The Office of Hearings and Appeals would implement Special Refund Procedures pursuant to 10 CFR Part 205, Subpart V in connection with March 25, 1985 Stipulation of settlement issued to Mountain Fuel Supply Company.
Do.	UPG, Inc. Washington, DC	KEF-0026	Implementation of Special Refund Procedures. If granted: The Office of Hearings and Appeals would implement Special Refund Procedures pursuant to 10 CFR Part 205, Subpart V, in connection with the December 31, 1985 Consent Order entered into with UPG, Inc.
Apr. 4, 1986	LARCO/Wiles Oil Company, Salt Lake City, Utah	RR112-1	Request for modification in the Larco refund proceeding. If granted: The March 5, 1986 Decision and Order (Case No. RF112-11) issued to Wiles Oil Company would be modified regarding the firm's application for refund submitted in the Little American Refining Company (LARCO) refund proceeding.

Objection to Proposed Remedial Order Filed; Period of March 24 Through April 4, 1986

During the period of March 24 through April 4, 1986, the notice of objection to proposed remedial order listed in the Appendix to this Notice was filed with the Office of Hearings and Appeals of the Department of Energy.

Any person who wishes to participate in the proceeding the Department of

VOL 51 ISS 84 MY 1 1986 UMI

Energy will conduct concerning the proposed remedial order described in the Appendix to this Notice must file a request to participate pursuant to 10 CFR 205.194 within 20 days after publication of this Notice. The Office of Hearings and Appeals will then determine those persons who may participate on an active basis in the proceeding and will prepare an official service list, which it will mail to all persons who filed requests to participate. Persons may also be placed on the official service list as non-participants for good cause shown.

All requests to participate in this proceeding should be filed with the Office of Hearings and Appeals, Department of Energy, Washington, DC 20585

Dated: April 21, 1986.

George B. Breznay,

Director, Office of Hearings and Appeals.

Ted True, Inc., Dallas, Texas; KRO-0270, Crude Oil

On April 1, 1986, Ted True, Inc. and Mr. Ted True, president, 1201 Elm Street, Suite 5377, Dallas, Texas 75270 filed a Notice of Objection to a Proposed Remedial Order which the DOE Houston District Office of Enforcement issued to the firm on February 28, 1986. In the PRO the Houston District found that during the period June 1979 through November 1980, the firm miscertified barrels of crude oil in violation of 10 CFR 212.131(b)(1).

According to the PRO the violation resulted in $944,771.00 of overcharges.

[FR Doc. 86-9807 Filed 4-30-86; 8:45 am]

BILLING CODE 6450-01-M

Implementation of Special Refund Procedures

AGENCY: Office of Hearings and Appeals, DOE.

ACTION: Notice of implementation of special refund procedures.

SUMMARY: The Office of Hearings and Appeals of the Department of Energy solicits comments concerning the appropriate procedures to be followed in refunding to adversely affected parties $33,690.23 obtained as a result of a Consent Order which the DOE entered into with Quarles Petroleum, Inc., a reseller-retailer of petroleum products located in Fredericksburg, Virginia. The money is being held in escrow following the settlement of enforcement proceedings brought by the DOE's Economic Regulatory Administration.

DATE AND ADDRESS: Comments must be filed within 30 days of publication of this notice in the **Federal Register** and should be addressed to the Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585. All comments should conspicuously display a reference to case number HEF-0156.

FOR FURTHER INFORMATION CONTACT: Walter J. Marullo, Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252-6602.

SUPPLEMENTARY INFORMATION: In accordance with section 205.282(b) of the procedural regulations of the Department of Energy, 10 CFR 205.282(b), notice is hereby given of the issuance of the Proposed Decision and Order set out below. The Proposed Decision sets forth procedures and standards that the DOE has tentatively formulated to distribute to adversely affected parties $33,690.23 plus accrued interest obtained by the DOE under the terms of a Consent Order entered into with Quarles Petroleum, Inc. (Quarles). The funds were provided to the DOE by Quarles to settle all claims and disputes between the firm and the DOE regarding the manner in which the firm applied the federal price regulations with respect to its sales of motor gasoline during the period January 2, 1979, through September 30, 1979.

OHA proposes that a two-stage refund process be followed. In the first stage, OHA has tentatively determined that a portion of the consent order funds should be distributed to firms and individuals that purchased Quarles motor gasoline during the consent order period. In order to obtain a refund, each claimant will be required to submit a schedule of its monthly purchases of Quarles motor gasoline and to demonstrate that it was injured by Quarles' pricing practices. The specific requirements for proving injury are set forth in the following Proposed Decision and Order.

Applications for Refund should not be filed at this time. Appropriate public notice will be given when the submission of claims is authorized.

Some residual funds may remain after all meritorious first-stage claims have been satisfied. OHA invites interested parties to submit their views concerning alternative methods of distributing any remaining funds in a subsequent proceeding.

Any member of the public may submit written comments regarding the proposed refund procedures. Such parties are requested to submit two copies of their comments. Comments should be submitted within 30 days of publication of this notice. All comments received in this proceeding will be available for public inspection between 1:00 and 5:00 p.m., Monday through Friday, except federal holidays, in the Public Reference Room of the Office of Hearings and Appeals, located in Room 1E-234, 1000 Independence Avenue, SW., Washington, DC 20585.

Dated: April 16, 1986.

George B. Breznay,

Director, Office of Hearings and Appeals.

Proposed Decision and Order of the Department of Energy

Implementation of Special Refund Procedures

April 16, 1986.

Name of firm: Quarles Petroleum, Inc.

Date of filing: October 13, 1983.

Case number: HEF-0156.

Under the procedural regulations of the Department of Energy (DOE), the Economic Regulatory Administration (ERA) may request that the Office of Hearings and Appeals (OHA) formulate and implement special procedures to distribute funds received as a result of an enforcement proceeding in order to remedy the effects of actual or alleged violations of the DOE regulations. See 10 C.F.R. Part 205, Subpart V. In accordance with the provisions of Subpart V, on October 13, 1983, ERA filed a Petition for the Implementation of Special Refund Procedures in connection with a consent order entered into with Quarles Petroleum, Inc. (Quarles).

I. Background

Quarles is a "reseller-retailer" of refined petroleum products as that term was defined in 10 CFR 212.31 and is located in Fredericksburg, Virginia. A DOE audit of Quarles' records revealed possible violations of the Mandatory Petroleum Price Regulations. 10 CFR Part 212, Subpart F. The audit alleged that between January 2, 1979, and September 30, 1979, Quarles committed possible pricing violations in its sales of motor gasoline.

In order to settle all claims and disputes between Quarles and the DOE regarding the firm's sales of motor gasoline during the period covered by the audit, Quarles and the DOE entered into a consent order on October 21, 1981. The consent order refers to ERA's allegations of overcharges, but notes that there was no finding that violations occurred. Additionally, the consent order states that Quarles does not admit that it violated the regulations.

Under the terms of the consent order, Quarles was required to deposit $33,690.23 into an interest-bearing escrow account for ultimate distribution by the DOE. Quarles remitted this sum on April 5, 1982.[1]

II. Proposed Refund Procedures

The procedural regulations of the DOE set forth general guidelines to be used by OHA in formulating and implementing a plan of distribution for funds received as a result of an enforcement proceeding. 10 CFR Part 205, Subpart V. The Subpart V process may be used in situations where the DOE is unable to identify readily those persons who likely were injured by alleged overcharges or to ascertain readily the amount of such persons' injuries. For a more detailed discussion of Subpart V and the authority of OHA to fashion procedures to distribute refunds, *see Office of Enforcement*, 9 DOE ¶ 82,508 (1981), and *Office of Enforcement*, 8 DOE ¶ 82,597 (1981) (*Vickers*).

Our experience with Subpart V cases leads us to believe that the distribution of refunds in this proceeding should take place in two stages. In the first stage, we will accept claims from identifiable purchers of motor gasoline who may have been injured by Quarles' pricing practices during the period January 2, 1979, through September 30, 1979. If any funds remain after all meritorious first-stage claims have been paid, they may be distributed in a second-stage proceeding. *See, e.g., Office of Special Counsel*, 10 DOE ¶ 85,046 (1982) (*Amoco*).

A. Refunds to Identifiable Purchasers

In the first stage of the Quarles refund proceeding, we propose to distribute the funds currently in escrow to claimants who demonstrate that they were injured by Quarles' alleged overcharges. As we have done in many prior refund cases, we propose to adopt certain presumptions and findings which will be used to help determine the level of a purchaser's injury.

The presumptions and findings we plan to adopt in this case are used to permit claimants to participate in the refund process without incurring inordinate expenses and to enable OHA to consider the refund applications in the most efficient way possible in view of the limited resources available. First, we plan to adopt a presumption that the alleged overcharges were dispersed evenly in all of Quarles' sales of motor gasoline made during the consent order period. In the past, we have referred to a refund process that uses this presumption as a volumetric method. Second, we propose to adopt a presumption of injury with respect to small claims. Third, we plan to adopt a presumption that spot purchasers were not injured by the alleged overcharges. Finally, we are making proposed findings that end users, certain types of regulated firms, and cooperatives were injured by Quarles' pricing practices.

The pro rata, or volumetric, refund presumption assumes that alleged overcharges by a consent order firm were spread equally over all gallons of product covered by the consent order. In the absence of better information, this assumption is sound because the DOE price regulations generally required a regulated firm to account for increased costs on a firm-wide basis in determining its prices. This presumption is rebuttable, however. A claimant which believes that it incurred a disproportionate share of the alleged overcharges may submit evidence proving this claim in order to receive a larger refund. *See, e.g., Sid Richardson Carbon and Gasoline Co. and Richardson Products Co./Siouxland Propane Co.*, 12 DOE ¶ 85,054 at 88,164 (1984), and cases cited therein.

Under the volumetric method we plan to adopt, a claimant will be eligible to receive a refund equal to the number of gallons of Quarles motor gasoline that it purchased during the consent order period times the volumetric factor. The volumetric factor is the average per gallon refund and in this case equals $0.003662 per gallon.[2] In addition, successful claimants will receive a proportionate share of the accrued interest.

The second presumption we plan to use is that purchasers of Quarles motor gasoline seeking small refunds were injured by the firm's pricing practices. There are a variety of reasons for adopting this presumption. *See, e.g., Uban Oil Co.*, 9 DOE ¶ 82,541 (1982). These firms were in the chain of distribution where the alleged overcharges occurred and therefore bore some impact of the alleged overcharges, at least initially. In order to support a specific claim of injury, a firm would have to compile and submit detailed factual information regarding the impact of alleged overcharges which took place many years ago. This procedure is generally time-consuming and expensive. With small claims, the cost to the firm of gathering the necessary information and the cost to OHA of analyzing it could exceed both the expected refund and the benefits from any additional precision. As a result, without simplified procedures injured parties could effectively be denied the opportunity to receive a refund.

Under the small-claims presumption, a claimant who is a reseller or retailer would not be required to submit any additional evidence of injury beyond volumes of Quarles motor gasoline purchased if its refund claim is below a certain sum. Several factors determine the value of this threshold. For example, the cost to the applicant and the government of compiling and analyzing information sufficient to show injury should not exceed the amount of any relevant refund. In this case, where the refund amount is fairly low and the early months of the consent order period are many years past, $5,000 is a reasonable value for the threshold. *See Texas Oil & Gas Corp.*, 12 DOE ¶ 85,069 at 88,210 (1984); *Office of Special Counsel*, 11 DOE ¶ 85,228 (1984) (*Conoco*), and cases cited therein.

A reseller or retailer which claims a refund in excess of $5,000 will be required to document its injury. While there are a variety of methods by which a firm might make such a showing, a firm is generally required to demonstrate (i) that it maintained a "bank" of unrecovered costs, in order to show that it did not pass the alleged overcharges through to its own customers, and (ii) that market conditions were the reason that it did not pass through those increased costs.[3]

A modification of the standard injury requirement is necessary in this proceeding because for 6½ months of the 9-month Quarles consent order period, retailers of motor gasoline were not required to compute MLSPs with reference to May 15, 1973 selling prices and increased costs. *See* 10 CFR 212.93; 45 FR 29546 (1980). Instead, effective July 16, 1979, a retailer was required to calculate its MLSP under a fixed-margin approach set forth in the new rule. Unrecouped increased product costs could no longer be banked for later recovery. *Id.* Consequently, retailers were not required to maintain or compute cost banks during the 6½ month period. As a result, any

[1] The total value of the Quarles escrow account stood at $40,025.34 as of March 31, 1986.

[2] This figure is computed by dividing the $33,690.23 received from Quarles by the 9,200,300 gallons of motor gasoline sold by the firm during the consent order period.

[3] This injury requirement reflects the nature of the petroleum price regulations in effect beginning on August 19, 1973, and ending on July 15, 1979 for retailers, and on May 1, 1980 for resellers. Under the original rules, a reseller or retailer of motor gasoline was required to calculate its maximum lawful selling price (MLSP) by summing its selling price on May 15, 1973, with increased costs incurred since that time. A firm which was unable to charge its MLSP in a particular month could "bank" any unrecovered increased product costs, so that those costs could be recouped in a later month, if possible. *See* 10 CFR 212.93; 45 FR 29546 (1980).

VOL 51 ISS 84 MY 1 1986 UMI

requirement that a retailer claimant make a demonstration of injury like that contemplated for resellers, *i.e.*, based on unrecovered cost banks, would effectively eliminate all non-threshold retailer claimants for a portion of the consent order period. Therefore, in this proceeding, we will allow retailers which lack banks subsequent to July 16, 1979 to file a claim for a refund which exceeds $5,000.[4] However, like resellers, retailers will be required for the entire consent order period to show that market conditions prevented them from recovering those increased product costs, *e.g.*, through a demonstration of reduced profit margins, decreased market shares, depressed sales volumes or competitive disadvantage.[5]

If a reseller or retailer made only spot purchases, we propose that it should not receive a refund since it is unlikely to have been injured. As we have previously stated with respect to spot purchasers:

> [T]hose customers tend to have considerable discretion in where and when to make purchases and would therefore not have made spot market purchases of [the firm's product] at increased prices unless they were able to pass through the full amount of [the firm's] quoted selling price at the time of purchase to their own customers.

Vickers, 8 DOE at 85,396–97. We believe the same rationale applies in the present case. Therefore, we propose that firms which made only spot purchases of Quarles motor gasoline not receive refunds unless they present evidence which rebuts the spot purchaser presumption and establishes the extent to which they were injured as a result of their purchases of Quarles motor gasoline during the consent order period.

As noted above, we have concluded that end users were injured by the alleged overcharges. Unlike regulated firms in the petroleum industry, members of this group generally were not subject to price controls during the consent order period. They were therefore not required to base their pricing decisions on cost increases or to keep records which would show whether they passed through cost increases. An analysis of the impact of the alleged overcharges on the final prices of goods and services which were not covered by the petroleum price regulations would therefore be beyond the scope of a special refund proceedings. *See Office of Enforcement*, 10 DOE ¶ 85,072 (1983) (*PVM*); *see also Texas Oil & Gas Corp.*, 12 DOE at 88,209, and cases cited therein.[6]

In addition, we propose that firms whose prices for goods and services are regulated by a governmental agency or by the terms of a cooperative agreement not be required to demonstrate that they absorbed the motor gasoline overcharges alleged by ERA. In the case of regulated firms, *e.g.*, public utilities, any overcharges incurred as a result of Quarles' alleged violations of the DOE regulations would routinely be passed through to the utilities' customers. Similarly, any refunds received by such firms would be reflected in the rates they were allowed to charge their customers. Refunds to agricultural cooperatives would likewise directly influence the prices charged to their member customers. Consequently, we propose adding such firms to the class of claimants that are not required to show that they did not pass through to their customers cost increases resulting from alleged overcharges. *See, e.g., Office of Special Counsel*, 9 DOE ¶ 82,538 (1982) (*Tenneco*), *and Office of Special Counsel*, 9 DOE ¶ 82,545 at 85,244 (1982) (*Pennzoil*). Instead, those firms should provide with their application a full explanation of the manner in which refunds would be passed through to their customers and how the appropriate regulatory body or membership group will be advised of the applicant's receipt of any refund money. Sales by cooperatives to nonmembers, however, will be treated the same as sales by any other reseller.

As in previous cases, only claims for at least $15 will be processed. This minimum has been adopted in prior refund cases because the cost of processing claims for refunds of less than $15 outweighs the benefits of restriction in those situations. *See, e.g., Urban Oil Co.*, 9 DOE at 85,225. *See also* 10 CFR 205.286(b). The same principle applies here.

If valid claims exceed the funds available in the escrow account, all refunds will be reduced proportionately. Actual refunds will be determined after analyzing all appropriate claims.

B. Application for Refund

Any purchaser claiming a portion of the consent order funds will be required to file an Application for Refund pursuant to 10 CFR 205.283. In its application, a claimant must include a schedule of its monthly purchases of Quarles motor gasoline as well as all relevant information necessary to support its claim in accordance with the presumptions and findings outlined above. A claimant must also state whether it has previously received a refund, from any source, with respect to the alleged overcharges underlying this proceeding. Each applicant must also state whether there has been a change in ownership of the firm since that audit period. If there has been a change in ownership, the applicant must provide the names and addresses of the other owners, and should either state the reasons why the refund should be paid to the applicant rather than to the other owners or provide a signed statement from the other owners indicating that they do not claim a refund. Finally, an applicant should report whether it is or has been involved as a party in DOE enforcement or private actions filed under § 210 of the Economic Stabilization Act. If these actions have been concluded the applicant should furnish a copy of any final order issued in the matter. If the action is still in progress, the applicant should briefly describe the action and its current status. The applicant must keep OHA informed of any change in status while its Application for Refund is pending. *See* 10 CFR 205.9(d).

C. Distribution of Remaining Consent Order Funds

In the event that money remains after all meritorious claims have been satisfied, residual funds could be distributed in a number of ways in a subsequent proceeding. However, we will not be in a position to decide what should be done with any remaining funds until the initial stage of this refund proceeding has been completed. We encourage the submission by interested parties of proposals which address alternative methods of distributing any remaining funds.

It is therefore ordered that:

The refund amount remitted to the Department of Energy by Quarles Petroleum, Inc. pursuant to the Consent Order executed on October 21, 1981, will be distributed in accordance with the foregoing decision.

[FR Doc. 86-9804 Filed 4-30-86; 8:45 am]

BILLING CODE 6450-01-M

[4] The cost bank requirement ahs been relaxed in other instances involving the change in the pricing regulations for motor gasoline. *See* Tenneco Oil Company/United Fuels Corporation, 10 DOE ¶ 85,085 at 88,017 n.1 (1982).

[5] Resellers or retailers who claim a refund in excess of $5,000 but who cannot establish that they did not pass through the price increases will be eligible for a refund of up to the $5,000 threshold, without being required to submit evidence of injury beyond purchase volumes. Firms potentially eligible for greater refunds may choose to limit their claims to $5,000. *See* Vickers, 8 DOE at 85,396. *See also* Ofice of Enforcement, 10 DOE ¶ 85,029 at 88,122 (1982).

[6] If a firm is both a spot purchaser and an end user, it will be treated as an end user and will not be required to make any showing of injury beyond that required of other end users.

Implementation of Special Refund Procedures

AGENCY: Office of Hearings and Appeals, DOE.

ACTION: Notice of Implementation of Special Refund Procedures.

SUMMARY: The Office of Hearings and Appeals of the Department of Energy announces the procedures for disbursement of $172,193.63 (plus accrued interest) obtained as a result of a Consent Order which the DOE entered into with Elm City Filling Stations, Inc. of New Haven, Connecticut (Case No. HEF-0067). The fund will be available to customers who purchased No. 6 residual fuel oil from Elm during the consent order period.

DATE AND ADDRESS: Applications for refund of a portion of the consent order fund must be filed no later than 90 days after publication of this notice in the **Federal Register** and should be addressed to: Elm Consent Order Refund Proceeding, Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585. All applications should conspicuously display a reference to Case No. HEF-0067.

FOR FURTHER INFORMATION CONTACT: Richard W. Dugan, Associate Director, Office of Hearings and Appeals, 1000 Independence Avenue SW., Washington, DC 20585, (202) 252-2860.

SUPPLEMENTARY INFORMATION: In accordance with § 205.282(c) of the procedural regulations of the Department of Energy, 10 CFR 205.282(c), notice is hereby given of the issuance of the Decision and Order set out below. The Decision and Order relates to a Consent Order entered into by Elm City Filling Stations, Inc. of New Haven, Connecticut. The Consent Order settled possible pricing violations with respect to the firm's sales of No. 6 residual fuel oil to customers during the November 1, 1973 through December 31, 1973 consent order period.

The Office of Hearings and Appeals previously issued a Proposed Decision and Order which tentatively established a two-stage refund procedure and solicited comments from interested parties concerning the proper disposition of the consent order fund. The Proposed Decision and Order discussing the distribution of the consent order funds was issued on July 3, 1985. 50 FR 28633 (July 15, 1985).

As the Decision and Order indicates, applications for refunds from the consent order fund may now be filed. Applications will be accepted provided they are postmarked no later than 90 days after publication of this Decision and Order in the **Federal Register**.

Applications will be accepted from customers who purchased No. 6 residual fuel oil from Elm during the consent order period. The specified information required in an application for refund is set forth in the Decision and Order. The Decision and Order reserves the question of the proper distribution of any remaining consent order funds until the first-stage claims procedure is completed.

Dated: April 17, 1986.

George B. Breznay,

Director, Office of Hearings and Appeals.

Decision and Order of The Department of Energy

Special Refund Procedures

April 17, 1986.

Name of firm: Elm City Filling Stations, Inc.

Date of filing: October 13, 1983.

Case number: HEF-0067

In accordance with the procedural regulations of the Department of Energy (DOE), 10 CFR Part 205, Subpart V, the Economic Regulatory Administration (ERA) of the DOE filed a Petition for the Implementation of Special Refund Procedures with the Office of Hearings and Appeals (OHA) On October 13, 1983. The petition requests that the OHA formulate and implement procedures for the distribution of funds received pursuant to a Consent Order entered into by the DOE and Elm City Filling Stations, Inc. (Elm) of New Haven, Connecticut.

I. Background

Elm is a "reseller" of "No. 6 residual fuel oil" as these terms were defined in 10 CFR 212.31. On January 2, 1979, a Proposed Remedial Order (PRO) was issued to Elm Subsequently, the OHA issued a Remedial Order (RO) to Elm. which found violations of the Mandatory Petroleum Price Regulations in the amount of $219,797 with respect to the firm's sales of No. 6 residual fuel oil during the two-month period November 1, 1973 through December 31, 1973. *Elm City Filling Stations, Inc.*, 8 DOE ¶ 83,031 (1981) (*Elm City*). In order to settle all claims and disputes between Elm and the DOE regarding these sales, Elm and the DOE entered into a Consent Order on September 1, 1981, in which Elm agreed to remit $141,454 to the DOE. The Consent Order states that the ERA alleges pricing violations and that Elm does not admit that it committed any such violations. Elm's payments, which total $172,193.63 ($141,454 in principal plus $30,739.63 in interest accrued prior to the completion of payments), are currently being held in an interest-bearing escrow account pending distribution by the DOE.

On July 3, 1985, the OHA issued a Proposed Decision and Order (PD&O) setting forth a tentative plan for the distribution of the consent order fund. 50 FR 28633 (July 15, 1985). We stated in the PD&O that the basic purpose of a special refund proceeding is to make restitution for injuries that were suffered as a result of alleged or adjudicated violations of the DOE regulations. In order to effect restitution in this proceeding, we proposed to establish a claims procedure whereby applications for refund would be accepted from customers who can demonstrate that they were injured as a result of Elm's pricing practices during the November 1, 1973 through December 31, 1973 period (hereinafter known as the consent order period). A copy of the PD&O was published in the **Federal Register** on July 15, 1985, and comments were solicited regarding the proposed refund procedures. We have received comments for Ultramar Petroleum, Inc. (Ultramar), successor-in-interest to Metropolitan Petroleum, Inc., which was identified in the Elm audit as a direct purchaser of Elm residual fuel oil. These comments will be addressed in Section III A. of this Decision.

II. Jurisdiction and Authority

The procedural regulations of the DOE set forth general guidelines by which the OHA may formulate and implement a plan of distribution for funds received as a result of an enforcement proceeding. 10 CFR Part 205, Subpart V. The DOE policy is to use the Subpart V process in order to distribute such funds. For a more detailed discussion of Subpart V and the authority of the OHA to fashion procedures to distribute refunds obtained as part of settlement agreements, *see Office of Enforcement*, 9 DOE ¶ 82,553 (1982); *Office of Enforcement*, 9 DOE ¶ 82,508 (1981); *Office of Enforcement*, 8 DOE ¶ 82,597 (1981) *(Vickers)*. As we stated in the PD&O, we have reviewed the record in the present case and have determined that a Subpart V proceeding is an appropriate mechanism for distributing the Elm consent order fund. We will therefore grant the ERA's petition and assume jurisdiction over this fund.

III. Refund Procedures

Other than Ultramar's comments, which we consider below, we have not received any adverse comments regarding our proposed refund procedures. We have thus determined

VOL 51 ISS 84 MY 1 1986 UMI

that those procedures should be adopted.

The distribution of refunds will take place in two stages. In the first stage refund monies will be refunded to customers who purchased Elm No. 6 residual fuel oil during the consent order period and who demonstrate that they were injured by Elm's pricing practices. Such purchasers must file claims and document their purchases in order to be eligible for a portion of the consent order fund.

After meritorious claims are paid in the first stage, a second stage may become necessary to distribute any remaining funds. *See generally Office of Special Counsel*, 10 DOE ¶ 85,048 (1982) *(Amoco)*. However, we will not discuss second stage refund procedures in this Decision and Order.

A. Refund Claimants

Information in the ERA audit file indicates that there were only three direct purchasers of No. 6 residual fuel oil from Elm during the consent order period, each of which resold the fuel oil to other petroleum marketers and to end-users: Amerada Hess Corporation (Hess), Metropolitan Petroleum, Inc. (Metropolitan), and JOC Oil Company (JOC). According to the RO and other documents in the audit file, JOC and Metropolitan were allegedly overcharged $7,339 and $212,458, respectively, but Hess was not overcharged. Hess is thus ineligible for a refund in this proceeding.

In the PD&O, we tentatively found JOC and Metropolitan to be spot purchasers of the Elm No. 6 residual fuel oil. This finding was based on the fact that JOC and Metropolitan were not regular customers of Elm, and that during the consent order period, each firm made only one purchase of No. 6 residual fuel oil from Elm.[1] Based on this finding, we proposed to establish the rebuttable presumption that JOC and Metropolitan were not injured by Elm's pricing practices during the consent order period. As we have previously stated regarding spot purchasers, these customers tend to have considerable discretion as to where and when to make purchases. The rationale behind our presumption that spot purchasers do not experience injury derives from this concept of choice which characterizes spot purchase transactions. It would appear that, under normal circumstances, a customer would not choose to make a spot market purchase of a firm's high priced product unless it were able to pass through to its own customers the full amount of the firm's quoted selling price at the time of purchase. *See Vickers*, 8 DOE at 85,396–97; *Amoco*, 10 DOE at 88,200; *JOC Oil, Inc./Tenneco Oil Co.*, 13 DOE ¶ 85,312 (1985). Accordingly, we shall adopt the spot purchaser presumption proposed in the PD&O.

We further stated in the PD&O that, in order to rebut the presumption that they were not injured, JOC and Metropolitan would be required to submit evidence to establish that they absorbed the alleged overcharges and that they had no choice as to where and when they made the purchase upon which their refund claim is based. In its comments regarding the PD&O, Ultramar does not contest our finding that its predecessor, Metropolitan, was a spot purchaser of the Elm product. The firm does, however, object to the requirement that it show that Metropolitan's spot purchase was not the result of a discretionary decision to maximize profits. In this regard the firm contends that the length of time since the consent order period precludes it from locating contemporaneous documentation (e.g., telephone memoranda) which might illustrate any unsuccessful attempts by Metropolitan to obtain product from other firms in order to continue its business operations. We recognize that the type of showing which the firm describes might be difficult due to the passage of time. But the difficulty should not be exaggerated. The showing required to rebut the spot purchaser presumption is simply that the firm, as a result of the transaction(s) in question, experienced injury to the extent of suffering actual economic harm. Generally, firms do not engage in a transaction which is disadvantageous if they have another option. In certain cases where we have granted refunds to spot purchasers, applicants have successfully rebutted the spot purchaser presumption by showing that they did not have another option. *See, e.g., Waller Petroleum Co./Wooten Oil Co.*, 13 DOE ¶ 85,110 (1985); *OKC Corp./Pester Refining Co.*, 11 DOE ¶ 85,158 (1983). However, we have not insisted on a detailed explanation if the applicant can make a clear and convincing showing of injury without it and the requested refund is relatively small. *McCarty Oil Co./Watkins Oil Co.*, 13 DOE ¶ 85,213 (1985) (selling price 2¢ per gallon less than purchase price—$2,055 refund). Accordingly, Ultramar may submit any information to demonstrate that Metropolitan was injured by Elm's alleged overcharges and that it did not subsequently recover the additional costs associated with the alleged overcharges.[2]

In the event that JOC and/or Metropolitan/Ultramar fails to rebut the spot purchaser presumption, other firms may be eligible for a refund. As we have indicated, since they were spot purchasers, it is likely that JOC and Metropolitan passed on some or all of the Elm alleged overcharges to their respective customers. Consequently, downstream customers may have been injured by Elm's pricing practices during the consent order period, and they may apply for a refund in this proceeding. Any such applicant must show that it purchased Elm's products and was adversely affected by Elm's alleged overcharges.

B. Showing of Injury

In order to qualify for a refund, any claimant who resold the Elm No. 6 residual fuel oil purchased from JOC or Metropolitan must show that during the consent order period it would have maintained its prices for the product at the same level had the alleged overcharges not occurred. Accordingly, any such reseller of Elm fuel oil should show that during the consent order period, market conditions would not permit it to increase its prices to pass through the additional costs associated with the alleged overcharges. *Office of Enforcement*, 10 DOE ¶ 85,056 (1983); *Office of Enforcement*, 10 DOE ¶ 85,029 (1982). In addition, a reseller must show that it had a "bank" of unrecovered costs in order to demonstrate that it did not subsequently recover these costs by increasing its prices. As we noted in the PD&O, however, the maintenance of a bank will not automatically establish injury. *See Tenneco Oil Co./Chevron U.S.A., Inc.*, 10 DOE ¶ 85,014 (1982).

In the PD&O, we also proposed to adopt presumptions which have been used in many prior refund cases. The presumptions proposed in the PD&O, and being adopted here, will enable the OHA to consider the refund applications in the most efficient way possible in view of the limited resources available. *See* 10 CFR 205.282(e).

[1] Elm's sales to JOC and Metropolitan occurred on November 20, 1973, and December 31, 1973, respectively. *See Elm City*, 8 DOE at 86,287.

[2] In its comments, Ultramar has submitted detailed information about the injury allegedly suffered by Metropolitan as a result of Elm's pricing practices and requests that it be granted a refund without any further proceedings. We cannot approve this request. Ultramar must file a timely Application for Refund. We will make a determination upon the merit of the firm's arguments only after receipt of such an application.

1. Applicants Claiming a Refund of $5,000 or Less

As stated in the PD&O, we recognize that making a detailed showing of injury may be too complicated and burdensome for resellers who purchased relatively small amounts of No. 6 residual fuel oil from Metropolitan or JOC. For example, such firms may have limited accounting and data-retrieval capabilities and may therefore be unable to produce the records necessary to prove that they did not pass on the alleged overcharges to their own customers. We also are concerned that the cost to the applicant and to the government of compiling and analyzing information sufficient to make a detailed showing of injury not exceed the amount of the refund to be gained. In the past we have adopted a small claims presumption to assure that the costs of filing and processing refund applications do not exceed the benefits. *See, e.g., Aztex Energy Co.*, 12 DOE ¶ 85, 116 (1984); *Marion Corp.*, 12 DOE ¶ 85,014 (1984) (*Marion*). We will adopt such a presumption in this case. Therefore, any reseller applicant claiming a refund of $5,000 or less, based upon the volumetric refund amounts in this proceeding (*see* n.3, *infra*), need not make a detailed showing of injury in order to be eligible to receive a refund.

2. Spot Purchasers

As we have stated with regard to Metropolitan and JOC's status as spot purchasers, resellers that made spot purchasers of fuel oil from Metropolitan or JOC will be ineligible to receive a refund unless they can make a showing that rebuts the presumption that they were not injured. Since the small claims procedure was not intended as a means by which applicants otherwise presumed to be ineligible for refunds could receive monies, the spot purchaser presumption also applies to claims below $5,000. *See Stinnes Interoil, Inc./Exxon Co., U.S.A.*, 13 DOE ¶ 85,159 (1985).

3. End-Users

In the PD&O, we made a finding that end-users and ultimate consumers of Elm No. 6 residual fuel oil (purchased from JOC or Metropolitan) whose businesses are unrelated to the petroleum industry were injured by the alleged overcharges settled in the Elm Consent Order. Unlike regulated firms in the petroleum industry, members of this group generally were not subject to price controls during the time covered by the Consent Order, and thus were not required to keep records which justified selling price increases by reference to cost increases. For these reasons, an analysis of the impact of the alleged overcharges on the final price of non-petroleum goods and services would be beyond the scope of a special refund proceeding. *See Office of Enforcement*, 10 DOE ¶ 85,072 (1983); *see also Texas Oil & Gas Corp.*, 12 DOE ¶ 85,069 (1984), and cases cited therein. We have received no comments objecting to this finding. We will therefore adopt our proposal that end-users of No. 6 residual fuel oil need only document their purchase volumes from JOC or Metropolitan that can be traced to Elm to make a showing that they were injured by the alleged overcharges.

C. Calculation of Refund Amounts

We must further determine the proper method for dividing the consent order fund among successful applicants. As we proposed in the PD&O, we will use the information contained in the ERA audit file to divide the Elm consent order fund into two pools, one for JOC and its customers and one for Metropolitan and its customers, in proportion to the amount JOC and Metropolitan were allegedly overcharged by Elm. To calculate the size of these pools, the amount of alleged overcharges experienced by each of the two direct customers (JOC and Metropolitan) is divided by the total alleged overcharges found in the RO ($219,797). This fraction is then multiplied by the amount of funds remitted by Elm to the DOE ($172,193.63). The share of the Elm consent order fund initially attributable to each of the two direct customers is thus $5,749 for JOC ([$7,339 ÷ $219,797] × $172,193.63) and $166,444 for Metropolitan ([$212,458 ÷ $219,797] × $172,193.63). This methodology has been used in prior Subpart V proceedings where the ERA audit was very narrow in scope, the Consent Order was limited to the same product and time period as the audit, and the consent order firm had very few customers during this period. *See, e.g., Marion.*

If JOC and/or Metropolitan/Ultramar fail to establish eligibilty for a refund, these funds will then be available for distribution to each firm's customers in proportion to the amount they purchased from JOC or Metropolitan. *Cf. Office of Special Counsel*, 11 DOE ¶ 85,226 (1984). This distribution scheme presumes that the alleged overcharges by Elm that were passed on by JOC and/or Metropolitan were dispersed equally in these firms' sales. The OHA has referred to this presumption in the past as a volumetric refund amount. In the absence of better information, this assumption is sound because the DOE price regulations generally required a regulated firm to account for increased costs on a firm-wide basis in determining its prices.

To determine the volumetric factors for JOC and Metropolitan's customers, the share of the Elm consent order fund attributable to each of the two direct customers is divided by the total amount of No. 6 residual fuel oil sold by that firm during the Elm consent order period.[3] *See Conoco Inc./Banco Properties, Inc.*, 12 DOE ¶85,117 at 88,362 (1984). This results in a refund amount for each gallon of No. 6 residual fuel oil purchased from JOC or Metropolitan during the consent order period.[4] The interest which has accrued on the money in the Elm escrow account will be added to the refund of each successful claimant in proportion to the size of its refund.

v. Application for Refund Procedures

We have determined that the procedures described in the PD&O are the most equitable and efficacious means of distributing the Elm consent order fund. Accordingly, we shall now accept applications for refund from eligible customers who purchased Elm No. 6 residual fuel oil during the consent order period. There is no official application form. Applications for Refund should be written or typed on business letterhead or personal stationery. The following information should be included in all Applications for Refund:

1. The name of the consent order firm: Elm City Filling Stations, Inc., the case number: HEF-0067, and the applicant's name should be prominently displayed on the first page.

2. The name, position title, and telephone number of a person who may be contacted by us for additional information concerning the Application.

3. The manner in which the applicant used the Elm No. 6 residual fuel oil, i.e., whether it was a reseller or end-user.

[3] If a determination is made that Metropolitan/Ultramar and /or JOC is eligible to receive a portion of the Elm consent order fund, the volumetric refund amount for downstream customers of that firm will be based on the share of the Elm consent order fund attributable to that firm minus the refund granted to that firm.

[4] In the event that a downstream customer is able to document that the No. 6 residual fuel oil it purchased from JOC or Metropolitan was supplied entirely by Elm and no refund is granted to its direct supplier (JOC or Metropolitan), the downstream purchaser's per gallon volumetric refund amount will be based on the amount of Elm residual fuel oil it purchased. These volumetric amounts are equal to $0.005695 for JOC's customers ($5,749 ÷ 1,027,459 gallons) and $0.16679 for Metropolitan's customers ($166,44 ÷ 895,905 gallons).

VOL 51 ISS 84 MY 1 1986 UMI

4. A statement of whether the applicant was in any way affiliated with Elm, and in the case of downstream purchasers, JOC or Metropolitan. If so, the applicant should state the nature of the affiliation.

5. A statement of whether there has been any change in ownership of the entity that purchased No. 6 residual fuel oil from Elm, JOC or Metropolitan since the end of the consent order period. Is so, the name and address of the current (or former) owner should be provided.

In addition, JOC and Metropolitan/Ultramar should include the information requested in items 6 and 7.

6. In order to rebut the spot purchaser presumption that it was not injured, the firm should submit evidence to demonstrate that it experienced actual economic harm as a result of the Elm alleged overcharges.

7. It should also submit evidence to establish that it did not pass through the alleged overcharge to its customers, state whether it maintained banks of unrecouped product cost increases, and furnish the OHA with quarterly bank calculations from the date of purchase through June 1 1976, the date residual fuel oil was decontrolled.

Downstream purchasers of Elm No. 6 residual fuel oil should submit the information requested in items 8 through 10.

8. The applicant should demonstrate that it was either a regular customer or JOC or Metropolitan, or rebut the presumption that it was not injured by its spot purchase of the fuel oil.

9. The volume of fuel oil that the applicant purchased from JOC or Metropolitan for which it is claiming it was injured by the alleged overcharges. The applicant must explain why it believes that this volume of fuel oil was originally supplied by Elm either to JOC in November 1973 or to Metropolitan in December 1973.

10. If the applicant is a reseller who wishes to claim a refund in excess of $5,000 it should also:

(a) state whether it maintained banks of unrecouped product cost increases and furnish the OHA with quarterly bank calculations from the date of purchase through June 1, 1976, the date residual fuel oil was decontrolled, and

(b) submit evidence to establish that it did not pass through the alleged overcharges to its customers. For example, a firm may compare the prices it paid for JOC or Metropolitan No. 6 residual fuel oil with the prices paid for that product by its competitors to show that price increases to recover alleged overcharges were infeasible.

Finally, all applications should include:

11. A statement of whether the applicant is or has been involved as a party in any DOE or private Section 210 enforcement actions, or as a party in any legal proceeding with Elm, JOC or Metropolitan. If these actions have been terminated, the applicant should furnish a copy of any final order issued in the matter. If the action is ongoing, the applicant should describe the action and its current status. The applicant is under a continuing obligation to keep the OHA informed of any change in status during the pendency of its Application for Refund. *See* 10 CFR 205.9(d).

12. The following signed statement:

I swear (or affirm) that the information submitted is true and accurate to the best of my knowledge and belief.

All Applications for Refund must be filed in duplicate and must be received within 90 days after publications of this Decision and Order in the **Federal Register.** A copy of each Application will be available for public inspection in the Public Reference Room of the Office of Hearings and Appeals, Forrestal Building, Room 1E–234, 1000 Independence Avenue, SW., Washington, DC. Any applicant that believes that its Application contains confidential information must so indicate on the first page of its Application and submit two additional copies of its Application from which the material alleged to be confidential has been deleted, together with a statement specifying why the information is alleged to be privileged or confidential.

All Applications should be sent to: Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585.

It is therefore ordered that:

(1) Applications for Refund from the funds remitted to the Department of Energy by Elm City Filling Stations, Inc. pursuant to the Consent Order executed on September 1, 1981 may now be filed.

(2) All Applications must be filed no later than 90 days after publication of this Decision and Order in the **Federal Register.**

Dated: April 17, 1986.

George B. Breznay,

Director, Office of Hearings and Appeals.

[FR Doc. 86–9805 Filed 4–30–86; 8:45 am]

BILLING CODE 6450–01–M

Implementation of Special Refund Procedures

AGENCY: Office of Hearings and Appeals, DOE.

ACTION: Notice of Proposed Implementation of Special Refund Procedures and Solicitation of Comments.

SUMMARY: The Office of Hearings and Appeals of the Department of Energy solicits comments concerning the appropriate procedures to be followed in refunding $21,082,535.86 in consent order funds to members of the public. This money is being held in escrow following the settlement of enforcement proceedings brought by the Economic Regulatory Administration of the Department of Energy involving Marathon Petroleum Company.

DATE AND ADDRESS: Comments must be filed in duplicate within 30 days of the date of publication of this Notice in the **Federal Register** and should be addressed to: Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585. All comments should conspicuously display a reference to the Case Number KEF–0021.

FOR FURTHER INFORMATION CONTACT: Virginia A Lipton, Assistant Director, Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252–2400.

To receive final decision or refund application forms contact: Marcia B. Proctor, Chief, Docket and Publications Branch, Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252–4924.

SUPPLEMENTARY INFORMATION: In accordance with the procedural regulations of the Department of Energy, 10 CFR 205.282(b), notice is hereby given of the issuance of the Proposed Decision and Order set out below. The Proposed Decision relates to a January 30, 1986 consent order between the DOE and Marathon Petroleum Company. That consent order settled certain disputes between the firm and the DOE concerning Marathon's possible violations of DOE regulations in its sales of crude oil and refined petroleum products. The consent order covers the period January 1, 1973 through January 27, 1981.

The Proposed Decision sets forth the procedures and standards that the DOE has tentatively formulated to distribute the contents of an escrow account in the amount of $21,082,535.86, funded by Marathon pursuant to the consent order. The DOE has tentatively divided the consent order fund into two pools; one relating to Marathon crude oil sales and the other relating to Marathon sales of refined products. Under the DOE's tentative procedures, purchasers of Marathon refined products may file claims for refunds from the escrow fund. The amount of the refund available to an applicant will generally be a pro rata or volumetric share of the Marathon consent order fund. The Proposed Decision provides that in order to receive a portion of its allocable share, a claimant must furnish the DOE with evidence that it was injured by the allegedly unlawful prices for covered products charged by Marathon. However, the Proposed Decision indicates that no separate, detailed showing of injury will be required of end-users of the relevant product, or of firms which file refund claims in amounts of $5,000 or less. The Proposed Decision further indicates that an applicant that maintained banks of unrecovered costs and whose claim, if granted, would result in a refund greater than $5,000 but less than $50,000 may elect to receive a refund based on 35 percent of its allocable share. The Proposed Decision also sets forth a suggested application format which claimants may use and solicits comments regarding the suggested format. The Proposed Decision notes that after all applications for refunds based on refined product purchases have been processed, some funds may remain. The Office of Hearings and Appeals therefore invites interested parties to submit comments concerning alternative methods of distributing any remaining refined product funds in a subsequent proceeding.

With regard to the portion of the consent order fund attributable to Marathon's alleged crude oil violations, the decision proposes to place the money into a pool of crude oil moneys for distribution pursuant to the DOE's Statement of Restitutionary Policy for crude oil claims.

Until a final Decision and Order is issued, no claims for refund can be accepted. Applications for Refund therefore should not be filed at this time. Appropriate public notice, including notice published in the **Federal Register,** will be given when the submission of claims is authorized. The deadline for filing such claims will be no less than 90 days from publication of such notice in the **Federal Register.**

Any member of the public may submit written comments regarding the proposed refund procedures. Commenting parties should submit two copies of their comments. Comments should be submitted within 30 days of publication of this notice in the **Federal Register,** and should be sent to the address set forth at the beginning of this notice. All comments received will be available for public inspection between the hours of 1:00 p.m. and 5:00 p.m., Monday through Friday, except federal holidays, in the Public Reference Room of the Office of Hearings and Appeals, located in Room 1E–234, 1000 Independence Avenue, SW., Washington, DC 20585.

Dated: April 18, 1986.

George B. Breznay,

Director, Office of Hearings and Appeals.

Proposed Decision and Order

Implementation of Special Refund Procedures

April 18, 1986.

Name of Firm. Marathon Petroleum Company
Date of Filing: March 26, 1986
Case Number: KEF–0021

On March 26, 1986, the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) filed a petition with the Office of Hearings and Appeals (OHA), requesting that the OHA formulate and implement procedures for distributing funds obtained through the settlement of enforcement proceedings involving Marathon Petroleum Company (Marathon). *See* 10 CFR Part 205, Subpart V. This proposed decision contains OHA's tentative plan for distributing these funds to qualified refund applicants. Section I below outlines the approach to be used in connection with applicants that purchased crude oil from Marathon. The decision then discusses the considerations applicable for the preparation of refund applications related to purchases of Marathon refined petroleum products. This discussion appears at Section II of this decision. Section II(A) sets forth specific requirements applicable to each of the various types of claimants that are likely to file applications in connection with purchases of Marathon refined products. A claimant should take particular note of those requirements applicable to its particular circumstances. The specific application requirements are followed at Section II(B) by a discussion of general requirements which apply to all refund applications involving refined petroleum products. Since the procedures set forth in this decision are in proposed form, no refund applications should be filed at this time. A final determination will be issued at a later date announcing that the filing of Marathon refund applications is authorized.

During the period covered by the settlement agreement, Marathon was engaged in the production, sale and refining of crude oil, as well as in the sale of refined petroleum products. DOE audits of Marathon's operations revealed possible regulatory violations in the firm's application of the federal petroleum price and allocation regulations. In order to settle claims and disputes between Marathon and the DOE, the parties entered into a consent order which became final on January 30, 1986.[1] Under the terms of the consent order, Marathon remitted $21,082,535.86 to the DOE in settlement of alleged violations occurring between January 1, 1973 and January 27, 1981 (the consent order period). These funds are being held in an escrow account established with the United States Treasury pending a determination of their proper distribution. Because the consent order resolves alleged violations involving both sales of crude oil and refined products, we propose to divide the fund into two pools. *See Standard Oil Co. (Indiana).* 10 DOE ¶ 85,048 (1982) *(Amoco).* According to information set forth in the **Federal Register** Notice announcing the proposed Marathon consent order, it appears that approximately 40 percent of the aggregate amount of the alleged violations settled by the consent order concern Marathon's production and sales of crude oil. 50 F.R. 34901, 34902 (August 28, 1985). We therefore propose that this same percentage of the principal contained in the Marathon escrow account, or $8,344,014, be set aside as a pool of crude oil funds. We further propose that the remaining 60 percent of the Marathon funds, or $12,649,522 be made available for distribution to claimants who demonstrate that they were injured by Marathon's alleged violations in sales of refined petroleum products.

I. Proposed Refund Procedures for Crude Oil Claims

Marathon, like other producers of crude oil, was subject to the Mandatory Petroleum Price Regulations set forth in 6 CFR Part 150 and 10 CFR Part 212.[2] To

[1] Section 501 of the Marathon consent order resolves all pending and potential civil and administrative claims by the DOE against Marathon, which certain enumerated exceptions. See consent order section 501(a) through (g).

[2] The DOE regulations, in effect from August 19, 1973 until January 27, 1981, governed prices charged in crude oil sales to first purchasers by defining ceiling prices for various tier classifications of crude oil. The regulations permitted producers to sell certain crude oil, such as crude oil produced from a "stripper well property," at market price levels. When a producer sold crude oil, it was required to certify in writing to the purchaser the respective volumes of crude oil belonging to each tier

Continued

VOL 51 ISS 84 MY 1 1986 UMI

the extent that Marathon misscertified old crude oil as new or stripper well crude oil, the impact of the violations was spread throughout the domestic refining industry by the operation of the Entitlements Program, 10 CFR 211.67. *See, e.g., Union Oil Co.* v. *DOE*, 686 F.2d 797 (Temp. Emer. Ct. App. 1982), *cert. denied*, 459 U.S. 1202 (1983). Based on the OHA's report to the District Court in the Stripper Well Exemption Litigation, *see Report of the Office of Hearings and Appeals, In re: The Department of Energy Stripper Well Exemption Litigation*, MDL No. 378 (D. Kan., filed June 21, 1985), 6 Fed. Energy Guidelines ¶ 90,507 at 90,620 (1985) (the OHA Stripper Well Report), the DOE announced that the Department would maintain overcharges associated with such violations in escrow to afford Congress the opportunity to select the means of making indirect restitution. *See* Statement of Restitutionary Policy, 50 FR 27400 (July 2, 1985). The OHA will pool the Marathon funds attributable to alleged crude oil violations with other crude oil funds for distribution in accordance with departmental policies. *See* 50 FR at 27400–02.

II. Proposed Refund Procedures for Refined Product Refund Claims

With regard to the remainder of the Marathon settlement fund, $12,649,522, we propose to implement a two-stage refund proceeding in which purchasers of Marathon refined petroleum products will be afforded an opportunity to submit refund applications during the initial stage. From our experience with Subpart V proceedings, we believe that potential claimants will fall into the following categories: (1) End-users, i.e., consumers who used Marathon refined products; (2) regulated non-petroleum industry entities which used Marathon products in their businesses, or cooperatives which puschased Marathon products in their businesses; and (3) refiners, resellers or retailers who resold Marathon refined products.

In establishing the procedures which will govern the Marathon Special Refund Proceeding, we are adopting certain presumptions which will permit claimants to participate in the refund process without incurring inordinate expense and enable OHA to consider refund applications in the most efficient manner possible.[9] *American Pacific International*, No. HEF-6316, (February 11, 1986) (Proposed Decision) (hereinafter cited as *API*). First, we will adopt a presumption that the alleged overcharges were dispersed equally in all sales of refined product made by Marathon during the consent order period and that refunds should therefore be made on a pro rata or volumetric basis. In the absence of better information, a volumetric refund assumption is sound because the DOE price regulations generally required a regulated firm to account for increased costs on a firm-wide basis in determining its prices.

Under the volumetric refund approach we are adopting, a claimant will be eligible to receive a refund equal to the number of gallons purchased times the per gallon refund amount, plus accrued interest. In the present case, we have set the per gallon refund amount at $.00042 per gallon. We derived this figure by dividing the consent order funds available for distribution to non-crude oil claimants ($12,649,522) by the number of gallons of covered products other than crude oil which Marathon indicated to us that it sold from September 1973 through the date of decontrol of the relevant product (29,983,247,000). However, we also recognize that some claimants may have been disproportionately overcharged. Therefore, any purchaser may file a refund application based on a claim that it suffered a disproportionate share of the alleged overcharges. *See Sid Richardson Carbon and Gasoline Co.*, 12 DOE ¶ 85,054 at 88,164 (1984).

We also propose to adopt a number of presumptions concerning injury. These presumptions will excuse certain categories of refund applicants from proving that they were injured by Marathon's alleged overcharges, thus simplifying the refund process for these applicants. We will discuss these presumptions and the showing which each type of applicant must make in Section II(A) below.

(A) Specific Application Requirements for Each Category of Refund Applicants.

(1) Refund Applications of End-Users

We propose to adopt a finding that end-users and ultimate consumers whose businesses are unrelated to the petroleum industry were injured by Marathon's alleged refined product overcharges. Unlike regulated firms in the petroleum industry, end-users generally were not subject to price controls during the consent order period and were not required to keep records which justified selling price increases by reference to cost increases. For these reasons, an analysis of the impact of the alleged overcharges on the final prices of non-petroleum goods and services would be beyond the scope of a special refund proceeding. *See Texas Oil & Gas Corp.*, 12 DOE ¶ 85,069 at 88,209 (1984). We propose, therefore, that end-users of Marathon products need only document that they were ultimate consumers of a specific amount of Marathon products to make a sufficient showing that they were injured by the alleged overcharges.

(2) Refund Applications of Cooperatives and Regulated Firms

We also will not require firms whose prices for goods and services are regulated by a government agency or by the terms of a cooperative agreement to demonstrate injury as a result of alleged overcharges on refined products. Although such firms, e.g., public utilities and agricultural cooperatives, generally would have passed overcharges through to their customers, they generally would pass through any refunds as well. Therefore, we will require such applicants to certify that they will pass any refund received through to their customers, to provide us with a full explanation of how they plan to accomplish this restitution, and to explain how they will notify the appropriate regulatory body or membership group of their receipt of the refund money. *See Office of Special Counsel*, 9 DOE ¶ 82,538 at 85,203 (1982). We note, however, that a cooperative's sales of Marathon products to non-members will be treated in the same manner as sales by other resellers.

(3) Refund Applications of Resellers, Retailers and Refiners

a. Refiners, Resellers and Retailers Seeking Refunds of $5,000 or Less: We propose to adopt a presumption, as we have in many previous cases, that purchasers seeking small refunds were injured by Marathon's pricing practices. *See, e.g., Uban Oil Co.*, 9 DOE ¶ 85,224–25 (1982). The cost to the applicant of gathering evidence of injury to support a small refund claim could exceed the expected refund. Consequently, without simplified procedures, some injured parties would be denied an opportunity to obtain a refund. Under the small-claims presumption, a claimant seeking total refunds of $5,000 or less will not be required to submit any evidence of injury beyond establishing the volume of Marathon products it purchased during the settlement period. *See Texas Oil & Gas Corp.*, 12 DOE ¶ 85,069 at 88,210 (1984).

b. Refiners, Resellers, and Retailers Seeking Larger Refunds: Refiners, resellers and retailers seeking refunds greater than $5,000 will be expected to provide a more detailed injury showing. We have tentatively adopted a further presumption for refiner, reseller or retailer applicants whose claims, if granted, would result in a total refund greater than $5,000, but less than $50,000, excluding interest (medium range claimants). Based on our review of prior cases, we believe that it is a reasonable presumption that firms that sold Marathon refined products and that maintained banks of unrecovered costs were likely to have experienced some injury as a result of the alleged overcharges. *E.g., Mobil Oil Corp.*, 13 DOE ¶ 85,339 (1985) (*Mobil*); *Amoco*, 10 DOE ¶ 85,048 (1982). In *Mobil*, for example, we found that wholesalers of motor gasoline generally absorbed alleged overcharges in 35 to 45 percent of their sales of Mobil product, and that retailers absorbed alleged overcharges in approximately 20 to 30 percent of their Mobil sales. *Id.* at 88,853. In *Amoco*, we determined that motor gasoline wholesalers absorbed 34 percent of alleged Amoco overcharges and that retailers absorbed 40 percent of the alleged overcharges. *Id.* at 88,212. Amoco middle distillate resellers were found to have been injured in 38 percent of their Amoco sales. *Id.* at 88,216. These percentage figures were derived in part by referring to national average price data. We know of no peculiarities with respect to Marathon's pricing of product that would lead us to conclude that the presumption of injury percentages concerning product resellers used in *Amoco* and *Mobil* cannot reasonably be applied to the present Marathon proceeding. Accordingly, we shall refer to these figures to arrive at an appropriate presumption of injury level for medium range Marathon claimants. The injury percentages in *Amoco* and *Mobil* range between 20 and 45 percent. *Mobil*, 13 DOE at 88,853; *Amoco*, 10 DOE at 88,222–23. We have tentatively decided to adopt an injury presumption of 35 percent in the Marathon refund proceeding. We believe that this presumption represents a reasonable injury level for medium range claimants. Accordingly, any medium range claimant may elect to receive a refund based on 35 percent of its total allocable or volumetric share. In order to receive a refund based on this 35 percent presumption, an applicant will be required to substantiate the volume of product it purchased from Marathon and demonstrate the existence of banks of unrecouped costs at levels at least equal to the refund claimed, beginning with the first month of the period for which a refund is claimed through the date on which that product was decontrolled.[4] However, any medium range claimant may elect not to receive a refund based on this presumption and may, instead, prove the extent of its injury using the criteria set forth below for larger refund claimants.

A large refund applicant in this general category, one whose total claims, if granted, would result in a refund of $50,000 or more excluding interest, will be required to provide an even more detailed showing of injury. In order to show that it did not pass along the alleged overcharges to its own customers, it also will be required to demonstrate that it maintained a bank of unrecovered product costs beginning with the first month of the period for which a refund is claimed through the date on which that product was decontrolled. In addition, a claimant must specifically show that market conditions would not permit it to pass through those increased costs. *See Panhandle Eastern Pipeline Co./I.V. Cole Petroleum Co.*, 10 DOE ¶ 85,051 at 88,265 (1983). For periods in which the DOE regulations did not require retailers or resellers to compute cost banks, a retailer or reseller will only be required to show that market conditions prevented it from recovering increased costs. Such a showing might be made though a demonstration of lowered profit margins, decreased market share, or depressed sales volume during the period of purchases from Marathon. *API*, slip op. at 7.

(4) Applicants Seeking Refunds Based on Allocation Claims

We also recognize that we may receive claims alleging Marathon allocation violations. Such claims are based on the consent order firm's alleged failure to furnish petroleum products that it was obliged to supply to the claimant under the DOE allocation regulations. *See* 10 CFR Part 211. We will evaluate refund applications based on allocation claims by referring to standards such as those set forth in *OKC Corp./Town & Country Markets, Inc.*, 12 DOE ¶ 85,094 (1984), and *Aztex Energy Co.*, 12 DOE ¶ 85,116 (1984).

(B) General Refund Application Requirements

In addition to the specific requirements outlined above, all applications for refund must be in writing and signed by the applicant. An application must make reference to the Marathon Petroleum Company Special Refund Proceeding (Case No. KEF–0021). Each applicant must submit a monthly purchase schedule for Marathon refined petroleum products during the period in which the relevant product was controlled. If an applicant purchased Marathon refined petroleum products from a reseller, it must establish its basis for belief that the products originated with Marathon and identify the reseller from whom the product was purchased.

We will establish a rebuttable presumption that claimants who made only spot purchases from Marathon were not injured. Spot purchasers tend to have considerable discretion in where and when to make purchases and generally would not have made spot market purchases from Marathon at increased prices unles they were able to pass through the full amount of the selling price to their own customers. *See Office of Enforcement*, 8 DOE ¶ 82,597 (1981).

Therefore, a firm which made only spot purchases from Marathon will not receive a refund unless it presents evidence rebutting the spot purchaser presumption and establishing the extent to which it was injured as a result of its spot purchases from Marathon.

In the Appendix to this decision, we hav set forth a suggested form for applications filed by gasoline retailer claimants and one for other applicants. Gasoline retailer applicants using the suggested form must file a separate form for *each gasoline station* for which a refund is requested. All other applicnts using the suggested form must file a separate form for *each product* for which a refund is requested. We will accept all applications that contain the information necessary to process a claim, whether or not the suggested form is used. We request comments and questions with respect to these proposed forms during the 30 day comment period.

All applications for refund must be filed in duplicate. A copy of each application will be available for public inspection in the Public Reference Room of the Office of Hearings and Appeals, Forrestal Building, Room 1E–234, 1000 Independence Avenue, SW., Washington, DC 20585. Any applicant that believes that its application contains confidential information must

---

classification in each purchase. When a refiner processed the crude oil, it was required to report these certifications to the DOE to enable the agency to administer the Crude Oil Entitlements Program, 10 CFR 211.67.

[9] The Subpart V regulations specifically authorize the use of presumptions in special refund proceedings. *See* 10 CFR Part 205, Subpart V.

[4] However, using the volumetric figure of .00042 per gallon and the 35 percent medium range presumption, an applicant that purchased 34,015,000 gallons of Marathon product would receive a refund of $5,000. Such a claimant may elect to limit his claim to $5,000 under the small claims threshold and would therefore not need to submit bank information.

VOL 51 ISS 84 MY 1 1986 UMI

so indicate on the first page of its application and submit two additional copies of its application from which the confidential information has been deleted, together with a statement specifying why any such information is privileged or confidential. Applications should be sent to: Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585.

Applications for Refund should not be filed at this time. Detailed procedures for filing Applications for Refund will be provided in a final Decision and Order. Before distributing any portion of the consent order fund, we intend to publicize the distribution process, to solicit comments on the proposed refund procedures and to provide dan opportunity for any affected party to file a claim. Comments regarding the tentative distribution process set forth in this Proposed Order should be filed with the Office of Hearings and Appeals within 30 days of publication of this Proposed Order in the Federal Register.

(C) Distribution of the Remainder of the Consent Order Funds Attributable to Marathon's Refined Product Sales

In the event that money remains after all first stage claims have been disposed of, undistributed funds attributable to Marathon's alleged refined product violations could be distributed in a number of different ways. For example, the funds may be distributed through plans formulated by state governments to benefit consumers who were likely injured by Marathon's alleged overcharges. *See, e.g., Northeast Petroleum Industries*, 11 DOE ¶ 85,199 (1983). However, we will not be in a position to decide what should be done with any remaining funds until the first stage refund procedure is completed. We encourage the submission of comments containing proposals for alternative distribution schemes.

It is therefore ordered that:

The refund amount remitted to the Department of Energy by Marathon Petroleum Company pursuant to the consent order made final on January 30, 1986, will be distributed in accordance with the foregoing Decision.

APPENDIX

Gas Station Form

OHA Use Only

GAS STATION FILING FOR MOTOR GASOLINE

Suggested Format for Application for Marathon Refund—KEF–0021

(Separate Application for Each Gas Station Please)

1. Name of Gas Station:

Street address of gas station during refund period:

2. To whom should refund check be made out?

Address to which check should be sent:

Contact Person:

Telephone: (_____) _____

3. Total gallonage for which refund is requested (from page 3):

4. Was the product you bought Marathon-branded? _____ Yes _____ No

5. Were you supplied by Marathon directly _____ Yes _____ No

If yes, please provide information on sales representative in Item 6 and provide Marathon customer number here _____

6. Immediate supplier(s) during refund period name(s):

Address:

Telephone: (_____) _____

7. If the total refund requested by the firm and all affiliated entities for all products exceeds $5,000, attach information on banks of unrecovered costs as well as the required injury showing. (See Decision for injury showing requirements.)

8. Have you been a party or are you currently a party in a DOE enforcement action or private § 210 action? _____ Yes _____No

If yes, please attach an explanation. (See final Decision for specific details.)

9. Have you or a related firm filed any other application for refund involving any Marathon product? If yes, attach an explanation. _____ Yes _____No

10. Have you or a related firm authorized any individual(s) other than those identified on this form to file an application on your behalf? If yes, attach an explanation. _____ Yes _____No

I swear (or affirm) that the information contained in this application and its attachments is true and correct to the best of my knowledge and belief. I understand that anyone who is convicted of providing false information to the federal government may be subject to a jail sentence, a fine, or both, pursuant to 18 U.S.C. § 1001. I understand that the information contained in this application is subject to public disclosure. I have enclosed a duplicate of this entire application form which will be placed in the OHA Public Reference Room.

ENVIRONMENTAL PROTECTION AGENCY

[OPTS–44015; FRL–30111–4]

TSCA Chemical Testing; Receipt of Test Data

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the data submissions received by EPA during the second quarter of 1986 from negotiated testing programs accepted by EPA in lieu of requiring testing under section 4 of the Toxic Substances Control Act (TSCA). These submissions include results of certain studies and tests on five chemical substances or groups of chemicals.

FOR FURTHER INFORMATION CONTACT: Edward A. Klein, Director, TSCA Assistance Office (TS–799), Office of Toxic Substances, Environmental Protection Agency, Rm. E–543, 401 M St., SW., Washington, DC 20460, Toll free: (800–424–9065). in Washington, DC: (554–1404). Outside the USA: (Operator–800–554–1404).

SUPPLEMENTARY INFORMATION: Section 4(d) of TSCA requires the EPA to issue a notice in the Federal Register reporting on any test data received pursuant to test rules promulgated under section 4(a). Although not required by section 4(d), EPA also periodically publishes

VOL 51 ISS 84 MY 1 1986 UMI

notices of receipt of data from negotiated testing programs and other industry programs the conduct of which led EPA not to require testing through test rules.

I. Test Data Submissions

This notice announces test data submissions received during the second quarter of 1986 from such industry testing programs under TSCA.

A. Alkyl Phthalates

On January 14, 1986, EPA received from the Chemical Manufacturers Association (CMA) the results of 21-day feeding studies in rats on di(heptyl, nonyl, undecyl) phthalate (CAS No. 3648-20-2) and butyl benzyl phthalate (CAS No. 85-68-7). On February 10, 1986, EPA received from CMA the results of similar studies on di-(2-ethylhexyl) adipate (CAS No. 103-23-1), di-isononyl phthalate (CAS No. 28553-12-0), di-isodecyl phthalate (CAS No. 26761-40-0), and di-(n-hexyl, n-octyl, n-decyl) phthalate (CAS No. 2572458-7). On March 4, 1986, EPA received from CMA the results of a similar study with di-n-butyl phthalate (CAS No. 84-74-2). On March 4, 1986, EPA received from Eastman Kodak Co. the final report for a study of the early life stage toxicity of di(2-ethylhexyl) terepthalate (CAS No. 6422-86-2) to rainbow trout (*Salmo gairdneri*) eggs in a flow-through system.

B. Hydroquinone

On March 6, 1986, Eastman Kodak Co. submitted to EPA the study, Blood Elimination Kinetics of U-^{14}C-hydroquinone (CAS No. 123-31-9) administered by intragastric intubation, intratracheal instillation, or intravenous injection to male Fischer 344 rats.

C. Hexofluoropropylene

On February 3, 1986, Du Pont submitted to EPA a mutagenicity study on hexafluoropropylene (CAS No. 116-15-4), using the CHO/HGPRT assay.

D. Tris (2-Ethylhexyl) Trimellitate

On January 23, 1986, CMA submitted to EPA a final report on the determination of octanol/water coefficient of tris (2-ethylhexyl) trimellitate (TOTM) (CAS No. 3319-31-1).

On March 21, 1986, CMA submitted to EPA a study on the shake flask biodegradation of ^{14}C-TOTM.

E. Acrylamide

On February 21, 1986 EG&G Bionomics Marine Research Laboratory submitted to the EPA a study on the acute toxicity of acrylamide (CAS No. 79-06-1) to mysid shrimp (*Mysidopsis bahia*).

II. Public Record

EPA has established a public record for this quarterly receipt of data notice (docket number OPTS-44015). This record includes copies of all studies reported in this notice. The record is available for inspection from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays, in the OPTS reading room, E-107, 401 M St., SW., Washington, DC 20460.

Dated: April 25, 1986.

Joseph J. Merenda,

Director, Existing Chemical Assessment Division.

[FR Doc. 86-9768 Filed 4-30-86; 8:45 am]

BILLING CODE 6560-50-M

[OPTS-140076; FRL-3011-9]

Access to Confidential Business Information by Syracuse Research Corporation

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has authorized Syracuse Research Corporation (SRC) of Syracuse, New York for access to information which has been submitted to EPA under various sections of the Toxic Substances Control Act (TSCA). Some of the information may be claimed or determined to be confidential business information (CBI).

DATE: Access to the confidential data submitted to EPA will occur no sooner than 10 working days after the date of publication of this notice in the **Federal Register.**

FOR FURTHER INFORMATION: Edward A. Klein, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Rm. E-543, 401 M St., SW., Washington, DC 20460, Toll-free: (800-424-9065), In Washington, DC: (554-1404), Outside the USA: (Operator-202-554-1404).

SUPPLEMENTARY INFORMATION: Under TSCA, EPA must determine whether the manufacture, processing, distribution in commerce, use, or disposal of certain chemical substances or mixtures may present an unreasonable risk of injury to human health or the environment. New chemical substances, i.e., those not listed on the TSCA Inventory of Chemical Substances, are evaluated by EPA under section 5 of TSCA. Existing chemical substances, i.e., those listed on the TSCA Inventory, are evaluated by the Agency under sections 4, 6, 7, and 8 of TSCA.

EPA has selected SRC, Merrill Lane, Syracuse, N.Y., to perform work under contract number 68-03-3228 in support of the Agnecy's activities under section 4 of TSCA. Specifically, SRC will assist the Agency in identifying chemical substances for which required testing under section 4(a) is appropriate. To provide this assistance, SRC personnel will be given access to TSCA data on chemical substances relating to environmental fate and transport, pharmokinetics, carcinogenicity, mutagenicity, teratogenicity, chronic toxicity, and aquatic toxicity.

The data derived from the section 4(a) required testing will be used by the Office of Toxic Substances to determine whether regulatory action under sections 5, 6, or 7 of TSCA is necessary to prevent or reduce unreasonable risks to human health or the environment. It will also be used by the Office of Research and Development to identify substances for possible inclusion in the Land Disposal Prohibition under section 3004 of the Solid Waste Disposal Act.

In accordance with 40 CFR 2.306(j), EPA had determined that SRC personnel will require access to CBI submitted to EPA under all reporting sections of TSCA to perform work successfully under TSCA. SRC was previously cleared for section 4, 5, and 8 of TSCA CBI access under contract number 68-02-4209, announced in the **Federal Register** of January 28, 1985, (50 FR 3835). EPA is issuing this notice to inform submitters of information under all reporting sections of TSCA that EPA may provide access to TSCA CBI to SRC on a need-to-know basis. All access to TSCA CBI under this contract will take place at either EPA Headquarters or SRC. Clearance for access to TSCA CBI under this contract is scheduled to expire on September 30, 1986.

SRC has been authorized for access to TSCA at its facilities under the EPA "Contractor Requirements for the Control and Security of TSCA Confidential Business Information" security manual. EPA has approved SRC's security plan and has performed the required inspections of their facilities and has found them to be in compliance with the requirements of the manual. SRC personnel will be required to sign non-disclosure agreements and will be briefed on appropriate security procedures before they are permitted access to TSCA CBI. All CBI materials reviewed by SRC personnel under this contract at the contractor's facilities listed above will be returned to EPA upon completion of their review.

Dated: April 28, 1986.

Don R. Clay,

Director, Office of Toxic Substances.

[FR Doc. 86-9927 Filed 4-30-86; 8:45 am]

BILLING CODE 6560-50-M

[OPTS-140074; FRL-3011-3]

Access to Confidential Business Information by the Dynamac Corporation

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has authorized the Dynamac Corporation (Dynamac) of Rockville, Maryland for access to information which has been submitted to EPA under sections 4 and 8 of the Toxic Substances Control Act (TSCA). Some of the information may be claimed or determined to be confidential business information (CBI).

FOR FURTHER INFORMATION CONTACT: Edward A. Klein, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Rm E-543, 401 M St., SW., Washington, DC 20460, Toll-free (800-424-9065). In Washington, DC: (554-1404). Outside the USA: (Operator-202-554-1404).

SUPPLEMENTARY INFORMATION: Under TSCA, EPA must determine whether the manufacture, processing, distribution in commerce, use, or disposal of certain chemical substances or mixtures may present an unreasonable risk of injury to human health or the environment. New chemical substances, i.e., those not listed on the TSCA Inventory of Chemical Substances, are evaluated by EPA under section 5 of TSCA. Existing chemical substances, i.e., those listed on the TSCA Inventory, are evaluated by the Agency under sections 4, 6, 7, and 8 of TSCA.

The Interagency Testing Committee (ITC) is required by section 4(e) of TSCA to recommend to the EPA Administrator chemical substances and mixtures which should be given priority consideration for the promulgation of testing rules. In making its recommendations, ITC must consider, among other relevant factors, the quantities of chemicals manufactured, the extent of human and environmental exposure, the existence of data concerning effects on health and environment, and similarity to chemicals known to have adverse health or environmental effects. To accomplish this, ITC required the assistance of outside experts.

Under Contract No. 68-02-4251, Dynamac, 11140 Rockville Pike, Rockville, MD, will perform reviews of information which may be helpful to ITC in making its recommendations. In previous notices published in the **Federal Register** of December 6, 1982, (47 FR 54865) and October 12, 1983 (48 FR 46429), the EPA announced that under other EPA contracts Dynamac would be authorized for access to CBI submitted under section 8(b) of TSCA to perform functions similar to those under this contract.

Pursuant to 40 CFR 2.306(j), EPA has determined that under EPA Contract No. 68-02-4251, Dynamac will require access to CBI submitted to EPA under sections 4 and 8 of TSCA in order to support the ITC in making determinations on the need for further testing of chemicals.

EPA is issuing this notice to inform all submitters of information under sections 4 and 8 of TSCA that EPA may provide Dynamac access to these CBI materials at its facilities and at EPA Headquarters on a need-to-know basis. All access to TSCA CBI under this contract will take place at either EPA Headquarters or Dynamac. Upon completing review of the CBI materials, Dynamac will return all transferred materials to EPA. Clearance for access to TSCA CBI under this contract is scheduled to expire on February 28, 1987.

Dynamac has been authorized for access to TSCA CBI at its facilities under the EPA "Contractor Requirements for the Control and Security of TSCA Confidential Business Information" security manual. EPA has approved Dynamac's security plan and has performed the required inspections of their facilities and has found them to be in compliance with the requirements of the manual.

Dynamac personnel will be required to sign non-disclosure agreements and will be briefed on appropriate security procedures before they are permitted access to TSCA CBI.

Dated: April 24, 1986.

D.R. Clay,

Director, Office of Toxic Substances.

Water Quality Criteria; Request for Comments

AGENCY: Environmental Protection Agency.

ACTION: Notice of request for comments on ambient aquatic life water quality criteria documents.

SUMMARY: EPA announces the availability for public comment, and provides summaries of three ambient aquatic life water quality criteria documents. When published in final form after the review of public comments, these water quality criteria may form the basis for enforceable standards. These criteria are published pursuant to section 304(a)(1) of the Clean Water Act.

DATE: Written comments should be submitted to the person listed directly below by June 30, 1986.

FOR FURTHER INFORMATION CONTACT: Dr. Frank Gostomski, Criteria and Standards Division (WH-585), U.S. Environmental Protection Agency, 401 M

VOL 51 ISS 84 MY 1 1986 UMI

Street, SW., Washington, DC 20460. (202) 245-3030.

Availability of Documents

This notice contains summaries of three documents containing proposed ambient water quality criteria for the protection of aquatic life and its uses. Copies of the complete criteria documents may be obtained upon request from the person listed above. These documents are also available for public inspection and copying during normal business hours at: Public Information Reference Unit, U.S. Environmental Protection Agency, Room 2404 (rear), 401 M St., SW., Washington, DC 20460. As provided in 40 CFR Part 2, a reasonable fee may be charged for copying services. Copies of these documents are also available for review in the EPA Regional Office libraries. A list of the proposed documents is presented below:

1. Ambient Water Quality Criteria for Selenium.
2. Ambient Water Quality Criteria for Parathion.
3. Ambient Water Quality Criteria for Toxaphene.

SUPPLEMENTARY INFORMATION:

Background

Section 304(a)(1) of the Clean Water Act (33 U.S.C. 1314(a)(1)) requires EPA to publish and periodically update ambient water quality criteria. These criteria are to reflect the latest scientific knowledge on the identifiable effects of pollutants on public health and welfare, aquatic life, and recreation.

EPA has periodically issued ambient water quality criteria beginning in 1973 with the publication of the "Blue Book" (Water Quality Criteria 1972). In 1976, the "Red Book" (Quality Criteria for Water) was published. On November 28, 1980 (45 FR 79318), EPA announced the publication of 64 individual ambient water quality criteria documents for pollutants listed as toxic under section 307(a)(1) of the Clean Water Act. A document addressing 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) was announced on February 15, 1984 (49 FR 5831) completing the coverage of the 65 priority pollutants listed in 307(a)(1). Nine ambient water quality criteria documents, including revision of seven of the 1980 documents, were released on July 29, 1985 (50 FR 30784). A bacteriological ambient water quality criteria document was published on March 7, 1986 (51 FR 8012).

Today EPA is announcing the availability for public comment of three proposed individual ambient aquatic life water quality criteria documents. Two of the documents, selenium and toxaphene, upon final publication will update and revise appropriate sections of the 1980 criteria documents. The other, parathion, will update criteria from the 1976 Red Book.

The documents announced today will not contain information on the effects of these pollutants on human health. EPA anticipates the release of a water quality advisory on parathion to specifically address human health concerns. Advisories will also be issued to update the human health section of the 1980 ambient water quality criteria documents for selenium and toxaphene if a review of the available information indicate that such a revision is necessary. Both the criteria documents announced today and the water quality advisories addressing human health may form the basis for enforceable standards, when published in final form.

Dated: April 21, 1986.

Edwin L. Johnson,

Acting Assistant Administrator for Water.

Appendix A—Summary of Water Quality Criteria

1. Selenium

Freshwater Aquatic Life

The procedures described in the "Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses" indicate that, except possibly where a locally important species is very sensitive, freshwater aquatic organisms and their uses should not be affected unacceptably if the four-day average concentration of acid-soluble selenium (IV) does not exceed 26 ug/L more than once every three years on the average and if the one-hour average concentration does not exceed 190 ug/L more than once every three years on the average. However, field data indicate that solely using the Guidelines to predict a selenium criterion may be under protective. If species such as the channel catfish and various sunfishes are as sensitive as some data indicate they might be, the criterion should be less than 10 ug/L. The Criteria and Standards Division recommends that the four-day average concentration of acid-soluble selenium (IV) should not exceed 10 ug/L more than once every three years on the average and the one-hour average concentration should not exceed 190 ug/L more than once every three years on the average.

Saltwater Aquatic Life

The procedures described in the "Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses" indicate that, except possibly where a locally important species is very sensitive, saltwater aquatic organisms and their uses should not be affected unacceptably if the four-day average concentration of acid-soluble selenium (IV) does not exceed 93 ug/L more than once every three years on the average and if the one-hour average concentration does not exceed 300 ug/L more than once every three years on the average. If selenium (IV) is more toxic to saltwater organisms in the field than in the laboratory, this criterion will not adequately protect saltwater organisms.

EPA believes that "acid-soluble" is probably the best measurement at present for expressing criteria for metals and the criteria for selenium (IV) were developed on this basis. However, at this time, no EPA approved method for such a measurement is available to implement criteria for metals through the regulatory programs of the Agency and the States. The Agency is considering development and approval of a method for a measurement such as "acid-soluble." Until one is approved, however, EPA recommends applying criteria for metals using the total recoverable method. This has two impacts: (1) Certain species of some metals cannot be measured because the total recoverable method cannot distinguish between individual oxidation states, and (2) in some cases these criteria might be overly protective when based on the total recoverable method.

The allowed average excursion frequency of three years is the Agency's best scientific judgment of the average amount of time it will take an unstressed aquatic ecosystem to recover from a pollution event in which exposure to selenium (IV) exceeds the criterion. Stressed systems, for example one in which several outfalls occur in a limited area, would be expected to require more time for recovery. The resiliences of ecosystems and their abilities to recover differ greatly, however, and site-specific criteria may be established if adequate justification is provided.

Use of criteria for developing water quality-based permit limits and for designing waste treatment facilities requires selection of an appropriate wasteload allocation model. Dynamic models are preferred for the application of these criteria. Limited data or other considerations might make their use impractical, in which case one must rely on a steady-state model. The Agency recommends the interim use of 1Q5 or 1Q10 for the Criterion Maximum Concentration (CMC) design flow and 7Q5 or 7Q10 for the Criterion Continuous Concentration (CCC) design flow in steady-models for unstressed and stressed systems respectively. These matters are discussed in more detail in the Technical Support Document for Water Quality-Based Toxics Control (U.S. EPA, 1985).

2. Parathion

Freshwater Aquatic Life

The procedures described in the "Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses" indicate that, except possibly where a locally important species is very sensitive, freshwater aquatic organisms and their uses should not be affected unacceptably if the four-day average concentration of parathion does not exceed 0.013 ug/L more than once every three years on the average and if the one-hour average concentration does not exceed 0.065 ug/L more than once every three years on the average.

Saltwater Aquatic Life

The procedures described in the "Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses" require the availability of specified data for the derivation of a criterion. Very few of the required data are available concerning effects of parathion on saltwater species. Consequently, no criterion can be derived for saltwater.

The allowed average excursion frequency of three years is the Agency's best scientific judgment of the average amount of time it will take an unstressed aquatic ecosystem to recover from a pollution event in which exposure to parathion exceeds the criterion. Stressed systems, for example one in which several outfalls occur in a limited area, would be expected to require more time for recovery. The resiliences of ecosystems and their abilities to recover differ greatly, however, and site-specific criteria may be established if adequate justification is provided.

Use of criteria for developing water quality-based permit limits and for designing waste treatment facilities requires selection of an appropriate wasteload allocation model. Dynamic models are preferred for the application of these criteria. Limited data or other considerations might make their use impractical, in which case one must rely on a steady-state model. The Agency recommends the interim use of 1Q5 or 1Q10 for the Criterion Maximum Concentration (CMC) design flow and 7Q5 or 7Q10 for the Criterion Continuous Concentration (CCC) design flow in steady-state models for unstressed and stressed systems respectively. These matters are discussed in more detail in the Technical Support Document for Water Quality-Based Toxics Control (U.S. EPA, 1985).

3. Toxaphene

Freshwater Aquatic Life

The procedures described in the "Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses" indicate that, except possibly where a locally important species is very sensitive, freshwater aquatic organisms and their uses should not be affected unacceptably if the four-day average concentration of toxaphene does not exceed 0.0002 ug/L more than once every three years on the average and if the one-hour average concentration does not exceed 0.73 ug/L more than once every three years on the average. If the channel catfish is as sensitive as some data indicate, it will not be protected by this criterion.

Saltwater Aquatic Life

The procedures described in the "Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses" indicate that, except possibly where a locally important species is very sensitive, saltwater aquatic organisms and their uses should not be affected unacceptably if the one-hour average concentration of toxaphene does not exceed 0.019 ug/L more than once every three years on the average. If the four-day average concentration of toxaphene exceeds 0.002 ug/L more than once in a three-year period, the edible portions of consumed species should be analyzed to determine whether the concentration of toxaphene exceeds the FDA action level of 5 mg/kg.

The allowed average excursion frequency of three years is the Agency's best scientific judgment of the average amount of time it will take an unstressed aquatic ecosystem to recover from a pollution event in which exposure to toxaphene exceeds the criterion. Stressed systems, for example one in which several outfalls occur in a limited area, would be expected to require more time for recovery. The resiliences of ecosystems and their abilities to recover differ greatly, however, and site-specific criteria may be established if adequate justification is provided.

Use of criteria for developing water quality-based permit limits and for designing waste treatment facilities requires selection of an appropriate wasteload allocation model. Dynamic models are preferred for the application of these criteria. Limited data or other considerations might make their use impractical, in which case one must rely on a steady-state model. The Agency recommends the interim use of 1Q5 or 1Q10 for the Criterion Maximum Concentration (CMC) design flow and 7Q5 or 7Q10 for the Criterion Continuous Concentration (CCC) design flow in steady-state models for unstressed and stressed systems respectively. These matters are discussed in more detail in the Technical Support Document for Water Quality-Based Toxics Control (U.S. EPA, 1985).

BILLING CODE 6560-50-M

FEDERAL RESERVE SYSTEM

Norwest Corp.; Acquisition of Company Engaged in Permissible Nonbanking Activities

The organization listed in this notice has applied under § 225.23(a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23(a)(2) or (f)) for the Board's approval under section 4(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be

VOL 51 ISS 84 MY 1 1986 UMI

accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than May 16, 1986.

A. Federal Reserve Bank of Minneapolis (Bruce J. Hedblom, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Norwest Corporation*, Minneapolis, Minnesota; to acquire McKinney Wudel Insurance Service, Rapid City, South Dakota and thereby engage in general insurance agency activities pursuant to section 4(c)(8)(G) of the Bank Holding Company Act. These activities will be conducted in Rapid City, South Dakota.

Board of Governors of the Federal Reserve System, April 25, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

IBT Bankshares, Inc., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than May 23, 1986.

A. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street NW., Atlanta, Georgia 30303:

11. *IBT Bankshares, Inc.*, Gretna, Louisiana; to become a bank holding company by acquiring 100 percent of the voting shares of Investors Bank and Trust Company, Gretna, Louisiana.

B. Federal Reserve Bank of Chicago (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Community Financial Corp.*, Avilla, Indiana; to become a bank holding company by acquiring 80 percent of the voting shares of Community State Bank, Avilla, Indiana.

Board of Governors of the Federal Reserve System, April 25, 1986.

James McAfee,

Associate Secretary of the Board.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Family Support Administration

Planned Secondary Resettlement (PSR) of Refugees; Availability of Grants for Fiscal Year 1987

AGENCY: Office of Refugee Resettlement (ORR), FSA, HHS.

ACTION: Notice of application due dates and panel review dates for Fiscal Year 1987.

SUMMARY: On May 13, 1985, the Office of Refugee Resettlement (ORR) published a notice in the Federal Register (50 FR 20088) which announced the availability of funding for grants to assist interested refugees to make planned secondary resettlements to favorable communities. This notice amends the May 13 notice by establishing the following schedule of proposal due dates and corresponding panel review dates for the remainder of Fiscal Year 1986 and for Fiscal Year 1987.

Application Due Dates	*Panel Review Dates*
July 15, 1986	July 28, 1986
September 29, 1986	October 21, 1986
December 16, 1986	January 20, 1987
April 6, 1987	April 28, 1987
July 13, 1987	July 28, 1987

EFFECTIVE DATE: May 1, 1986.

FOR FURTHER INFORMATION CONTACT: Toyo Biddle, (202) 245-1960.

Dated: April 21, 1986.

Office of Human Development Services

Advisory Board on Child Abuse and Neglect; Meeting

Agency Holding the Meeting: National Center on Child Abuse and Neglect, Children's Bureau, Administration for Children, Youth and Families, Office of Human Development Services, Department of Health and Human Services.

Time and Date: The Advisory Board on Child Abuse and Neglect will meet from 8:30 a.m.-6 p.m., June 4-5, 1986. In addition, the Committee on Indian Child Welfare will meet from 8:30 a.m.-5:30 p.m. on June 3 and from 8:30-11 a.m. on June 6, 1986. The Publications Review Committee will review books from 8:30 a.m.-5:30 p.m. on June 3 and from 8:30 a.m.-3 p.m. on June 6, 1986. The Committee on Private Sector Involvement and the Hearings Committee will meet during the 2-day Board meeting.

Place: The Board will meet in Room 600 of the Humphrey Building, 200 Independence Ave., SW., Washington, DC 20201. The Committee on Indian Child Welfare will meet in Room 405-A of the Humphrey Building. Members of the Publications Review Committee may pick up books for review in Room 252 of the Capitol Holiday Inn, 550 C Street, SW., Washington, DC 20201.

Status: The Board and committee meetings are open to the public. However, because of security precautions at all Government buildings, persons wishing to attend who do not have Government identification should call the contact person below for information about access to the building.

Matters to be Considered: Public Health Response to Child Abuse and Neglect; Victim Assistance Program, National Sheriff's Association; Evaluation of Emergency Foster Care Case Practice and Interpreting Foster Care Entry Rates; Child Abuse and Neglect in the Military; Private Sector Involvement; Child Abuse Regulations; Fiscal Years 1986 and 1987 Coordinated Discretionary Grants Program of the Office of Human Development Services; Child Abuse Legislative Proposal; and Committee Reports. The Board will also have the opportunity to meet with Child Abuse and Neglect State Liaison Officers and Directors of the new National Resource Centers. These groups are meeting at the same time.

Contact Person for More Information: Patricia B. Wood, Special Assistant, Office of the Associate Commissioner, Children's Bureau, Box 1182, Washington, DC 20013, (202) 755-7447 or 755-7800.

Dated: April 25, 1986.

National Institutes of Health

Division of Research Resources; General Clinical Research Centers Committee; Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the General Clinical Research Centers (GCRC) Committee, Division of Research Resources (DRR), June 11-13, 1986, First Floor Conference Room, American Inn of Bethesda, 8130 Wisconsin Avenue, Bethesda, MD 20814.

The meeting will be open to the public on June 12, from 9:00 a.m. to approximately 11:00 a.m. during which time there will be comments by the Director, DRR; an update of the GCRC Program; and reports on the Clinical Associate Physician Program; the diffusion of the CLINFO System; possible new technologies for GCRCs; and clinical research data management. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.C. Code and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public on June 11 from approximately 6:00 p.m. to recess and on June 12 from approximately 11:00 a.m. to recess and from approximately 8:00 a.m. to adjournment on June 13 for the review, discussion, and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mr. James Augustine, Information Officer, Division of Research Resources, Bldg. 31, Rm., 5B-10, National Institutes of Health, Bethesda, Maryland 20892, (301) 496-5545, will provide a summary of the meeting and a roster of the Committee members upon request. Dr. Ephraim Y. Levin, Executive Secretary of the General Clinical Research Centers Review Committee, Bldg. 31, Room 5B51, National Institutes of Health, Bethesda, Maryland 20892, (301) 496-5595, will furnish program information upon request.

BILLING CODE 4140-01-M

National Institute on Aging; Geriatrics Review Committee; Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Geriatrics Review Committee, National Institute on Aging, on June 11, 12, and 13, 1986, to be held in Building 31, Conference Room 4, National Institutes of Health, Bethesda, Maryland, 20892.

The meeting will be open to the public from 8:30 a.m. to 9:00 a.m. on June 11 for introductory remarks. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public on June 11 from 9:00 a.m. to adjournment on June 13 for the review, discussion, and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Ms. June McCann, Committee Management Officer, NIA, Building 31, Room 2C05, National Institutes of Health, Bethesda, Maryland, 20892, (301/496-5898), will provide summaries of meetings and rosters of Committee members as well as substantive program information.

(Catalog of Federal Domestic Assistance Program No. 13.866, Aging Research, National Institutes of Health)

Dated: April 24, 1986.

Betty J. Beveridge,
NIH Committee Management Officer.

[FR Doc. 86-9734 Filed 4-30-86; 8:45 am]

BILLING CODE 4140-01-M

National Institute of Child Health and Human Development; National Advisory Child Health and Human Development Council; Meeting

Pursuant to Pub. L. 92-463, notice if hereby given of the meeting of the National Advisory Child Health and Human Development Council, June 2-3, 1986, in Building 31, Conference Room 10, National Institutes of Health, Bethesda, Maryland, and the meeting of the Subcommittee on Planning on June 2 from 8:30 a.m. to 9:30 a.m. in Building 31, Room 2A03.

The Council meeting will be open to the public on June 2 from 9:30 a.m. until 3:00 p.m. The agenda includes a report by the Director, NICHD, and a presentation by the Demographic and Behavioral Sciences Branch, Center for Population Research. The meeting will be open on June 3 immediately following the review of applications if any policy issues are raised which need further discussion. The Subcommittee meeting will be open on June 2 from 8:30 a.m. to 9:30 a.m. to discuss program plans and the agenda for the next Council meeting. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in section 552b(c)(9)(B), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public on June 2 from 3:00 p.m. to 5:00 p.m. for discussion and preparation of comments Council wishes to submit to the Director, NIH, for inclusion in the biennial report to the Congress.

In accordance with the provision set forth in section 552(c)(4) and 552b(c)(6), Title 5, U.S. Code the meeting will be closed to the public on June 3 from 8:30 a.m. to completion of the review, discussion, and evalution of individual grant applications. The applications and the discussions could reveal confidential trade secrets or commerical property such as patentable material, and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mrs. Marjorie Neff, Council Secretary, NICHD, Landow Building, Room 6C08, National Institutes of Health, Bethesda, Maryland 20205, Area Code 301, 496-1485, will provide a summary of the meeting and a roster of Council members as well as subtantive program information.

(Catalog of Federal Domestic Assistance Program Nos. 13.864, Population Research, and 13.865, Research for Mothers and Children, National Institutes of Health.)

Dated: April 24, 1986.

Betty J. Beveridge,
Committee Management Officer, NIH.

BILLING CODE 4140-01-M

NIDR Special Grants Review Committee; Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the National Institute of Dental Research Special Grants Review Committee, June 9-10, 1986, in Conference Room 3, Building 31A, National Institutes of Health, Bethesda, Maryland. The meeting will be open to the public from 9:00 a.m. to 9:30 a.m. June 9 for general discussions. Attendance by the public is limited to space available.

In accordance with provisions set forth in section 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public from 9:30 a.m. June 9 to adjournment June 10 for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Dr. H. George Hausch, Executive Secretary, NIDR Special Grants Review Committee, NIH, Westwood Building, Room 507, Bethesda, MD 20892, (telephone 301/496-7658) will provide a summary of the meeting, roster of committee members and substantive program information upon request.

(Catalog of Federal Domestic Assistance Program Nos. 13.21—Diseases of the Teeth and Supporting Tissues: Caries and Restorative Materials; Periodontal and Soft Tissue Diseases; 13-122—Disorders of Structure, Function, and Behavior: Craniofacial Anomalies, Pain Control, and Behavioral Studies; 13-845—Dental Research Institutes; National Institute of Health.

Dated: April 24, 1986.

Betty J. Beveridge,
NIH Committee Management Officer.

BILLING CODE 4140-01-M

Public Health Service

Privacy Act of 1974; Addition of Routine Uses to an Existing System of Records

AGENCY: Public Health Service, HHS.

ACTION: Notification of the addition of new routine uses to an existing system of records.

SUMMARY: In accordance with the requirements of the Privacy Act, the Public Health Service (PHS) is publishing a notice to add five new routine uses to, and to revise one routine use of, system of records 09-15-0019, entitled "Health and Medical Records System, HHS/HRSA/IHS."

DATES: PHS invites interested persons to submit comments on the proposed new routine uses and the revised routine use on or before June 2, 1986.

PHS will adopt these routine uses without further notice 30 days after the date of publication unless comments are received which would result in a contrary determination.

ADDRESS: Please address comments to the Indian Health Service (IHS) Privacy Act Coordinator, Health Resources and Services Administration (HRSA), Room 6A-30, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857. We will make comments received available for public inspection at the above address during normal business hours, 8:30 a.m.-5:00 p.m.

FOR FURTHER INFORMATION CONTACT: Mr. Aaron Handler, IHS Privacy Act Coordinator, HRSA, Room 6A-30, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443-1180. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: IHS currently maintains the Health and Medical Records System to provide a description of patients' illnesses, treatments administered, and the results achieved. Over time, the records serve as a medical history of the total health care and medical treatment provided to the subject individuals by IHS and its contract health care providers. The system also supports authorized research and statistical evaluations.

A. We are adding five new routine uses as follows:

1. The first proposed new routine use (number eight) will permit disclosure of information regarding suspected cases of physical child abuse and neglect to members of community child protective teams (comprised of representatives of tribes, Bureau of Indian Affairs (BIA), a child protective service agency, IHS, and the judicial systems such as local, State, and tribal and law enforcement officers (State, county, Tribal or local)) for the purposes of establishing a diagnosis, formulating a treatment plan, monitoring the plan, investigating reports of suspected physical child abuse and neglect, and making recommendations to the appropriate court of competent jurisdiction. Many American Indian and Alaska Native communities have established a permanently organized team of persons from various professions and agencies that plan and coordinate services to families in which physical child abuse or neglect occur. Members of child protective teams are required to keep information supplied by fellow members confidential. Each time a child's status is to be reviewed by non-IHS staff members of the child protective team, a notation that such a review has occurred will be documented in the progress notes of the child's health record. The proposed new routine use will assist members of the child protective team to make informed decisions designed to protect the health and safety of the subject children.

2. The second proposed new routine use (number ten) will permit disclosure to the BIA of the Department of Interior and its contractors for the identification of American Indian and Alaska Native handicapped children, in order to carry out the Education for All Handicapped Children Act of 1975 (20 U.S.C. 1401 et. seq.). The purpose of this disclosure is to assist BIA to provide a suitable educational program for such handicapped children by eliminating any need for that agency to conduct duplicate medical evaluations at additional cost to the Federal Government.

3. The third proposed new routine use (number eleven) will permit disclosure to an IHS contractor for the purpose of computerized data entry or maintenance of records contained in this system. In certain health care facilities locations, IHS does not employ staff or equipment required for the performance of such data processing requirements and, therefore, must rely on the use of a contractor to perform these activities. The contractor will be required to maintain Privacy Act safeguards with respect to the receipt and processing of such records. IHS staff will monitor the implementation of the safeguards and all other provisions of the Privacy Act.

4. The fourth proposed new routine use (number twelve) will permit disclosure of a patient's medical history and other relevant information to health care providers under contract to IHS (including tribal contractors) in order to enable the contractor to provide appropriate health services to that individual in an informed manner. Contract care is used when IHS facilities and staff are not available; are not qualified to provide required emergency and/or specialty care, or are overloaded. The contractors will be required to maintain Privacy Act safeguards with respect to the receipt of medical information. IHS staff will monitor the contractors' implementation of these safeguards and all other applicable provisions of the Privacy Act.

5. The fifth proposed new routine use (number thirteen) will permit disclosure to the State of Alaska, Department of Health and Social Services (DHSS) in response to its request, of patient care summaries, portions of immunization registers, disease indices and other computer-generated medical summaries. This information will assist DHSS in its provision of health care to Alaska Natives and its other patients. IHS will supply this information through the Patient Care Information System (PCIS), an automated health and medical records management system, which is in effect in three of IHS' Area Offices (Anchorage, Alaska; Billings, Montana; and Tucson, Arizona). The State of Alaska, DHSS, has requested that medical records information which its staff will provide on PCIS forms for both IHS and non-IHS patients be entered into the PCIS system. On a cost reimbursement basis, IHS will provide to the State of Alaska computer-generated medical summaries of this health and medical information.

B. We are revising routine use number 9 (litigation routine use) to be consistent with guidance issued May 24, 1985, by the Office of Management and Budget on disclosures of Privacy Act records during litigation. This routine use has been limited to disclosure of records to the Department of Justice for the purpose of defending the Department in litigative action. The revision broadens the routine use to permit disclosure of records to a court or other tribunal, or to another party before such tribunal. It also permits the Department to disclose records for purposes of prosecution if such action is compatible with the purpose for which the information was collected.

C. we are making additional minor revisions at this time to improve the clarity and specificity of the system notice, and to incorporate normal updating changes. For example:

1. We are adding an introductory notation at the beginning of the "Routine Uses" section which indicates that in certain specified instances disclosures of portions of records indicating the diagnosis, prognosis, referral or treatment of alcohol and drug abuse can be made without prior patient consent pursuant to the Confidentiality of Alcohol and Drug Abuse Patient Record Statutes and Regulations (42 U.S.C. 290dd-3, 42 U.S.C. 290ee-3, and 42 CFR

VOL 51 ISS 84 MY 1 1986 UMI

Part 2). The notation also indicates that in all other instances prior to the release of alcohol or drug abuse patient information, written consent of the patient must be obtained. The routine use regarding release of alcohol and drug abuse information (formerly routine use number 8) has been deleted. Routine use number seven and the proposed new routine use number eight have been revised to conform to this introductory statement.

2. We have added a statement at the beginning of the "Routine Uses" section that states that "Individuals acting *in loco parentis* to minors as well as parents, legal guardians, and custodians may act on behalf of the subject individual for purposes of giving consent for disclosures to others when it is determined that the subject individual is a minor who is unable or cannot exercise with appropriate understanding, the right of consent by himself or herself. This statement was found in the "Notification Procedure" section; it has now been moved to be included in the introductory statement to the "Routine Uses" section.

3. We have revised the "Categories of Individuals" section to clarify that both IHS beneficiaries and nonbeneficiaries are being treated at IHS facilities.

4. We have added more specificity to the "Categories of Records" section and are listing items of information contained in the PCIS and third-party reimbursement records.

5. We have revised the "Safeguards" section to include automated data processing safeguards.

6. We have updated the "System Managers and Address" section (Appendix I), to incorporate address changes since the last publication and have deleted the "Attn." reference in Appendix I, which referred the reader (inappropriately) to the Privacy Act Coordinators in each IHS Area/Program Office, since these individuals are not system managers. In addition, we are adding the title and location of the Policy-Coordinating Official.

This system notice was last published in the Federal Register on November 29, 1983 (48 FR 53892–53897). We are republishing the system notice in its entirety below to incorporate the proposed changes.

The following notice is written in the present, rather than future tense, in order to avoid the unnecessary expenditure of public funds to republish the notice after the new routine uses have become effective.

Dated: April 24, 1986.

Wilford J. Forbush,

Deputy Assistant Secretary for Health Operations and Director, Office of Management, PHS.

09–15–0019

SYSTEM NAME:

Health and Medical Records Systems, HHS/HRSA/IHS.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Indian Health Service (IHS) hospitals, health centers, school health centers, health stations, field clinics, Service Units, Area and Program Offices (Appendix 1), and Regional Federal Records Centers (Appendix 2). Automated records, including Patient Care Information System (PICS) records, are stored at the Data Processing Service Center, IHS, located in Albuquerque, New Mexico (Appendix 1). Records may also be located at hospitals and offices of health care providers who are under contract to IHS. A current list of contractor sites is available by writing to the appropriate System Manager (Area or Service Unit Director) at the address shown in Appendix 1.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals, including both IHS beneficiaries and nonbeneficiaries, who are examined/treated on an inpatient and/or outpatient basis by IHS staff and/or contract (including tribal contract) health care providers.

CATEGORIES OF RECORDS IN THE SYSTEM:

1. Health and medical records containing: Examination, diagnostic and treatment data; proof of eligibility; social data such as name, address, date of birth, tribe; case records for special programs such as: Dental, social service, mental health, nursing; and laboratory test results. 2. Follow-up registers of individuals with specific health conditions or a particular health status such as: Tumors, communicable diseases, hospital commitment, suspected and confirmed physical child abuse and neglect, immunizations, self-destructive behavior, or handicap. 3. Logs of individuals provided health care by staffs of specific hospital components such as: Surgery, emergency, obstetric delivery, x-ray and laboratory. 4. Operation and/or disease indices for particular hospitals which list each relevant patient by the operation or disease. 5. Monitoring strips and tapes such as fetal monitoring strips and EEG and EKG tapes. 6. In the Anchorage, Alaska; Billings, Montana, and Tucson, Arizona Area Offices automated patient medical records and maintained in the Patient Care Information System (PCIS) which provides for structured patient medical summaries to IHS and contract health care providers, such as: Name; beneficiary code; Social Security Number (SSN) (voluntary); address; tribe; date of birth; and examination, diagnostic and treatment results. 7. Third-party reimbursement records containing name, address, date of birth, date of admission and Medicare or Medicaid claim numbers, SSN (voluntary), health plan name, insurance number, employment status, and other relevant claim information necessary to process and validate third-party reimbursement claims.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Section 321 of the Public Health Service Act, as amended, (42 U.S.C. 248), "Hospitals, Medical Examinations and Medical Care." Section 327A of the Public Health Service Act, as amended, (42 U.S.C. 254a–1), "Hospital-Affiliated Primary Care Centers." Indian Self Determination and Education Assistance Act (25 U.S.C. 450). Snyder Act (25 U.S.C. 13). Indian Health Care Improvement Act (25 U.S.C. 1601 et. seq). Construction of Community Hospitals Act (25 U.S.C. 2005–2005f). Idnian Health Service Transfer Act (42 U.S.C. 2001–2004).

PURPOSES:

The purposes of this system are:

1. To provide a description of a patient's illness, the treatment administered and results achieved, and to plan for future care of the patient.

2. To provide IHS program officials with statistical data upon which the health care program is evaluated and modified to meet future needs.

3. To serve as a means of communication among members of the health care team who contribute to the patient's care by integrating information from field visits with that from IHS facilities which have provided treatment.

4. To serve as the official documentation of health care rendered.

5. To contribute to continuing education of IHS staff to improve their competency to deliver health care services.

6. For disease surveillance purposes. For example:

(a) The Centers for Disease Control may use those records for their monitoring of various communicable diseases among persons residing within the United States; and

(b) The National Institutes of Health may use these records for their review of the prevalence of particular diseases (i.e., malignant neoplasms, diabetes mellitus, arthritis, metabolism and digestive diseases) for various ethnic groups of the Nation.

7. To compile and provide aggregated program statistics. Upon request of other components of the Department, IHS will provide statistical information, from which individual identifiers have been removed, such as:

(a) To the National Center for Health Statistics, for its dissemination of aggregated health statistics for various ethnic groups;

(b) To the Assistant Secretary for Population Affairs to keep a record of the number of sterilizations provided through the use of Federal funds;

(c) To the Health Care Financing Administration for the documentation of IHS health care covered by the Medicare and Medicaid programs for third-party reimbursement; and

(d) To the Bureau of Support Services, Health Care Financing Administration, to determine the prevalence of end-stage renal disease among the American Indian and Alaska Native population and to coordinate the care of American Indian and Alaska Native patients with this condition.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

If a portion of a health or medical record indicates a diagnosis, prognosis, referral, or treatment of alcohol or drug abuse, then the Confidentiality of Alcohol and Drug Abuse Patient Records Regulations, 42 CFR Part 2 apply. In general under these regulations, the only disclosures of a diagnosis, prognosis, referral or treatment of alcohol or drug abuse which may be made without patient consent are: (1) To met medical emergencies (42 CFR Part D, Sec. 2.51), (2) for research, audit, evaluation and examination (42 CFR Part D, Secs. 2.52, 2.53, 2.54 and 2.56), (3) for supervision and regulation of narcotic maintenance and detoxification programs (42 CFR Part D, Sec. 2.55), (4) pursuant to a court order (42 CFR 2.61–2.67), and (5) pursuant to a qualified service organization agreement, as defined in 42 CFR 2.11. In all other situations, written consent of the patient is required prior to disclosure of alcohol or drug abuse information under the routine uses listed below.

Individuals acting *in loco parentis* to minors, as well as parents, legal guardians, and custodians may act on behalf of the subject individual for purposes of giving consent for disclosures to others when it is determined that the subject individual is a minor who is unable to or cannot exercise with appropriate understanding, the right of consent by himself or herself.

1. Records may be disclosed to State, local or other authorized organizations which provide health services to American Indians and Alaska Natives, or provide third-party reimbursement of fiscal intermediary functions, for the purpose of planning for or providing such services, billing or collecting third-party reimbursements and reporting results of medical examination and treatment.

2. Records may be disclosed to Federal and non-Federal school systems which serve American Indians and Alaska Natives for the purpose of student health maintenance.

3. Records may be disclosed to organizations deemed qualified by the Secretary to carry out quality assessment, medical audits, or utilization review.

4. Records may be disclosed to authorized organizations, such as the United States Office of Technology Assessment, or individuals for conduct or analytical and evaluation studies sponsored by the IHS.

5. Records may be disclosed to a congressional office in response to an inquiry from that office made at the request of the subject individual.

6. A record may be disclosed for a research purpose, when the Department:

(a) Has determined that the use or disclosure does not violate legal or policy limitations under which the record was provided, collected, or obtained;

(b) Has determined that the research purpose (1) cannot be reasonably accomplished unless the record is provided in individually identifiable form, and (2) warrants the risk to the privacy of the individual that additional exposure of the record might bring;

(c) Has required the recipient to—(1) establish reasonable administrative, technical, and physical safeguards to prevent unauthorized use or disclosure of the record, and (2) remove or destroy the information that identifies the individual at the earliest time at which removal or destruction can be accomplished consistent with the purpose of the research project, unless the recipient has presented adequate justification of a research or health nature for retaining such information, and (3) make no further use or disclosure of the record except—(A) in emergency circumstances affecting the health or safety of any individual, (B) for use in another research project, under these same conditions, and with written authorization of the Department, (C) for disclosure to a properly identified person for the purpose of an audit related to the research project, if information that would enable research subjects to be identified is removed or destroyed at the earliest opportunity consistent with the purpose of the audit, or (D) when required by law;

(d) Has secured a written statement attesting to the recipient's understanding of, and willingness to abide by these provisions.

7. Information regarding the commission of crimes or the reporting of occurrences of communicable diseases, suspected or confirmed physical child abuse or neglect, births, or deaths, etc., may be disclosed by health providers and facilities to State and local agencies as required by State and local law. The disclosure of patient information or alcohol or drug abuse for purposes of criminal investigations or prosecution of the patient must be authorized by court order issued under 42 CFR 2.65.

8. Information regarding suspected cases of physical child abuse or neglect may be disclosed to members of community child protective teams (comprised of representatives of tribes, Bureau of Indian Affairs, a child protective service agency, the judicial system(s) (local, State, tribal), law enforcement officers (State, county, Tribal or local)) and IHS for the purposes of establishing a diagnosis, formulating a treatment plan, monitoring the plan, investigating reports of suspected physical child abuse or neglect and making recommendations to the appropriate court of competent jurisdiction. The disclosure of patient information on alcohol or drug abuse for purpose of criminal investigation or prosecution of the patient for suspected child abuse or neglect must be authorized by a court order issued under 42 CFR 2.65.

9. The Department may disclose information from this system of records to the Department of Justice, to a court or other tribunal, or to another party before such tribunal, when:

(a) HHS, or any component thereof; or

(b) Any HHS employee in his or her official capacity; or

(c) Any HHS employee in his or her individual capacity where the Department of Justice (or HHS, where it is authorized to do so) has agreed to represent the employee; or

(d) The United States or any agency thereof where HHS determines that the

VOL 51 ISS 84 MY 1 1986 UMI

litigation is likely to affect HHS or any of its components,

is a party to litigation or has an interest in such litigation, and HHS determines that the use of such records by the Department of Justice, the tribunal, or the other party is relevant and necessary to the litigation and would help in the effective representation of the governmental party, provided, however, that in each case, HHS determines that such disclosure is compatible with the purpose for which the records were collected.

10. Records may be disclosed to the Bureau of Indian Affairs and its contractors for the identification of American Indian and Alaska Native handicapped children to permit that Bureau to carry out the Education for All Handicapped Children Act of 1975 (20 U.S.C. 1401 et seq.).

11. Records may be disclosed to an IHS contractor for the purpose of computerized data entry or maintenance of records contained in this system. The contractor shall be required to maintain Privacy Act safeguards with respect to the receipt and processing of such records.

12. Records may be disclosed to a health care provider under contract to IHS (including tribal contractors) to permit the contractor to obtain health and medical information about the subject individual in order to provide appropriate health services to that individual. The contractor shall be required to maintain Privacy Act safeguards with respect to the receipt and processing of such records.

13. Records may be disclosed to the State of Alaska, Department of Health and Social Services (DHSS) (which supplies part or all of this information to IHS), in response to its request for patient summaries, portions of immunization registers, disease indices and other computer-generated medical summaries. This information assists DHSS in its provision of health care to the subject individual. Disclosure to the State of Alaska's DHSS is limited to information concerning its patients.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders, ledgers, card files, microfiche, microfilm, punch cards, computer tapes, disk packs and automatic files.

RETRIEVABILITY:

Indexed by name, record number, and SSN and cross-indexed. SSN is supplied on a voluntary basis.

SAFEGUARDS:

1. *Authorized Users.* Access is limited to authorized IHS personnel and IHS contractors and subcontractors in the performance of their duties. Authorized personnel include: Medical records personnel, health care providers, authorized researchers, medical audit personnel, and health care team members.

2. *Physical Safeguards.* Records are kept in locked metal filing cabinets or in a secured room at all times when not actually in use during working hours and at all times during nonworking hours. Magnetic tapes, disks, other computer equipment and other forms of personal data are stored in areas where fire and life safety codes are strictly enforced.

Telecommunication equipment (computer terminals, modems and disks) of the Patient Care Information System (PCIS) are maintained in locked rooms during nonworking hours. Combinations on door locks are changed periodically and whenever a PCIS employee resigns, retires or is reassigned.

3. *Procedural Safeguards.* Within each facility a list of personnel or categories of personnel having a demonstrable need for the records in the performance of their duties has been developed and is maintained. Procedures have been developed and implemented to review one-time requests for disclosure to personnel who may not be on the authorized user list. Proper charge-out procedures are followed for the removal of all records from the area in which they are maintained. Persons who have a need to know are entrusted with records from this system of records and are instructed to safeguard the confidentiality of these records. They are to make no further disclosure of the records except as authorized by the system manager and permitted by the Privacy Act, and to destroy all copies or to return such records when the need to know has expired. Procedural instructions include the statutory penalties for noncompliance.

The following automated information systems (AIS) security procedural safeguards are in place for automated health and medical records maintained in the Patient Care Information System. A profile of automated systems security is maintained. Security clearance procedures for screening individuals, both Government and contractor personnel, prior to their participation in the design, operation, use or maintenance of IHS automated information systems are implemented. The use of current passwords and log-on codes are required to protect sensitive automated data from unauthorized access. Such passwords and codes are changed periodically. An automated audit trail is maintained. Only authorized IHS Data Processing Service Center staff may modify automated files in batch mode. Personnel at remote terminal sites may only retrieve automated data. Such retrievals are password protected.

Privacy Act requirements and specified Automated Information System security provisions are specifically included in contracts and agreements and the system manager or his/her designee oversee compliance with these contract requirements.

4. *Implementing Guidelines.* DHHS Chapter 45–13 and supplementary Chapter PHS.hf:45–13 of the General Administration Manual; and Part 6, "ADP Systems Security," of the DHHS Information Resources Management Manual.

RETENTION AND DISPOSAL:

Patient listings which may identify individuals are maintained in IHS Area and Program Offices permanently. Inactive records are held at the facility which provided health services from three to seven years and then are transferred to the appropriate Federal Records Center. Monitoring strips and tapes (i.e., fetal monitoring strips and EEG and EKG tapes) which are not stored in the patient's official medical record, are stored at the health facility for one year and are then transferred to the appropriate Federal Records Center. (See Appendix 2 for Federal Record Center addresses.) Records are retained at the Regional Federal Record Centers for 25 years. Disposal methods include burning or shredding of hard copy and erasing of magnetic media.

SYSTEM MANAGER(S) AND ADDRESS:

Policy-Coordinating Official: Director, Division of Clinical and Environmental Health Services Indian Health Service 5600 Fishers Lane, Room 6A55 Rockville, Maryland 20857

See Appendix 1. The IHS Area/Program Office Directors and Service Unit Directors listed in Appendix 1 are System Managers.

NOTIFICATION PROCEDURE:

General Procedure. Requests must be made to the appropriate System Manager (IHS Area/Program Office Director or Service Unit Director). An individual who requests a copy of, or access to, a medical record shall at the time the request is made designate in writing a responsible representative who will be willing to review the record and inform the subject individual of its contents at the representative's discretion. Such a representative may be an IHS health professional. When an individual is seeking to obtain information about himself/herself which may be retrieved by a different name or identifier than his/her current name or identifier, he/she shall be required to produce evidence to verify that he/she is the person whose record he/she seeks.

No verification of identity shall be required where the record is one which is required to be disclosed under the Freedom of Information Act.

Requests In Person. Identification papers with current photographs are preferred but not required. If a subject individual has no identification but is personally known to the designated agency employee, such employee shall make a written record verifying the subject individual's identity. If the subject individual has no identification papers, the responsible system manager or designated agency official shall require that the subject individual certify in writing that he/she is the individual whom he/she claims to be and that he/she understands that the knowing and willful request or acquisition of records concerning an individual under false pretenses is a criminal offense subject to a $5,000 fine. If an individual is unable to sign his/her name when required, he/she shall make his/her mark and have the mark verified in writing by two additional persons.

Requests By Mail. Written requests must contain the name and address of the requester, his/her date of birth and at least one piece of information which is also contained in the subject record, and his/her signature for comparison purposes. If the written request does not contain sufficient information, the System Manager shall inform the requester in writing that additional, specified information is required to process the request.

Requests By Telephone. Since positive identification of the caller cannot be established, telephone requests are not honored.

Parents and Legal Guardians. Parents of minor children and legal guardians of legally incompetent individuals shall verify their own identification in the manner described above, as well as that relationship to the individual whose record is sought. A copy of the child's birth certificate or court order establishing legal guardianship may be required if there is any double regarding the relationship of the individual to the patient.

RECORDS ACCESS PROCEDURES:

Same as Notification Procedures. Requesters should also provide a reasonable decription of the record being sought. Requesters may also request an accounting of disclosures that have been made of their record, if any.

CONTESTING RECORD PROCEDURES:

Write to the appropriate IHS Area/Program Office Director or Service Unit Director at his/her address specified in Appendix 1, and specify the information being contested, the corrective action sought, and the reasons for requesting the correction, along with supporting information to show how the record is inaccurate, incomplete, untimely, or irrelevant.

RECORD SOURCE CATEGORIES:

Patient and/or family members, IHS health care personnel, contract health care providers, State and local health care provider organizations, and Medicare and Medicaid funding agencies.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

Appendix 1—System Managers and IHS Locations Under Their Jurisdiction Where Records are Maintained

Director, Aberdeen Area Indian Health Service, Federal Building, 115 Fourth Avenue, SE, Aberdeen, South Dakota 57401
Director, Rapid City Service Unit, Rapid City Indian Hospital, Rapid City, South Dakota 57701
Director, Cheyenne River Service Unit, Eagle Butte Indian Hospital, Eagle Butte, South Dakota 57625
Director, Fort Berthold Service Unit, Minni-Tohe Indian Health Center, New Town, North Dakota 58763

BILLING CODE 4820-29-M

Privacy Act of 1974; Addition of Routine Uses To An Existing System of Records

AGENCY: Public Health Service, HHS.

ACTION: Notification of addition of new routine uses to an existing system of records.

SUMMARY: In accordance with the requirements of the Privacy Act, the Public Health Service (PHS) is publishing a notice to add nine new routine uses and to revise two routine uses to system of records 09-15-0044, entitled "Health Education Assistance Loan Program (HEAL) Loan Control Master File, HHS/HRSA/BHPr."

DATES: PHS invites interested persons to submit comments on the proposed routine uses and the revised routine use on or before June 2, 1986.

PHS will adopt these new and revised routine uses without further notice 30 days after the date of publication, unless comments are received which would result in a contrary determination.

ADDRESS: Please address comments to the Acting HRSA Privacy Act Coordinator, Department of Health and Human Services, Room 14A-20, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857. We will make comments received available for public inspection at the above address during normal business hours, 8:30 a.m.–5:00 p.m.

FOR FURTHER INFORMATION CONTACT: Robert H. Handy, Ph.D., Acting Privacy Act Coordinator, HRSA, Room 14A-20 Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, telephone (301) 443-3760. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: The Health Resources and Service Administration (HRSA) currently maintains individually identifiable information on students participating in the HEAL program. This information is used primarily to determine the eligibility of loan applicants, and to monitor the loan status of selected HEAL applicants.

A. The Debt Collection Act of 1982 requires Federal Agencies to implement procedures for the collection of overdue debts owed to the Federal Government. Within HRSA, the 09-15-0045 record system entitled "HRSA Loan Repayment/Debt Management Records System, HHS/HRSA/OA," covers debt management activities for individuals who have been determined to be delinquent in repaying their loans. Prior to determining if loan recipients are unable to repay their HEAL loans, official counsel them in preclaim assistance and loan repayment efforts. To aid HEAL officials in identifying and locating delinquent borrowers, we are proposing to add seven new rountine uses for the purpose of managing debts owed under the HEAL program.

The proposed new routine uses numbers 5 to 11 will permit HRSA to disclose necessary information to other Federal agencies, OMB, the Department of the Treasury, consumer reporting agencies, debt collection bureaus, and other private and public parties. The purpose of such disclosures is (1) to locate delinquent borrowers, (2) to determine delinquent borrowers' creditworthiness and their ability to repay their debts, (3) to assist in preclaim assistance and loan repayment/management efforts, (4) to aid in the collection of debts owed under the HEAL program, and (5) to assist HRSA in its debt management activities.

Prior to making any actual disclosure under the fifth new routine use, which will permit disclosure to another Federal agency for salary and administrative offsets, HRSA will take the following due process steps: Verify the existence of the debt, and take reasonable action to locate the debtor to send written notice to him/her that the claim is overdue, that the agency intends to disclose information to debt collection agencies, or another Federal agency, of what the disclosure(s) will consist, and what his/her rights are with respect to the claim as set forth in Guidelines issued by the Office of Management and Budget (48 FR page 15556 and page 15559, April 11, 1983). For example, HRSA will allow the debtor to examine agency documentation of the debt, and provide an opportunity for the individual to enter into a written agreement satisfactory to the agency for repayment of any outstanding debts.

Further, before making any disclosures to debt collection agencies, HRSA will obtain assurance from such agencies that they will comply with the Fair Credit Reporting Act (15 U.S.C. 1681 et seq.) and with any other Federal law governing the provision of consumer credit information. Assurances to this effect will be incorporated in service contracts between the Government and debt collection agencies. The service contracts will contain a provision subjecting the contractors to Section (m) of the Privacy Act, which provides that such contractors are liable under the criminal provisions of the Privacy Act as "employees of the (Federal) agency."

B. Section 222 of the Health Professions Training Assistance Act of 1985 (Pub. L. 99-129) provides for a study to determine if health professions schools are engaged in a pattern or practice (1) of failure to comply with section 12(f) of the Military Selective Service Act (50 U.S.C. App. 462(f)) or (2) of providing loans or work assistance to persons who are required to register for the draft under section 3 of the Military Selective Service Act and have not so registered.

We are, therefore, proposing to add a new routine use (number 12) for disclosure of information from this system of records to the Director, Selective Service, for the purpose of determining if draft-eligible students participating in the HEAL program are registrants of the Military Selective Service System. Disclosure will be limited to the eligible student's name and other information necessary to determine if the individual is a registrant of the Military Selective Service System.

The disclosure of eligible student information to the Selective Service will result in aggregate information being provided to HRSA for analytical purposes in determining whether health professions schools are engaged in a pattern or practice of not complying with the Military Selective Service Act.

C. We are proposing to amend routine use number 1 by deleting the reference to "agency contractors," and are proposing to add a separate routine use (number 13) to further clarify that records may be disclosed to Department contractors and subcontractors. The purpose of this disclosure is to assist program managers in collating, compiling, aggregrating, or analyzing records used in admininstering the HEAL program. The contractors and subcontractors are required to maintain Privacy Act safeguards with respect to such records.

D. We are revising routine use number 3 (litigation routine use) to be consistent with guidance issued May 24, 1985, by the Office of Management and Budget on disclosures of Privacy Act records during litigation. This routine use has been limited to disclosure of records to the Department of Justice for the purpose of defending the Department in litigation action. The revision broadens the routine use to permit disclosure of records to a court or other tribunal, or to another party before such tribunal. It also permits the Department to disclose records for purposes of prosecution if such action is compatible with the purpose for which the information was collected.

E. In conjunction with the above-mentioned routine uses, we are making additional minor revisions to improve the clarity and specificity of the system notice, and to incorporate normal updating changes. For example:

1. We have updated the "Authority" section as follows: (a) To include the authorities under the Debt Collection Act of 1982 which provide for the implementation of debt management activities; and (b) to include the authority under section 222 of the Health Professions Training Assistance Act of 1985 which provides for a study on compliance with the Selective Service Act.

2. We have revised the "Purpose" section to emphasize the monitoring of the loan status of HEAL recipients, which includes the collection of overdue debts owed under the HEAL program.

3. We have revised the "Safeguards" section to clarify authorized users of the record system, and to add a statement that contractors and subcontractors must comply with the Privacy Act.

This system notice was last published in the Federal Register on November 29, 1983 (48 FR 53911–53913). We are republishing the system notice in its entirety below to incorporate the proposed additions.

The following notice is written in the present, rather than the future tense, in order to avoid the unnecessary expenditure of public funds to republish the notice after the new and revised routine uses have become effective.

Dated: April 24, 1986.

Wilford J. Forbush,

Deputy Assistant Secretary for Health Operations, and Director, Office of Management, PHS.

09-15-0044

SYSTEM NAME:

Health Education Assistance Loan Program (HEAL) Loan Control Master File. HHS/HRSA/BHPr.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Division of Student Assistance, Bureau of Health Professions, Health Resources and Services Administration, Room 8-23, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857.

Records are also located at contractor sites. A list of contractor sites where individually identifiable data are currently located is available upon request to the System Manager.

Washington National Records Center, 4205 Suitland Road, Suitland, MD 20832.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Applicants for and recipients of Health Education Assistance Loans.

CATEGORIES OF RECORDS IN THE SYSTEM:

Contains name, social security number or other identifying number, birthdate, demographic background, educational status, loan location and status, and financial information about the individual for whom the record is maintained. Contains lender and school identification.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Sections 727 and 728 of the Public Health Service Act, as amended (42 U.S.C. 294), which authorize the establishment of a Federal program of student loan insurance;

Section 739 of the Public Health Service Act, as amended (42 U.S.C. 2941), which directs the Secretary to require institutions to provide information for each student who has a loan;

Debt Collection Act of 1982 (5 U.S.C. 5514 note); and

Section 222 of the Health Professions Training Assistant Act of 1985 (50 U.S.C. App. 462 note), which provides for a study on compliance with the Selective Service Act.

PURPOSE(S):

Purpose of this system is (1) to identify students participating in the HEAL Program; (2) to determine eligibility of loan applicants and to compute insurance premium for Federal insurance; (3) to monitor the loan status of HEAL recipients, which includes the collection of overdue debts owed under the HEAL program; and (4) to compile and generate managerial and statistical reports.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

1. Disclosure may be made to Federal, State, or local agencies, to private parties such as relatives, present and former employers, business and personal associates, educational and financial institutions, and collection agencies. The purpose of such disclosures is to verify the identity of the loan applicant, to determine program eligibility and benefits, to enforce the conditions or terms of the loan, to counsel the borrower in repayment efforts, to investigate possible fraud and abuse, to verify compliance with program regulations, and to locate delinquent borrowers through preclaims assistance. Information may be disclosed to educational or financial institutions to assist them in loan management.

2. Disclosure may be made to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of that individual.

3. The Department may disclose information from this system of records to the Department of Justice, to a court or other tribunal, or to another party before such tribunal, when

(a) HHS, or any component thereof; or

(b) Any HHS employee in his or her official capacity; or

(c) Any HHS employee in his or her individual capacity where the Department of Justice (or HHS, where it is authorized to do so) has agreed to represent the employee; or

(d) The United States or any agency thereof where HHS determines that the litigation is likely to affect HHS or any of its components, is a party to litigation or has an interest in such litigation, and HHS determines that the use of such records by the Department of Justice, the tribunal, or the other party is relevant and necessary to the litigation and would help in the effective representation of the governmental party, provided, however, that in each case, HHS determines that such disclosure is compatible with the purpose for which the records were collected.

4. In the event that a system of records maintained by this agency to carry out its functions indicates a violation or potential violation of law, whether civil, criminal, or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the General Accounting Office, Office of Management and Budget, Department of Justice, and other appropriate Federal and State agencies charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute or any rule, regulation or order issued pursuant thereto.

5. HRSA will disclose from this system of records a delinquent debtor's name, address, Social Security number, and other information necessary to identify him/her; the amount, status, and history of the claim, and the agency

VOL 51 ISS 84 MY 1 1986 UMI

or program under which the claim arose, as follows:

a. To another Federal agency so that agency can effect a salary offset for debts owned by Federal employees; if the claim arose under the Social Security Act, the employee must have agreed in writing to the salary offset.

b. To another Federal agency so that agency can effect an authorized administrative offset; i.e., withhold money payable to or held on behalf of debtors other than Federal employees.

c. To the Treasury Department, Internal Revenue Service (IRS), to request a debtor's current mailing address to locate him/her for purposes of either collecting or compromising a debt, or to have a commercial credit report prepared.

6. Records may be disclosed to the General Accounting Office and to the Office of Management and Budget for auditing financial obligations to determine compliance with programmatic, statutory, and regulatory provisions.

7. HRSA may disclose information from this system of records to a consumer reporting agency (credit bureau) to obtain a commercial credit report for the following purposes:

a. To establish creditworthiness of a loan applicant; and

b. To assess and verify the ability of a debtor to repay debts owed to the Federal Government.

Disclosures are limited to the individual's name, address, Social Security number and other information necessary to identify him/her; the funding being sought or amount and status of the debt; and the program under which the application or claim is being processed.

8. HRSA may disclose to the Treasury Department, Internal Revenue Service (IRS), information about an individual applying for a loan under any loan program authorized by the Public Health Service Act to find out whether the loan applicant has a delinquent tax account. This disclosure is for the sole purpose of determining the applicant's creditworthiness and is limited to the individual's name, address, Social Security number; other information necessary to identify him/her, and the program for which the information is being obtained.

9. HRSA will report to the Treasury Department, Internal Revenue Service (IRS), as taxable income, the written-off amount of a debt owed by an individual to the Federal Government when a debt becomes partly or wholly uncollectable—either because the time period for collection under the statute of limitations has expired, or because the Government agrees with the individual to forgive or compromise the debt.

10. HRSA will disclose to debt collection agents, other Federal agencies, and other third parties who are authorized to collect a Federal debt, information necessary to identify a delinquent debtor. Disclosure will be limited to the debtor's name, address, Social Security number, and other information necessary to identify him/her; the amount, status, and history of the claim, and the agency or program under which the claim arose.

11. HRSA will disclose information from this system of records to any third party that may have information about a delinquent debtor's current address, such as a U.S. post office, a consumer reporting agency (credit bureau), a State motor vehicle administration, a professional organization, an alumni association, etc., for the purpose of obtaining the debtor's current address. This disclosure will be limited to information necessary to identify the individual.

12. Records may be disclosed to the Director, Selective Service, for the purpose of determining if draft eligible students participating in the HEAL program are registrants of the Military Selective Service System. Disclosure will be limited to the eligible student's name and other information necessary to determine if the individual is a registrant of the Military Selective Service System. The purpose of this disclosure will result in aggregate data which HEAL program managers will use to determine if health professions schools are engaged in a pattern or practice of not complying with the Military Selective Service Act.

13. Records may be disclosed to Department contractors and subcontractors for the purpose of assisting HEAL program managers in collating, compiling, aggregating, or analyzing records used in administering the HEAL program. Contractors maintain, and are also required to ensure that subcontractors maintain, Privacy Act safeguards with respect to the records.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosures pursuant to 5 U.S.C. 552(a)(b)(12): Disclosures may be made from this system to "consumer reporting agencies" as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f)) or the Federal Claims Collection Act of 1966 (31 U.S.C. 3701(a)(3)). The purposes of these disclosures are: (1) To provide an incentive for debtors to repay delinquent Federal Government debts by making these debts part of their credit records, and (2) to enable HRSA to improve the quality of loan and scholarship decisions by taking into account the financial reliability of applicants. Disclosure of records will be limited to the individual's name, Social Security number (SSN), and other information necessary to establish the identity of the individual, the amount, status, and history of the claim, and the agency or program under which the claim arose.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained in file folders, magnetic tape, and disc packs.

RETRIEVABILITY:

Social Security Number or other identifying number.

SAFEGUARDS:

1. *Authorized Users:* Access is limited to authorized HEAL personnel and contractors responsible for administering the HEAL program. Authorized personnel include HEAL employees and officials, financial and fiscal management personnel, computer personnel, and program managers who have responsibilities for implementing the HEAL program.

2. *Physical Safeguards:* Magnetic tapes, disc packs, computer equipment and other forms of personal data are stored in areas where fire and life safety codes are strictly enforced. All documents are protected during lunch hours and nonworking hours in locked file cabinets or locked storage areas. Twenty-four hour, seven-day security guards perform random checks on the physical security of the records storage areas.

3. *Procedural Safeguards:* A password is required to access the terminal and a data set name controls the release of data to only authorized users. All users of personal information in connection with the performance of their jobs protect information from public view and from unauthorized personnel entering an unsupervised office.

Access to records is strictly limited to those staff members trained in accordance with the Privacy Act and ADP security procedures. Contractors are required to maintain, and are also required to ensure that subcontractors maintain, confidentiality safeguards with respect to these records. Contractors and subcontractors are instructed to make no further disclosure of the records except as authorized by the System Manager and permitted by the Privacy Act. All individuals who have access to these records receive the appropriate ADP security clearances. HEAL personnel make site visits to ADP facilities for the purpose of ensuring that ADP security procedures continue to be met. Privacy Act and ADP system security requirements are specifically included in contracts. The HRSA project directors, project officers, and the System Manager oversee compliance with these requirements.

4. *Implementing Guidelines.* The safeguards described above were established in accordance with DHHS Chapter 45–13 and supplementary Chapter PHS.hf: 45–13 of the General Administration Manual; and the DHHS Information Resources Management Manual, Part 6, "ADP System Security."

RETENTION AND DISPOSAL:

Records will be retained for 5 years after the loan is repaid (1 year on site and 4 years at the Federal Records Center). Stored computer data is retained for aggregate purposes and then destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, HEAL Branch/Division of Student Assistance, BHRP/HRSA, Room 8–39, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857.

NOTIFICATION PROCEDURE:

To find out if the system contains records about you contact the System Manager.

Requests in person: A subject individual who apppears in person at a specific location seeking access or disclosure of records relating to him/her shall provide his/her name, current address, and at least one piece of tangible identification such as driver's license, passport, voter registration card, or union card. Identification papers with current photographs are preferred but not required. Additional identification may be requested when there is a request for access to records which contain an apparent discrepancy between information contained in the record and that provided by the individual requesting access to the record. No verification of identity shall be required where the record is one which is required to be disclosed under the Freedom of Information Act.

Requests by mail: Written requests for information and/or access to records received by mail must contain information providing the identity of the writer and a reasonable description of the record desired.

Written requests must contain the name and address of the requester, his/her date of birth and at least one piece of information which is also contained in the subject record, and his/her signature for comparison purposes.

Requests by telephone: Since positive identification of the caller cannot be established, telephone requests are not honored.

RECORD ACCESS PROCEDURES:

Same as notification procedures. Requesters should also provide a reasonable description of the record being sought.

Requesters may also request an accounting of disclosures that have been made of their records, if any.

CONTESTING RECORD PROCEDURES:

Contact the System Manager, provide a reasonable description of the record, specify the information being contested, the corrective action sought, and the reasons for requesting the correction, along with supporting information to show how the record is inaccurate, incomplete, untimely, or irrelevant.

RECORD SOURCE CATEGORIES:

Individual loan recipients, HEAL schools, lenders, and holders of HEAL loans and their agents.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

[FR Doc. 86-9728 Filed 4-30-86; 8:45 am]

BILLING CODE 4160-15-M 4160-15-M

Social Security Administration

Privacy Act of 1974; Notification of New Routine Use

AGENCY: Social Security Administration (SSA), Department of Health and Human Services (HHS).

ACTION: New Routine Use.

SUMMARY: In accordance with the Privacy Act (5 U.S.C. 552a(e)(11)), we are issuing public notice of our intent to establish a new routine use of information maintained in the system of records entitled "Master Beneficiary Record (MBR), HHS/SSA/OSR, 09–60–0090." The proposed routine use would permit disclosure of Social Security benefit data from the MBR to the Federal Reserve Bank of New York (FRBNY) for the purpose of making direct deposit/electronic funds transfer (EFT) of Social Security benefit payments to foreign-resident Social Security beneficiaries. We invite public comments on this publication.

DATES: The proposed routine use will become effective as proposed without further notice on June 2, 1986, unless we received comments on or before that date which would result in a contrary determination.

ADDRESSES: Interested parties may comment on this proposal by writing to the SSA Privacy Officer, Social Security Administration, 3–F–1 Operations Building, 6401 Security Boulevard, Baltimore, Maryland 21230. All comments received will be available for public inspection at that address.

FOR FURTHER INFORMATION CONTACT: Mr. Michael Johnson, Office of Policy Social Security Administration, 6401 Security Boulevard, Baltimore, Maryland 21235, telephone (Area Code 301) 597–4802.

SUPPLEMENTARY INFORMATION:

I. Background and Purpose

The MBR contains payment data which are used primarily to pay benefits to individual entitled to Social Security Retirement, Survivors and Disability Insurance. The issuing authority for Social Security checks is the Department of the Treasury (Treasury). Social Security beneficiaries residing in the United States (U.S.) may elect to receive their benefits in form of a paper check or via direct deposit/EFT. Heretofore, direct deposit/EFT services have not been available to foreign-resident beneficiaries. Payment delivery to these beneficiaries has been by means of paper checks delivered through the Foreign Service Posts and the postal systems of the countries in which they reside. This method of payment is more labor intensive and, therefore, administratively more costly than payment methods used in the U.S. Advances in the automation of international banking services among industrialized countries offer an opportunity to provide better payment services to foreign-resident beneficiaries. Using the new technology also will result in reduced administrative costs.

Presently, Treasury is undertaking a major systems improvement effort which precludes the development of an international direct deposit payment operation. Treasury, therefore, has delegated the function to FRBNY as its fiscal agent. FRBNY for all intents and purposes will function as a Treasury Regional Financial Center and perform the payment issuance functions normally undertaken by Treasury, until such time that Treasury can perform the functions. This process requires that Treasury delegate disbursing authority to SSA for international funds transfer purposes. As the disbursing authority, SSA must disclose Social Security benefit data to FRBNY to provide direct

VOL 51 ISS 84 MY 1 1986 UMI

deposit/EFT services. We, therefore, are proposing to establish the routine use below to meet the technical requirements of the Privacy Act before disclosing any data to FRBNY:

Information may be disclosed to the Federal Reserve Bank of New York for the purpose of making direct deposit/electronic funds transfer of Social Security benefits to foreign-resident beneficiaries.

II. Compatibility of the Proposed Routine Use

The Privacy Act (5 U.S.C. 552a(b)(3)) and our disclosure regulation (20 CFR 401.310) permit us to disclose information as a routine use for purposes which are compatible with the purpose for which we collected the information. Section 401.310 of the regulation permits us to disclose information as a routine use for the purpose of administering our programs as well as to assist in the administration of similar income-maintenance and health-maintenance programs of other agencies. Providing timely and economical delivery of Social Security checks is an extension of SSA program administration. Thus, the proposed routine use meets the criteria of the regulation and, therefore, is appropriate.

III. Effect of the Proposed Routine Use on the Rights of Individuals

Only information pertaining to those foreign-resident beneficiaries who request that SSA deliver their Social Security benefits via direct deposit/EFT would be disclosed under the routine use and disclosure would be made only for this purpose. Thus, we do not anticipate that any disclosures under the routine use would have any unwarranted effect on the privacy rights of individuals.

Dated: April 17, 1986.

Martha A. McSteen,

Acting Commissioner of Social Security.

09-60-0090

SYSTEM NAME:

Master Beneficiary Record (MBR), HHS/SSA/OSR.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Social Security Administration, Office of System Operations, 6401 Security Boulevard, Baltimore, MD 21235.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All Social Security beneficiaries who are or were entitled to receive Retirement, Survivors, or Disability Insurance (RSDI) benefits, including individuals who have received a RSDI payment since November 1978 even if their payment is not part of an ongoing award of benefits; individuals (nonclaimants) whose former spouses apply for RSDI benefit on their earnings records; persons who are only enrolled in the Hospital and/or Supplementary Medical Insurance (SMI) programs; and claimants whose benefits have been denied or disallowed.

The system also contains short reference to records for persons entitled to Supplemental Security Income payments, Black Lung benefits or Railroad Retirement Board (RRB) benefits.

CATEGORIES OF RECORDS IN THE SYSTEM:

The MBR contains information about each claimant who has applied for RSDI benefits, or to be enrolled in the Hospital or SMI programs; a record of the amount of Federal tax withheld on benefits paid to nonresident aliens; and the aggregate amount of benefit payments, repayments and reductions with respect to an individual in a calendar year. A record is maintained under each individual's Social Security number (SSN). However, if the individual has filed on another person's SSN, only a short 'pointer' record is maintained. Personal and general data about the claim is maintained under the SSN of that claim. Data about the claimant can be assessed using the claimant's SSN or the SSN on which benefits have been awarded or claimed (claim account number (CAN)).

There are three types of data in each CAN:

Account data. This includes the primary insurance amount, insured status of the SSN holder (if no monthly benefits are payable), data relating to the computation (use of military service credits, railroad retirement credits, or the foreign country when the primary insurance amount is based on wage credits under a totalization agreement), and, if only survivor's benefits have been paid, identifying data about the SSN holder (full name, date of birth, date of death and verification of date of death).

Payment data. This includes the payee name and address, data about a financial institution (if benefits are sent directly to the institution for deposit), the monthly payment amount, the amount and date of a one-time payment of past due benefits, and, where appropriate, a scheduled future payment. Payment data can refer to one beneficiary or several beneficiaries in a combined payment.

Beneficiary data. This includes personal information (name, date of birth, sex, date of filing, relationship to the SSN holder, other SSN's, benefit amount and payment status), and, if applicable, information about a representative payee, data about disability entitlement, worker's compensation offset data, estimates and report of earnings, or student entitlement information.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Sections 202a-205, 223, 226, 228, 1818, 1836, and 1840 of the Social Security Act.

PURPOSE(S):

Data in this system are used by a broad range of Social Security employees for responding to inquiries, generating followups on beneficiary reporting events, computer exception processing, statistical studies, conversion of benefits, and generating records for the Department of the Treasury to pay the correct benefit amount.

Data in this system also are available to the Department of Health and Human Services' (HHS') Inspector General for use in the performance of his/her duties.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Disclosure may be made for uses as indicated below:

1. To applicants or claimants, prospective applicants or claimants (other than the data subject), their authorized representatives or representative payees to the extent necessary to pursue Social Security claims and receive and account for benefits.

2. To third party contacts in situations where the party to be contacted has, or is expected to have, information relating to the individual's capability to manage his/her affairs or his/her eligibility for, or entitlement to, benefits under the Social Security program when:

(a) The individual is unable to provide information being sought. An individual is considered to be unable or provide certain types of information when:

(1) He/she is incapable or of questionable mental capability;

(2) He/she cannot read or write;

(3) He/she cannot afford the cost of obtaining the information;

(4) A language barrier exists; or

(5) The custodian of the information will not, as a matter of policy, provide it to the individual.

(b) The data are needed to establish the validity of evidence or to verify the accuracy of information presented by the individual, and it concerns one or more of the following:

(1) His/her eligibility for benefits under the Social Security program;

(2) The amount of his/her benefit payment; or

(3) Any case in which the evidence is being reviewed as a result of suspected fraud, concern for program integrity, quality appraisal, or evaluation and measurement activities.

3. To third party contacts where necessary to establish or verify information provided by representative payees or payee applicants.

4. To a person (or persons) on the rolls when a claim is filed by another individual which is adverse to the person on the rolls:

(a) An award of benefits to a new claimant precludes an award to a prior claimant; or

(b) An award of benefits to a new claimant will reduce the benefit payments to the individual(s) on the roll; but only for information concerning the facts relevant to the interests of each party in a claim.

5. To the Department of the Treasury for:

(a) Collecting Social Security taxes or as otherwise pertinent to tax and benefit payment provisions of the Social Security Act (including SSN verification services);

(b) Investigating the alleged theft, forgery, or unlawful negotiation of Social Security checks;

(c) Determining the Federal tax liability on Social Security benefits pursuant to 26 U.S.C. 6050, as amended by Pub. L. 98-21. The information disclosed will consist of the following:

(1) The aggregate amount of Social Security benefits paid with respect to any individual during any calendar year;

(2) The aggregate amount of Social Security benefits repaid by such individual during such calendar year;

(3) The aggregate reductions under section 224 of the Social Security Act in benefits which would otherwise have been paid to such individual during the calendar year on account of amounts received under a workmen's compensation act; and

(4) The name and address of such individual; and

(d) Depositing the tax withheld on benefits paid to nonresident aliens in the Treasury (Social Security Trust Funds) pursuant to 26 U.S.C. 871, as amended by Pub. L. 98-21.

6. To the United States Postal Service for investigating the alleged theft or forgery of Social Security checks.

7. To the Department of Justice for:

(a) Investigating and prosecuting violations of the Social Security Act to which criminal penalties attach;

(b) Representing the Secretary of HHS; and

(c) Investigating issues of fraud by agency officers or employees, or violation of civil rights.

8. To the Department of State for administering the Social Security Act in foreign countries through services and facilities of that agency.

9. To the American Institute on Taiwan for administering the Social Security Act on Taiwan through services and facilities of that agency.

10. To the Veterans Administration (VA), Philippines Regional Office, for administering the Social Security Act in the Philippines through the services and facilities of that agency.

11. To the Department of the Interior for administering the Social Security Act in the Trust Territory of the Pacific Islands through services and facilities of that agency.

12. Information necessary to adjudicate claims filed under an international Social Security agreement that the United States has entered into pursuant to Section 233 of the Social Security Act may be disclosed to a foreign country which is a party to that agreement.

13. To the Office of the President for the purpose of responding to an individual pursuant to an inquiry received from that individual or from a third party on his/her behalf.

14. To the Office of Education for determining eligibility of applicants for basic educational opportunity grants.

15. To the Bureau of Census when it performs as a collecting agent or data processor for research and statistical purposes directly relating to this system of records.

16. To the Department of the Treasury, Office of Tax Analysis, for studying the effects of income taxes and taxes on earnings.

17. To the Office of Personnel Management for the study of the relationship of civil service annuities to minimum Social Security benefits, and the effects on the trust fund.

18. To State Social Security Administrators for administering agreements pursuant to Section 218 of the Social Security Act.

19. To the Department of Energy for their study of the long-term effects of low-level radiation exposure.

20. To contractors under contract to the Social Security Administration (SSA) (or under contract to another agency with funds provided by SSA) for the performance of research and statistical activities directly relating to this system of records.

21. To a congressional office in response to an inquiry from that office made at the request of the subject of a record.

22. To the Department of Labor for conducting statistical studies of the relationship of private pensions and Social Security benefits to prior earnings.

23. To the Department of Justice in the event of litigation where the defendant is:

(a) HHS, any component of HHS, or any employee of HHS in his/her official capacity;

(b) The United States where HHS determines that the claim, if successful, is likely to directly affect the operations of HHS or any of its components; or

(c) Any HHS employee in his/her individual capacity where the Justice Department has agreed to represent such employee;

HHS may disclose such records as it deems desirable or necessary to the Department of Justice to enable that department to present an effective defense, provided such disclosure is compatible with the purpose for which the records were collected.

24. In response to legal process or interrogatories relating to the enforcement of an individual's child support or alimony obligations as required by sections 459 and 461 of the Social Security Act.

25. To Federal, State, or local agencies (or agents on their behalf) for administering income maintenance or health maintenance programs (including programs under the Social Security Act). Such disclosures include, but are not limited to, release of information to:

(a) RRB for administering provisions of the Railroad Retirement Act relating to railroad employment; for administering the Railroad Unemployment Insurance Act and for administering provisions of the Social Security Act relating to railroad employment;

(b) VA for administering 38 U.S.C. 412, and upon request, for determining eligibility for, or amount of, veterans benefits or verifying other information with respect thereto;

(c) State welfare departments for administering sections 205(c)(2)(B)(i)(II) and 401(a)(25) of the Social Security Act requiring information about assigned SSN's for Aid to Families with Dependent Children (AFDC) program purposes and for determining a recipient's eligibility under the AFDC program; and

VOL 51 ISS 84 MY 1 1986 UMI

(d) State agencies for administering the Medicaid program.

28. Upon request, information on the identity and location of aliens may be disclosed to the Department of Justice (Criminal Division, Office of Special Investigations) for the purpose of detecting, investigating and, where appropriate, taking legal action against suspected Nazi war criminals in the United States.

27. To third party contacts (including private collection agencies under contract with SSA) for the purpose of their assisting SSA is recovering overpayments.

28. Information may be disclosed to contractors and other Federal agencies, as necessary, for the purpose of assisting SSA in the efficient administration of its programs. We contemplate disclosing information under the routine use only in situations in which SSA may enter into a contractual or similar agreement with a third party to assist in accomplishing an agency function relating to this system of records.

29. Information may be disclosed to the Federal Reserve Bank of New York for the purpose of making direct deposit/electronic funds transfer of Social Security benefits to foreign-resident beneficiaries.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are stored in magnetic media (e.g., magnetic tape and magnetic disk) and in microform and paper form.

RETRIEVABILITY:

Records in this system are indexed and retrieved SSN.

SAFEGUARDS:

Safeguards for automated records have been established in accordance with the HHS Automated Data Processing (ADP) Manual, "Part 6, ADP System Security." All magnetic tapes and discs are within an enclosure attended by security guards. Anyone entering or leaving this enclosure must have special badges which are issued only to authorized personnel. All microform and paper files are accessible only by authorized personnel and are locked after working hours.

For computerized records, electronically transmitted between SSA's central office and field office locations (including organizations administering SSA programs under contractual agreements), safeguards include a lock/unlock password system, exclusive use of leased telephone lines, a terminal oriented transaction matrix, and an audit trail. (See Appendix J to this publication for additional information relating to safeguards SSA employs to protect personal information.)

RETENTION AND DISPOSAL:

Primary data storage is on magnetic disc. A new version of the disk file is generated each month based on changes to the beneficiary's record (adjustment in benefit amount, termination, or new entitlements). The prior version is written to tape and retained for 90 days in SSA's main data processing facility and is then sent to a secured storage facility for indefinite retention.

Selected records also are retained on magnetic disc for on-line query purposes. The query files are updated monthly and retained indefinitely. Microform records are disposed of by shredding or the application of heat after periodic replacement of a complete file.

Paper records are usually destroyed after use, by shredding, except where needed for documentation of the claims folder, in which case they are retained therein indefinitely (see the notice for the Claims Folders System, 09–60–0089).

SYSTEM MANAGER(S) AND ADDRESS:

Director, Office of Claims and Payment Requirements, Office of System Requirements, Social Security Administration, 6401 Security Boulevard, Baltimore, MD 21235.

NOTIFICATION PROCEDURE:

An individual can determine if this system contains a record about him or her by contacting the most convenient Social Security officer and providing his/her name, Social Security claim number (SSN plus alphabetic symbols), address, and proper identification. (See Appendix F.1 for address and telephone information.) (Furnishing the SSN is voluntary, but it will make searching for an individual's record easier and avoid delay.) (See Appendix K to this publication for documentation individuals may be required to furnish to establish their identity when requesting information pertaining to them from SSA.) These procedures are in accordance with HHS Regulations 45 CFR Part 5b.

RECORD ACCESS PROCEDURES:

Same as notification procedures. Requesters should also reasonably specify the record contents being sought. These procedures are in accordance with HHS Regulations 45 CFR Part 5b.

CONTESTING RECORD PROCEDURES:

Same as notification procedures. Requesters should also reasonably identify the record, specify the information they are contesting and state the corrective action sought and the reasons for the correction with supporting justification showing how the record is untimely, incomplete, inaccurate or irrelevant. These procedures are in accordance with HHS Regulations 45 CFR Part 5b.

RECORD SOURCE CATEGORIES:

Data for the MBR come primarily from the Claims Folders System (09–60–0089) and/or is furnished by the beneficiary at the time of filing for benefits, via the application form and necessary proofs, and during the period of entitlement when notices of events such as changes of address, work, marriage, are given the SSA by the beneficiary; and from States regarding Health Insurance third party premium payment/buy-in cases.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

BILLING CODE 4190–11–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. N–86–1607]

Notice of Submission of Proposed Information Collection to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

ACTION: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and should be sent to:

Robert Fishman, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, SW., Washington, DC 20410, telephone (202) 755–6050. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal described below for the collection of information to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the agency form number, if applicable; (4) how frequently information submissions will be required; (5) what members of the public will be affected by the proposal; (6) an estimate of the total number of hours needed to prepare the information submission; (7) whether the proposal is new or an extension or reinstatement of an information collection requirement; and (8) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Copies of the proposed forms and other available documents submitted to OMB may be obtained from David S. Cristy, Reports Management Officer for the Department. His address and telephone number are listed above. Comments regarding the proposal should be sent to the OMB Desk Officer at the address listed above.

The proposed information collection requirement is described as follows:

Proposal: Record of Employee Interview
Office: Labor Relations
Form Number: HUD–11
Frequency of Submission: On Occasion
Affected Public: Individuals or Households, State or Local Governments, Businesses or Other For-Profit, Federal Agencies or Employees, and Small Businesses or Organizations
Estimated Burden Hours: 10,000
Status: Extension
Contact: Elizabeth G. Cronin, HUD (202) 755–5370; Robert Fishman, OMB, (202) 395–6880.

Authority: Sec. 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: April 10, 1986.

Dennis F. Geer,

Director, Office of Information Policies and Systems.

BILLING CODE 4210–01–M

Office of Inspector General

[Docket No. N–86–1606; FR–2139]

Privacy Act; Program of Matching Tenant Data in Assisted Housing Programs

AGENCY: Office of Inspector General, HUD.

ACTION: Notice of matching program—HUD/Public Housing Agencies and Subsidized Multifamily Projects.

SUMMARY: In accordance with the Privacy Act of 1974 and the Office of Management and Budget's Revised Supplemental Guidance for Conducting Matching Programs (47 FR 21656, May 19, 1982), on August 6, 1984 (49 FR 31342), the Department published a Notice of Matching Program—HUD/Public Housing Agencies and Subsidized Multifamily Projects. That notice stated that HUD's Office of Inspector General would conduct or directly supervise computer matches of tenant records at Public Housing Agencies and HUD-subsidized multifamily projects with various types of income data maintained by States and by the Office of Personnel Management. This notice expands the coverage of the matching program to include certain computer records from the United States Department of Defense and the United States Postal Service. The matching program will be performed to detect unwarranted benefit payments under the National Housing Act, 12 U.S.C. 1701–1750g, the United States Housing Act of 1937, 42 U.S.C. 1437–1437o, and Section 101 of the Housing and Urban Development Act of 1965, 12 U.S.C. 1701s. Such unwarranted benefits may be paid when family income is unreported or underreported, causing rental payments to be set unduly low, and housing subsidies to be set correspondingly too high. A report on the design of the matching program is set forth in the Supplementary Information.

FOR FURTHER INFORMATION CONTACT: Mr. Steven A. Switzer, Office of Inspector General, Room 8284, Department of Housing and Urban Development, 451 Seventh Street SW, Washington, DC 20410, telephone (202) 755–6364. (This is not a tool-free telphone number.)

SUPPLEMENTARY INFORMATION: The information supplied below is required by paragraph 5.f.1. of the Revised Supplemental Guidance for Conducting Matching Programs, issued by the Office of Management and Budget (47 FR 21656; May 19, 1982). In accordance with the Revised Supplemental Guidance, copies of this report are being sent to the Office of Management and Budget and both Houses of Congress.

This matching program is exempt under 24 CFR 50.20(k) from the requirements for an environmental review under the National Environmental Policy Act, 42 U.S.C. 4321.

Dated: April 21, 1986.

Paul A. Adams,

Inspector General.

Report of Matching Program: Department of Housing and Urban Development/Public Housing Agencies/ Subsidized Multifamily Projects

A. *Authority.* The matching program will be conducted under Section 4(a) of the Inspector General Act of 1978, Pub. L. 95–452, 5 U.S.C. App. 4(a), and the National Housing Act, 12 U.S.C. 1701–1750g, the United States Housing Act of 1937, 42 U.S.C. 1437–1437o, and Section 101 of the Housing and Urban Development Act of 1965, 12 U.S.C. 1701s. The Inspector General Act authorizes the Inspector General of the Department of Housing and Urban Development to undertake programs to detect and prevent fraud and abuse in all HUD programs.

B. *Program Description.* The matching program is intended to be a continuing program, carried out at selected Public Housing Agencies (PHAs) and subsidized multifamily projects. HUD's Office of Inspector General (OIG) will perform or supervise the performance of the computer matching of tenant social security numbers (SSNs) and additional identifiers such as surname or date of birth in tenant records in HUD's Multifamily Tenant Characteristics System from data submitted by PHAs and HUD subsidized multifamily project owners (or tenant data in the form in which it is maintained by the PHAs or owners) against the States' machine-readable files of quarterly wage data and unemployment insurance benefit data to determine whether tenants have underreported income. State wage agencies or other Federal agencies may, in some instances, perform the actual matching in accordance with a written agreement with HUD and the PHA or project owner. Data on the unverified matches will be provided to HUD's OIG for further follow-up work, as discussed below. In addition, tenant SSNs may be matched to the Office of Personnel Management's General Personnel Records (OPM/GOVT–1) and Civil Service Retirement and Insurance Records System (OPM/Central–1); the Department of Defense's Defense Manpower Data Center Base (S322.10,

BEST COPY AVAILABLE

VOL 51 ISS 84 MY 1 1986 UMI

DLA–LZ); and the United States Postal Service's Finance Record-Payroll (USPS 050.020). Routine uses of these automated files are provided at 49 FR 36949, 36950–52 (September 20, 1984) (OPM/Central–1); 49 FR 36949, 36954–57 (September 20, 1984) (OPM/GOVT–1); 49 FR 30834, 30852–54 (August 1, 1984) (S322.10, DLA–LZ); and 50 FR 28862 (July 16, 1985) (USPS 050.020).

HUD's OIG will conduct follow-up work at the PHAs and multifamily projects based on the computer matches. This work will include verification of income sources reported to the PHA or subsidized multifamily project owner, interviews with individuals knowledgeable about the case(s), and preparation of case files for possible investigation and prosecution.

Records created from the computer matching program (case matches and the follow-up data) will be included in the "Investigation Files, HUD/Dept–24" category. Routine uses of these files are described in 49 FR 10372 (March 20, 1984).

HUD will take actions necessary to collect the amount of excess benefits paid on behalf of tenants. In addition, if requested by another Federal agency to provide information on tenants that have underreported income, HUD may supply data on verified cases in accordance with routine uses of HUD's investigative files HUD/Dept 24.

C. *Objectives to be met by the Matching Program:* The matching program will be performed to identify tenants receiving excess housing assistance resulting from unreported or underreported family income. The various HUD assisted housing programs available through PHAs or subsidized multifamily projects require that, in order to be admitted, applicants must meet certain income, as well as other, eligibility requirements. In addition, tenants are required to report amount and sources of income on at least an annual basis. To the extent families do not report all their income as required, HUD may initiate investigation or legal actions against tenants suspected of false reporting or failing to report their incomes.

D. *Period of the Match:* The matching program for HUD/PHA and subsidized multifamily projects has been conducted on a continuing basis since August, 1984 (excluding the use of Department of Defense and United States Postal Service data). HUD will expand the coverage of this continuing program to include the described Department of Defense and United States Postal Service records beginning May 1986. (Please note another agency, the United States Postal Service, has conducted a related computer match of its payroll system file with HUD's records on individuals receiving benefits under the National Housing Act, under a privacy act notice published September 17, 1985 (50 FR 37730).)

Follow-up work on resultant matches under HUD's computer matching program is expected to be completed within 6 months after completion of each computer match.

E. *Security:* To protect the identify of tenants, HUD will restrict access to both the information provided by other sources for the purposes of the matching program and the resulting case match data. The following measures will be taken to assure compliance with the Privacy Act.

If HUD performs the computer match, it will agree in writing to the conditions listed below governing its use of information from another source. If another government agency performs the match, HUD will require the agency enter into a written agreement with HUD and the PHA or project owner to the conditions listed below governing the use of both the source data provided by HUD and the case match data. This agreement will be executed before HUD discloses tenant data from a PHA or project owner to that agency.

The conditions included in the written agreements will include requirements that:

(1) The files to be matched will remain the property of the original sources and will be returned or destroyed at the end of a particular matching program;

(2) The agency performing the match will take sufficient physical, technical and administrative safeguards to maintain reasonable security over data in its possession provided for the match and over data created as a result of a particular matching program;

(3) The records will be used and accessed only to match the file(s) previously agreed to;

(4) The agency performing the match will not use the records to extract information for any purpose concerning individuals who were not a case match;

(5) Machine-readable matching files and any printed form of the data on these files will not be duplicated or disseminated within the agency performing the match for purposes other than the matching program or outside the agency for any purpose, unless authorized by the original source; and

(6) When the tenant data and case match data is used for statistical purposes, all personal identifiers will be deleted.

F. *Disposition of Records:* Upon completion of the match and related follow-up work, all source data received for this match will be returned to the appropriate PHAs, subsidized multifamily project owners, or government agencies, or destroyed. Case match data records will be kept by HUD only so long as criminal or administrative investigation is active and will be disposed of in accordance with the requirements of the Privacy Act of 1974 and the Federal Records Schedule.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[F-19148-12 and F-19148-15]

Alaska Native Claims Selection; Arctic Slope Regional Corp.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice is hereby given that a decision to issue conveyance under the provisions of sec. 14(e) of the Alaska Native Claims Settlement Act of December 18, 1971 (ANCSA), 43 U.S.C. 1601, 1613(e), will be issued to Arctic Slope Regional Corporation for approximately 4,976 acres. The lands involved are in the vicinity of Point Lay, Alaska.

Umiat Meridian, Alaska

T. 1 S., R. 44 W.
T. 1 S., R. 45 W.
T. 2 S., R. 45 W.

A notice of the decision will be published once a week for four (4) consecutive weeks in the Tundra Times. Copies of the decision may be obtained by contacting the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513. ((907) 271–5960.)

Any party claiming a property interest which is adversely affected by the decision shall have until June 2, 1986 to file an appeal. However, parties receiving service by certified mail shall have 30 days from the date of receipt to file an appeal. Appeals must be filed in the Bureau of Land Management, Division of Conveyance Management (960), address identified above, where the requirements for filing an appeal can be obtained. Parties who do not file an appeal in accordance with the requirements of 43 CFR Part 4, Subpart E shall be deemed to have waived their rights.

Helen Burleson,
Section Chief, Branch of ANCSA Adjudication.

BILLING CODE 4310-JA-M

Availability of Owl Creek Wilderness Study Area Environmental Impact Statement and Public Hearing Schedule

AGENCY: Worland District, Bureau of Land Management, Interior.

ACTION: Notice of Availability of Owl Creek Wilderness Study Area Environmental Impact Statement and Public Hearing Schedule.

SUMMARY: Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969, notice is hereby given that the Bureau of Land Management (BLM), U.S. Department of the Interior, has prepared a draft Environment Impact Statement (EIS) for the Owl Creek Wilderness Study Area (WSA) which will supplement the Grass Creek/Cody Draft Wilderness EIS. This EIS documents the effects expected on 710 acres of public lands from two alternatives; All Wilderness (the proposed action) and No Wilderness (no action). The Owl Creek WSA is located adjacent to the Washakie Wildeness on the western edge of the Big Horn Basin of north-central Wyoming.

DATES: Written comments on the BLM's wilderness recommendation and the adequacy of this document will be accepted during the 90 days following the Environmental Protection Agency's publication of the notice of filing on this EIS in the **Federal Register**. A public hearing to receive oral and written testimony will be held on June 26, 1986, at 7:30 p.m. at the Hot Springs County Museum, Thermopolis, Wyoming.

ADDRESS: Written comment on the recommendation and adequacy of this document should be addressed to: Worland District Office, Bureau of Land Management, P.O. Box 119, Worland, Wyoming 82401.

The document is available for inspection at the Worland District Office, 101 South 23rd Street, Worland, Wyoming, and the Wyoming State Office, 2515 Warren Avenue, Cheyenne, Wyoming.

F. William Eikenberry,
Associate State Director.

BILLING CODE 4310-22-M

Oregon: Burns District Advisory Council; Meeting, Tour

AGENCY: Bureau of Land Management, Interior.

ACTION: Burns District Office Advisory Council Meeting and Tour.

SUMMARY: In accordance with Pub. L. 92–463, this notice sets forth the schedule and proposed agenda for a meeting (and tour) of the Burns District Advisory Council at the Harney County Courthouse in Burns, Oregon.

DATE: Tour: May 29, 1986 9:00 a.m.; meeting: May 30, 1986.

FOR FURTHER INFORMATION CONTACT: Joshua L. Warburton, District Manager, Burns District Bureau of Land Management, 74 South Alvord, Burns, Oregon 97720, Telephone (503) 573–5241.

SUPPLEMENTARY INFORMATION: The primary purpose of this meeting is to discuss the following items: the Land Base Adjustment Program for Oregon and Washington, the BLM/Hammond Land Exchange, Harney County's proposal under the Recreation and Public Purposes Act (R&PP) for a recreation vehicle park, the Alvord Desert Winter Use proposal, and the Drewsey Management Framework Plan Amendment.

Persons interested in making an oral statement at this meeting which is open to the public, must notify the District Manager, Burns District Office, 74 South Alvord, Burns, Oregon 97720, by May 26, 1986. Written statements must also be received by this date.

The tour will cover lands involved in the Hammond exchange and will leave from the Burns District Office on Thursday, May 29, 1986, at 9:00 a.m. to return at 5:00 p.m.

Transportation will be provided for the Advisory Council members. Members of the public who wish to participate on the tour will need to provide their own transportation.

Summary minutes of the meeting and tour will be available for public inspection and duplication within 30 days following the meeting.

Dated: April 16, 1986.

Joshua L. Warburton,
District Manager.

[M60014]

Opening of Public Land in Lewis and Clark Counties, MT

AGENCY: Bureau of Land Managment, Interior.

ACTION: Notice of conveyance and order providing for opening of public land in Lewis and Clark County, Montana.

SUMMARY: This order will open lands reconveyed to the United States in an exchange under the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1701 et seq. (FLPMA), to the operation of the public land laws. It also informs the public and interested state and local governmental officials of the issuance of the conveyance document.

DATE: At 9 a.m. on June 16, 1986, the lands reconveyed to the United States shall be open to the operation of the public land laws, subject to valid existing rights, the provisions of existing withdrawals and the requirements of applicable law. The lands described in paragraph 1 below were segregated from settlement, sale, location and entry, including the mining laws, but not from exchange, by the Notice of Realty Action published in the **Federal Register** on September 26, 1985 (50 FR 39062). The segregation terminated on issuance of the patents on November 26, 1985.

FOR FURTHER INFORMATION CONTACT: Edward H. Croteau, Chief, Lands Adjudication Section, BLM, Montana State Office, P.O. Box 36800, Billings, Montana 59107, Phone (406) 657–6062.

SUPPLEMENTARY INFORMATION:

1. Notice is hereby given that pursuant to Sec. 206 of FLPMA, the following described surface estate was conveyed to the parties shown:

Principal Meridian, Montana

Elmer Joe Brown:
T. 36 N., R. 3 E.,
Sec. 1, NW¼ SW¼
40 acres.

Walter H. Kortum and Betty Kortum:
T. 17N., R. 7 E.,
Sec. 26, NW¼NW¼.
40 acres.

Chris Allen Kolstad and Vicki Kolstad:
T. 30 N., R. 3 E.,
Sec. 27, SE¼ SW¼;
Sec. 28, SW¼
Sec. 29, E½ SE¼.
280 acres.

Total acreage transferred—360 acres.

2. In exchange for the above selected land, the United States acquired the surface estate of the following described

BEST COPY AVAILABLE

VOL 51 ISS 84 MY 1 1986 UMI

land in Lewis and Clark County, Montana:

Principal Meridian, Montana

T. 21 N., R. 6 W.,
Sec. 27, That part of the SW¼NW¼ south of the Sun River and west of U.S. Highway 287 and that part of the NW¼SW¼ lying west of said highway; and
Sec. 28, That part of the SE¼NE¼ lying south of the Sun River.
Containing 53.23 acres.

3. The values of federal public land were appraised at $34,000 and the nonfederal land was appraised at $34,400. No minerals were transferred by either party in the exchange.

4. At 9 a.m. on June 16, 1986, the lands described in paragraph 2 above that were conveyed to the United States will be open to the operation of the public land laws.

Dated: April 23, 1986.

James Binando,

Acting Deputy State Director, Division of Lands and Renewable Resources, Montana State Office.

Comprising 19,669.60 acres of State lands.

The purpose of this exchange is to acquire State of Idaho endowment lands which have high public values for recreation and wildlife. Included in this exchange are offered lands within the Owyhee Canyonlands Wilderness Study Area and the proposed Owyhee Canyonlands Wild and Scenic River designation. Wildlife values on the offered lands include approximately 6,000 acres of mule deer winter range, 4,800 acres of pronghorn habitat, and 14,000 acres of sage grouse habitat of which 2,500 acres are used for nesting. River otter, red band trout, and California bighorn sheep are three sensitive species found on the offered lands. The selected lands contain approximately four miles of red band trout habitat, 19,000 acres of mule deer summer range, and 6,600 acres of sage grouse habitat.

The value of the lands to be exchanged are approximately equal; equalization of values will be by deletion of State or Federal lands. The public interest will be served by completing this exchange.

Publication of this notice in the Federal Register segregates the public lands from the operation of the public land laws, including the mining laws for a period of two years from the date of first publication.

Further information concerning the exchange, including the environmental assessment is available for review at the Bureau of Land Management, Boise District Office, 3948 Development Avenue, Boise, Idaho 83705.

For a period of 45 days from the date of first publication, interested parties may submit written comments to Martin J. Zimmer, Bureau of Land Management, Boise District Office, 3948 Development Avenue, Boise, Idaho 83705.

Dated: April 22, 1986.

J. David Brunner,

Associate District Manager.

BILLING CODE 4310-GG-M

Colorado; Filing of Plats of Survey

April 25, 1986.

The plat of survey of the following described land, will be officially filed in the Colorado State Office, Bureau of Land Management, Denver, Colorado, effective 10:00 A.M., April 25, 1986.

The plat representing the dependent resurvey of a portion of the New Mexico Guide Meridian (east boundary), a portion of the subdivisional lines, and the survey of the subdivision of section 13, T. 32 N., R. 8 E., New Mexico Principal Meridian, Colorado, Group No. 780, was accepted April 14, 1986.

This survey was executed to meet certain administrative needs of this Bureau.

All inquiries about this land should be sent to the Colorado State Office, Bureau of Land Management, 2020 Arapahoe Street, Denver, Colorado 80205.

Jack A. Eaves,

Acting Chief, Cadastral Surveyor for Colorado.

BILLING CODE 4310-JB-M

[Nev-044082]

Proposed Continuation of Withdrawal; Nevada

April 24, 1986.

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Reclamation proposes that 19,261 acres of withdrawn land for the Humboldt Sink Project be continued for an additional 50 years. The land will remain closed to surface entry and mining but has been and will remain open to mineral leasing.

DATE: Comments should be received by July 30, 1986.

ADDRESS: Comments should be sent to: Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Nevada State Office, P.O. Box 12000, Reno, Nevada 89520.

FOR FURTHER INFORMATION CONTACT: Vienna Wolder, Nevada State Office, (702) 784-5481.

SUPPLEMENTARY INFORMATION: The Bureau of Reclamation proposes that a portion of the existing land withdrawal made by Secretarial Order of April 4, 1958, be continued for a period of 50 years pursuant to section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751, 43 U.S.C. 1714. The land is described as follows:

Mount Diablo Meridian, Nevada

T. 24 N., R. 29 E.,
Sec. 12, All;
Sec. 14, That portion east of the Southern Pacific Railroad tracks;
Sec. 24, All;

Sec. 26, That portion east of Interstate I-80;
Sec. 32, That portion east of Interstate I-80;
Sec. 34, All;
Sec. 36, All.

The area described contains 19,261 acres in Churchill and Pershing Counties.

The purpose of the withdrawal is to protect the construction, operation and maintenance of the Humboldt Sink Project. The withdrawal segregates the land from operation of the public land laws generally, including the mining laws, but not the mineral leasing laws. No change is proposed in the purpose or segregative effect of the withdrawal.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments in connection with the proposed withdrawal continuation may present their views in writing to the Chief, Branch of Lands and Minerals Operations, in the Nevada State Office.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the land and its resources. A report will also be prepared for consideration by the Secretary of the Interior, the President, and Congress, who will determine whether or not the withdrawal will be continued and, if so, for how long. The final determination on the continuation of the withdrawal will be published in the Federal Register. The existing withdrawal will continue until such final determination is made.

Dated: April 24, 1986.

Robert G. Steele,

Deputy State Director, Operations.

Proposed Continuation of Withdrawal; Nevada

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The U.S. Forest Service proposes that a 23-acre withdrawal for the Little Meadows Administrative Site be continued for an additional 25 years. The land will remain closed to surface entry and mining but has been and will remain open to mineral leasing.

VOL 51 ISS 84 MY 1 1986 UMI

DATE: Comments should be received by July 30, 1986.

ADDRESS: Comments should be sent to: Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Nevada State Office P.O. Box 12000, Reno, Nevada 89520.

FOR FURTHER INFORMATION CONTACT: Vienna Wolder, Nevada State Office, (702) 784–5481.

SUPPLEMENTARY INFORMATION: The U.S. Forest Service proposes that the existing land withdrawal made by the Secretarial Order of June 29, 1908, be continued for a period of 25 years pursuant to section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751, 43 U.S.C. 1714. The land is described as follows:

Mount Diablo Meridian, Nevada

T. 10 N., R. 40 E. (unsurveyed),

Beginning at Cor. No. 1 a juniper post 6" diameter set in a mound of earth and stone and marked R1, whence F.S.M. above described bears N74°30' E. 1.12 chs.

Thence N15° W. 22.52 chs to Cor. No. 2 a dead pine post 8" diameter marked R2 in a blaze, set in a mound of earth and stone. A pine tree 10" diameter bears N18° W. .94 chs. marked W2 in a blaze, another pine tree marked W2 in a blaze bears N38° E. 71 chs.

Thence N75° E. 12.24 chs. to Cor. No. 3 a pine post 8" diameter set in a mound of earth and stone, and marked R3 in a blaze. Whence a pine tree 8" diameter marked W3 in a blaze, bears N27° E. 28 Chs. Another pine tree 10" diameter marked W3 in blaze bears N71° E. .35 chs.

Thence S6°30' E. 20.83 chs to Cor. No. 4 a pine post 6" diameter set in a mound of earth and stone, marked R4 in a blaze, whence a pine tree 8" in diameter, marked W4 in a blaze,m bears N80° E. .64 chs, another pine tree 1' diameter, marked W4 in a blaze, bears S16°30' E. 58 chs.

Thence S62° W. 9.28 chs to place of beginning.

The area described contains 23 acres in Nye County.

The purpose of the withdrawal is to protect the Little Meadows Administrative Site. The withdrawal segregates the land from operation of the public land laws generally, including the mining laws, but not the mineral leasing laws. No change in proposed in the purpose or segregative effect of the withdrawal.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments in connection with the proposed withdrawal continuation may present their views in writing to the Chief, Branch of Lands and Minerals Operations, in the Nevada State Office.

The authorized officer of the Bureau of Land Management will undertake such investigation as are necessary to determine the existing and potential demand for the land and its resources. A report will also be prepared for consideration by the Secretary of the Interior, the President, and Congress, who will determine whether or not the withdrawal will be continued and, if so, for how long. The final determination on the contiuation of the withdrawal will be published in the **Federal Register**. The existing withdrawal will continue until such final determination is made.

Proposed Continuation of Withdrawal; Nevada

April 23, 1986.

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The U.S. Forest Service proposes that 520 acres of withdrawn land for the paleontological Shoshone Mountain Ichthyosaur Site be contined for an additional 25 years. The land will remain closed to surface entry and mining but has been and will remain open to mineral leasing.

DATE: Comments should be received by July 30, 1986.

ADDRESS: Comments should be sent to: Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Nevada State Office, P.O. Box 12000, Reno, Nevada 89520.

FOR FURTHER INFORMATION CONTACT: Vienna Wolder, Nevada State Office, (702) 784–5481.

SUPPLEMENTARY INFORMATION: The U.S. Forest Service proposes that the existing land withdrawal made by Public Land Order 1961 of August 25, 1959, be continued for a period of 25 years pursuant to section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751, 43 U.S.C. 1714. The land is described as follows:

Mount Diablo Meridian, Nevada

T. 12N., R. 39 E.,
Sec. 27, N½SW¼, W½SW¼SW¼;
Sec. 28, SE¼, SE¼SW¼;
Sec. 33, NE¼, NE¼NW¼;
Sec. 34, W½NW¼NW¼.

The area described contains 520 acres in Nye County.

The purpose of the withdrawal is to protect the paleontological fossils at the Shoshone Mountain Ichthyosaur Site near Ione, Nevada. The withdrawal segregates the land from operation of the public land laws generally, including the mining laws, but not the mineral leasing laws. No change is proposed in the purpose or segregative effect of the withdrawal.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments in connection with the proposed withdrawal continuation may present their views in writing to the Chief, Branch of Lands and Minerals Operations, in the Nevada State Office.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the land and its resources. A report will also be prepared for consideration by the Secretary of the Interior, the President, and Congress, who will determine whether or not the withdrawal will be continued and, if so, for how long. The final determination on the continuation of the withdrawal will be published in the **Federal Register**. The existing withdrawal will continue until such final determination is made.

Proposed Continuation of Withdrawal, Nevada

April 23, 1986.

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Reclamation proposes that 2,263.71 acres of withdrawn land for the Robert B. Griffith Water Project be continued for an additional 20 years. The land will remain closed to surface entry and mining but has been and will remain open to mineral leasing.

DATE: Comments should be received by July 30, 1986.

ADDRESS: Comments should be sent to: Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Nevada State Office P.O. Box 12000, Reno, Nevada 89520.

FOR FURTHER INFORMATION CONTACT: Vienna Wolder, Nevada State Office, (702) 784–5481.

SUPPLEMENTARY INFORMATION: The Bureau of Reclamation proposes that a portion of the existing land withdrawal made by Public Land Order 3512 of December 7, 1964, be continued for a period of 10 years pursuant to section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751, 43 U.S.C. 1714.

The land is described as follows:

Mount Diablo Meridian, Nevada

T. 21 S., R. 62 E.,
Sec. 23, NE¼NE¼;
Sec. 24, All;
Sec. 25, N½NE¼, SE¼NE¼, NE¼NW¼.
T. 21 S., R. 63 E.,
Sec. 19, lots 3 and 4, E½SW¼;
Sec. 28, SE¼NE¼, N½NW¼, W½SW¼, SE¼SW¼, SE¼;
Sec. 29, N½NE¼, NW¼, S½S½;
Sec. 30, lots 1, 2 and 4, NE¼, E½NW¼, SE¼SW¼, S½SE¼.

The area described contains 2,263.71 acres in Clark County.

The purpose of the withdrawal is to protect the construction, operation and maintenance of certain salinity control units associated with the Robert B. Griffith Water Project (formerly known as the Southern Nevada Water Project). This project supplies southern Nevada with water from the Colorado River. The withdrawal segregates the land from operation of the public land laws generally, including the mining laws, but not the mineral leasing laws. No change is proposed in the purposes of segregative effect of the withdrawal.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments in connection with the proposed withdrawal continuation may present their views in writing to the Chief, Branch of Lands and Minerals Operations, in the Nevada State Office.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the land and its resources. A report will also be prepared for consideration by the Secretary of the Interior, the President, and Congress, who will determine whether or not the withdrawal will be continued and, if so, for how long. The final determination on the continuation of the withdrawal will be published in the **Federal Register**. The existing withdrawal will continue until such final determination is made.

Dated: April 22, 1986.

Proposed Continuation of Withdrawal; Oregon

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Forest Service, U.S. Department of Agriculture, proposes that a land withdrawal for the Jackson Picnic Ground continue for an additional 20 years. The land would remain closed to mining but has been and would remain open to surface entry and mineral leasing.

FOR FURTHER INFORMATION CONTACT: Champ Vaughan, BLM Oregon State Office, P.O. Box 2965, Portland, Oregon 97208 (Telephone 503–231–6905).

SUPPLEMENTARY INFORMATION: The Forest Service, U.S. Department of Agriculture, proposes that the existing land withdrawal made by Public Land Order No. 2868 of May 3, 1962, be continued for a period of 20 years pursuant to section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751, 43 U.S.C. 1714.

The land involved is located approximately 20 miles southwest of Medford and contains 40 acres within Section 5, T. 40 S., R. 3 W., W.M., Jackson County, Oregon.

The purpose of the withdrawal is to protect the Jackson Picnic Ground within the Rogue River National Forest. The withdrawal segregates the land from operation of the mining laws, but not from operation of the public land laws or mineral leasing laws, No change is proposed in the purpose for segregative effect of the withdrawal.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal continuation may present their views in writing to the undersigned officer at the address specified above.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the land and its resources. A report will also be prepared for consideration by the Secretary of the Interior, the President and Congress, who will determine whether or not the withdrawal will be continued and if so, for how long. The final determination of the continuation of the withdrawal will be published in the **Federal Register**. The existing withdrawal will continue until such final determination is made.

Dated: April 24, 1986.

Proposed Continuation of Withdrawal; Washington

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Reclamation proposes that a land withdrawal for the Yakima Project continue for an additional 100 years. The land would remain closed to surface entry and mining but has been and would remain open to mineral leasing.

FOR FURTHER INFORMATION CONTACT: Champ Vaughan, BLM Oregon State Office, P.O. Box 2965, Portland, Oregon 97208 (Telephone 503–231–6905).

SUPPLEMENTARY INFORMATION: The Department of Interior, Bureau of Reclamation, proposes that the existing land withdrawal made by Secretarial Order of August 9, 1907, be continued for a period of 100 years pursuant to

VOL 51 ISS 84 MY 1 1986 UMI

section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751, 43 U.S.C. 1714.

The land involved is located approximately 30 miles west of Yakima and contains 1,623.43 acres within Section 22, 24, 28, 30, and 32, T. 14 N., R. 15 E., W.M., Yakima County, Washington.

The purpose of the withdrawal is to protect the Yakima-Tieton Diversion Dam and Main Canal and Flume of the Yakima Project. The withdrawal segregates the land from operation of the public land laws generally, including the mining laws, but not the mineral leasing laws. No change is proposed in the purpose or segregative effect of the withdrawal.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal continuation may present their views in writing to the undersigned officer at the address specified above.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the land and its resources. A report will also be prepared for consideration by the Secretary of the Interior, the President and Congress, who will determine whether or not the withdrawal will be continued and if so, for how long. The final determination on the continuation of the withdrawal will be published in the **Federal Register**. The existing withdrawal will continue until such final determination is made.

[W-87410]

Receipt of Exchange Proposal, Wyoming

AGENCY: Bureau of Land Management, National Park Service, Interior.

ACTION: Notice of receipt of exchange proposal between Laurance S. Rockefeller and the Department of the Interior.

SUMMARY: The proposal involves the exchange of a scenic easement of approximately 902 acres of the Heartland Area of Laurance Rockefeller's J–Y Ranch—an inholding in the Grand Teton National Park—for public coal reserves of approximately identified in the proposal are 2,720 acres in the Young's Creek area of Sheridan County, specifically in all or portions of sections 22, 23, 25, 26, 27, 34, and 35, T. 58 N., R. 84 W., 6th P.M.

The Heartland Area of the J–Y Ranch is described by metes and bounds. It lies, however, within parts of sections 4, 5, 6, and 8 of T. 42 N., R. 116 W., 6th P.M., Teton County.

The Casper District Bureau of Land Management is soliciting public comment on this exchange proposal. All comments must be received by June 9, 1986. Specific areas of interest for public comments are as follows:

(1) What, if any, are the environmental impacts of the proposed exchange?

(2) What are the impacts of the proposed exchange on competitive coal leasing?

(3) Comments or thoughts on public interest involved with processing the proposal.

(4) Comments on the values associated with either the private lands to be acquired or the public coal to be transferred into private ownership.

FOR FURTHER INFORMATION CONTACTS: All comments and any further information should be addressed to: Charles Wilkie, Special Projects Team Leader, Casper District Office, Bureau of Land Management, 951 North Poplar Street, Casper, WY 82601, (307) 261–5554.

Dated: April 24, 1986.

BILLING CODE 4310-22-M

[W-87105]

Wyoming; Proposed Reinstatement of Terminated Oil and Gas Lease

Pursuant to the provisions of Pub. L. 97–451, 96 Stat. 2462–2466, and Regulation 43 CFR 3108.2–3(a) and (b)(1), a petition for reinstatement of oil and gas lease W–87105 for lands in Carbon County, Wyoming was timely filed and was accompanied by all the required rentals accruing from the date of termination.

The lessee has agreed to the amended lease terms for rentals and royalties at rates of $5.00 per acre, or fraction thereof, per year and 16⅔ percent, respectively.

The lessee has paid the required $500.00 administrative fee and $106.25 to reimburse the Department for the cost of this **Federal Register** notice.

The lessee has met all the requirements for reinstatement of the lease as set out in section 31 (d) and (e) of the Mineral Lands Leasing Act of 1920 (30 U.S.C. 188), and the Bureau of Land Management is proposing to reinstate lease W–87105 effective June 1, 1985, subject to the original terms and conditions of the lease and the increased rental and royalty rates cited above.

Andrew L. Tarshis,

Chief, Leasing Section.

BILLING CODE 4310-22-M

Minerals Management Service

Development Operations Coordination Document; Union Texas Petroleum Corp.

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the Receipt of a Proposed Development Operations Coordination Document (DOCD).

SUMMARY: Notice is hereby given that Union Texas Petroleum Corporation has submitted a DOCD describing the activities it proposes to conduct on Lease OCS–G 6677, Block 237, Vermilion Area, offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an onshore base located at Intracoastal City, Louisiana.

DATE: The subject DOCD was deemed submitted on April 16, 1986. Comments must be received within 15 days of the date of this Notice or 15 days after the Coastal Management Section receives a copy of the DOCD from the Minerals Management Service.

ADDRESSES: A copy of the subject DOCD is available for public review at the Office of the Regional Director, Gulf of Mexico OCS Region, Minerals Management Service, 3301 North Causeway Blvd., Room 147, Metairie, Louisiana (Office Hours: 9 a.m. to 3:30 p.m., Monday through Friday). A copy of the DOCD and the accompanying Consistency Certification are also available for public review at the Coastal Management Section Office located on the 10th Floor of the State Lands and Natural Resources Building, 625 North 4th Street, Baton Rouge, Louisiana (Office Hours: 8 a.m. to 4:30 p.m. Monday through Friday). The public may submit comments to the Coastal Management Section, Attention OCS Plans, Post Office Box 44396, Baton Rouge, Louisiana 70805.

FOR FURTHER INFORMATION CONTACT: Michael J. Tolbert; Minerals Management Service, Gulf of Mexico OCS Region, Rules and Production, Plans, Platform and Pipeline Section; Exploration/Development Plans Unit, Phone (504) 838–0875.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to Sec. 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review. Additionally, this Notice is to inform the public, pursuant to § 930.61 of title 15 of the CFR, that the Coastal Management Section/Louisiana Department of Natural Resources is reviewing the DOCD for consistency with the Louisiana Coastal Resources Program.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979, (44 FR 53685).

Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Dated: April 22, 1986.

J. Rogers Pearcy,

Regional Director, Gulf of Mexico OCS Region.

Import Investigation; Certain Brass Sheets and Strips From Brazil, Canada, France, Italy, the Republic of Korea, Sweden, and West Germany

Determinations

On the basis of the record [1] developed in the subject investigations, the Commission determines, pursuant to section 703(a) of the Tariff Act of 1930 (19 U.S.C. 1671b(a)), that there is a reasonable indication that an industry in the United States is materially injured by reason of imports from Brazil (investigation No. 701–TA–269 (Preliminary)) and France (investigation No. 701–TA–270 (Preliminary)) of certain brass sheets and strips,[2] provided for in item 612.39 of the Tariff Schedules of the United States, which are alleged to be subsidized by the Governments of Brazil and France.

Further, the Commission determines, pursuant to section 733(a) of the Tariff Act of 1930 (19 U.S.C. 1673b(a)), that there is a reasonable indication that an industry in the United States is materially injured by reason of imports from Brazil (investigation No. 731–TA–311 (Preliminary)), Canada (investigation No. 731–TA–312 (Preliminary)), France (investigation No. 731–TA–313 (Preliminary)), Italy (investigation No. 731–TA–314 (Preliminary)), the Republic of Korea (investigation No. 731–TA–315 (Preliminary)), Sweden (investigation No. 731–TA–316 (Preliminary)), and West Germany (investigation No. 731–TA–317 (Preliminary)) of certain brass sheets and strips,[3] provided for in item 612.39 of the Tariff Schedules of the United States, which are alleged to be sold in the United States at less than fair value (LTFV).

Background

On March 10, 1986, petitions were filed with the U.S. International Trade Commission and the U.S. Department of Commerce by counsel on behalf of American Brass, Buffalo, NY; Bridgeport Brass Corp., Indianapolis, IN; Chase Brass & Copper Co., Solon, OH; Hussey Copper Ltd., Lettsdale, PA; The Miller Co., Meriden, CT; Olin Corp. (Brass Group), East Alton, IL; and Revere Copper Products, Inc., Rome, NY. The following trade unions are also petitioners: The International Association of Machinists and Aerospace Workers; the International Union, Allied Industrial Workers of America (AFL–CIO); Mechanics Educational Society of America, Local 56; and the United Steelworkers of America (AFL–CIO/CLC).

The petitions allege that an industry in the United States is materially injured and threatened with material injury by reason of imports from Brazil and France of certain brass sheets and strips which are alleged to be subsidized by the Governments of Brazil and France. In addition, the petitions allege that an industry in the United States is materially injured and threatened with material injury by reason of imports from Brazil, Canada, France, Italy, the Republic of Korea, Sweden, and West Germany of certain brass sheets and strips which are allegedly being sold in the United States at LTFV.

Accordingly, the Commission instituted, effective March 10, 1986, preliminary countervailing duty investigations Nos. 701–TA–269 (Preliminary) (Brazil) and 701–TA–270 (Preliminary) (France), under section 703(a) of the Tariff Act of 1930, and, further, the Commission instituted, under section 733(a) of the Tariff Act of 1930, preliminary antidumping investigations Nos. 731–TA–311 (Preliminary) (Brazil), 731–TA–312 (Preliminary) (Canada), 731–TA–313 (Preliminary) (France), 731–TA–314 (Preliminary) (Italy), 731–TA–315 (Preliminary) (the Republic of Korea), 731–TA–316 (Preliminary) (Sweden), and 731–TA–317 (Preliminary) (West Germany).

Notice of the institution of the Commission's investigations and of a public conference to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of March 19, 1986, (53 FR 9536). The conference was held in Washington, DC, on April 4, 1986, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its determinations in these investigations to the Secretary of Commerce on April 24, 1986. The views of the Commission are contained in USITC Publication 1837 (May 1986), entitled "Certain Brass Sheets and Strips from Brazil, Canada, France, Italy, the Republic of Korea, Sweden, and West Germany: Determinations of the Commission in Investigations Nos. 701–TA–269 and 270

---

[1] The record is defined in § 207.2(i) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(i)).

[2] For purposes of these investigations, the term "certain brass sheets and strips" refers to brass sheets and strips of solid rectangular cross section, over 0.006 inch but not over 0.188 inch in thickness, in coils or cut to length, whether or not corrugated or crimped, but not cut, pressed, or stamped to nonrectangular shape, provided for in items 612.3960, 612.3962, and 612.3968 of the *Tariff Schedules of the United States Annotated* (TSUSA). The petitions limit the scope of the investigations to sheets and strips of brass alloys designated as "C20000-series" under the nomenclature and numbering system of the Unified Numbering System (UNS) or the equivalent "200-series" under the Copper Development Association (CDA) numbering system.

[3] For purposes of these investigations, the term "certain brass sheets and strips" refers to brass sheets and strips of solid rectangular cross section, over 0.006 inch but not over 0.188 inch in thickness, in coils or cut to length, whether or not corrugated or crimped, but not cut, pressed, or stamped to nonrectangular shape, provided for in items 612.3960, 612.3962, and 612.3968 of the *Tariff Schedules of the United States Annotated* (TSUSA). BILLING CODE 7020-02-M

[Investigation No. 337-TA-240]

Import Investigation; Certain Laser Inscribed Diamonds and the Method of Inscription Thereof; Decision Not To Review Initial Determination Adding a Respondent and Amending the Notice of Investigation

AGENCY: International Trade Commission.

ACTION: Nonreview of an initial determination adding a respondent and amending the notice of investigation.

SUMMARY: Notice is hereby given that the Commission has determined not to review an initial determination (ID) (Order No. 4) issued by the presiding administrative law judge (ALJ) in the above-captioned investigation granting the Commission investigative attorney's (IA) motion to add A. Schwartz of Tel Aviv, Israel, as a respondent in the investigation and amending the notice of investigation to reflect this action.

FOR FURTHER INFORMATION CONTACT: Catherine R. Field, Esq., Office of General Counsel, U.S. International Trade Commission, telephone 202-523-0189.

SUPPLEMENTARY INFORMATION: The authority for the Commission's disposition of this matter is contained in section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and in § 210.53 of the Commission's rules of Practice and Procedure (19 CFR 210.53).

On February 6, 1986, the Commission voted to institute the above-captioned investigation. At the time of this decision the identity of the foreign source of the allegedly infringing inscribed diamonds was unknown. Subsequently, respondents identified A. Schwartz of Tel Aviv, Israel as the source of their imported inscribed diamonds.

On March 18, 1986, the IA filed a motion to add A. Schwartz as a respondent and to amend the notice of investigation. Motion No. 240-1. On March 26, 1986, the presiding ALJ granted the motion and certified the ID to the Commission. Order No. 4. Counsel for complainant Lazare Kaplan and respondents Sears Roebuck & Co. and I.B. Goodman represented during a preliminary conference that they did not oppose the motion. The Commission did not receive any petitions for review of the ID.

Copies of the ID and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436, telephone 202-523-0161.

Hearing-impaired individuals are advised that information concerning this investigation can be obtained by contacting the Commission's TDD terminal on 202-724-0002.

Issued: April 22, 1986.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-229]

Import Investigation; Certain Nut Jewelry and Parts Thereof; Receipt of Initial Determination Terminating Respondent on the Basis of Consent Order Agreement

AGENCY: International Trade Commission.

ACTION: Notice is hereby given that the Commission has received an initial determination from the presiding officer in the above-captioned investigation terminating the following respondent on the basis of a consent order agreement: RDCO, Inc. (RDCO).

SUPPLEMENTARY INFORMATION: This investigation is being conducted pursuant to section 337 of the Tariff Act of 1930 (19 U.S.C. 1337). Under the Commission's rules, the presiding officer's initial determination will become the determination of the Commission thirty (30) days after the date of its service upon the parties, unless the Commission orders review of the initial determination. The initial determination in this matter was served upon the parties on April 23, 1986.

Copies of the initial determination, the consent order agreement, and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436, telephone 202-523-0161. Hearing impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202-724-0002.

Written Comments

Interested persons may file written comments with the Commission concerning termination of the aforementioned respondent. The original and 14 copies of all such comments must be filed with the Secretary to the Commission, 701 E Street, NW., Washington, DC 20436, no later than 10 days after publication of this notice in the **Federal Register**. Any person desiring to submit a document (or portion thereof) to the Commission in confidence must request confidential treatment. Such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why confidential treatment should be granted. The Commission will either accept the submission in confidence or return it.

FOR FURTHER INFORMATION CONTACT: Ruby J. Dionne, Office of the Secretary, U.S. International Trade Commission, telephone 202-523-0170.

Issued: April 23, 1986.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-83]

Import Investigation; Certain Window Shades; Commission Decision To Maintain Exclusion Order Pending the Outcome of the Appeal to the Court of Appeals for the Federal Circuit of the Federal District Court Decision Holding Invalid the Patent Underlying the Exclusion Order

AGENCY: International Trade Commission.

ACTION: The Commission has decided not to modify or vacate the exclusion order issued in June 1981 in the above-captioned investigation pending the outcome of the appeal of *Newell Companies Inc.* v. *Kenney Manufacturing Co.*, 606 F. Supp. 1282 (D.R.I. 1985) to the Court of Appeals for the Federal Circuit.

FOR FURTHER INFORMATION CONTACT: Jean Heck, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202-523-1693.

SUPPLEMENTARY INFORMATION: On June 30, 1985, McCrory Corporation, an importer of window shades, informed the Commission that a Federal district court had determined that the patent underlying the exclusion order issued in the above captioned investigation was invalid. *See Newell Companies Inc.* v. *Kenney Manufacturing Co.*, 606 F. Supp. 1282 (D.R.I. 1985). As a result, the Commission instituted a review proceeding pursuant to Commission rule 211.57 to determine whether the *Window Shades* exclusion order should be modified or vacated at this time. Notice of this review proceeding was published in the **Federal Register** on October 9, 1985 (50 FR 41229). Interested parties were invited to file submissions. Submissions were received from the complainant Newell Window Furnishing Company and the McCrory Corporation.

Copies of the Commission's Action and Order and all other nonconfidential documents filed in connection with this review proceeding are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street, NW., Washington, DC 20436, telephone 202-523-0161.

Issued: April 21, 1986.

By order of the Commission.

INTERSTATE COMMERCE COMMISSION

[Docket No AB-261X and AB-263X]

Staten Island Rapid Transit Operating Authority—Abandonment Exemption—Richmond County, NY and Staten Island Railway Corp.—Discontinuance of Service Exemption—Richmond County, NY

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: The Commission exempts from prior approval under 49 U.S.C. 10903, *et seq.*, the abandonment and discontinuance of freight service over an entire line of railroad extending approximately 14.5 miles from St. George, Staten Island, NY to Tottenville, Staten Island, NY by Staten Island Rapid Transit Operating Authority and Staten Island Railway Corporation, respectively. the discontinuance of service is subject to standard employee protective conditions.

DATES: This exemption is effective June 2, 1986. Petitions to stay must be filed by May 12, 1986 and petitions for reconsideration must be filed by May 20, 1986.

ADDRESSES: Send pleadings referring to Docket No. AB-261X and Docket No. AB-263X to:

(1) Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

(2) Edward D. Greenberg, Esq., 1054 Thirty-First Street, NW., Washington, DC 20007.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer, (202) 275-7245.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T.S. InfoSystems, Inc., Interstate Commerce Commission Building, Room 2229, Washington, DC 20423 or call 289-4357 (DC Metropolitan Area) or toll free (800) 424-5403.

Decided: April 22, 1986.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Sterrett, Andre, and Lamboley.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Lodging of a Settlement Agreement Pursuant to the Clean Water Act; Victory Polishing & Plating Co., Inc.

In accordance with Departmental Policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that a proposed settlement agreement in *United States* v. *Victory Polishing & Plating Co., Inc.*, Civil Action No. 85-0157P, has been reached and a stipulation of dismissal without prejudice was lodged with the United States District Court for the District of Rhode Island on April 28, 1986. The agreement concerns violations of the Clean Water Act's pretreatment standards and reporting requirements, as established under 40 CFR Parts 403 and 413. The proposed agreement requires the defendant to pay $100,000 in civil penalties and maintain compliance with the pretreatment limits for copper, nickel, zinc, lead, cadmium, chromium, silver, cyanide and pH. The settlement agreement also provides for a regular monitoring program beginning as of May 1, 1986.

The Department of Justice will receive for thirty (30) days from the date of publication of this notice, written comments relating to the settlement agreement. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Washington, DC 20530 and should refer to *United States* v. *Victory Polishing & Plating Co., Inc.*, D.J. Ref. No. 90-5-1-1-2340.

The proposed settlement agreement may be examined at the Office of the United States Attorney, District of Rhode Island, 223 Federal Building & Courthouse, Kennedy Plaza, Providence, Rhode Island 02903; at the Region I office of the Environmental Protection Agency, John F. Kennedy Federal Building, Boston, Massachusetts 02203; and the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1515, Ninth Street and Pennsylvania Avenue, NW., Washington, DC 20530. A copy of the proposed settlement agreement may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please enclose a check in the amount of $2.00 (10 cents per page reproduction charge) payable to the Treasurer of the United States.

F. Henry Habicht II,

Assistant Attorney General Land and Natural Resources Division.

[FR Doc. 86-9679 Filed 4-30-86; 8:45 am]

BILLING CODE 4410-01-M

Lodging of a Consent Decree Pursuant to the Clean Air Act; Andersons

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on April 21, 1986, a proposed consent decree in *United States* v. *The Andersons*, Civil Action No. C-83-455 was lodged with the United States District Court for the Northern District of Ohio. The proposed consent decree concerns the installation of air pollution control equipment to control grain dust emissions that occur during shiploading operations at The Andersons' grain terminal elevator in Toledo, Ohio. The proposed consent decree requires the defendant to undertake remedial measures at its facility and to meet a compliance schedule for the installation and maintenance of a mineral oil spray system and related air pollution control equipment. The decree also requires defendants to pay a civil penalty of $25,000.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division,

VOL 51 ISS 84 MY 1 1986 UMI

Department of Justice, Washington, DC 20530, and should refer to *United States v. The Andersons*, D.J. Ref. 90-5-2-1-571.

The proposed consent decree may be examined at the office of the United States Attorney, Northern District of Ohio, 307 U.S. Courthouse, Toledo, Ohio 43624 and at the Region V Office of the Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604. Copies of the consent decree may be examined at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1517, Ninth Street and Pennsylvania Avenue, NW., Washington, DC 20530. A copy of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please enclose a check in the amount of $1.50 (10 cents per page reproduction cost) payable to the Treasurer of the United States.

F. Henry Habicht II,

Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Records Schedules

AGENCY: National Archives and Records Administration, Office of Records Administration.

ACTION: Notice of availability of proposed records schedules; request for comments.

SUMMARY: The National Archives and Records Administration (NARA) publishes a notice at least once monthly of all agency records schedules (requests for records disposition authority) which include records proposed for disposal. The first notice was published on April 1, 1985. Records schedules identify records of continuing value for eventual preservation in the National Archives of the United States and authorize agencies to dispose of records of temporary value. NARA invites public comment on proposed records disposals as required by 44 U.S.C. 3303a(a).

DATE: Comments must be received in writing on or before June 30, 1986.

ADDRESS: Address comments and requests for single copies of schedules identified in this notice to the Records Appraisal and Disposition Division (NIR), National Achives and Records Administration, Washington, DC 20408. Requesters must cite the control number assigned to each schedule when requesting a copy. The control number appears in parenthesis immediately after the title of the requesting agency.

SUPPLEMENTARY INFORMATION:

Each year U.S. government agencies created billions of records in the form of paper, film, magnetic tape, and other media. In order to control the accumulation of records, Federal agencies prepare records schedules which specify when the agency no longer needs them for current business and what happens to the records after the expiration of this period. Destruction of the records requires the approval of the Archivist of the United States, which is based on a thorough study of their potential value for future use. A few schedules are comprehensive; they list all the records of an agency or one of its major subdivisions. Most schedules cover only one office, or one program, or a few series of records, and many are updates of previously approved schedules.

This public notice identifies the Federal agencies and their appropriate subdivisions requesting disposition authority, includes a control number assigned to each schedule, and briefly identifies the records scheduled for disposal. The complete records schedule contains additional information about the records scheduled for disposal. The complete records schedule contains additional information about the records and their disposition. Additional information about the disposition process will be furnished with each copy of a records schedule requested.

Schedules Pending Approval

1. Department of Agriculture, Science and Education Division, Cooperative State Research Service (N1-164-86-1). Project case files, river basin reports, grant case files, working papers, and routine administrative records relating to house-keeping functions in the Office of Experiment Stations.

2. Department of Agriculture, Forest Service, Office of Information (NC1-95-84-6). Correspondence dealing with production of Forest Service publications and clearances; copies of Forest Service publications located in offices other than the originating office.

3. Department of the Air Force, Directorate of Administration (N1-AFU-86-42). Medical War Reserve Quality Assurance Records.

4. Department of the Air Force, Directorate of Administration (N1-AFU-86-45). Drug abuse testing program records.

5. Department of the Air Force, Directorate of Administration (N1-AFU-86-46). Daily Audit lists.

6. Department of the Army, Records Management Operations Office (N1-AU-86-33). Mapping work assignment files.

7. Department of the Army, Records Management Operations Office (N1-AU-86-34). Mapping production and reproduction control files.

8. Department of the Army, Records Management Operations Office (N1-AU-86-44). Map requisition files.

9. Department of the Army, Records Management Operations Office (N1-AU-86-46). Map stock level files.

10. Department of the Army, Records Management Operations Office (N1-AU-86-47). Map manuscript reproduction control files.

11. Department of Commerce, Bureau of the Census (NC1-29-84-3). Comprehensive schedule for the records of the Agriculture Division, Bureau of the Census.

12. U.S. Geological Survey, National Mapping Division (NC1-57-84-3). Photogrammetric drawings with annotated data that are reproduced on related printed maps.

13. Department of Housing and Urban Development, Office of Inspector General (NC1-207-85-1). Audits and investigation case files, general subject and program files, previous participation check files and ADP tracking systems.

14. Department of Justice, Federal Bureau of Investigation, Records Management Division (N1-65-86-23). Establishment of standards for transfer and custody of materials restricted by statute (tax return information, grand jury and Title III (wire-tap) materials) and found in permanently valuable investigative case files.

15. Department of Labor, Assistant Secretary for Policy, Evaluation and Research (N1-174-86-1). Machine readable records containing information on employment, unemployment, and benefit payments in Arizona and Pennsylvania during the period 1957-1972.

16. Department of the Navy, Commander Caribbean Sea Frontier, Movement Report Center (N1-313-86-4). Hydrographic Office charts annotated with ships position information.

17. Pennsylvania Avenue Development Corporation, Development Division and Real Estate Division (N1-220-86-1). Records relating to the management of real estate, including reports by property management consultants, correspondence, insurance documentation, and related materials.

Dated: April 24, 1986.

Claudine J. Weiher,

Acting Archivist of the United States.

BILLING CODE 7515-01-M

PACIFIC NORTHWEST ELECTRIC POWER AND CONSERVATION PLANNING COUNCIL

Northwest Conservation and Electric Power Plan 1986 Revision

AGENCY: Pacific Northwest Electric Power and Conservation Planning Council (Northwest Power Planning Council).

ACTION: Notice of revision of the Northwest Conservation and Electric Power Plan.

SUMMARY: The Northwest Power Planning Council is an interstate compact agency formed by the four northwest states under the Pacific Northwest Electric Power Planning and Conservation Act of 1980 (16 U.S.C. 839 (1980)) (Northwest Power Act or Act) for the purpose among others, of developing a 20-year electrical power plan that would ensure the lowest cost electrical energy future for the Pacific Northwest. On April 27, 1983, the Council adopted its first power plan. Although the Act requires the Council to review the plan at least every five years, because of ongoing changes in the regional energy picture and in order to incorporate the latest technology and analysis, the Council determined in the 1983 Plan to review the plan in two years. After several months of public discussion of issue papers on key matters that the Council circulated to interested persons in the region, the Council published a draft revised power plan for comment on August 7, 1985 (50 FR 37100-03, September 11, 1985) and thereafter held public hearings, consultations, and received public comments until the close of the comment period on October 25, 1985. The Council has also voted at its July 10, 1985 meeting to enter rulemaking to amend those portions of the 1983 Plan relating to model conservation standards (50 FR 30854-61, July 26, 1985; 50 FR 33435, August 19, 1985) and accepted comments in that rulemaking through October 23, 1985. Even though the comment periods for the 1986 Power Plan revision and the model conservation standards amendment rulemakings overlapped in large part, the two rulemakings were separate processes. The Council is incorporating the model conservation standards amendments which were adopted at its December 4, 1985 meeting in Portland Oregon. (51 FR 7364-75, March 3, 1985) into this revised plan. Therefore, certain technical non-substantial revisions to the model conservation standards amendments as first published will be made to conform the amendments to the format of this revised power plan.

FOR FURTHER INFORMATION CONTACT: Dulcy Mahar, Director of Public Information and Involvement, at Northwest Power Planning Council, 850 S.W. Broadway, Suite 1100, Portland, Oregon 97205, or at (503) 222-5161, or (toll-free) 1-800-222-3355 (in Montana, Idaho or Washington) or 1-800-452-2324 in Oregon. Copies of this notice and the final revised power plan will be mailed to all those who commented on the draft revised plan. Others may obtain copies upon request.

SUPPLEMENTARY INFORMATION:

Background

The 1983 Power Plan

The Northwest Power Act requires the Council to develop a 20-year regional electrical energy plan, to be carried out by the Bonneville Power Administration, to provide the most economical electrical energy future possible for the Pacific Northwest. In 1983, the Council published its initial 20-year power plan, (48 FR 24493, June 1, 1983).

The 1983 Plan introduced several innovations in the power planning process for the Northwest. First, the Council adopted a policy of range forecasting for estimating future demand for electricity, focusing not on a single predicted rate of growth, but rather on a range of four possible rates, from high to low. Second, the plan incorporated a resource portfolio comprised of energy resources selected in part for their flexibility, to reduce the risk of over or under-building. Third, conservation was chosen as the cornerstone of the region's energy future, based on the determination that it is both the least expensive and most flexible available resource. Finally, the 1983 Plan provided that any new resource development would have to be harmonized with the Council's parallel regional planning mandate, a program to protect, mitigate and enhance the Northwest fish and wildlife and other environmental concerns.

The Council voted on August 7, 1985 to enter rulemaking to amend the 1983 Plan and to release draft revised power plan for public comment. (50 FR 37100-03, September 11, 1985.) Hearings, advertised in the region's largest circulation newspapers, were held in each of the four states in the region and Council members and staff met in consultation with public utility commissions, utility groups, State and local government organizations, and citizen environmental groups. During the comment period, the Northwest Public Power Association sponsored a two-day Draft Power Workshop, featuring four members of the Council, the Council's executive director, staff members, and representatives from utilities, state energy offices, local governments, industries and conservation groups. Finally, in November and December, the Council held a series of meetings open to the public at which important issues raised by the draft plan were discussed and resolved.

Differences in the 1986 Power Plan

The principal differences in the 1986 Plan reflect changed conditions and trends in the Northwest. The surplus that the 1983 Plan identified is now viewed as more expensive and longer lasting than previously expected. Economic growth in the Northwest has been slower than in the rest of the country and electrical demand has grown at a proportionally slower rate. Experience since 1983 has also shown that the surplus is unevenly distributed: Public utilities served by Bonneville appear to have a long term surplus, while some investor owned utilities (IOUs) serving the highest growth areas may require new resources in the very near future. The 1983 Plan expected that Bonneville would lead and unify the region in acquiring new resources. In fact, the region has grown yet more decentralized, with Bonneville supplying less than half the region, primarily the public utility customers and direct service industries. The 1986 Plan calls on Bonneville to develop a predictable, new resource rate as an incentive to bring about better cooperation among the region's utilities. The 1986 Plan also calls for a coordinated approach to resource acquisition for all utilities. Central to the revised power plan approach is regional cooperation, calling for regional sharing of resources such as conservation and better use of the existing hydropower system, as well as equitable sharing of cost allocations for resources and resource options.

The 1986 Plan also focuses on increased uncertainties that have arisen since the 1983 Plan. Chief among these are the future of the direct service industries (DSIs), the future of the region's two partially completed nuclear plants and the future of power sales and purchases outside the region, chiefly in California. The DSIs use about 15% of the region's electrical power, should they leave the Northwest, the cost-effectiveness of completing the

VOL 51 ISS 84 MY 1 1986 UMI

unfinished nuclear plants would be dramatically affected. In 1983, the Council assumed that Washington Public Power Supply System Nuclear Projects (WNP) 1, 2, and 3 would be completed and therefore considered these plants among existing and soon-to-be-completed resources. Only WNP 2 was finished. WNP 1 and 3 were omitted from the 1986 portfolio because of legal and financial barriers that render the future of the plants too uncertain to meet the "reliable and available" criterion required by the Northwest Power Act for inclusion in the portfolio. The 1986 Plan regards the plants as potential options and encourages resolution of the barriers to their completion, since they would be cost-effective should the power be needed.

The 1986 Plan also reduces significantly the estimate of available hydropower. The 1983 Plan called for 920 megawatts of new hydropower in the high forecast; the 1986 Plan considers only 200 megawatts available. This figure is based on only that hydropower that could be achieved by upgrading existing sites. The region's hydropower assessment study will be completed later in 1986, establishing which sites are acceptable for development, until then, no new hydropower sites are included in the plan.

Strategies to make better use of the existing hydropower system is a 700 megawatt resource that appears for the first time in the 1986 portfolio. This significant source of power would be used to supply firm loads in the Northwest. The hydropower system currently uses the amount of hydropower available in historic low water years to meet firm, or contractual, power loads. In an average water year, however, the system generates 4,100 additional megawatts, termed "nonfirm" because they cannot be counted on every year. The 1986 Plan calls for exploring a number of strategies to back up this nonfirm power, thus increasing the amount of firm power that could be sold in the Northwest.

The 1986 Plan also reduces the amount of conservation available by almost 1,000 megawatts. The region's slow economic growth means that fewer new buildings will be built. If building activity is reduced, the opportunities for conservation are proportionally decreased. The Council also omitted structures that have been weatherized since 1983, thereby further reducing the amount of available conservation.

The 1986 Plan has adopted a new approach in setting out the activities Bonneville is called upon to perform in carrying out its responsibilities under the plan. In 1983, the plan contained an Action Plan that listed in considerable detail the actions that Bonneville was meant to implement. In the 1986 Plan, the Action Plan establishes goals and objectives and particular activities that Bonneville must accomplish if the region is to achieve its lowest cost energy future, but gives Bonneville greater flexibility in how it will meet these obligations. The Action Plan calls upon Bonneville to develop work plans designed to meet the goals and objectives and to brief the Council on its progress.

Description of the 1986 Power Plan

After considering the public comments received the Council voted to adopt the final revised plan at its January 23, 1986 meeting in Portland, Oregon. A summary of the revised plan is provided below. The revised plan itself consists of two volumes. Volume I contains the planning strategy, important regional power issues, lowest cost mix and schedules for new resources acquisitions, and the Action Plan that the region needs to follow to ensure an adequate and reliable supply of electricity at the lowest cost. Volume II is the technical analysis and supporting materials for the policy decisions presented in Volume I. Copies of Volumes I and II of the power plan will be mailed to all those who commented on the draft plan. They are available to others upon request through the Council's Director of Public Information as noted above.

Summary of the 1986 Plan

The new plan emphasizes the following priorities. Specific activities to achieve these objectives are outlined in the Action Plan.

- Securing "lost opportunity" resources: Lost opportunity resources are cost-effective resources, if not developed now, could be lost forever to the region. The most prominent example is found in the Model Conservation Standards for new buildings. If buildings are not constructed to be energy efficient now, they will continue to use electricity inefficiently long after the surplus is over.
- Promoting a stronger regional role for the Bonneville Power Admininstration: The Council is calling on Bonneville to take a more aggressive role in forging regional cooperation. The Council points in particular to the need for Bonneville to develop a predictable rate for new resources so that investor-owned utilities will have an incentive to turn to Bonneville for power as an alternative to developing more expensive resources on their own.
- Developing conservation on a regional basis: The plan calls for the sharing of conservation costs and benefits among utilities.
- Strategies to make better use of the hydropower system: See the Resource Portfolio section below.
- Building conservation capability in all sectors: While there is a current surplus of power, the Council wants conservation programs to the developed and tested so that they can come on line when they are needed.
- Demonstrating the cost effectiveness of renewable resources (wind, geothermal, solar) so they will be available before the region has to build new thermal generating resources.
- Allocating the costs of preserving the two unfinished nuclear plants and removing barriers to their preservation and completion.
- Studying electrical power sales and purchases between regions.

The Council's Planning Strategy

The plan includes a forecast range of future electrical power needs over the next 20 years and a portfolio of new electrical energy resources to meet those needs. The portfolio of new resources specifies the types and amounts of resources that will be needed, and provides a schedule for bringing those resources into service to meet growth in the Northwest.

To minimize the risk of either under- or overbuilding resources, the Council uses a range of forecasts from low to high growth, rather than a single forecast. Because resources are selected for their flexibility they can be developed in increments and brought into service at different times, depending on where growth falls within the forecast range. Under the Council's plan, the region should be prepared to meet a wide range of electrical use over the next 20 years.

At the low end of the forecast range (annual demand growth rate of 0.2 percent), the region would continue with a power surplus over the next 20 years, and conservation could meet all the region's new electrical energy needs. At the high end of the range (annual demand growth rate of 2.7 percent), the region would consume the surplus by 1990, when it would need new resources. In the case of extreme high growth, the region could need as many as 12 new coal plants by the end of the 20-year planning period. Where the region falls between these two extremes will depend largely on its economic growth. The range represents an 11,000 megawatt spread between the two extremes.

The Council's power plan places heavy emphasis on managing risk in order to protect the Northwest's energy supply and to reduce the costs to ratepayers. On one extreme, the risk is an inadequate supply of electricity. The risk on the other end of the spectrum is overbuilding thermal resources, coal and nuclear plants, so that ratepayers are paying for expensive resources they do not need.

The Council's power plan emphasizes energy conservation, flexible resources, and resource "options" to minimize risk. For example, resources that can be developed in increments or resources that have shorter construction lead times are preferred because they can match electrical energy needs more closely. The options concepts gives energy planners two decision points before they commit huge sums of money to construct a new resource. A resource can be taken through the relatively inexpensive but time-consuming stages of design, siting and licensing, then held in reserve as an option until it is needed. When it is needed, the resource can begin construction. If it is not needed, it can be delayed or terminated.

The Resource Portfolio

To be included in the portfolio, a resource must be available, reliable, and its environmental impacts must be controllable and acceptable. New resources are to be brought on line in a specific sequence as the region's power demand grows: the most cost effective are used first and are listed in that order. The megawatt figures following each resource indicate the total amount of that resource the Council has identified as available and reliable in the highest power demand forecast. Lesser amounts of the resource would be used for lower growth in demand.

- *Conservation: 3,900 megawatts.* The Council treats conservation as the equivalent of a generating resource because each megawatt of energy saved is a megawatt that does not need to be produced to serve Northwest electrical power needs. Less conservation is available with lower growth because fewer new buildings are constructed. Conservation is called for in all sectors: Residential, commercial, governmental, industrial and agricultural. The model conservation standards for new buildings, if adopted regionwide, would cover all the region's new electrical power needs if growth proceeds at the low end of the forecast range.
- *Better use of the existing hydropower system: 700 megawatts.* Energy planners estimate the amount of hydropower available based on an historic low water year, which is called the critical water standard. The hydropower produced up to the critical water standard is called firm power because it can be counted on. An average water year, however, produces a third more power, and good water years can nearly double the hydropower available. This additional hydropower is called nonfirm power because its availability depends on the weather.

The Council has identified 700 megawatts of nonfirm power that could be cost effectively "firmed up," that is, backed up with other power sources, to meet the Northwest's firm power needs. Because the surplus provides time to plan, the Council is calling on the region to explore strategies to expand the use of the Northwest's existing hydropower system, which produces electricity at a fraction of the cost of electricity generated at new thermal plants. While the Council is not recommending a particular strategy at this time, possibilities include using combustion turbines, short-term power purchases from Canada or other parts of the U.S., or load-management policies that would more closely match the region's power loads with the output of the hydropower system.

- *Hydropower: 200 megawatts.* The Council has included only new hydropower available through improvements and upgrades at existing hydropower sites. No new sites will be included until the Council completes a regionwide assessment of potential hydropower sites and their impact on the environment. This study will be used to designate areas that should be protected.
- *Cogeneration: 320 megawatts.* Congeneration is the simultaneous production of electricity and other useful heat energy from a fuel source. Often, it involves the recovery of "waste" energy from various industrial and commercial applications. This energy is typically used for industrial processes or space heating applications. There is considerable uncertainty over the amount and cost of the cogeneration potential in the region, and the Council based its estimate on a survey of Northwest industrial companies conducted by the Pacific Northwest Utilities Conference Committee.
- *Coal: 5,425 megawatts (12 plants).* Coal is the last and most expensive resource to come on line and would be used only if high growth made it necessary. Needing all 12 plants would require unprecedented high growth. The plan calls for intensified research and testing of renewable energy resources so that they can be ready and cost effective before the region needs to turn to some or all of the coal plants.

Response to Comments

In the course of the comment period on the draft revised power plan, the Council received written and oral comments from approximately 150 different groups and individuals. Verbatim transcripts of oral comments presented at public hearings amounted to approximately 1,180 pages. Two hundred twelve written comments were received, ranging in length from a single page to volumes of more than 250 pages, including a legislative style mark up of the plan. Summaries of all significant public comments received during the public comment period and the Council's responses to them are incorporated by reference in this notice. The Council's summaries and responses are available from the Public Information and Involvement Division at the address and telephone numbers listed in this notice.

Legal Effect of This Notice

The Act provides that suits seeking judicial review of final amendments to the power plan must be filed on or before June 30, 1986 (16 U.S.C. 839(e)(5)).

Edward Sheets,

Executive Director.

BILLING CODE 0000-00-M

PRESIDENTIAL COMMISSION ON THE SPACE SHUTTLE CHALLENGER ACCIDENT

[Notice 86-33]

Meeting

AGENCY: Presidential Commission on the Space Shuttle Challenger Accident.

ACTION: Notice of meeting

SUMMARY: In Accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the Commission announces the forthcoming meeting.

DATE AND TIME: May 2, 1986, beginning at 9:30 a.m.

ADDRESS: Old Executive Office Building, Pennsylvania Avenue and 17th Street NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Dr. Alton G. Keel, Executive Director, Presidential Commission on the Space Shuttle Challenger Accident (202/453-1797).

Purpose of Meeting: To obtain further information on the history of the Solid Rocket Booster joint problems.

SUPPLEMENTARY INFORMATION: The Presidential Commission on the Space Shuttle Challenger Accident was

VOL 51 ISS 84 MY 1 1986 UMI

established as a group of distinguished leaders of the government and the scientific, technical and management communities to investigate the accident of the Space Shuttle Challenger which occurred on January 28, 1986. The meeting will be closed to the public pursuant to 5 U.S.C. 552b(c)(9)(B) because the nature of the meeting is likely to disclose information if disclosed prematurely would be likely to significant frustrate implementation of proposed action by the Commission.

Exceptional circumstances requiring less than 15 days notice: The meeting was required to be held promptly due to the Presidential direction that the Commission investigate the January 28, 1986, Space Shuttle Challenger accident and submit a final report to the President and the Administrator of the National Aeronautics and Space Administration within 120 days of issuance of Executive Order 12546, dated February 3, 1986.

Dated: April 28, 1986.

Richard L. Daniels,

Advisory Committee Management Officer, National Aeronautics and Space Administration.

BILLING CODE 7510-01-M

POSTAL SERVICE

Privacy Act of 1974; Matching Program—Postal Service/State of Missouri Department of Social Services

AGENCY: Postal Service.

ACTION: Notice of Computer Matching Program—U.S. Postal Service/State of Missouri Department of Social Services.

SUMMARY: The purpose of this document is to publish notice of the Postal Service's plan to conduct a computer matching program through a comparison of its "Payroll System File" (USPS 050.020, Finance Records—Payroll System) with the Missouri Department of Social Services' (M–DSS) file of absent parents who are legally obligated by judicial or administrative order to pay child support to children receiving social services in Missouri and absent parents on whom such a support order could be entered if their location and/or financial resources were known.

DATE: It is anticipated that the match will begin on or about May 15, 1986.

ADDRESS: Send any comments to Records Officer, Room 8121, U.S. Postal Service, 475 L'Enfant Plaza, SW., Washington, DC 20260–5010. Copies of all written comments will be available for inspection and photocopying between 9:00 a.m. and 4:00 p.m., Monday through Friday, in Room 8121 at the above address.

FOR FURTHER INFORMATION CONTACT: Betty E. Sheriff, Records Office (202) 268–5158.

SUPPLEMENTARY INFORMATION: At the request of the M–DSS, the USPS has agreed to assist the M–DSS in its efforts to locate postal employees who are absent parents against whom the M–DSS is enforcing or seeking to enforce a child support obligation. Set forth below is the information required by paragraph 5.f.(1) of the Revised Supplemental Guidance for Conducting Computerized Matching Programs issued by the Office of Management and Budget (47 FR 21656; May 19, 1982). A copy of this notice has been provided to both Houses of Congress and the Office of Management and Budget.

Report of a Matching Program: U.S. Postal Service (USPS) and Missouri Department of Social Services (M–DSS).

a. *Authority:* 39 U.S.C. 404.

b. *Program Description:* Under the planned program, the M–DSS will provide to the USPS a computer tape of its absent parents who are legally obligated by judicial or administrative order to pay child support, and absent parents on whom a support order could be entered if their location and/or financial resources were known. The USPS will match that tape, using name and Social Security Account Number (SSAN), against its Payroll System file of employees. The purpose of this match is to identify current postal employees who are absent parents of, and have support obligations to, children receiving services in Missouri under Title IV–D of the Social Security Act. In instances where employee SSANs match, i.e., "hits," the USPS will disclose to the M–DSS the following information from its payroll file: Name, SSAN, date of birth, home address, facility where employed and annual gross wage information.

The validity of "matched" employee/absent parent information will be verified by the Division of Child Support Enforcement, M–DSS. Subsequent actions may include further investigation, and, if appropriate, entry of an administrative order or a judicial order, order to withhold earnings, wage assignment, garnishment, or attachment and property liens. Further, the USPS Inspection Service may participate in the investigation of hits as a result of this matching program and establish investigative cases files within the parameters of Privacy Act system USPS 080.010, "Inspection Requirements Investigative File System" (last published in 48 FR 10975 of March 15, 1983). Disclosure of this information is authorized by routine use Nos. 25 and 28 in USPS 050.020, Payroll System, most recently published in 50 FR 28862 of July 16, 1985.

c. *Period of the Match:* The matching program will be on a one-time basis and is expected to begin in May 1986 and end no later than December 1987.

d. *Security:* The USPS personnel who perform the match will: (a) Have the only USPS access to the M–DSS computer tape; (b) use it for the purpose of the match and for no other purpose; and (c) safeguard it from unauthorized access. Likewise, the postal employee information disclosed to M–DSS will be used by authorized M–DSS personnel only for the purpose of the match and for no other purpose and will be safeguarded from unauthorized access. All information exchanged as a result of this matching project will be maintaind in locked file areas when not in use.

e. *Disposition of Records:* The USPS will not retain or copy the tape provided by the M–DSS and will return it to the M–DSS within six months from the date of its receipt. All information compiled as a result of this matching effort must be destroyed as soon as the determination is made that no illegality has occurred.

f. *Further Comments:* No bestowed rights, privileges, or benefits will be terminated solely on the basis of a "hit" or the records provided by the USPS in connection with this program.

Fred Eggleston,

Assistant General Counsel, Legislative Division.

RAILROAD RETIREMENT BOARD

Agency Forms Submitted for OMB Review

AGENCY: Railroad Retirement Board.

ACTION: In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the Board has submitted the following proposal(s) for the collection of information to the Office of Management and Budget for review and approval.

Summary of proposal(s):

(1) Collection title: Public Service Pension Questionnaire
(2) Form(s) submitted: G–206
(3) Type of request: Revision of a currently approved collection
(4) Frequency of use: On occasion
(5) Respondents: Individuals or households
(6) Annual responses: 10,000
(7) Annual reporting hours: 833
(8) Collection description: A spouse of survivor annuity under the RR Act may be subjected to a reduction for a public service pension. The questionnaire obtains the information needed to determine if the reduction applies and the amount of such reduction.

Additional information or comments: Copies of the proposed forms and supporting documents may be obtained from Pauline Lohens, the agency clearance officer (312–751–4692). Comments regarding the information collection should be addressed to Pauline Lohens, Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611 and the OMB reviewer, Judy McIntosh (202–395–6880), Office of Management and Budget, Room 3208, New Executive Office Building, Washington, DC 20503.

Pauline Lohens,

Director of Information and Data Management.

SECURITIES AND EXCHANGE COMMISSION

[Holding Company Act Release No. 24067; Administrative Proceeding File No. 3–6649; 70–7112]

The Columbia Gas System, Inc. and TriStar Gas Marketing, Inc.; Notice of and Order for Hearing on Proposed Financing of Newly Organized Nonutility Subsidiary

April 22, 1986.

The Columbia Gas System, Inc. ("Columbia"), 20 Montchanin Road, Wilmington, Delaware 19807, a registered holding company, and its newly organized subsidiary company, TriStar Gas Marketing, Inc. ("TriStar"), 1600 Dublin Road, Columbus, Ohio, have filed an application-declaration with this Commission pursuant to sections 6(a), 7, 9(a), 10, and 12(b) of the Public Utility Holding Company Act of 1935 ("Act") and Rule 45 promulgated thereunder. Notice of the filing of said application-declaration was given by the Commission on June 20, 1985 (HCAR No. 23737). Requests for a hearing were filed by the Office of Consumers' Counsel, State of Ohio ("OCCO"), and Vescorp Industries ("Vescorp").

TriStar was organized under the laws of Delaware on April 22, 1985, and its authorized capital is $20 million, consisting of 800,000 shares of common stock $25 par value per share. TriStar does not have any issued securities or outstanding capital. It is stated that the availability of deregulated gas and the general surplus of gas supplies in general over the last few years have created a growing spot market which was virtually non-existent two years ago. It is proposed that TriStar would participate in this new aspect of the natural gas industry by offering both local distribution companies and end-use customers an array of marketing services related to the acquisition, sale, exchange, and transportation of a variety of spot market and other gas supplies. TriStar would be staffed with a group of full-time employees who possess experience and expertise in gas marketing, transportation and exchange, procurement, finance, and law. The initial staff would total 10–15 persons inclusive of clerical and secretarial support. Accounting and other services would be procured through the system service corporation or, if not available there, through outside contractors. TriStar may sell spot-market gas to Columbia's distribution subsidiaries, but it will not provide services to nor act as an agent for the distribution companies for a fee without prior approval of this Commission.

For initial start-up costs and capital needs, it is estimated that TriStar will require up to $5 million. It proposed that these funds be provided by the issuance and sale by TriStar, and the acquisition by Columbia, of up to 200,000 shares of TriStar common stock, par value $25 per share, for a total initial capital of $5 million.

In addition, TriStar may require short-term funds of up to $15 million for the purpose of purchasing gas on the spot market for resale to end-users or local distribution companies. Accordingly, TriStar proposes to issue up to $15 million of short-term notes outstanding at any one time to commercial lenders. The notes will be for a term not in excess of 360 days and will bear interest at a rate not in excess of the prime rate in effect at the commercial lender at the time of the issuance of each note. Columbia proposes to guarantee such notes if necessary.

Finally, Columbia proposes to make open account advances of up to $15 million to TriStar, provided, however, that the open account advances will not be made if TriStar can borrow funds from nonassociated lenders on reasonable terms with Columbia's guarantee. If made, the advances will bear interest at a rate equal to Columbia's effective cost of short-term funds and will be repaid as gas is sold, but in any event, no later than 360 days following the date of the advance.

It appears to the Commission that it is appropriate in the public interest and in the interest of investors and consumers that a public hearing be held with respect to the proposed transactions and that interested persons be afforded an opportunity to be heard at such hearing with respect to such matters. Accordingly,

It is ordered, pursuant to section 19 of the Act, that a hearing be held on the application-declaration under the applicable provisions of the Act and the Rules of the Commission at a time and place to be fixed by further order as provided by Rule 6 of the Commission's Rules of Practice (17 CFR 201.6), and that an Administrative Law Judge to be designated by further order preside at said hearing. Any person, other than Columbia and TriStar, desiring to be heard or otherwise wishing to participate in that proceeding is directed to file with the Secretary of the Commission, on or before May 21, 1986, an application as provided by Rule 9 of the Commission's Rules of Practice (17 CFR 201.9), setting forth the nature and extent of his interest in the proceeding and any issues which he deems raised by this Notice and Order or by said application. A copy of that request shall be served personally upon Columbia and TriStar at the addresses noted above, and proof of such service (by affidavit or, in case of an attorney at law, by certificate) shall be filed contemporaneously with the request. Persons filing an application to participate or to be heard will receive notice of the date and place of the hearing and any adjournments thereof, as well as of other actions of the Commission involving the subject matter of this proceeding.

The Division of Investment Management has advised the Commission that it has made an examination of the application-declaration, the requests for hearing, and the responses to those requests by Columbia and that, upon the basis thereof, the following matters and questions are presented for consideration without prejudice to the Commission's specifying additional matters and questions upon further examination:

(1) Whether the proposed issuance and sale by TriStar of its common stock to Columbia and its notes to commercial lenders meet the standards of section 7 of the Act, particularly subsections (c) and (d).

(2) Whether the proposed acquisition of TriStar's common stock by Columbia

VOL 51 ISS 84 MY 1 1986 UMI

meets the standards of section 10 of the Act, particularly subsections (b) and (c).

(3) Whether the proposed open account advances by Columbia to TriStar should be approved under section 12(b) of the Act and Rule 45 thereunder.

(4) What terms or conditions, if any, the Commission should impose if the proposed transactions are approved.

(5) Generally, whether the proposed transactions are in all respects compatible with the provisions and standards of the applicable sections of the Act and of the rules promulgated thereunder.

It is further ordered that in the aforesaid hearing attention should be given to the foregoing matters.

It is further ordered that the Division of Investment Management shall be a party to the proceedings.

It is further ordered that the Secretary of the Commission shall give notice of the aforesaid hearing by mailing copies of this Notice and Order by certified mail to Columbia and TriStar at the addresses noted above and to OCCO and Vescorp; that notice to all other persons be given by publication of this Notice and Order in the **Federal Register**; that a copy of this Notice and Order shall be published in the "SEC Docket"; and that an announcement of the aforesaid hearing shall be included in the "SEC News Digest."

By the Commission.

Shirley E. Hollis,

Assistant Secretary.

[FR Doc. 86-9759 Filed 4-30-86; 8:45 am]

BILLING CODE 8010-01-M

[Release No. IC-15069; File No. 811-3204]

Liquidity Management Group—Short-Term Trust; Application Declaring That Applicant Has Ceased To Be an Investment Company

April 24, 1986.

Notice is hereby given that Liquidity Management Group—Short-Term Trust ("Applicant"), 3390 West 86th Street, Indianapolis, Indiana 46268, registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified, management investment company, filed an application on April 7, 1986, for an order of the Commission pursuant to section 8(f) of the Act, declaring that Applicant has ceased to be an investment company. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act and rules thereunder for the applicable provisions thereof.

According to the application, Applicant's net assets decreased substantially during 1984 and in December 1984, virtually all of the unitholders voluntarily redeemed their units at the net asset value per unit of $1.00. Applicant states that as of July 25, 1985, there were 100 units outstanding with a net asset value of $1.00. Applicant's board of trustees recommended the liquidation of Applicant to its sole unitholder who owned the 100 units of beneficial interest on July 26, 1985. Applicant states that a unanimous consent of its sole unitholder approving the termination of Applicant was executed on July 26, 1985, and Applicant was dissolved under Indiana state law on March 17, 1986.

Applicant states that all of its portfolio investments matured on July 26, 1985, the date of liquidation. Applicant represents that it does not propose to engage in any business activities other than those necessary for the winding up of its affairs. Applicant further represents that it has retained no assets, no debts or other liabilities, and that it is not a party to any litigation or administrative proceeding. Finally, Applicant states that it has not within the past 18 months transferred any of its assets to a separate trust.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than May 16, 1986, at 5:30 p.m., do so by submitting a written request setting forth the nature of the interest, the reasons for the request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, DC 20549. A copy of the request should be served personally or by mail upon Applicant(s) at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

John Wheeler,

Secretary.

[FR Doc. 86-9760 Filed 4-30-86; 8:45 am]

BILLING CODE 8010-01-M

[Release No. IC-15072; File No. 812-6323]

MetLife—State Street Equity Trust; Filing Contingent Deferred Sales Charge Application

April 24, 1986.

Notice is hereby given that MetLife—State Street Equity Trust (the "Trust" or "Applicant") One Financial Center, Boston, Massachusetts 02111, filed an application on March 25, 1986, for an order, pursuant to section 6(c) of the Investment Company Act of 1940 (the "Act"), exempting Applicant and all of its future series from the provisions of sections 2(a)(32), 2(a)(35), 22(c) and 22(d) of the Act and Rule 22c-1 thereunder to the extent necessary to permit the assessment and waiver of a contingent deferred sales charge. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act and the rules thereunder for the applicable provisions thereof.

Applicant represents that it is an open-end, diversified, management investment company organized as a business trust under the laws of the Commonwealth of Massachusetts. Applicant states that its investment adviser, principal underwriter and distributor will be MetLife—State Street Investment Services, Inc. ("Distributor"), a wholly-owned subsidiary of State Street Research & Management Company ("State Street"), which is a wholly-owned indirect subsidiary of Metropolitan Life Insurance Company. Applicant further states that the Distributor will receive the proceeds of each contingent deferred sales charge.

Applicant states that it is presently comprised of three portfolio series and that its Trustees have authority to create additional porfolio series at any time in the future without shareholder approval. Applicant states that its Trustees from time to time may consider whether it would be in Applicant's best interests to offer one or more new series of Applicant's shares to the public. Applicant states further that it may change the sales load and/or contingent deferred sales charge imposed by it, provided that the aggregate of such sales load and contingent deferred sales charge shall not exceed applicable limitations imposed by the National Association of Securities Dealers, Inc. (Portfolio series subject hereto are sometimes referred to as a "Fund").

Applicant represents that (i) an initial sales charge of 2% generally will be imposed upon purchases of shares of the Trust of less than $500,000, an initial sales charge of 1% generally will be imposed upon purchases of shares of the Trust from $500,000 to $4,000,000, and no initial sales charge will be imposed upon purchases of shares of the Trust in excess of $4,000,000; (ii) the full amount of the applicable sales charge will be reallowed by the Distributor to the securities dealer responsible for each sale; (iii) the Distributor will also pay the securities dealer a supplemental 2% commission on any sale regardless of the amount involved; and (iv) Applicant will adopt a Distribution Plan pursuant to Rule 12b-1 of the Act under which each of its Funds will make monthly payments to the Distributor at the annual rate of 0.75% of the average daily value of its assets. In its periodic review of the proposed Distribution Plan pursuant to Rule 12b-1, the Trust's Board of Trustees will consider, among other things, the effect of the contingent deferred sales charge. In addition, Applicant states that certain redemptions of shares during the first four years following purchase, whether by direct request to the Trust or through a securities dealer acting as principal or agent pursuant to the share repurchase arrangements offered by the Trust and its authorized securities dealers, generally will be subject to a contingent deferred sales charge of up to 2.5%, depending on how long the redeemed shares have been held.

Applicant represents that no contingent deferred sales charge will be imposed by the Trust on redemptions of (a) shares redeemed as a result of exercising an exchange privilege except in connection with exchanges into any Fund managed by the Distributor which does not impose a sales charge, (b) shares acquired through reinvestment of dividends or distributions fromn a Fund, and (c) that number of shares of a Fund which have a value equivalent to the net appreciation of shares of that Fund purchased by the redeeming shareholder within the prior four years. Applicant further represents that the contingent deferred sales charge paid by an investor who reinvests some or all of the proceeds received from the redemption or repurchase of shares of a Fund within 30 days in any other load fund managed by the Distributor will be refunded in whole or in part, depending upon the amount reinvested. Applicant represents that in effecting any redemption the Trust will redeem those shares held longest by a shareholder, and that shares received by virtue of exercising the exchange privilege or upon a transfer (including any transfer to a securities dealer in connection with a repurchase) will be deemed to have been held for as long as the shares exchanged or transferred.

Applicant asserts that the amount of the contingent deferred sales charge, if any, will be calculated by determining the holding period of the redeemed shares which are subject to the charge, and applying the appropriate percentage to the lesser of (a) the initial purchase price of such shares or (b) the net asset value of such shares at the time of redemption. For ease of administration in calculating the contingent deferred sales charge, all purchases of shares will be deemed to have been made on the last day of the month of purchase.

Applicant states that when the contingent deferred sales charge is imposed, the amount of the charge will be 2.5% if the redemption occurs during the twelve-month period following the date upon which the shares being redeemed were purchased; 2% if the redemption occurs during the next twelve-month period; 1.5% if the redemption occurs during the third twelve-month period; and 1.0% if the redemption occurs during the fourth twelve-month period. If the redemption occurs during the fifth or any subsequent year following the date of purchase, no contingent deferred sales charge will be imposed.

Applicant asserts that no initial sales charge or contingent deferred sales charge will be imposed in connection with the sale of shares to, and the redemption of shares by, officers, directors, trustees, employees and sales representatives of the Trust, the Distributor, State Street, or of any selected dealer engaged in the sale of shares of the Funds, or any spouse or minor child of the foregoing (or a trust established for the benefit of such a spouse or minor child), provided that each such purchaser must submit to the Trust at the time of purchase a written assurance that such purchase is being made for investment and that the shares purchased will not be resold except through redemption.

Applicant submits that the proposed waiver of the contingent deferred sales charge under the circumstances described above will not harm Applicant or its remaining shareholders or unfairly discriminate among shareholders or purchasers. Applicant further intends to fully disclose the waiver provisions in its prospectus and to advise existing shareholders of any future variations of the contingent deferred sales charge within one year of the date when that variation is first made available to purchasers of the Applicant's shares, and the waiver provisions will be applied uniformly to specified classes of investors or transactions. Thus, the Applicant submits that it is in compliance with Rule 22d-1 under the Act.

Applicant contends that the proposed contingent deferred sales charge is consistent with all provisions of the Act, is fair and in the best interests of shareholders. Applicant further submits that the exemptions it requests are appropriate in the public interest, and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than May 16, 1986, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, DC 20549. A copy of the request should be served personally or by mail upon Applicant(s) at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

John Wheeler,

Secretary.

BILLING CODE 8010-01-M

Issuer Delisting; Application To Withdraw From Listing and Registration; MGM/UA Entertainment Co. (now Doing Business as MGM Entertainment Co.) (10% Senior Subordinated Notes (the "MGM Notes") due 1993) [File No. 1-7926]

April 25, 1986.

The above named issuer has filed an application with the Securities and Exchange Commission pursuant to section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d2-2(d) promulgated thereunder, to withdraw the specified security from listing and registration on the New York Stock Exchange, Inc. ("NYSE").

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

VOL 51 ISS 84 MY 1 1986 UMI

There are currently 78 holders of MGM Notes, and $368,794,000 aggregate principal amount of the MGM Notes is outstanding. Turner Broadcasting System, Inc., the Company's parent, holds $343,797,000 aggregate principal amount of the MGM Notes. In addition, approximately $50,000,000 aggregate principal amount of the MGM Notes is expected to be surrendered in connection with the exercise of warrants (the "Warrants") to purchase the common stock of MGM/UA Entertainment Co. After the exercise of the Warrants, approximately $5,000,000 aggregate principal amount of the MGM Notes will remain publicly held.

Any interested person may, on or before May 15, 1986, submit by letter to the Secretary of the Securities and Exchange Commission, Washington, DC 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchange and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

John Wheeler,

Secretary.

[FR Doc. 86-9762 Filed 4-30-86; 8:45 am]

BILLING CODE 8010-01-M

[Released No. 35-24070]

Filings Under the Public Utility Holding Company Act of 1935 ("Act")

April 24, 1986.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendment(s) thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by May 19, 1986 to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the addresses specified below. Proof of service (by affidavit, or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

Mississippi Power & Light Company (70-7189)

Mississippi Power & Light Company ("MP&L"), Electric Building, Jackson, Mississippi 39201, a subsidiary of Middle South Utilities, Inc., a registered holding company, has filed a post-effective amendment, pursuant to sections 6(a), 6(b) and 7 of the Act, to the previously filed joint application-declaration.

By order dated December 30, 1985 (HCAR No. 23867), MP&L was, among other things, authorized to issue and sell notes ("Notes") in the aggregate principal amount of up to $75.2 million at any one time outstanding to commercial banks in its service territory ("Territorial Banks") through December 31, 1986. Pursuant to that authority, MP&L has entered into agreements with three Territorial Banks for credit lines totaling $30 million. All terms will be the same as authorized in the prior order, except that MP&L requests authority to maintain compensating balances, and to issue and sell Notes that will bear interest at an annual rate of ½ of 1% over Prime.

Massachusetts Electric Company et al. (70-7208)

New England Electric System, a registered holding company, and certain of its subsidiary companies, Massachusetts Electric Company ("Mass Electric"), New England Power Company, New England Power Service Company, all of 25 Research Drive, Westborough, Massachusetts 01582, Granite State Electric Company, 33 West Lebanon Road, Lebanon, New Hampshire 03766, and The Narragansett Electric Company, 280 Melrose Street, Providence, Rhode Island 02901, have filed an application-declaration pursuant to sections 6(a), 7, 9(a), 10, 12(b), and 12(c) of the Act and Rules 42, 45, and 50 promulgated thereunder.

Mass Electric proposes (i) to acquire and retire, through September 30, 1987, any or all of its outstanding First Mortgage Bonds, Series O, 12⅛%, due October 1, 2012, (ii) to issue and sell, through December 31, 1987, not exceeding $25,000,000 principal amount of First Mortgage Bonds, Series P, and (iii) to increase its authorization for short-term borrowing, consisting of notes to banks, commercial paper, and advances from the system money pool (File No. 70-7088), from $30 million to $59 million until the sale of Series P Bonds is completed. The price to be paid for the Series O Bonds will not exceed 116% of the principal amount outstanding, currently $25,000,000, plus accrued interest. The Series P Bonds will be sold pursuant to competitive bidding under Rule 50 or in accordance with the alternative procedures contained in HCAR NO. 22823 (September 2, 1982). It is indicated, however, that an exception from competitive bidding may be requested to allow for a negotiated public offering or a private placement.

The Narragansett Electric Company (70-7207)

The Narragansett Electric Company ("Narragansett"), 280 Melrose Street, Providence, Rhode Island 02901, a wholly owned, electric utility subsidiary of New England Electric System, a registered holding company, has filed an application-declaration pursuant to sections 6(b), 9(a), 10, and 12(b) of the Act and Rules 42 and 50 promulgated thereunder.

Narragansett plans to acquire or redeem any or all of its outstanding First Mortgage Bonds, Series J, N, O, and P through December 31, 1987, and seeks the requisite authorization therefor. Such bonds aggregate $73.7 million. In order to finance the acquisitions and redemptions, Narragansett proposes to issue and sell one or more series of first mortgage bonds in an aggregate principal amount not exceeding $75 million. The Series J Bonds may be redeemed at the current redemption price. The Series N, O, and P Bonds are subject to a five-year freeze on redemption with funds borrowed at a lower effective interest cost and would be acquired through a tender offer. (The Series N Bonds may be redeemed without restriction after January 31, 1987.) The purchase price of the Series N, O, and P Bonds will not exceed 119%, 117.75%, and 116.25%, respectively, of the principal amount of these bonds, plus accrued interest to the settlement date of the offer. The proposed new bonds are to be sold pursuant to competitive bidding procedures under Rule 50 (or as Rule 50 has been modified by HCAR No. 22823 (September 2, 1982)), although it is indicated that an exception from competitive bidding may be requested to allow for a negotiated public offering or private placement.

Alabama Power Company (70-7211)

Alabama Power Company ("Alabama"), 600 North 18th Street, Birmingham, Alabama 35291, an electric utility subsidiary of The Southern Company, a registered holding company, has filed an application-declaration with this Commission pursuant to sections 6(a) and (b) and 7 of the Act and Rules 50(a)(2) and 50(a)(5) thereunder.

Alabama proposes to issue and sell from time to time, prior to April 1, 1988, short-term notes to banks and commercial paper to dealers up to an aggregate principal amount of $322,000,000 at any one time outstanding. Alabama also requests authorization to exceed the 5% limit on short-term debt contained in section 6(b) of the Act. The maximum short-term debt authorized for Alabama will be reduced by the amount of net-cash proceeds that Alabama receives from the sale of first mortgage bonds and/or preferred stock prior to April 1, 1988.

Alabama has obtained separate commitments with ten banks located outside its territorial service area providing for revolving credit borrowings aggregating $200,000,000 through April 30, 1989. These borrowings have a maximum maturity of 270 days and are renewable at maturity (but not later than the lending bank's commitment). The current effective annual interest rates on individual borrowings would range from 7.97% to 9.125% for such borrowings.

In addition, Alabama proposes to borrow from other banks up to $122,000,000. These borrowings will be evidenced by notes to be dated as of the date of such borrowings and to mature in not more than nine months after date of issue. The maximum effective cost of amounts borrowed in connection with these arrangements would be 9.320%, assuming a prevailing prime interest rate of 9%.

Rocky Mountain Natural Gas Company (70-7221)

Rocky Mountain Natural Gas Company, Inc. ("Rocky Mountain"), and its pipeline subsidiary, Sunflower Pipeline Company ("Sunflower"), 1600 Sherman Street, Room 420, Capital Life Center, Denver, Colorado 30202, have filed an application pursuant to section 2(a)(4) of the Act.

Rocky Mountain acquired all of the stock of Sunflower on April 16, 1986. Sunflower's principal business is the transport of natural gas and, as a result, it is primarily engaged in a business other than the business of a gas utility company. A majority of the gas carried through its pipeline is transported only and is not sold at retail to customers along the pipeline. Sunflower does sell gas for irrigation purposes to 46 agricultural customers. Rocky Mountain and Sunflower request an order declaring Sunflower not be a "gas utility company" under section 2(a)(4) of the Act due to the small dollar amount of sales to customers for irrigation use along its pipeline, coupled with the fact that those sales are not related to the business Sunflower is primarily engaged in.

Eastern Utilities Associates (70-7251)

Eastern Utilities Associates ("EUA"), P.O. Box 2333, Boston, Massachusetts 02107, a registered holding company, has filed an application pursuant to sections 9(a) and 10 of the Act.

EUA, through Montaup Electric Company ("Montaup"), an indirect, wholly owned, generation and transmission subsidiary company, presently has a 2.89989% joint ownership interest in the Seabrook nuclear generating project ("Seabrook Project"). There are fifteen other owners which are tenants in common with Montaup ("Participants") under an Agreement for Joint Ownership, Construction and Operation of New Hampshire Nuclear Units, dated as of May 1, 1973, as amended from time to time. On October 15, 1985, and April 17, 1986 (HCAR Nos. 23866 and 24085), notice was given of EUA's pending proposal to acquire, through a new, wholly owned, New Hampshire subsidiary, EUA Power Corporation ("EUA Power"), the interests of four Participants aggregating 11.26721%.

Now, in a separate filing, EUA proposes to acquire, again through EUA Power, the ownership interest, amounting to 0.86519%, of Fitchburg Gas and Electric Light Company ("Fitchburg"). The total amount to be paid by EUA Power at the time of the Fitchburg closing (if it occurs on June 30, 1986) is estimated to be $10,673,000. Progress payments to be made by EUA Power thereafter, until the commercial operation date of Seabrook Unit No. 1 (scheduled for October 31, 1986), on remaining construction costs attributable to the interest which it will acquire from Fitchburg, together with carrying charges on those payments at an assumed rate of 25% per annum, are estimated to be $1,316,000, which, when added to the payments at the closing, results in an estimated total cost to EUA Power of $11,989,000 for the 0.86519% ownership share of the completed Unit No. 1. It is stated that no additional financing by EUA Power will be necessary as a result of adding the Fitchburg interest. EUA also proposes to acquire, through EUA Power, at a cost of approximately $606.00, a portion, in accordance with its ownership share of the Seabrook Project, of the common stock of New Hampshire Yankee Electric Corporation which is intended to have primary responsibility for management of the construction and operation of the Seabrook Project.

Consolidated Natural Gas Company (70-7253)

Consolidated Natural Gas Company ("Consolidated"), a registered holding company, Four Gateway Center, Pittsburgh, Pennsylvania 15222, has filed an application-declaration pursuant to sections 9(a), 10, and 12(c) of the Act and Rule 42 thereunder.

Consolidated proposes to acquire for cash, through a tender offer, all or a substantial portion of the outstanding $100,000,000 principal amount of its 11⅛% Debentures due April 1, 2006. It is stated that in order to fund the proposed acquisition of the 11⅛% Debentures, Consolidated will, in a separate filing, seek authorization for the sale of $100,000,000 principal amount of debentures or notes in the Euro market or will issue and sell debentures under the Commission's order of April 5, 1985 (HCAR No. 23655), depending upon market conditions.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

John Wheeler,

Secretary.

BILLING CODE 8010-01-M

Self-Regulatory Organizations; Applications for Unlisted Trading Privileges and of Opportunity for Hearing; Midwest Stock Exchange, Incorporated

April 25, 1986.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted trading privileges in the following stocks:

Mylan Lab, Inc.
Common Stock, $0.50 Par Value (File No. 7-8941)

Andal Corporation
Common Stock, $1.00 Par Value (File No. 7-8942)

BEST COPY AVAILABLE

VOL 51 ISS 84 MY 1 1986 UMI

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before May 15, 1986, written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

John Wheeler,

Secretary

BILLING CODE 8010-01-M

SMALL BUSINESS ADMINISTRATION

[License No. 09/09-0292]

California Capital Investors, Ltd., Filing of an Application for an Exemption Under the Conflict of Interest Regulation

Notice is hereby given that California Capital Investors, Ltd. 11612 San Vicente Boulevard, Los Angeles California 90049, a Federal Licensee under the Small Business Investment Act of 1958, as amended, has filed an application with the Small Business Administration (SBA) pursuant to § 107.906 of the Regulations governing small business investment companies (13 CFR 107.903 (1986)) for approval of a conflict of interest transaction.

Subject to SBA approval California Capital Investors, Ltd., proposes to sell its investments in Exvenco Venture 83–01 and Exvenco Resources, Inc., North 9516 Division, Suite B, Spokane, Washington 99218, respectively, to Stephen D. Moses and Katherine C. Keck.

The proposed sale is brought within the purview of § 107.903(b) of the SBA Regulations because Stephen D. Moses and Katherine C. Keck, respectively, are presently being proposed as General Partners, of California Capital Investors, Ltd., subject to SBA approval, and therefore each could be considered an Associate as defined by § 107.3 of the Regulations.

Notice is hereby given that any interested person may, not later than (15) days from the date of publication of this Notice, submit written comments on the proposed transaction to the Deputy Associate Administrator for Investment, Small Business Administration 1441 "L" Street, NW., Washington, DC 20416.

A copy of this Notice will be published in newspapers of general circulation in Los Angeles, California, and Spokane, Washington.

BILLING CODE 4710-07-M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Trade Policy Staff Committee Review; Electric Heaters from Taiwan, Korea and Hong Kong

Notice is hereby given that the Trade Policy Staff Committee (TPSC) has initiated a review concerning the removal of Electric Heaters classified under TSUS 684.40 of the Tariff Schedules of the United States Annotated, when imported from Taiwan, Korea and Hong Kong, from the list of products currently eligible for duty-free treatment under the U.S. Generalized System of Preferences (19 U.S.C. 2461–2465). The review is initiated pursuant to a petition filed by the Patton Electric Company. Anyone interested in this matter is requested to provide written comments to the TPSC regarding the Patton Electric Company request not later than May 28, 1986. A public hearing on the proposed modification will not be scheduled unless a request for such hearing is received no later than close of business May 7, 1986.

All submissions should conform to 15 CFR 2003.2 and be submitted in 20 copies, in English, to the Chairman of the GSP Subcommittee of the Trade Policy Staff Committee, 600 17th Street NW., Room 517, Washington, DC 20506. Information submitted in connection with the proposed modification will be subject to public inspection by appointment with the staff of the GSP Information Center, except for information granted "business confidential" status pursuant to 15 CFR 2003.6 and 15 CFR 2007.7. Parties submitting briefs or statements containing confidential information must indicate clearly on the cover page of each of the twenty copies submitted and each page within the document, where appropriate, that confidential materials are included. Non-confidential summaries of all confidential material must be submitted in twenty copies, in English, at the same time that confidential submissions are filed.

All communications with regard to the proposed modification should be addressed to the GSP Subcommittee, Office of the United States Trade Representative, 600 17th Street NW., Room 517, Washington, DC 20506. Questions may be directed to the GSP Information Center at, (202) 395–6971.

Donald M. Phillips,

Chairman, Trade Policy Staff Committee.

Treasury Notes, Series Y–1988

April 24, 1986.

The Secretary announced on April 23, 1986, that the interest rate on the notes designated Series Y–1988, described in Department Circular—Public Debt Series—No. 15–86 dated April 17, 1986, will be 6¾ percent. Interest on the notes will be payable at the rate of 6¾ percent per annum.

Gerald Murphy,

Fiscal Assistant Secretary.

BILLING CODE 4810-40-M

Internal Revenue Service

Art Advisory Panel; Closed Meeting

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of Closed Meeting of Art Advisory Panel.

SUMMARY: Closed meeting of the Art Advisory Panel will be held in Washington, DC.

DATE: The meeting will be held May 22, 1986.

FOR FURTHER INFORMATION CONTACT: Karen Carolan, CC:AP:V, 1111 Constitution Avenue, NW., Room 2575, Washington DC, 20224, Telephone No. (202) 566–9259, (not a toll free number).

Notice is hereby given pursuant to section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. (1982), that a closed meeting of the Art Advisory Panel will be held on May 22, 1986 beginning at 9:30 a.m. in Room 3029, Internal Revenue Building, 1111 Constitution Avenue, NW., Washington, DC 20224.

The agenda will consist of the review and evaluation of the acceptability of fair market value appraisals of works of art involved in federal income, estate, or gift tax returns. This will involve the discussion of material in individual tax returns made confidential by the provisions of section 6103 of Title 26 of the United States Code.

A determination as required by section 10(d) of the Federal Advisory Committee Act has been made that this meeting is concerned with matters listed in section 552(b)(c) (3), (4), (6), and (7) of Title 5 of the United States Code, and that the meeting will not be open to the public.

This document does not meet the criteria for significant regulations set forth in paragraph 8 of the Treasury Directive appearing in the Federal Register for Wednesday, November 8, 1978. (43 FR 52122.)

James I. Owens,

Acting Commissioner.

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 2:30 p.m. on Monday, May 5, 1986, the Federal Deposit Insurance Corporation's Board of Directors will meet in closed session, by vote of the Board of Directors, pursuant to sections 552b(c)(2), (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of Title 5, United States Code, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Recommendations with respect to the initiation, termination, or conduct of administrative enforcement proceedings (cease-and-desist proceedings, termination-of-insurance proceedings, suspension or removal proceedings, or assessment of civil money penalties) against certain insured banks or officers, directors, employees, agents or other persons participating in the conduct of the affairs thereof:

Names of persons and names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), and (c)(9)(A)(ii)).

Note.—Some matters falling within this category may be placed on the discussion agenda without further public notice if it becomes likely that substantive discussion of those matters will occur at the meeting.

Discussion Agenda:

Applications for Federal deposit insurance:

American Investment Thrift, an operating noninsured industrial bank located at 50 South Main, Salt Lake City, Utah.

First Thrift and Loan, an operting noninsured industrial bank located at 326 South 580 East, Salt Lake City, Utah.

Recommendation regarding the liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Case No. 46,497-NR
Penn Square Bank, National Association, Oklahoma City, Oklahoma

Recommendation regarding the Corporation's assistance agreement with an insured bank pursuant to section 13 of the Federal Deposit Insurance Act.

Recommendation regarding the Corporation's corporate and liquidation activities.

Personnel actions regarding appointments, promotions, administrative pay increases, reassignments, retirements, separations, removals, etc.:

Names of employees authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(2) and (c)(6) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2) and (c)(6)).

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550 17th Street, NW., Washington, DC.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 898-3813.

Dated: April 28, 1986.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

2

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 2:00 p.m. on Monday, May 5, 1986, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Disposition of minutes of previous meetings.

Application for Federal deposit insurance:

Basin Loans, Inc., an operating noninsured industrial bank located at 74 East Main Street, Vernal, Utah.

Application for consent to purchase assets and assume liabilities:

Harford National Bank, Aberdeen, Maryland, for consent to purchase the assets of and assume the liability to pay deposits made in Enterprise Building and Loan Association of Harford County, Aberdeen, Maryland, a non-federally-insured institution.

Application for consent to merge and establish twelve branches:

The Morris Plan Company of California, Palo Alto, California, an insured industrial loan company, for consent to merge, under its charter and title, with Credithrift & Loan, Inc., Orange, California, a non-federally-insured industrial loan company, and for consent to establish twelve of the offices of Credithrift & Loan, Inc. as branches of the resultent bank.

Application for consent to exercise full trust powers:

Harris Trust Company of California, San Francisco, California.

Memorandum and resolution re: Federal Financial Institutions Examination Council policy statement, entitled "General Policy For Sharing Confidential Supervisory Information With State Banking and Thrift Regulatory Agencies" which policy statement provides for the federal financial institutions regulatory agencies to share with the state regulatory agencies certain confidential supervisory information.

Reports of committees and officers:

Minutes of actions approved by the standing committees of the Corporation pursuant to authority delegated by the Board of Directors.

Reports of the Division of Bank Supervision with respect to applications, requests, or actions involving administrative enforcement proceedings approved by the Director or an Associate Director of the Division of Bank Supervision and the various Regional Directors pursuant to authority delegated by the Board of Directors.

Reports of the Director, Office of Corporate Audits and Internal Investigations:

Summary Audit Report re:
Gilpin County Bank, Black Hawk, Colorado, AP-479 (Memo dated April 4, 1986)
Summary Audit Report re:
Farmers State Bank of Dexter, Kansas, Dexter, Kansas, SR-577 (Memo dated March 17, 1986)
Summary Audit Report re:
Citizens State Bank of El Dorado, El Dorado, Kansas (2484) (Memo dated April 9, 1986)
Summary Audit Report re:
Eskridge State Bank, Eskridge, Kansas, AP-478 (Memo dated April 2, 1986)
Summary Audit Report re:
Madison Bank, Madison, Kansas, AP-476 (Memo dated March 31, 1986)
Summary Audit Report re:
The First National Bank of Onaga, Onaga, Kansas, AP-481 (Memo dated April 2, 1986)
Summary Audit Report re:
Kansas American Bank, Overland Park, Kansas, AP-483 (Memo dated April 3, 1986)
Summary Audit Report re:
Linn County State Bank, Linneus, Missouri, AP-480 (Memo dated April 2, 1986)
Summary Audit Report re:
Farmers State Bank, Rising City, Nebraska (2485) (Memo dated April 9, 1986)
Summary Audit Report re:
Golden Pacific National Bank, New York (Manhattan), New York, NR-580 (Memo dated March 18, 1986)
Summary Audit Report re:
The Crossroads State Bank, Oklahoma City, Oklahoma, SR-584 (Memo dated April 7, 1986)
Summary Audit Report re:
First City Bank, National Association, Oklahoma City, Oklahoma, AP-474 (Memo dated March 18, 1986)

FEDERAL ELECTION COMMISSION

DATE AND TIME: Tuesday, May 6, 1986, 10:00 a.m.

PLACE: 999 E Street, NW., Washington, DC.

STATUS: This meeting will be closed to the public.

ITEMS TO BE DISCUSSED:

Compliance matters pursuant to 2 U.S.C. 437g
Audits conducted pursuant to 2 U.S.C. 437g, 438(b), and Title 26, U.S.C.
Matters concerning participation in civil actions or proceedings or arbitration
Internal personnel rules and procedures or matters affecting a particular employee

* * * * *

DATE AND TIME: Thursday, May 8, 1986, 10:00 a.m.

PLACE: 999 E Street, NW., Washington, DC (Ninth Floor).

STATUS: This meeting will be open to the public.

MATTERS TO BE CONSIDERED:

Setting of Dates of Future Meetings
Correction and Approval of Minutes
Draft AO 1986-12—Geraldine A. Ferraro
Draft AO 1986-13—Brock R. Landry, on behalf of National Tire Dealers & Retreaders Association PAC
Routine Administrative Matters

PERSON TO CONTACT FOR INFORMATION: Mr. Fred Eiland, Information Officer, 202-376-3155.

Marjorie W. Emmons,

Secretary of the Commission.

4

INTERSTATE COMMERCE COMMISSION

TIME AND DATE: 10:00 a.m., Thursday, May 8, 1986.

PLACE: Hearing Room A, Interstate Commerce Commission, 12th & Constitution Avenue, NW., Washington, DC 20423.

STATUS: Open Special Conference.

MATTER TO BE DISCUSSED:

Ex Parte MC-177—
National Industrial Transportation League—Petition to Institute Rulemaking on Negotiated Motor Common Carrier Rates.

CONTACT PERSON FOR MORE INFORMATION: Alvin H. Brown, Office of Legislative and Public Affairs, Telephone: (202) 275-7252.

James H. Bayne,

Secretary.

5

PACIFIC NORTHWEST ELECTRIC POWER AND CONSERVATION PLANNING COUNCIL

STATUS: Open. The Council will also hold an executive session to discuss pending litigation.

TIME AND DATE: May 14-15, 1986, 9:00 a.m.

PLACE: South Auditorium, Federal Building, 915 Second Avenue, Seattle, Washington.

MATTERS TO BE CONSIDERED:

1. Staff Presentation on Impact of Oil and Gas Price Changes on the Energy Plan.
2. Public Comment on Issue Paper on Bonneville Conservation/Modernization Program and the Resource Acquisition Provisions of the Northwest Power Act.
3. Public Comment on Issue Paper on Hydropower Responsibility for Salmon and Steelhead Losses in the Columbia River Basin.
4. Staf Presentation of Draft Process for Evaluating Petitions to Enter Rulemaking.
5. Staff Briefing on Salmon and Steelhead Production in the Columbia River Basin.
6. Briefing and Public Comment on Applications to Amend Columbia River Fish and Wildlife Program. (For summaries or complete copies of the amendment applications, call Judy Allender in the Council's Public Involvement Division).
7. Council Business.
8. Public Comment.

FOR FURTHER INFORMATION CONTACT: Ms. Bess Atkins at (503) 222-5161.

Edward Sheets,

Executive Director.

Agricultural Marketing Service

Wheat and Wheat Foods Research and Nutrition Education; Wheat Industry Council Budget for Fiscal Year 1987; Notice

VOL 51 ISS 84 MY 1 1986 UMI

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[Docket No. WR-1]

Wheat and Wheat Foods Research and Nutrition Education; Wheat Industry Council Budget for Fiscal Year 1987

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice of the Wheat Industry Council Budget for fiscal year 1987.

SUMMARY: This notice presents the proposed July 1986 through June 1987 budget of the Wheat Industry Council. Publication of budget information in the Federal Register is required by the Wheat and Wheat Foods Research and Nutrition Education Act. The purpose is to provide information concerning the emphasis and direction of the Council's nutritional education program for the upcoming year. In addition, it provides those end product manufacturers, who are required to pay assessments on purchases of processed wheat to fund the program, an opportunity to reserve the right to seek a refund of assessments paid.

FOR FURTHER INFORMATION CONTACT: Lowry Mann, Livestock and Seed Division, AMS, USDA, Washington, DC 20250, Phone: 202/447-2650.

SUPPLEMENTARY INFORMATION: The Wheat and Wheat Foods Research and Nutrition Education Act of 1977 (7 U.S.C. 3401-17) authorized a research and nutrition education program for wheat and wheat foods. Formal rulemaking procedures, including a public hearing, were followed in developing the Wheat and Wheat Foods Research and Nutrition Education Order which provides the framework for the program.

In a March 1980 referendum wheat end product manufacturers approved the Wheat and Wheat Foods Research and Nutrition Education Order. The Order provides for a program of research and nutrition education for wheat and wheat-based foods to be administered by a 20-member Wheat Industry Council. The Order requires that all nonexempt wheat end product manufacturers be assessed up to 5 cents per hundredweight of processed wheat purchased to finance the program. The Order limited the assessments to 1 cent per hundredweight during the first 2 years of the program. This budget is based on a continuation of the 1-cent assessment level. Wheat end product manufacturers who purchase less than 2,000 hundredweight of processed wheat per year, those who are defined as retail bakers, and processed wheat used in the manufacture of exempt end products are not assessed.

The Wheat and Wheat Foods Research and Nutrition Education—Rules and Regulations require all nonexempt wheat end product manufacturers to register with the Wheat Industry Council; 1333 H Street, NW., Suite 1200; Washington, DC 20005 (Phone: 202/682-2130). Assessments are due and payable to the Wheat Industry Council on or before the 30th day following the end of each firm's quarterly reporting period.

Wheat end product manufacturers who wish to reserve the right to request refunds of assessments to be paid during the Council's upcoming fiscal year must submit such notification to the Wheat Industry Council by registered or certified mail within 60 days after publication of this notice in the Federal Register. In order to receive a refund of assessments paid, an end product manufacturer must first reserve that right, then pay the assessment on or before the 30th day following the end of the quarterly reporting period. The refund must then be requested on the appropriate form within 60 days following the end of the quarterly reporting period.

The Council's 1986-87 nutrition education program will consist of a generic advertising campaign, "Eat Wheat America," which will emphasize wheat foods with a back-to-school theme. The campaign will use a combination of broadcast and print media and merchandising at point of purchase.

The Wheat Industry Council budget for fiscal year 1987 is as follows:

Wheat Industry Council Budget—July 1, 1986-June 30, 1987

Income: Income from assessments	$1,000,000	
Total		$1,000,000
Expenses:		
Consumer Information/ Education Program	396,500	
Compensation	274,680	
Outside services: Legal, financial audit, USDA oversight	57,300	
Referendum repayment	30,000	
Council meetings/ committee expenses	41,000	
Travel	34,200	
Administration costs: Rent, insurance, property tax, lockbox, telephone	76,470	
Council communications: Newsgram, special mailings	24,670	
Printing and postage	27,330	
Office equipment, maintenance, and supplies	31,170	
Miscellaneous: Memberships, subscriptions	6,700	
Total		$1,000,000

Done at Washington, DC: April 23, 1986.

William T. Manley,

Deputy Administrotor, Marketing Programs.

Labeling of Drug Products for Over-the-Counter Human Use; Final Rule

VOL 51 ISS 84 MY 1 1986 UMI

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Parts 330, 331, 332, and 357

[Docket No. 82N-0154]

Labeling of Drug Products for Over-the-Counter Human Use

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule changing its "exclusivity" policy for the labeling of over-the-counter (OTC) drug products. The final rule establishes three alternatives for stating an OTC drug product's indications for use in OTC drug labeling. The label and labeling of OTC drug products are required to contain, in a prominent and conspicuous location, either (1) the specific wording on indications for use established under an OTC drug monograph, which may appear within a boxed area designated "APPROVED USES"; (2) other wording describing such indications for use that meets the statutory prohibitions against false or misleading labeling, which shall neither appear within a boxed area nor be designated "APPROVED USES"; or (3) the approved monograph language on indications, which may appear within a boxed area designated "APPROVED USES," plus alternative language describing indications for use that is not false or misleading, which shall appear elsewhere in the labeling. All required OTC drug labeling other than indications for use (e.g., statement of identity, warnings, and directions) must appear in the specific wording established under an OTC drug monograph. FDA is issuing this final rule after consideration of the comments submitted in response to the agency's proposed rule that was published in the Federal Register of April 22, 1985 (50 FR 15810).

EFFECTIVE DATE: June 30, 1986.

FOR FURTHER INFORMATION CONTACT: William E. Gilbertson, Center for Drugs and Biologics (HFN-210), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-295-8000.

SUPPLEMENTARY INFORMATION: In the Federal Register of July 2, 1982 (47 FR 29002), FDA announced a public hearing to be held on the "exlusivity" policy as it relates to the labeling of OTC drug products. This policy currently limits the terms that may be used in an OTC drug product's labeling to the specific terminology established in a final OTC drug monograph. Thus, when an applicable final monograph became effective, any OTC drug product containing labeling with claims or representations other than those established in the monograph, or using differing terminology, would have been a new drug and/or misbranded under the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 321(p) and 352).

At the hearing on September 29, 1982, 12 persons presented testimony on behalf of manufacturers, trade associations, and consumers. Written testimony ws submitted by individuals, companies, and organizations. Comments and testimony by manufacturers and trade associations contended that the present exclusivity policy is unconstitutional because it unlawfully restrains free speech; is in violation of the Administrative Procedure Act (APA) because it was implemented without notice and comment and because it is arbitrary and capricious; and is not authorized by the act (21 U.S.C. 321 et seq.). These comments also questioned whether, as a matter of sound agency policy irrespective of its legal status. In general, testimony and comments submitted by individuals or consumer groups urged FDA to retain the exclusivity policy in its present form to avoid confusion and deception and to facilitate comparisons among OTC drug products. However, testimony from one consumer group took the position that while it is important that limitations be placed on labeling so as to avoid confusion, alternative wording of labeling claims could also be advantageous.

In the Federal Register of April 22, 1985 (50 FR 15810), FDA discussed the testimony and information submitted at the hearing and the comments submitted in various proceedings to establish OTC drug monographs. The agency stated that, although the present policy is lawful, there were sound reasons for proposing a modification of that policy. (See 50 FR 15811.) Accordingly, FDA proposed to amend the labeling requirements for OTC drugs in 21 CFR Part 330 by amending § 330.1.

FDA also proposed conforming amendments to the monographs for OTC antacid, antiflatulent, and cholecystokinetic drug products that appear in 21 CFR Parts 331, 332, and 357, respectively. The agency stated that other conforming amendments, as required, may be made to other monographs as they are published in final form. FDA also stated that the provisions of the regulations relating to the amendment of monographs (Section 330.10(a)(12)) would not be affected by the proposed amendment of the exclusivity policy. Persons seeking to amend the language established by a monograph would continue to follow the procedures set out in § 330.10(a)(12).

Interested persons were invited to file written comments regarding the proposal by July 22, 1985. In response to the proposed rule, 54 consumers, 8 manufacturers, 7 health care providers, 9 government agencies, 14 consumer/trade associations, and 1 university submitted comments. Copies of the comments received are on public display in the Dockets Management Branch. Final agency action on this matter occurs with the publication of this final rule.

I. The Agency's Conclusions on the Comments

1. Many of the comments received in support of the proposal to change the existing exclusivity policy were general in nature. Reasons given by these comments for supporting the proposal include the following: The proposal is in the public interest; will meet consumers' needs for accurate labeling information; will improve patients' understanding of OTC drug products; will assist manufacturers in writing clear communications to consumers; will allow manufacturers the opportunity to change label information without complying with unnecessary FDA procedures; will provide for regional differences in the way people refer to the same condition, e.g., acid stomach versus upset stomach; and will provide greater flexibility. Other comments maintained that a revised exclusivity policy would reduce costs, expedite work, and save agency resources by eliminating the costly monograph amendment procedures.

FDA acknowledges these comments in support of the proposed change in the exclusivity policy.

2. A number of comments stated that it is in the consumers' interest to maintain the old exclusivity policy because it assures accurate and uniform labeling of OTC drug products and assists consumers, especially the poor, sick, and elderly, in purchasing OTC drug products through easy comparisons. Reasons given by these comments for maintaining the old policy include the following: Manufacturers cannot be relied upon to provide accurate, nonmisleading label information; a number of products are switching from prescription to OTC marketing status; the manufacturer's choice, consumer interpretation, and differences in regional language would increase communications problems; it is not apparent that the cost of drugs would be lower because of this proposal. One comment argued that confusion already exists because consumers do not realize the limits of FDA's power and therefore expect more control.

Explaining that panel members had debated many hours for years over the wording that would be appropriate for OTC drug labeling, two former panel chairpersons stated that the panel members were acutely aware that many other words could be used, but that approval should be obtained from a responsible FDA group. The former chairpersons expressed concern that the proposed change in the exclusivity policy could result in the public being misled about an OTC drug product's capability.

The concerns expressed in this comment were discussed in depth in the proposed rule (50 FR 15810) and are also discussed in comment 4 below. After careful review and study, the agency believes that the goal of ensuring truthful, nonmisleading labeling without inhibiting effective consumer communication does not require that the existing rigid exclusivity policy be continued. Specific wording established in a final OTC drug monograph will provide a standard for measuring the accuracy of alternative language developed by manufacturers for the indications of OTC drug products. Language which represents or suggests that the drug is safe and effective for an indication for use other than one established in a appropriate final monograph would render the drug product a "new drug" under 21 U.S.C. 321(p) for which appropriate regulatory action could be taken. The monograph amendment procedures in § 330.10(a)(12) would also continue to apply where a manufacturer seeks approval for other language for indications for use already included in the monograph.

3. Three comments argued that the new policy was a license for manufacturers of OTC drug products to use words that are misleading and confusing. One comment stated that the proposed changes in exclusivity would increase the likelihood that the consumer will be misled. According to the comment, this situation could lead to medical problems, and the taxpayer would ultimately pay for up to 40 percent of the costs of dealing with the problems.

Expressing the opposite point of view, another comment stated that consumers will have more useful information on which they can base their purchase and treatment decisions, and thus are more likely to identify quickly and rely on appropriate and effective OTC drug products rather than on more costly or less efficient alternatives.

The agency finds no evidence to support the contention that flexible labeling of the indications for use of OTC drug products will be misleading, confuse the consumer, and lead to medical problems. As discussed later in this document, the monograph language will continue to be used as a benchmark to ensure that any alternative language does not exceed the approved indications. (See comment 4 below.) FDA will continue to review the labeling of OTC drug products and initiate enforcement activities as necessary, thereby ensuring that consumers will continue to be protected. (See comment 12 below.)

The agency's experience to date provides no basis for the presumption that this change in policy will cause any deterioration in OTC drug product labeling practices because, for the most part, rigid adherence to the strict "exclusivity" policy has not been required in the absence of final OTC drug monographs. The vast majority of OTC drug products are now marketed pursuant to statutory and regulatory standards that will remain in effect upon publication of this final rule. Experience does not demonstrate any significant widespread patterns of abuse, even in the absence of established "exclusivity" provisions, and there is no reason to expect such abuses to emerge under the revised policy.

Regardless of which alternative manufacturers choose, FDA regulations require that the labeling of OTC drug products be clear and truthful in all respects, not false or misleading in any particular, and understandable to the ordinary individual, including individuals of low comprehension, under customary conditions of purchase and use. (See 21 CFR 330.10(a)(4)(v).) FDA believes that allowing alternative terminology for describing indications for use that have been developed under a relevant OTC drug monograph is consistent with the purpose of § 330.10(a)(4)(v).

4. A number of comments contended that approval of the new proposal would result in unfair competition between manufacturers of OTC drug products. One comment contended that the proposal would benefit unscrupulous manufacturers and those who are cleverest at bending the truth, and would be most harmful to competing manufacturers of higher integrity and to unwitting consumers. The comment added that in time bad labels would drive good labels out of the marketplace. A second comment stated that unfair competition will result as companies compete to convince consumers that their products are superior to the products of competitors who abide by FDA's monograph.

Another comment stated that it was not confident that companies involved would be either totally truthful or not misleading in their advertising efforts, and added that an increase in the cost of OTC drugs to cover advertising campaigns is likely to occur. Another comment claimed that many consumers are under the false impression that advertising and labeling claims are approved in advance by FDA. Other comments contended that substitute language could be a sales gimmick or possibly "one-up-manship." According to some comments, if the restrictions on drug labeling are lifted, bolder claims, not validated by testing, will in time appear. The comments assert that if drug companies are allowed to use their own format, the company with the best marketing technique, not necessarily with the best drug for the indication, will be the more successful, and this practice in turn will increase costs to the consumer. One comment added that the new policy would undermine confidence in FDA.

As stated in the proposal (50 FR 15810), the agency's principal purpose in establishing and maintaining the exclusivity policy has been to ensure that OTC drug labeling is clear, accurate, and meaningful to the consumer. In the past, the agency has been concerned that unless the policy was rigidly adhered to, there was potential for labeling to be used that was misleading or confusing. The agency's basic premise has not changed. After careful review and study, however, the agency now believes that the goal of ensuring truthful, nonmisleading labeling without inhibiting effective consumer communication does not require the enforcement of a rigid exclusivity policy. Recognizing that, within limits, there can be various ways of accurately stating the same thing, some of which may even be more meaningful to potential purchasers of OTC drug products, the agency has concluded that it can meet its responsibilities by providing greater flexibility for the use of alternative truthful statements without recourse to the time- and resource-consuming monograph amendment process. Rather, the agency will use the monograph language as its standard in determining whether alternative statements are accurate or require regulatory action, thus achieving its goals at a lower cost

VOL 51 ISS 84 MY 1 1986 UMI

in terms of administrative and enforcement resources. However, FDA emphasizes that the relaxation of the exclusivity policy applies only to indications for use that are established in a final monograph; other required OTC drug labeling continues to be subject to the existing exclusivity standard.

FDA intends to carefully examine the labeling of OTC drug products to ensure that any alternative language that manufacturers use does not go beyond the approved indications for use, thereby causing the drug to become a "new drug" or "misbranded" or both under the act. If unacceptable language is discovered, the agency will take appropriate regulatory action. The agency believes that a sound enforcement program will minimize any unfair competition that would otherwise result from improper labeling.

In response to the comment's concern about the new policy causing untruthful or misleading OTC drug advertising, FDA notes that the Federal Trade Commission (FTC) has the primary responsibility for regulating OTC drug advertising, and that both the past "exclusivity" policy and the revised policy would affect advertising only in those circumstances in which it falls under the act's labeling provisions.[1] In addition, existing regulations in § 330.1(d) (21 CFR 330.1(d)) remain in effect and provide that, for an OTC drug to be generally recognized as safe and effective and not misbranded, its advertising may prescribe, recommend, or suggest the drug's use only under the conditions stated in the labeling.

5. Several comments stated a preference for a specific labeling alternative included in the proposal. Three comments expressed particular support of the provisions in the first alternative that permit the listing in OTC drug labeling of the words "APPROVED USES" or "FDA APPROVED USES" provided the monograph language is used. Other comments, however, argued that the agency should delete the first and third alternatives from the proposal and retain only the second alternative (which permits the use of other truthful and nonmisleading language to describe those indications for use that have been developed under a relevant OTC drug monograph), because any policy other than alternative 2 serves no compelling government interest and indeed disserves the public. Another comment commended FDA for its judgments and wisdom in proposing alternative 2. Two comments supported the third alternative, i.e., the use of monograph language in the boxed area (first alternative) and other truthful and nonmisleading alternative language elsewhere in the labeling. One comment stated that the third alternative appears to be the best for both the consumer and the manufacturer, adding that it "gives the consumer the most information and the manufacturer can indicate uses that the consumer did not know the products could be used for."

Three comments requested a hearing if alternative 2 is not selected and implemented as the only provision of the final rule.

Concerning the comments that stated a preference for one alternative or another, the agency reiterates that the purpose of revising the exclusivity policy was to establish alternative methods of labeling OTC drug products. In particular, the agency disagrees with the comments that contended that only the second labeling alternative should be retained in the final regulation. The agency's reason for changing the exclusivity policy is to make the policy more flexible, not to eliminate entirely the use of specific language developed during the OTC drug review. Moreover, the use of the "FDA Approved" language will enable manufacturers to market OTC drug products knowing that the indications for use are approved by the agency. The availability of this option should enable manufacturers who choose to do so to market OTC drugs without spending time and resources developing alternative language.

The agency does not believe that it would be a disservice to the public, as alleged by some comments, if OTC drug labeling contains a section entitled "APPROVED USES" or "FDA APPROVED USES." The agency believes that some manufacturers and many consumers would favor such information in the labeling of OTC drug products. Many comments made by consumers on the proposal expressed such a view. In response to one comment, the agency also points out that while the third alternative may allow a manufacturer to indicate uses that the consumer was unaware of, such indications for use are limited to those established in an appropriate monograph.

Finally, the requests for a hearing unless only alternative 2 is adopted are denied. The final regulation permits a manufacturer to use only alternative 2 if it so chooses even though other manufacturers may elect to use another alternative. The comments have not raised any new issues appropriate for resolution at another hearing or shown that any policy other than adopting alternative 2 alone would be contrary to the public interest. As described above, the agency has already conducted one hearing on this labeling policy (September 29, 1982). The Commissioner does not believe that a second hearing would yield additional information not already presented at the previous hearing or in the comments on the proposed rule. Accordingly, the requests for a hearing are denied.

6. Several comments stated that the first and third alternatives are "extensions of the exclusivity policy" to the extent that they mandate use of specific language approved by FDA. The comments argued that, as such, the proposed alternatives represent unconstitutional restrictions on first amendment rights to truthful commercial speech; exceed FDA's statutory authority under sections 502, 201(p), and 701(a) of the act (21 U.S.C. 352, 321(p), and 371(a)); are arbitrary and capricious because they are not supported by an adequate administrative record; and are unwise from a public policy standpoint.

One comment referred to a recent case in which the Supreme Court reviewed restrictions on commercial speech by governmental bodies and reiterated its concern for any abridgment of first amendment rights. (*Zauderer* v. *Ohio*, ___ U.S. ___, 105 S. Ct. 2265 (1985).) The comment contended that *Zauderer* further establishes that the exclusivity policy adopted in 1975 is unconstitutional and that the current proposal, while more flexible, continues to raise constitutional questions that must be considered.

Other than the reference to *Zauderer*, the comments did not raise any constitutional or legal issues concerning the existing policy or the proposed changes that had not previously been discussed in the proposed rule. (See 50 FR 15811.)

The agency believes that the new rule is constitutionally sound. As the comments assert, commercial speech is entitled to the protection of the first amendment. However, as noted in recent Supreme Court cases, reasonable restrictions may be imposed to ensure that commercial speech is not false or deceptive, and other restrictions may also be imposed when there is a legitimate and substantial interest to be achieved. See, for example, *Central Hudson Gas & Electric Corp.* v. *Public Services Commission*, 447 U.S. 557, 564, 566 (1980).

[1] See, e.g., *United States* v. *Article of Drug . . . B-Complex Cholinos Capsules*, 362 F.2d 923 (3d Cir. 1966); *V.E. Irons, Inc.* v. *United States*, 244 F.2d 34 (10th Cir. cert. denied, 354 U.S. 923 (1957).

The *Zauderer* case cited by the comments concerned the regulation by the State of Ohio of attorney advertisements. The Supreme Court restated the principle that attorney advertisements are commercial speech entitled to first amendment protection and that commercial speech which is not false or deceptive and does not concern unlawful activities may be restricted only where there is a substantial government interest and then only through means directly advancing that interest. *Zauderer, supra* at 2275–2276. The Court then went on to hold that some of the restrictions imposed by the State on the attorney advertisements were unconstitutional while other restrictions were not.

OTC drug labeling is commercial speech with a special public health function. It helps ensure that OTC drugs are used safely and effectively. In cases involving public health and safety, courts have held that additional restrictions on commercial speech may pass constitutional scrutiny. (See *Central Hudson Gas & Electric Corp., supra.*) As pointed out in the preamble to the proposal (50 FR 15811) and discussed above, the agency has concluded that the exclusivity policy adopted in 1975, while legally supportable, should not be continued for policy reasons: the goal of ensuring truthful, non-misleading labeling without inhibiting effective consumer communication does not require continuation of a rigid exclusivity policy.

The new labeling scheme provided for in this rule permits three alternatives, ranging from specific words established by FDA to other truthful and nonmisleading language, subject only to the minimal restrictions that the labeling not be false or misleading. Manufacturers who believe that one of the three alternatives is overly intrusive may select another alternative, including the development of their own alternative statements. The agency believes that the minimal restrictions contained in this rule clearly fall within the constitutional limits for commercial speech generally as set forth in the cases cited by the comments, and well within constitutional limits for commercial speech dealing directly with matters of public health and safety.

7. Referring to the first alternative of the exclusivity proposal, several comments maintained that "FDA APPROVED USES" language should be permitted for OTC drug products marketed under a new drug application (NDA) as well as for those marketed under an OTC drug monograph.

One comment noted that section 301(1) of the act (21 U.S.C. 331(1)) prohibits the use in labeling of any representation or suggestion that "approval of an application with respect to such drug * * * is in effect under section 355 [the new drug approval provision] * * *." The comment argued that the use of the "FDA APPROVED" language is contrary to the intent and meaning of section 301(1). The comment stated that as a result non-NDA'd OTC drug products would be allowed to use such language, but that NDA'd OTC drug products would be prohibited from using it. The comment maintained that the issue of labeling NDA'd OTC drugs as "FDA APPROVED" could only be adequately resolved legislatively, by amendment to the statute. Citing the pending "FDA Approval Labeling Act" (H.R. 2244), which would allow the statement "FDA APPROVED" followed by the NDA number on prescription drugs, the comment stated that FDA should suggest revisions in this manner to cover the labeling of NDA'd OTC drug products. Another comment contended that section 301(1) can be interpreted to apply only to statements connoting new drug approval pursuant to 21 U.S.C. 355 and therefore any terminology such as "APPROVED USES" connoting use of terminology approved by FDA in a final OTC drug monograph is not prohibited by this section of the law.

The comments maintained that equal treatment of OTC drug products marketed under an NDA and under an OTC drug monograph would be consistent with FDA's policy of promoting uniformity in OTC drug labeling consistent with applicable statutory standards and would lessen consumer confusion about the label indications on OTC drugs because there is no difference to the consumer between an NDA'd and a monograph OTC drug. The comments requested that the agency clarify that the "FDA APPROVED USES" language will also be permitted for NDA'd OTC drugs, and this language will not be in violation of section 301(1) of the act.

To further promote consistency in the labeling of OTC drug products, the agency agrees that OTC drug products approved by an NDA but not included in an OTC drug monograph should also be permitted to use the term "FDA APPROVED USES" or "FDA APPROVED INFORMATION" in their labeling. Because the current regulation is included under Part 330 (21 CFR Part 330), which applies only to OTC drugs that are generally recognized as safe and effective and not misbranded, the agency will propose in a future issue of the Federal Register specific procedures for the labeling of OTC drug products subject to NDA's that will allow use of the "FDA APPROVED USES" terminology.

The agency notes further that section 301(1) of the act by its own terms prohibits only representations or suggestions that an approval of an application under section 505 of the act (21 U.S.C. 355) is in effect for a drug product. It does not apply to requirements for labeling related to indications for use such as those described in the present regulation. Accordingly, FDA believes that it can issue regulations for NDA'd OTC drugs that will be consistent with section 301(1) of the act and that a statutory amendment to section 301(1) is not required for this purpose.

8. One comment stated that the second labeling alternative included in the proposal should permit reference to "FDA Approved Uses" because manufacturers or distributors of OTC drug products who use that alternative will be severely penalized by the inability to make reference to the "FDA Approved Uses." Contending that consumers will almost always choose an OTC drug products that has language such as "FDA Approved Uses," the comment added that marketers would be forced to use either alternative 1 or 3 rather than be disadvantaged in the marketplace by using alternative 2. The comment stated that, in practical terms, this means that the previous policy of rigid exclusivity would be perpetuated.

The comment added that denying the right to make reference to "FDA Approved Uses" to the marketer who elected the second alternative would place that marketer at a competitive disadvantage and also would mislead consumers because they would improperly be led to believe that the product bearing the "FDA Approved Uses" language is somehow better than the competing product that does not have such language.

The proposal, and this final rule, provide three alternatives to every manufacturer. A manufacturer who feels competitively disadvantaged by a particular alternative is free to select another alternative, such as one being used by a competitor. Moreover, the agency does not accept the comment's basic premise, that in every instance consumers will prefer a product bearing "FDA Approved" indications. A principal impetus behind the present rulemaking was the belief that there may be many ways of fairly and accurately stating the same information.

VOL 51 ISS 84 MY 1 1986 UMI

A manufacturer may well find that consumers prefer the language it develops over the "FDA Approved" language. The agency believes that substantial numbers of manufacturers will elect to use labeling alternative 3, which combines both the monograph language and the manufacturer's alternative language. This alternative will permit use of the "FDA Approved" designation while also allowing manufacturers flexibility in developing their own wording. In any event, it would be false or misleading to use the words "FDA APPROVED USES" for wording that has not, in fact, been approved by the FDA, as requested by the comment. Accordingly, such a designation may not be used where alternative 2 is selected by a manufacturer.

Manufacturers may also wish to use the FDA monograph language but not use the terminology "APPROVED USES" or "APPROVED INFORMATION." Therefore, the agency has revised the requirements of labeling alternative 1 to make the use of the term "APPROVED USES," or similar designations permitted in the regulation, optional. However, if the term "APPROVED USES" is used, then the indication must appear within a boxed area. Also, the boxed area may not be used unless the "APPROVED USES"designation is also used.

The agency has also revised labeling alternative 2 to delete the reference back to the requirements of paragraph (c)(2)(i), because the original wording was unclear. Alternative 2 has also been clarified to refer only to "other truthful and nonmisleading statements."

9. Several comments stated that manufacturers should be allowed to use more than one of the three alternatives provided in the proposal in the labeling of a particular OTC drug product. As an example, one comment stated that a manufacturer might wish to use the first alternative by listing "APPROVED USES" or "FDA APPROVED USES" in a boxed area on the outer container and also use the third alternative by presenting the same FDA approved indications under "APPROVED USES" or "FDA APPROVED USES" together with alternative truthful and nonmisleading terminology outside the boxed area on the immediate container. Arguing that the third alternative recognizes that a combination of the first and second alternatives is appropriate on a single label, one comment maintained that there is no valid legal or policy reason why a company could not choose the first alternative on the outer container label and the second alternative on the immediate container label. Two comments argued that provided each labeling of an OTC drug product is taken as a whole and is complete, the ability to blend or combine alternatives for use in various component labeling sections would be fully consistent with the intent of the proposal. One comment added that this interpretation maintains the substantive standards of the proposal and preserves the overriding statutory requirement that the labeling not be false or misleading. The comments requested that FDA clarify in the final rule whether more than one alternative may be used.

The agency agrees with the comments that the proposal would enable manufacturers to use more than one of the three alternatives in the labeling of OTC drug products provided that each portion of the labeling complies with applicable statutory and regulatory labeling requirements in all respects. The final regulation has been clarified to state that more than one of the three alternatives may be used in the labeling of any particular OTC drug product marketed under the terms of a final OTC drug monograph.

10. Several comments argued that flexibility of labeling should be applied not only to indications but also to other sections of the labeling, e.g., warnings. One comment claimed that the same arguments could be made for the flexibility of other required labeling, such as directions or warnings, and questioned why, if flexibility of labeling is superior, the proposed rule is limited to indications for use. The comment expressed concern that the proposal "is the crack in the door" and that other required labeling will be given the same treatment later on.

One of the comments discussed the effect of the exclusivity policy, as applied to warnings, directions for use, and statements of identity, on the labeling of multiuse products, such as petrolatum. The comment contended that if a product is simultaneously subject to several final monographs, the policy of exclusivity would require that each specific "warning," "direction for use," and "statement of identity" established in each applicable final monograph be included on the product label, even if they are redundant (though not precisely identical), inconsistent, obvious, or even if their inclusion is impossible because of the small available label space. The comment also contended that the manufacturer would not be permitted to eliminate redundancy and inconsistency, and thereby minimize the burden of compliance, by employing terminology of its own expressing in a truthful and nonmisleading way, the appropriate "warnings," "directions for use," and "statements of identity" based on guidance provided in the applicable final monographs.

The flexibility established by the present regulation does not apply to OTC drug labeling other than indications for use. All other OTC drug labeling must continue to be stated in exact language where exact language has been established and identified by quotation marks in an applicable monograph or by regulation. However, in addition to the indications for use, statements of identity, warnings, and directions may appear within the boxed area. The agency's reasons for this policy are as follows:

Indications for use. As stated in the proposal, the agency recognizes that, within limits, there can be various ways of stating the same thing, some of which may even be more meaningful to potential purchasers of OTC drug products. The agency concludes that it can meet its regulatory responsibilities by providing greater flexibility for the use of alternative truthful statements without recourse to the monograph amendment process, which consumes both time and resources. (See comments 2 and 4 above.)

Statement of identity. Where it is feasible, some flexibility of labeling is already allowed in the statement of identity for certain OTC drug products, e.g., any of the following statements of identity could be used to describe OTC external analgesic drug products: "external analgesic," "topical analgesic," or "pain-relieving (insert dosage form, e.g., cream, lotion, or ointment)." See the tentative final monograph for OTC external analgesic drug products, published in the Federal Register of February 8, 1983 (48 FR 5852). For other OTC drug products, only one statement of identity has been proposed, e.g., "nighttime sleep-aid" or "acne medication." The agency concludes that there is no need to extend flexibility of labeling to the statement of identity, because, as stated above, it is already provided for where applicable. The agency believes that uniformity in this area helps avoid consumer confusion and aids consumer selection of competing products. In addition, where a product is marketed with multiple uses, the agency believes that it is essential that each use be identified in the statement of identity, which by regulation (21 CFR 201.61) must appear on the principal display panel of an OTC drug in package form, because the prominent location of this information greatly helps consumers in selecting an appropriate OTC drug product to use.

Warnings. Unlike indications for use, which pertain to a group of similar OTC drug products, warnings are more likely to be specific to ingredients. The agency believes that concisely and consistently worded warnings are essential to the safe use of an OTC drug product and that permitting flexibility in this section of labeling could put consumers at risk in terms of safe use of an OTC drug product. Accordingly, the exact wording of warnings in an OTC drug monograph will continue to be required. However, where applicable, e.g., in the case of a product covered by several monographs, warnings may be combined to eliminate duplicative words and phrases so long as the resulting warning is clear and understandable. The individual OTC drug monographs already provide for this.

Directions. OTC drug monographs do provide for flexibility in directions relating to the dosage for specific ingredients, which is designated in general terms. It is not FDA's intent that certain parts of the dosing information stated in a monograph be used verbatim. Rather, manufacturers, depending on their specific dosage form and the strength of the dosage form, may vary the dosage directions so long as the directions accurately reflect the designated dosage. For example: for a product which contains 25 milligrams (mg) of an active ingredient in a tablet dosage form where the monograph directions are 25 mg three times a day, the directions could read "Take 1 tablet 3 times a day"; or, the same product could be marketed as a 12.5-mg capsule, in which case the directions could read "Take 2 capsules 3 times a day."

In other instances, usually with topical OTC drug products, the agency believes that the safe and effective use of those products would be better ensured by requiring specific monograph language to be used in labeling directions. In these cases the agency has used quotation marks to identify those portions of the monograph directions that must be used exactly. (See the tentative final monograph for OTC wart remover drug products that was published in the Federal Register of September 3, 1982; 47 FR 39102.)

The principles discussed above are applicable to multiuse products, such as petrolatum, which was mentioned in the comment.

11. One comment stated that the "other allowable indications" listed in the more recently published tentative final monographs should also be included in the final monographs and should be allowed to be included in the "FDA Approved Uses" boxed area. The comment contended that only indications that have not been reviewed by the agency should be excluded from the boxed area. Another comment suggested the inclusion in proposed monographs of a section for substitute language.

A number of recently published tentative final monographs have included statements captioned "Other Allowable Indications" or "Other Allowable Statements." These statements are comparable to the substitute language described by one comment. As proposed in those tentative final monographs, other allowable statements describing indications would have been permitted to appear elsewhere on the labeling in addition to the monograph-required information, but could not appear in direct conjuction with the required labeling prescribed by the monograph.

In the exclusivity proposal, the agency stated that these additional indications and statements may be developed during the tentative final monograph stage of the OTC drug review, but would not be included in a final monograph because such statements were only examples of other acceptable language. However, the agency has decided that, because these additional terms have been reviewed by FDA, they should be incorporated, wherever possible, in final OTC drug monographs under the heading "Indications" as part of the indications developed under that monograph. By inclusion in the final monograph, they would therefore be permitted to be included in the boxed area. As future final monographs are published, the indications for use section will include such terms, where appropriate. This approach will provide other substitute language as suggested by one comment. As one comment stated, only indications that have not been reviewed by the agency (as well as those found to be nonmonograph in OTC drug rulemaking would then be excluded from the boxed area.

12. Several comments expressed concern about the agency's review of OTC drug labeling and the enforcement of violations under the revised exclusivity policy. One of the comments recommended that a manufacturer be required to send a registered letter to FDA outlining its intentions prior to ordering the printing of any labeling which changes the labeling contained in an approved monograph. The comment stated that this would not be a request for approval—just apprising FDA of what is being undertaken. Stating that the registering of the letter would be for the manufacturer's protection, the comment added that it would then be up to FDA to expedite an analysis of the change. The comment concluded that in this way FDA could stay abreast of all situations and still give the manufacturer more latitude to develop the product.

Several comments argued that without prior FDA approval the use of alternative indication statements would increase the cost of enforcing violations and strain FDA resources by "adding another layer of waiting, negotiation, and review to validate or prohibit statements which may not be truthful and not misleading." Two comments contended that the agency will find it impossible to review and police the infinite variations in language developed as marketers compete to sell their products.

One comment maintained that enforcement will be more cumbersome and difficult for FDA under a revised policy than under the existing exclusivity policy, but will be easier than if the agency had completely abandoned the approved terminology in the OTC drug monographs. The comment added that the monograph terminology will provide a workable standard by which to measure whether alternative terminology accurately expresses the approved indications for use or misbrands the product. Another comment supporting the more flexible labeling approach added that safeguards on checking the labeling language will need to be implemented, while another comment stated that FDA does not enforce regulations as it should now, thus allowing manufacturers enough freedom as it is.

One comment noted that alternative language used in labeling will still be subject to the controlling safeguard that it must be truthful and not misleading and that its substance not render the product misbranded or a new drug requiring FDA approval. The comment added that these continuing standards and FDA monitoring will provide adequate assurance to the public that health and safety considerations are fully taken into account and not overlooked.

Several comments, although less directly related to the question of FDA's review and enforcement of labeling requirements, are appropriate for inclusion here. Contending that the public does not know the subtleties involved in the wording in each product label, one of these comments stated that it will take a great deal of publicity to inform most people, particularly the most vulnerable, that the policy has

VOL 51 ISS 84 MY 1 1986 UMI

become caveat emptor (let the buyer beware). Another comment contended that the proposed rule represents abandonment of FDA's commitment to consumer protection for OTC drug products and would "turn back the clock and re-establish the rule of Caveat Emptor wherever these products are sold."

The agency does not believe it is necessary to require manufacturers to notify FDA by registered mail of any intended changes from monograph labeling. A manufacturer may choose other truthful and nonmisleading language to describe the indications for use, subject to the statutory prohibition against misbranding by the use of false or misleading labeling. As comments noted, the agency emphasizes that the monograph language will be used as a regulatory benchmark to ensure that any alternative language does not exceed the approved indications.

In reference to the comments' concern regarding the difficulty and costliness of enforcement, the agency has routine compliance activities to evaluate OTC drug labeling and will in the normal course of business made determinations as to whether a manufacturer has exceeded the labeling allowed by a final monograph. FDA will carefully examine any alternative language that manufacturers use to ensure that it does not go beyond the approved indications. Accordingly, consumers will continue to be protected. In addition, the agency concludes that the revised rule does not reestablish "caveat emptor." As stated above, FDA will continue to review OTC drug labeling and institute appropriate enforcement action when violations are determined to exist.

13. One comment stated that the use of the term "FDA Approved" on OTC drug labeling prior to promulgation of a final OTC drug monograph is not a true statement, and would, therefore, constitute misbranding. Another comment stated that consumer confusion will result in certain categories of OTC drug products that are subject to a final monograph, such as antacids, could use the "FDA Approved" language while other categories of products could not bear the language because final monographs for those products have not yet been issued. The comment contended that it would appear to consumers as though drugs without the "FDA Approved" designation are "unapproved."

The first comment is correct; until relevant individual OTC drug monographs are issued in final form, the boxed area/"APPROVED USES" concept described in this final rule can not be implemented. A product can not bear an "APPROVED USES" designation until the use has, in fact, been approved by FDA, which will only occur when the final monograph is issued.

In response to the second comment, FDA does not believe that consumers will be confused while the use of "FDA Approved" language is being implemented as final monographs are issued. As the "FDA Approved" language is implemented on a class-by-class basis as final monographs for each class of OTC drug products are issued, all drugs within that class will be implementing the monograph and "FDA Approved" language at the same time. Therefore, competitive products within a particular class of OTC drugs will have similar labeling at or about the same time.

14. Two comments requested that the final rule on exclusivity clearly state that the revised labeling requirements do not apply to cosmetic or cosmetic/drug products. One of the comments maintained that the first alternative treats cosmetic/drug and cosmetic products unfairly because cosmetic/drug products may be precluded from using truthful and nonmisleading cosmetic terminology on key parts of a product label if the first or third alternative is used. The comment added that cosmetic terminology is not reviewed and approved by FDA in the OTC drug monographs and therefore could not be placed in the box. Stating that there are many examples in the marketplace of truthful, nonmisleading cosmetic terminology on the label with drug terminology, the comment added that it is not aware of any consumer confusion from this common practice nor of any expressed agency concern that such a practice would adversely affect the public health. Another comment stated that the options included in the proposal are particularly valuable to products that make both drug and cosmetic claims, because consumers could find a complete description of the product's claims at one location on the label, thus minimizing confusion about the product's performance.

OTC drug monographs cover only the drug use of the active ingredients listed therein and do not apply to the use of the same ingredients in products intended solely as cosmetics. Thus, the final rule does not apply to products marketed solely as cosmetics. However, products labeled for both drug and cosmetic use must conform to the requirements of the pertinent final OTC drug monograph(s), the cosmetic labeling requirements of section 602 of the act (21 U.S.C. 362), and 21 CFR Part 701. As one comment pointed out, cosmetic terminology is not reviewed and approved by FDA in the OTC drug monographs and therefore could not be placed in the box. Thus, cosmetic claims may appear elsewhere in the labeling but not in the box should manufacturers choose alternative one or three for labeling cosmetic/drug products.

15. Several comments included suggestions on various aspects of OTC drug labeling. These included use of simple language, larger print size, pictorial illustrations to make labeling more readily understandable to consumers with impaired vision or limited reading skills, print and/or color contrasts to highlight cautions in using the drug(s), and having terms used in a monograph reflect a greater range of detailed language. One comment suggested that indications worded by a manufacturer should also be boxed, i.e., "NOT APPROVED BY FDA" and color-coded red to distinguish them from "FDA APPROVED" language, which would be color-coded green, while another comment asserted that there would be less confusion if an elipse was used for alternative language and entitled "INFORMATION ACCEPTED BY FDA."

The agency appreciates the comments' suggestions about OTC drug labeling. However, most of these items are already covered by other existing regulations, e.g., 21 CFR 201.15 (prominence of required label statements) and 21 CFR 201.60 (principal display panel), and are outside the scope of this rulemaking.

The agency disagrees with the comments' suggestions that indications worded by a manufacturer should be contained in an elipse or be boxed and color-coded to distinguish those indications from "FDA Approved" language. The agency believes that these suggestions would be confusing and would add little to consumer understanding of OTC drug labeling. In addition, because alternative language is not preaccepted by FDA, the agency concludes that it will be less confusing to consumers if only a single boxed area is used in OT drug labeling wherein only exact monograph language need appear.

16. Several comments expressed concern about the inclusion of side effects and warnings in OTC drug labeling. One comment stated that the manufacturer's goal is to make money; consequently, side effects, as well as interaction with foods, are likely to be glossed over. Another comment stated that drugs are potential poisons and that a number of unwanted reactions occur already, while another comment cited

upset stomach or bleeding that may be caused by aspirin as an example. Another comment noted that warning against use by persons with certain conditions, e.g., diabetes, heart conditions, and thyroid problems, are not foremost on the label or container, but are often in small print near the end of the label or are located on the inside of a container. The comment contended that these warnings should be in large print, at the top of the label, and in a boxed area.

Another comment emphasized that all OTC drug labeling should be required to state the age range for usage, e.g., "Administer only to persons aged 12–70. For persons outside this age range, consult your physician before administering it."

The agency shares the comments' concerns over the necessity of OTC drug labeling to alert consumers to the potential side effects of the product, conditions under which the product should be used with caution, and proper directions for use including age ranges. These items are being addressed in individual OTC drug rulemakings, specific to ingredients contained in OTC drug products. Regarding one comment's suggestion that other labeling, e.g., warnings and dosing information, may be included within the boxed area, the agency notes that the proposal and final regulation provide that option.

17. Referring to the proposed conforming amendment for OTC antacid drug products (21 CFR 331.30), published simultaneously with the exclusivity proposal at 50 FR 15814, two comments noted that it is made clear that, of the several indications listed, it is optional to select any one, some, or all of the indications for use on the product label and labeling. The comments requested that this policy expressly be set forth in the exclusivity proposal itself to clarify that such a policy is applicable to all OTC drug monographs, rather than stating it on a monograph-by-monograph basis.

The agency agrees that labeling should be as flexible as possible as evidenced by the final monograph for OTC antacid drug products. Because the various OTC drug monographs differ in the manner in which "indications" are described (e.g., a single indication; a broad indication with optional terms, or several indications), the agency considers it more appropriate to apply this selection policy on a monograph-by-monograph basis where applicable. The agency does not believe it necessary to establish an additional regulation to clarify this policy because manufacturers will need to read individual monographs applicable to their products to determine what options are available.

II. Summary of Changes

1. The agency has clarified the final regulation to state that more than one of the three alternatives may be used in the labeling of an OTC drug product. (See comment 9.)

2. The final rule has been clarified to state that labeling information not identified by quotation marks in a monograph, such as dosage, need not appear in OTC drug product labeling in the exact language established in an OTC final monograph. (See comment 10.)

3. The agency has revised alternative 1 to make the use of the term "FDA APPROVED USES," or similar designations permitted in the regulation, optional. However, as described in the proposal, if the term "FDA APPROVED USES" is used, then the indications information must appear within a boxed area. The boxed area may not be used unless the "FDA APPROVED USES" terminology is also used. The agency has also clarified the wording of alternative 2. (See comment 8.)

4. The agency has clarified the regulatory provisions of alternatives 2 and 3 to read "the provisions of section 502 of the act relating to misbranding" and the "prohibition in section 301(d) of the act against the introduction or delivery for introduction into interstate commerce of unapproved new drugs in violation of section 505(a) of the act." These changes have also been incorporated into the conforming amendments that were proposed for the monographs for OTC antacid, antiflatulent, and cholecystokinetic drug products in 21 CFR Parts 331, 332, and 357, respectively.

No comments were received in response to the agency's request for specific comment on the economic impact of this rulemaking (50 FR 15813). The agency has examined the economic consequences of this final rule in conjunction with other rules resulting from the OTC drug review. In a notice published in the Federal Register of February 8, 1983 (48 FR 5806), the agency announced the availability of an assessment of these economic impacts. The assessment determined that the combined impacts of all the rules resulting from the OTC drug review do not constitute a major rule according to the criteria established by Executive Order 12291. The agency therefore concludes that not one of these rules, including this final rule for labeling of drug products for OTC human use, is a major rule.

The economic assessment also concluded that the overall OTC drug review was not likely to have a significant economic impact on a substantial number of small entities as defined in the Regulatory Flexibility Act, Public Law 96-354. That assessment included a discretionary Regulatory Flexibility Analysis in the event that an individual rule might impose an unusual or disproportionate impact on small entities. However, this particular rulemaking for labeling of drug products for OTC human use is not expected to pose such an impact on small businesses. Therefore, the agency certifies that this final rule will not have a significant economic impact on a substantial number of small entities.

List of Subjects

21 CFR Part 330

OTC drugs, Labeling requirements.

21 CFR Part 331

OTC drugs, Antacid drug products.

21 CFR Part 332

OTC drugs, Antiflatulent drug products.

21 CFR Part 357

OTC drugs, Cholecystokinetic drug products.

Therefore, under the Federal Food, Drug, and Cosmetic Act and the Administrative Procedure Act, Subchapter D of Chapter I of Title 21 of the Code of Federal Regulations is amended in Parts 330, 331, 332, and 357 as follows:

PART 330—OVER-THE-COUNTER (OTC) HUMAN DRUGS WHICH ARE GENERALLY RECOGNIZED AS SAFE AND EFFECTIVE AND NOT MISBRANDED

1. The authority citation for 21 CFR Part 330 is revised as set forth below and the authority citations under §§ 330.2, 330.10, and 330.12 are removed.

Authority: Secs. 201(p), 502, 505, 701, 52 Stat. 1041–1042 as amended, 1050–1053 as amended, 1055–1056 as amended by 70 Stat. 919 and 72 Stat. 948 (21 U.S.C. 321(p), 352, 355, 371); 5 U.S.C. 553; 21 CFR 5.11.

2. In Part 330, § 330.1 is amended by redesignating existing paragraph (c) as paragraph (c)(1) and by adding new paragraph (c)(2), to read as follows:

§ 330.1 General conditions for general recognition as safe, effective, and not misbranded.

* * * * *

(c)(1) * * *

VOL 51 ISS 84 MY 1 1986 UMI

(2)(i) The label and labeling of the product contain in a prominent and conspicuous location the labeling describing the "Indications" that have been established in an applicable final monograph. At the option of the manufacturer, this labeling may be designated "APPROVED USES," or be given a similar designation as permitted by this paragraph, each time it appears in the labeling, e.g., on the outer carton, inner bottle label, and on any package insert or display material. If the "APPROVED USES" or a similar designation is used, the labeling involved shall appear within a boxed area. Other applicable labeling established under this Subchapter and Subchapter C of this chapter may be included in the boxed area. If such other labeling is included, the boxed area shall be designated "APPROVED INFORMATION" rather than "APPROVED USES." The "indications" information appearing in the boxed area shall be stated in the exact language of the monograph. Other information within the boxed area also shall be stated in exact language where exact language has been established and identified by quotation marks in an applicable monograph or by regulation (e.g., § 201.63 of this chapter). A statement that the information in the box was "published by the Food and Drug Administration" shall appear within the boxed area, or reasonably close by. In lieu of such statement, the designation of the boxed area may be modified to read: "FDA APPROVED USES" or "FDA APPROVED INFORMATION," as appropriate, or "USES (or "INFORMATION") APPROVED BY THE FOOD AND DRUG ADMINISTRATION," or other similar wording.

(ii) At the option of the manufacturer, as an alternative to the requirements of paragraph (c)(2)(i) of this section, the label and labeling of the product may contain in a prominent and conspicuous location other truthful and nonmisleading statements describing only those indications for use that have been established in an applicable monograph, subject to the provisions of section 502 of the act relating to misbranding and the prohibition in section 301(d) of the act against the introduction or delivery for introduction into interstate commerce of unapproved new drugs in violation of section 505(a) of the act. Such labeling shall not be boxed and shall not contain the statements provided in paragraph (c)(2)(i) of this section relating to "APPROVED USES," or "APPROVED INFORMATION," or contain a statement that the labeling has been published by the Food and Drug Administration.

(iii) At the option of the manufacturer, the label and labeling may meet the boxed-area requirements of paragraph (c)(2)(i) of this section and, in addition, other truthful and nonmisleading statements describing only those indications for use that have been established in an applicable monograph may appear elsewhere in the labeling, that is, outside the boxed area, subject to the provisions of section 502 of the act relating to misbranding and the prohibition in section 301(d) of the act against the introduction or delivery for introduction into interstate commerce of unapproved new drugs in violation of section 505(a) of the act.

(iv) At the option of the manufacturer, more than one of the alternatives described in paragraphs (c)(2)(i), (ii), and (iii) may be used in separate labeling, e.g., container label, outer carton, package insert, display material, for a particular OTC drug product provided each labeling complies with all applicable statutory and regulatory labeling requirements in all respects.

(v) The term "prominent and conspicuous location" as used in paragraph (c)(2)(i) and (ii) of this section means that the labeling within the boxed or nonboxed area shall be presented and displayed in such a manner as to render it likely to be read as understood by the ordinary individual under customary conditions at both time of purchase and use.

(vi) Regardless of the alternative selected by the manufacturer to describe indications, paragraphs (c)(2)(i), (ii), and (iii) of this section require other labeling established under this Subchapter and Subchapter C of this chapter to be stated in the exact language where exact language has been established and identified by quotation marks in an applicable monograph or by regulation (e.g., § 201.63 of this chapter).

* * * * *

PART 331—ANTACID PRODUCTS FOR OVER-THE-COUNTER (OTC) HUMAN USE

3. The authority citation for 21 CFR Part 331 is revised to read as follows:

Authority: Secs. 201(p), 502, 505, 701, 52 Stat. 1041–1042 as amended, 1050–1053 as amended, 1055–1056 as amended by 70 Stat. 919 and 72 Stat. 948 (21 U.S.C. 321(p), 352, 355, 371); 5 U.S.C. 553; 21 CFR 5.11

4. In Part 331, § 331.30 is amended by revising paragraph (b) to read as follows:

§ 331.30 Labeling of antacid products.

* * * * *

(b) *Indications.* The labeling of the product states, under the heading "Indications," the following: "For the relief of" (optional, any or all of the following:) "heartburn," "sour stomach," and/or "acid indigestion" (which may be followed by the optional statement:) "and upset stomach associated with" (optional, as appropriate) "this symptom" or "these symptoms." Other truthful and nonmisleading statements, describing only the indications for use that have been established and listed above, may also be used, as provided in § 330.1(c)(2) of this chapter, subject to the provisions of section 502 of the act relating to misbranding and the prohibition in section 301(d) of the act against the introduction or delivery for introduction into interstate commerce of unapproved new drugs in violation of section 505(a) of the act.

* * * * *

PART 332—ANTIFLATULENT PRODUCTS FOR OVER-THE-COUNTER HUMAN USE

5. The authority citation for 21 CFR Part 332 is revised to read as follows:

Authority: Secs. 201(p), 502, 505, 701, 52 Stat. 1041–1042 as amended, 1050–1053 as amended, 1055–1056 as amended by 70 Stat. 919 and 72 Stat. 948 (21 U.S.C. 321(p), 352, 355, 371); 5 U.S.C. 553; 21 CFR 5.11.

6. In Part 332, § 332.30 is amended by revising paragraph (a) to read as follows:

§ 332.30 Labeling of antiflatulent products.

(a) *Indications.* The labeling of the product states, under the heading "Indications," the following: "antiflatulent" and/or "to alleviate or relieve the symptoms of gas." Other truthful and nonmisleading statements, describing only the indications for use that have been established and listed above, may also be used, as provided in § 330.1(c)(2) of this chapter, subject to the provisions of section 502 of the act relating to misbranding and the prohibition in section 301(d) of the act against the introduction or delivery for introduction into interstate commerce of unapproved new drugs in violation of section 505(a) of the act.

* * * * *

PART 357—MISCELLANEOUS INTERNAL DRUG PRODUCTS FOR OVER-THE-COUNTER HUMAN USE

7. The authority citation for 21 CFR Part 357 is revised to read as follows:

Authority: Secs. 201(p), 502, 505, 701, 52 Stat. 1041–1042 as amended, 1055–1056 as amended by 70 Stat. 919 and 72 Stat. 948 (21 U.S.C. 321(p), 352, 355, 371); 5 U.S.C. 553; 21 CFR 5.11.

8. In Part 357, § 357.250 is amended by revising paragraph (b) to read as follows:

§ 357.250 Labeling of cholecystokinetic drug products.

* * * * *

(b) *Indications.* The labeling of the product states, under the heading "Indications," the following: "For the contraction of the gallbladder during diagnostic gallbladder studies." Other truthful and nonmisleading statements, describing only the indications for use that have been established and listed above, may also be used, as provided in § 330.1(c)(2), subject to the provisions of section 502 of the act relating to misbranding and the prohibition in section 301(d) of the act against the introduction or delivery for introduction into interstate commerce of unapproved new drugs in violation of section 505(a) of the act.

Frank E. Young,
Commissioner of Food and Drugs.
Otis R. Bowen,
Secretary of Health and Human Services.

Part IV

Department of Agriculture

Office of Grants and Program Systems

Competitive Research Grants Program for Forest and Rangeland Renewable Resources for Fiscal Year 1986; Solicitation of Applications

VOL 51 ISS 84 MY 1 1986 UMI

DEPARTMENT OF AGRICULTURE

Office of Grants and Program Systems

Competitive Research Grants Program for Forest and Rangeland Renewable Resources for Fiscal Year 1986; Solicitation of Applications

Notice is hereby given that pursuant to the authority contained in section 5 of the Forest and Rangeland Renewable Resources Research Act of 1978, as amended (16 U.S.C. 1644), the Office of Grants and Program Systems (OGPS), United States Department of Agriculture (USDA), anticipates awarding standard project grants for basic research in the areas of harvesting, wood utilization and forest biology. The total amount expected to be available for this program during fiscal year 1986 is approximately $6,168,636. Long-term projects, up to a limitation of five years, will be encouraged. Grants will be awarded by OGPS to the extent that funds are available.

Pursuant to the Secretary's Memorandum 1030-14 dated January 31, 1986, the authority to administer the $6,507,000 ($6,799,000 reduced by approximately 4.3 percent as mandated by Pub. L. No. 99-177) made available by the Continuing Appropriations Act for fiscal year 1986 for a competitive research grants program for forest research, authorized by section 5 of the Forest and Rangeland Renewable Resources Research Act of 1978, has been transferred to the Office of Grants and Program Systems. Under this authority the Office of Grants and Program Systems may award grants to Federal, State, and other governmental agencies, public or private agencies, institutions, universities, and organizations, and businesses and individuals in the United States. Only proposals from applicants in the United States will be considered for support.

Applicable Regulations

This program is subject to the provisions found at 7 CFR Part 3201 (51 FR 15288, April 22, 1986). These provisions set forth procedures to be followed when submitting grant proposals, rules governing the evaluation of proposals and the awarding of grants, and regulations relating to the post-award administration of grant projects. In addition, USDA Uniform Federal Assistance Regulations, 7 CFR Part 3015, as amended will apply to this program.

How To Obtain Application Materials

Copies of this proposed solicitation, the Research Grant Application Kit, and the proposed Administrative Provisions for this program (7 CFR Part 3201) may be obtained by writing to the address or calling the telephone number which follows: Grants Administrative Management; Attention: Proposal Services Unit; Office of Grants and Program Systems; U.S. Department of Agriculture; Room 007, J.S. Morrill Building; 15th and Independence Avenue SW.; Washington, DC 20251; telephone number (202) 475-5089.

What to Submit

An original and 15 copies of each proposal submitted under this program are requested. This number of copies is necessary to permit thorough, objective peer evaluation of all proposals received before funding decisions are made. In addition to other required forms and certifications included in the Research Grant Application Kit, an original and 15 copies of Form S&E-661, "Grant Application," are requested. Proposers should note that one copy of this form must contain pen-and-ink signatures of the principal investigator(s) and the authorized organizational representative.

All copies of each proposal should be mailed in one package if at all possible. Due to the volume of proposals received, applications submitted in several packages are very difficult to identify. Please see that each copy of each proposal is *stapled securely* in the upper left-hand corner. DO NOT BIND. Information should be typed on one side of the page only.

Every effort should be made to ensure that the proposal contains all pertinent information when submitted. Prior to mailing, compare your proposal with the Application Requirements checklist contained in the Research Grant Application Kit and instructions found in 7 CFR Part 3201.

Where and When To Submit Grant Applications

Each research grant application must be submitted to: Grants Administrative Management; Attention: Proposal Services Unit; Office of Grants and Program Systems; U.S. Department of Agriculture; Room 007, J.S. Morrill Building; 15th and Independence Avenue SW.; Washington, DC 20251.

To be considered for funding during fiscal year 1986, proposals should be *postmarked by June 2, 1986.*

Introduction to Program Description

Standard research grants will be awarded to support basic research in selected areas of (1) harvesting, processing, and utilization of timber resources, with special emphasis on the chemical, mechanical, and engineering properties of wood and wood materials and (2) forest biology, including biotechnology, that are considered by a number of scientific groups to possess exceptional opportunity for fundamental scientific discovery and for contributing, in the long run, to applied research and development vitally needed on important wood utilization and forestry problems. This grants program recognizes that new, innovative approaches and enhanced levels of funding are essential as we seek ways to improve the economic and environmental value of our forest resources.

Consideration will be given to research proposals that address fundamental questions in the areas noted below and that are consistent with the long-range missions of USDA. Basic guidelines are provided to assist members of the scientific community in assessing their interest in the program areas and to delineate certain important areas where new information is vitally needed. However, these guidelines are also meant to be flexible and should not detract from the creativity of potential investigators. OGPS encourages the submission of innovative projects in the so-called "high-risk" category, as well as those that may have greater probability of success.

Workshops or symposia that bring together scientists to identify research needs, update information or advance an area of research are recognized as an integral part of research efforts. Support for a limited number of such meetings covering subject matter encompassed by this Competitive Research Grants Program for Forest and Rangeland Renewable Resources will be considered for partial or, if modest, complete support.

This program is divided into the two program areas outlined below, and funding will be divided equally between them. Proposals submitted in response to this solicitation must be identified as to the program area under which they are to be considered for funding (e.g., Wood Chemistry and Biochemistry).

First, the Department will fund proposals concerning the improved utilization of wood and wood fiber. Public and private forests in the United States contain one of our most important renewable natural resources, providing

a continuing supply of wood for industrial materials, chemicals, and energy, as well as other resources and benefits. National requirements for wood, wood fiber, and chemical products, however, increasingly demand the development of innovative and economical conversion processes that effectively utilize total available wood resources. Thus, as the diverse demands placed upon forest resources grow, the Department of Agriculture is encouraging the development of more efficient harvesting, processing, utilization, and management practices.

Second, the Department will fund proposals concerning forest biology (including biotechnology). Forest systems generally are dominated by long-lived trees in either planted or naturally regenerated stands that may vary in composition from one species to complex mixtures of many. These primarily undomesticated populations of forest trees, while dominant, are but one component of larger communities of diverse numbers and combinations of associated organisms. Productivity of the forest ecosystem is thus dependent upon the many complex processes and interactions among trees, other organisms and the physical factors of the environment. While many of these processes and interactions have been identified, studied and described, very little is known of the basic biological mechanisms that underlie and determine their direction and rates.

The following guidelines are provided as a base from which proposals may be developed.

Specific Areas of Research To Be Supported in Fiscal Year 1986

1. Improved Utilization of Wood and Wood Fiber

Improved wood utilization practices depend upon a continually advancing scientific foundation of basic research in wood properties and fundamental components of wood science. This program area encourages research that addresses critical barriers to improved wood utilization and that will provide the scientific base from which new research and development can proceed. Grants will be awarded to support basic research in the following three categories of wood science:

Wood Chemistry and Biochemistry represents an important area where new basic information is vitally needed and where breakthroughs have a virtually unlimited potential for expanding wood utilization. Basic questions that need to be addressed include the nature of underlying principles governing enzymatic, microbial, and other chemical reactions. Examples of research subjects of interest include bioconversion and deterioration mechanisms, lignin and cellulose polymer modification, surface chemistry, bonding chemistry, and thermal reactions.

Physical/Mechanical Properties of Wood and Basic Processing Technology constitutes an area of investigation in which an improve base of scientific knowledge can ensure future development of new products and processes.

Research is encouraged that furthers our understanding of basic mechanisms that impinge upon the structure, physical properties, and basic processing characteristics of wood and reconstituted wood materials. Examples of such research include, but are not limited to, anatomy, wood formation, viscoelasticity and quality investigations, machining processes, heat and mass transfer phenomena, lignocellulose modification, particle/fiber consolidation, non-destructive property evaluation, and materials science principles.

Structural Wood Engineering has developed empirically over time and has typically involved incremental improvements upon conventional concepts. Significant improvements depend upon developing an expanded scientific base of knowledge about the use and performance of wood as a structural material. The goal of basic research in this field is to support and encourage innovative approaches to the structural use of wood. Examples of research in this category include reliability-based design, systems modeling and validation, wood/non-wood composites, fasteners, and basic failure mechanisms.

To be considered for support, grant proposals should demonstrate applicability to one of the described areas of research emphasis and must offer a resonable probability of contributing significantly to the present body of scientific knowledge. The Department encourages proposals that emphasize innovative approaches to solving fundamental problems in the field of wood science and technology. Although this program area will emphasize research in the above categories, other new or unusual approaches will not be excluded.

If necessary, further information may be obtained from the Associate Program Manager at (202) 475-3310.

2. Forest Biology (Including Biotechnology)

The primary goals of the Forest Biology program area are to promote and fund research that will further the basic knowledge of mechanisms of biological processes in forest organisms and systems and that will contribute to overcoming barriers to optimize the health and productivity of the forest resource. Emphasis will be placed on research proposals that deal with the woody plant component of the forest system. Also, grants will be awarded to support basic studies in the following two categories of forest biology research, each of which has been judged to offer exceptional opportunities for scientific advancement. Thus, proposals in this area of fundamental research are encouraged, but the program will not exclude other new or unusual research approaches.

Genetic Structure and Function is an area of research in which new basic knowledge and technology development are critically needed to support future efforts in more intensive forest management. Forest organisms, by virtue of their wide distribution and occurrence in both natural and manipulated ecosystems, offer unique opportunities to analyze, identify and utilize a broad spectrum of variations and adaptations that still persist in the gene pools of existing populations.

Research should address the genetic limits to the health and productivity of wood species, including: Development of techniques for genetic engineering, including those for DNA transfer systems and for determining molecular mechanisms of gene expression; elucidation of mechanisms of morphogenesis at the cellular and organismal levels, including those controlling the development of productive plants from tissue or cell culture; identification and characterization of valuable genes and simply-inherited traits; and determinations of the organization, structure, and function of genomes.

Mechanisms of Interactions in Forest Systems is an area of research which requires a significant increase in basic knowledge to support subsequent studies of a more applied nature. Forest productivity is determined by complex climatic, geochemical and physical forces interacting with the living component of the ecosystem, the diverse mixtures of woody species of varying genotype, size and age that exist in various stages of equilibria with each other and with a host of other forest organisms. Understanding basic mechanisms that underlie the dynamic changes that occur as a forest regenerates and matures is essential to determining constraints and

VOL
51
ISS
84
MY
1
1986
UMI

opportunities to improve the health and productivity of the forest resource.

Areas in which basic research is needed to understand mechanisms involved in some of these processes include, but are not limited to: Determining mechanisms driving processes such as mycorrhizal symbioses, carbon and nitrogen metabolism, and elucidating mechanisms involved in antagonistic relationships between forest organisms (interspecific interference) such as allelopathy and host-parasite interactions.

To be considered for support, grant proposals should demonstrate applicability to one of the described areas of research emphasis and must offer a reasonable probability of contributing significantly to the present body of scientific knowledge. It is especially important that proposals emphasize innovative approaches to solving fundamental problems in forest biology.

If necessary, further information may be obtained from the Associate Program Manager at (202) 475-3310.

Supplementary Information

For reasons set forth in the final rule related notice to 7 CFR Part 3015, Subpart V (48 FR 29115, June 24, 1983), this program is excluded from the scope of Executive Order 12372, which requires intergovernmental consultation with State and local officials.

Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3504 (h)), the collection of information requirements contained in this notice have been approved under OMB Document No. 0525-0001.

Done at Washington, DC, this 24th day of April 1986.

John Patrick Jordan,

Acting Administrator Office of Grants and Program Systems.

OFFICE OF MANAGEMENT AND BUDGET

Budget Rescissions and Deferrals

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report three rescission proposals totaling $114,500,000 affecting programs in the Department of Defense—Military.

The details of these rescission proposals are contained in the attached report.

Ronald Reagan.

The White House,

April 25, 1986.

Rescission Proposal No: R86-81

PROPOSED RESCISSION OF BUDGET AUTHORITY
Report Pursuant to Section 1012 of P.L. 93-344

AGENCY:
Department of Defense - Military

Bureau:

Appropriation title and symbol:
Procurement of weapons and tracked combat vehicles, Army
214/62033

OMB identification code:
21-2033-0-1-051

Grant program:
[ ] Yes [X] No

Type of account or fund:
[ ] Annual
[X] Multiple-year 9/30/86 (expiration date)
[ ] No-Year

New budget authority..... $
(P.L.)
Other budgetary resources 787,577,501
Total budgetary resources 787,577,501

Amount proposed for rescission $ 34,400,000

Legal authority (in addition to sec. 1012):
[ ] Antideficiency Act
[ ] Other

Type of budget authority:
[X] Appropriation
[ ] Contract authority
[ ] Other

Justification: Procurement of weapons and tracked combat vehicles, Army provides funds for the construction, procurement, production, and modification of weapons and tracked combat vehicles. These funds are being proposed for rescission to offset fiscal year 1986 increases resulting from a proposed supplemental for military and economic assistance to the Philippines.

Estimated Program Effect: This proposal would rescind those funds that were authorized to be transferred under Section 8103 of Public Law 99-190 for "increased readiness of conventional forces in programs funded in the operation and maintenance accounts."

The fiscal year 1986 column of the fiscal year 1987 Budget reflects transfers from prior year unobligated balances in procurement appropriations to operation and maintenance appropriations. The proposed transfers would be reduced by $34.4 million to accommodate this requirement. The following items have been adjusted:

($ in millions)

Productivity improvement equipment	-15.0
Tactical Army Combat Service Computer System (TACCS)	-4.3
Standard Army Automated Contracting System (SAACONS)	-3.0
Standard port system ADP	-1.1
Air defense training development contract	-5.8
Repair parts stockage	-5.0

Outlay Effect (in thousands of dollars):

1986 Outlay Estimate		Outlay Savings					
Without Rescission	With Rescission	1986	1987	1988	1989	1990	1991

Of the funds made available under this head in Public Law 98-473, $40,100,000 are rescinded.

Rescission Proposal No: R86-82

PROPOSED RESCISSION OF BUDGET AUTHORITY
Report Pursuant to Section 1012 of P.L. 93-344

Agency:
Department of Defense - Military

Bureau:

Appropriation title and symbol:
Shipbuilding and conversion, Navy
174/81611

OMB identification code:
17-1611-0-1-051

Grant program: | | Yes | X | No

Type of account or fund:
| | | Annual
| X | | Multiple-year 9/30/88 (expiration date)
| | | No-Year

New budget authority..... $ ____
(P.L. ____)

Other budgetary resources 3,196,322,330

Total budgetary resources 3,196,322,330

Amount proposed for rescission $ 40,100,000

Legal authority (in addition to sec. 1012):
| | | Antideficiency Act
| | | Other ____

Type of budget authority:
| X | | Appropriation
| | | Contract authority
| | | Other ____

Justification: Shipbuilding and conversion, Navy provides funds for the construction, acquisition, or conversion of naval vessels as authorized by law. These funds are being proposed for rescission to offset fiscal year 1986 increases resulting from a proposed supplemental for military and economic assistance to the Philippines.

Estimated Program Effect: This proposal would rescind funds which were authorized to be transferred under Section 8103 of Public Law 99-190 for "increased readiness of conventional forces in programs funded in the operation and maintenance accounts."

The fiscal year 1986 column of the fiscal year 1987 Budget reflects transfers from prior year unobligated balances in procurement appropriations to operation and maintenance appropriations. The proposed transfers would be reduced by $40.1 million to accommodate this requirement. The following item has been adjusted:

	($ in millions)
Aircraft and other depot maintenance...	-40.1

UMI

Outlay Effect (in thousands of dollars):

1986 Outlay Estimate Without Rescission	1986 Outlay Estimate With Rescission	Outlay Savings 1986	1987	1988	1989	1990	1991
9,147,200	9,119,200	28,000	12,100	---	---	---	---

DEPARTMENT OF DEFENSE - MILITARY

Procurement

Other Procurement, Air Force

Of the funds made available under this head in Public Law 98-473, $40,000,000 are rescinded.

PROPOSED RESCISSION OF BUDGET AUTHORITY
Report Pursuant to Section 1012 of P.L. 93-344

Agency:
Department of Defense - Military

Bureau:

Appropriation title and symbol:
Other procurement, Air Force
57S/73080

OMB identification code:
57-3080-0-1-051

Grant program: [ ] Yes [X] No

Type of account or fund:
[ ] Annual
[X] Multiple-year 9/30/87 (expiration date)
[ ] No-Year

New budget authority..... $
(P.L.)
Other budgetary resources 2,111,943,437
Total budgetary resources 2,111,943,437

Amount proposed for rescission $ 40,000,000

Legal authority (in addition to sec. 1012):
[ ] Antideficiency Act
[ ] Other

Type of budget authority:
[X] Appropriation
[ ] Contract authority
[ ] Other

Justification: Other procurement, Air Force provides funds for the procurement and modification of equipment including munitions, ground guidance, vehicles, electronic control equipment, and ground electronic and communication equipment. These funds are being proposed for rescission to offset fiscal year 1986 increases resulting from a proposed supplemental for military and economic assistance to the Philippines.

Estimated Program Effect: This proposal would rescind those funds that were authorized to be transferred under Section 8103 of Public Law 99-190 for "increased readiness of conventional forces in programs funded in the operation and maintenance accounts."

The fiscal year 1986 column of the fiscal year 1987 Budget reflects transfers from prior year unobligated balances in procurement appropriations to operation and maintenance appropriations. The proposed transfers would be reduced by $40.0 million to accommodate this requirement. The following item has been adjusted:

	($ in millions)
Real property maintenance.....	-40.0

TABLE OF EFFECTIVE DATES AND TIME PERIODS—MAY 1986

This table is used by the Office of the Federal Register to compute certain dates, such as effective dates and comment deadlines, which appear in agency documents. In computing these dates, the day after publication is counted as the first day.

When a date falls on a weekend or holiday, the next Federal business day is used. (See 1 CFR 18.17)

A new table will be published in the first issue of each month.

DATE OF FR PUBLICATION	15 DAYS AFTER PUBLICATION	30 DAYS AFTER PUBLICATION	45 DAYS AFTER PUBLICATION	60 DAYS AFTER PUBLICATION	90 DAYS AFTER PUBLICATION

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: May 15; at 9 am.

WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC.

RESERVATIONS: Laurence Davey, 202-523-3517

Rules and Regulations

Federal Register
Vol. 51, No. 85
Friday, May 2, 1986

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

7 CFR Parts 272 and 273

[Amdt. No. 273]

Food Stamp Program; Alaska Thrifty Food Plan

AGENCY: Food and Nutrition Service, USDA.

ACTION: Final rule.

SUMMARY: On May 1, 1984, the Department issued an interim rule establishing separate food stamp allotment levels for rural and urban Alaska. Comments were solicited from interested parties through July 2, 1984. On April 8, 1985, the Department issued a final rule which announced that rural and urban allotment levels in Alaska would remain unchanged, but that new levels would be considered when data became available to establish them. This action required new allotment levels in rural and urban Alaska, based upon a Settlement Agreement in *Vera Nevezaroff, et al. v. John R. Block*, U.S.D.C. Alaska, No. A–85–203. (These rules are to be implemented, construed and interpreted in a manner consistent with the terms of that Settlement Agreement.)

DATE: This rule will be effective April 1, 1986.

ADDRESS: Questions or comments should be directed to Thomas O'Connor, Supervisor, State Management Section, Administration and Design Branch, Program Development Division, Family Nutrition Programs, Food and Nutrition Service, and Nutrition Service, USDA, 3101 Park Center Drive, Alexandria, Virginia 22302. All written comments will be open for public inspection at the office of the Food and Nutrition Service during regular business hours (8:30 a.m. to 5:00 p.m., Monday through Friday).

FOR FURTHER INFORMATION CONTACT: Thomas O'Connor, Supervisor, State Management Section, Administration and Design Branch, Program Development Division, Family Nutrition Programs, Food and Nutrition Service, USDA, Alexandria, Virginia 22302, (703) 756–3385.

SUPPLEMENTARY INFORMATION:

Classification

Executive Order 12291

The Department has reviewed this rule under Executive Order 12291 and Secretary's Memorandum No. 1512–1. This rule will not have significant adverse effects upon competition, employment, investment, productivity, innovation, or upon the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Therefore, the Department has classified this rule as "not major". Adoption of this action would result in Alaska allotments that are more representative of food costs in the State.

Executive Order 12372

The Food Stamp Program is listed in the Catalog of Federal Domestic Assistance under No. 10.551. For the reasons set forth in the Final Rule related Notice to 7 CFR 3015, Subpart V (48 FR 29115), this program is excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

Regulatory Flexibility Act

This action has been reviewed with regard to the requirements of the Regulatory Flexibility Act of 1980 (Public Law 96–354, 94 Stat. 1164, September 19, 1980). Robert E. Leard, Administrator of the Food and Nutrition Service, has certified that this action will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

This regulation does not contain reporting or recordkeeping requirements subject to approval of the Office of Management and Budget under the Paperwork Reduction Act.

Final Rule

This rule is based on a Settlement Agreement approved by the United States District Court, District of Alaska. Notice and comment rulemaking is unnecessary and contrary to the public interest. The Settlement Agreement is based, in part, on extensive State-wide solicitation of public comment and a review of that public comment. A notice soliciting public comment was sent to food stamp recipients in Alaska, was posted by fee agents in Alaska, and was published in Alaska newspapers of general circulation.

This rule is effective April 1, 1986. The State of Alaska and Alaska Legal Services Corporation have agreed that Alaska will begin implementing the Settlement Agreement on April 1, 1986. Since rapid implementation of these improvements in program operations is in the public interest FNS has determined that good cause exists to make this rule effective on April 1, 1986.

Background

The Agriculture and Food Act of 1981 (Pub. L. 97–98), enacted on December 22, 1981, provided, in part, for differing allotment levels for rural and urban Alaska to recognize significantly higher food costs in rural Alaska. On May 1, 1984, and on April 8, 1985, the Department issued interim and final rules, respectively, implementing this provision of law. A full explanation of the rationale and purposes of those rules was provided when each was published. (See 49 FR 18458–18463 and 50 FR 13759–13761). In the April 8, 1985 final rule, the Department noted that efforts were being undertaken by the State agency, and others, to supply more up-to-date food price data for additional areas of the State. The Department noted that these data might ultimately provide sufficient information to warrant a reconsideration of the Department's initial decisions. Therefore, the Department made a commitment that when these data became available the Department would review them and determine the need for a reassessment in the methodology for establishing urban and rural allotments. In the meantime, a legal action was filed against the Department by several Alaska food stamp recipients who asserted that some areas designated as urban (low cost food areas) by USDA should have been designated rural (high food cost areas). USDA strongly contended that the rules establishing the rural and urban areas in Alaska were

VOL 51 ISS 85 MY 2 1986 UMI

proper, but that forthcoming food cost information might indicate that changes in the rules would improve the efficiency of the program in Alaska. This new information became available after the legal action was filed.

After reviewing the new data, USDA met with plaintiffs' counsel (Alaska Legal Services Corporation), the Alaska State agency, and the University of Alaska Cooperative Extension Service to consider and discuss discrepancies between the new data base and other information available to USDA and to obtain information concerning areas not covered in either the new data base or the data base used to promulgate USDA's original rules.

The result of this meeting, as well as extensive subsequent discussions, was an agreement among all parties as to which areas of the State were low cost food areas and which areas were high cost food areas. The U.S. District Court for Alaska, based on input from all parties and on public input, approved the Settlement Agreement on January 30, 1986.

Data Base Background

In the Department's previous rules, the Department used data from the State Division of Personnel (SDP) to establish food costs in the State's county equivalent areas.

The data base from the SDP covered a larger proportion of the State than other data bases. It contained food cost data for county equivalent areas which represented 95 percent of the population within the State. For the remaining 5 percent of the population, there was a compatible data base available from the Alaska Department of Commerce. However, the SDP data base was from 1976, and the Department was aware that salient changes might have occurred since then which were not reflected in these data. Although the Department had been advised that the State agency planned to develop a more up-to-date data base, that data base would not be available for some time after the final rule was published, and the Department did not have sufficient advance information to determine whether the forthcoming data base would be suitable to establish Alaska allotments. Therefore, based upon all of the information actually available when comments on the Alaska Thrifty Food Plan (TFP) rule were being considered, the Department concluded that it was necessary and in the public interest to issue a final rule based upon the best data base that existed.

The SDP data were judged to be preferable to other data bases because they were from a single point in time and because they provided broader coverage of the State. At the same time, the Department made a commitment to review and assess the State agency data base when it became available. In keeping with that commitment, the Department maintained close contact with the State agency and made an ongoing effort to assess and comment upon the survey while it was in process and to review the survey data as they became available. Several areas of concern had to be addressed and resolved before these data could be used, and the Department worked closely with the State agency, plaintiffs' counsel, and the Cooperative Extension Service in resolving them.

County Equivalent Concept Background

In the May 1 rule, the Department used the 23 county equivalents in Alaska as the geographic units upon which to base the designations of urban and rural. The Department did not have sufficient data to make a place-by-place designation of urban or rural, and the county equivalent concept was thought to ease the administrative burden of administering the dual allotment system.

Each county equivalent area was designated as either urban or rural based on whether its food costs (weighted by food stamp participants) were comparatively high or low. Thus, an entire county equivalent area would be designated urban, even though a small place within that area had very high food prices because places with lower food stamp participation were given less weight than higher participation places in the Department's mathematical equation. Likewise, an entire county equivalent area would be designated as rural even though a small place within it had relatively low food prices.

Since the Department's initial rules were promulgated, the convergence of two factors warranted a reconsideration of the county equivalent concept. First, the existence of the new data base greatly increased the number of areas for which the Department has food price data, thereby making it possible to make more precise determinations of urban and rural status. Secondly, the State agency acquired a new computer system which will enable them to make accurate place by place determinations of urban or rural status.

Data Base Description

The new data base is described in a survey report entitled, "What does it Cost in Alaska?" dated June 1985. This survey was conducted by the University of Alaska-Cooperative Extension Service (CES). A copy of this survey is available for review at the Department. Copies may be obtained from the Cooperative Extension Service, University of Alaska, Fairbanks, Alaska 99701.

Data were collected in 26 communities throughout Alaska between September 1984 and May 1985 on a food list similar to the USDA TFP described at 48 FR 34700–34702, July 29, 1983. An index of food costs in each community was obtained by comparing each community's surveyed food costs with a "derived" TFP for Anchorage that equalled 81% of CES's low cost food plan costs.

There were salient differences between CES's survey methods and USDA's, which had to be considered before the CES data could be used, however. CES modified the food list USDA used, and collected information for as few as 24 percent of the foods on the list. In addition, the methods used to collect food price information in the Alaska survey were different from those used to establish the TFP. In the national plan, the prices collected reflect differences in container sizes, brands, quality of food and price levels of different stores, so that average prices paid for foods are more closely approximated. However, the Alaskan prices were gathered from the three high-volume supermarkets in each community; and they were collected for the lowest priced item, regardless of brand or size of package. Thus, food prices *seemed* to be understated in the new survey, although this could be quantified only for Anchorage, where costs for the "TFP" calculated by CES were 16 percent below those of the TFP calculated by USDA based upon data collected by the Bureau of Labor Statistics (BLS). Furthermore, the 26 communities surveyed were surveyed at different points in time, making place-by-place comparisons somewhat imprecise. Finally, the CES survey did not cover all areas of the State. The survey covered 26 communities, representing 1.7 percent of the State's population and 64 percent of the Census Regions; but more than one-third of the State's 22 Census Regions were not represented at all.

The most troubling problem area was the apparent understatement of food prices. The differences between CES's modified market basket and USDA's market basket were not great enough to account for a 16 percent difference in cost. Yet, the magnitude of this difference called into question the validity of one or the other survey.

After consultation with the State agency, CES and within the Department, the Department developed a hypothesis why CES's derived food costs in Anchorage were lower than the costs collected by the BLS. The BLS method of obtaining average prices paid resulted in higher costs in Anchorage because the lowest-unit price items were not necessarily selected by their shoppers. Shoppers for CES, on the other hand, consistently selected the lowest-priced items, including those on sale and low-unit-price items. Since Anchorage is a competitive market that includes stores likely to have sales on various items and several sizes of items to choose among, the CES methodology would always result in a lower-cost market basket compared to the BLS procedure. However, in areas other than Anchorage, where there is less competition among stores (sometimes there is only one store in an area) and less selection among food items (sometimes only one size is available), there would not be differences between "lowest prices" and the "average prices" paid. Therefore, CES costs for areas other than Anchorage could be used directly, because they were most comparable to those that would have been obtained had the BLS method been used. However, Anchorage TFP costs imputed by the CES could not be used to establish urban and rural allotments because they were too low. Therefore, the Department decided to continue using Anchorage costs for the TFP as calculated using BLS data, as the base number to establish a food price index for purposes of making an urban or rural designation. The Department believes this results in a more accurate representation of food costs in rural areas compared to Anchorage costs.

In addressing the other areas of concern, the Department made the following decisions:

It decided to use all of the CES survey data (except as already noted), even when only a portion of the market basket was priced or when the food list itself was modified, but it worked closely with the State agency and with CES to assess the validity of the resultant numbers. Thus, the Department learned that certain items simply were not available in some areas, and that comparable food items were substituted using a consistent methodology. Also, the Department asked the State to collect more data in some areas.

The Department decided to combine the CES survey data base with the data base originally used by the Department to calculate urban and rural allotments (the SDP data base). The result is a "merged" new data base, which covers every Census Region within the State and enables the Department to make more precise designations of urban and rural.

Finally, the Department decided to use December 1984 Anchorage TFP costs as the base from which to compute index numbers from the CES survey. December 1984 is close to the midpoint of the CES survey time period and is the reference time period designated by CES.

Urban-rural definition

After reviewing the numbers obtained in the merged data based and consulting with the State agency, the Department decided that it would be appropriate to make some place-by-place designations of food costs, as well as to establish two rural allotment levels. Rural I allotment levels are higher than urban levels, and rural II allotment levels are higher than rural I, reflecting significantly higher food costs in some rural areas.

The Department's designation of each county equivalent or smaller geographic entity as urban, rural I, or rural II, is based largely upon food costs in those areas as shown in the two data bases, and after consultations with the State agency, the CES, and the Alaska Legal Services Corporation. In general, rural II areas are those places which currently are designated as rural, except that parts of the Aleutian Islands are redesignated as rural II, and one place in the Yukon-Koyukuk Census Area is redesignated as rural I. Some places which are currently urban are redesignated as rural I. (These places have food costs significantly higher than Anchorage, but not as high as in the rural areas.)

After aggregating places in the State into the urban, rural I and rural II areas, the Department calculated three weighted averages of food prices—one each for urban, rural I, and rural II areas. Then the weighted average food costs were compared to Anchorage costs to establish a differential for urban, rural I, and rural II allotments. This is the same methodology as was used in the current rules, except that the data base is now larger and the Census Region concept essentially has been abandoned. The new urban differential is 1.0079 percent higher than costs in Anchorage alone. It is lower than the current 6.4 percent urban differential, reflecting the results of pulling out some of the higher priced areas and redesignating them as rural I or rural II. The new rural I differential is 28.52 percent higher than Anchorage costs, and the new rural II differential is 56.42 percent higher than Anchorage costs. The new rural II differential is higher than the current rural differential of 50.7 percent because one lower-priced area was taken out and because the expansion of the data base led to the addition of some higher cost areas.

Urban, Rural I, and Rural II Allotments

Anchorage TFP costs were $350.20 for a family of four in June 1985. Using the new urban differential of 1.0079 percent, the new urban allotment would be $352. This is lower than the current urban allotment of $372, reflecting the mathematical results of taking the higher-priced rural I areas out of the urban designation. However, the Department does not want to reduce allotments in urban areas, so the Department is freezing urban allotments of $372 for a four-person household at the existing level until such time as the annual cost-of-living adjustment, calculated on the basis of the $352 allotment, dictates that they be increased. The same approach will be taken with respect to the one area being reclassified from rural to rural I. The new rural I allotment is $450, approximately 28 percent higher than the new unfrozen urban allotment, reflecting higher food costs in rural I areas. It is 21 percent higher than the current urban allotment, and it is lower than the current rural allotment. The new rural II allotment is approximately 55 percent higher than the new unfrozen urban allotment and 4 percent higher than the current rural allotment, reflecting that these areas have the highest food costs of all.

The current TFP amounts and the revisions for Alaska are as follows:

Household size	Current		New			
	Urban	Rural	Urban (Frozen)	Rural I	Nonarea (Frozen)	Rural II
1	111	198	111	135	158	164
2	204	290	204	247	290	301
3	293	415	293	354	415	431

+ Each additional	+84	+119	+84	+101	+119	+123

VOL 51 ISS 85 MY 2 1986 UMI

Implementation

This rule will have an important impact upon households in the State of Alaska. Many Alaskan households receiving food stamps will receive a different allotment amount. Households in many communities will be entitled to higher allotments because they have been reclassified either from urban to rural I or rural II or from rural to rural II. Households in one community, Nenana, will be reclassified from rural to rural I, but their allotments will be temporarily frozen at current levels. Households which remain urban will have their allotments frozen temporarily at current urban levels until cost of living adjustments provided for in the Food Stamp Act require a change.

After extensive discussions between the State of Alaska and the Alaska Legal Services Corporation, it was decided that an April 1, 1986, implementation was appropriate.

Enhanced Benefits and Recoupments

This rule is considered an improvement in the method of issuing benefits in Alaska and is based on new information, previously existing information, and other factors discussed in this docket. Most rural households will receive higher benefit levels, and urban households in areas remaining urban will eventually receive somewhat lower benefit levels than they would have if these rules had never been issued. If these rules had been issued two years ago, urban households remaining in urban areas would have received fewer benefits for two years. However, since their allotments were correctly computed under existing regulations, although based on a different geographic base and methodology (see 49 FR 18458–18463 and 50 FR 13758–13761), the Department decided that claims should not be issued against households living in areas still labelled urban to collect overissuances of benefits. The Department believes it is in the public interest to forgo recouping benefit amounts from urban households.

Likewise, rural households have been receiving the proper amount of benefits in accordance with a properly issued rule and retroactive benefits will not be paid to rural households whose benefits will increase, since no wrong denials of benefits occurred. However, should the State agency delay implementation beyond the April 1, 1986 period, retroactive benefits would be paid subsequently to affected households in rural areas.

List of Subjects

7 CFR Part 272

Alaska, Civil rights, Food and Nutrition Service, Food stamps, Grant programs, Social programs, Records, Reporting requirements.

7 CFR Part 273

Administrative practice and procedure, Aliens, Claims, Food and Nutrition Service, Food stamps, Fraud, Grant programs—social programs, Penalties, Records, Reporting requirements, Social Security, Students.

Therefore, Parts 272 and 273 are amended as follows:

1. The authority citations for Parts 272 and 273 continue to read as follows:

Authority: 91 Stat. 958 (7 U.S.C. 2011–2029).

PART 272—REQUIREMENTS FOR PARTICIPATING STATE AGENCIES

2. In § 272.1, a new paragraph (g) (75) is added to read as follows:

§ 272.1 General terms and conditions.

* * * * * * *

(g) *Implementation.* * * *

(75) Amendment No. 273. The State agency shall implement this amendment establishing Alaska urban, Rural I, and Rural II allotment levels by April 1, 1986.

3. In § 272.7(c), the definition for "Urban Alaska TFP" is revised, the definition for "Rural Alaska TFP" is removed and new definitions for "Rural I Alaska TFP" and "Rural II Alaska TFP" are added in alphabetical order. The revisions and additions reads as follows:

§ 272.7 Procedures for program administration in Alaska.

(c) *Definitions* * * *

"Rural I Alaska TFP" refers to a Thrifty Food Plan (TFP) that is the higher of the TFP that was in effect in each area on October 1, 1985, or 26.52 percent higher than the Anchorage TFP, as calculated by FNS, with rounding and other reductions that are appropriate. It is to be used in the following areas: In all places in Kodiak Island Borough with the exception of Kodiak; in all places in the Kenai Peninsula Borough that are west of Cook Inlet (including Tyonek, Kustatan, Kalgin Island, Iliamna, Chenik, and Augustine Island) and Chugach Island, English Bay, Port Graham, Portlock, Pt. Gore, Pye Island, and Seldovia. In the Yukon-Koyukuk Census Area, the city of Nenana; and Skwentna in the Matanuska-Susitna Borough. In the Valdez-Cordova Census Area, all places except Dayville and Valdez; and in the Southeast Fairbanks Census Area all places except Big Delta, Delta Junction, and Fort Greely. In the Skagway-Yakutat-Angoon Census Area, all places except Skagway; in Sitka Borough all places except Sitka; in the Wrangell-Petersburg Census Area, all places except Wrangell and Petersburg; in the Ketchikan Gateway Borough, all places except Ketchikan, Saxman, and Ward Cove; in the Prince of Wales-Outer Ketchikan Census Area, all places except Craig, Hyder, and Metlakatla.

"Rural II Alaska TFP" refers to a TFP that is 58.42 percent higher than the Anchorage TFP, a calculated by FNS, with rounding and other reductions that are appropriate. It is to be used in the following areas: North Slope Borough; Kobuk Census Area; Nome Census Area; Yukon-Koyukuk Census Area except for the city of Nenana; Wade Hampton Census Area; Bethel Census Area; Denali in the Matanuska-Susitna Borough; Dillingham-Bristol Bay Borough; and in all places in the Aleutian Islands except for Cold Bay and Adak.

"Urban Alaska TFP" refers to a TFP that is the higher of the TFP that was in effect in each area on October 1, 1985, or 1.0079 percent higher than the Anchorage TFP, as calculated by FNS, with rounding and other reductions that are appropriate. It is to be used in the following areas: Cold Bay and Adak in the Aleutian Islands; Kodiak in Kodiak Island Borough; Valdez and Dayville in the Valdez-Cordova Census Area; all places in Kenai Peninsula Borough that are on the Kenai Peninsula except for those specifically designated as Rural I; the entire Anchorage Borough; the entire Matanuska-Susitna Borough except for Denali and Skwentna; the entire Fairbanks-North Star Borough; the entire Juneau Borough; the entire Haines Borough; Sitka in the Sitka Borough; Skagway in the Skagway-Yakutat-Angoon Census Area; Wrangell and Petersburg in the Wrangell-Petersburg Census Area; Ketchikan, Saxman, and Ward Cove in the Ketchikan-Gateway Borough; Craig, Hyder, and Metlakatla in the Prince of Wales-Outer Ketchikan Census Area; and Big Delta, Delta Junction, and Fort Greely in the Southeast-Fairbanks Census Area.

* * * * * * *

PART 273—CERTIFICATION OF ELIGIBLE HOUSEHOLDS

4. In § 273.10 paragraph (e)(4)(i) is revised to read as follows:

§ 273.10 Determining household eligibility and benefit levels.

* * * * * * *

(e) Calculating net income and benefit levels. * * *

(4) Thrifty Food Plan (TFP)—(i) Level of the TFP. The TFP shall be uniform by household size throughout the 48 contiguous States and the District of Columbia. The TFP for Hawaii shall be the TFP for the 48 States and DC, adjusted for the price of food in Honolulu. The plans for urban, rural I and rural II parts of Alaska shall be the TFP for the 48 States and DC adjusted by the price of food in Anchorage and further adjusted for urban, rural I and rural II Alaska as defined in § 272.7(c). The TFPs for Guam and the Virgin Islands shall be adjusted for changes in the cost of food in the 48 States and DC, provided that the costs of these plans may not exceed the cost of the highest TFP for the 50 States. The TFP amounts in each area are adjusted annually and will be prescribed in a General Notice published in the **Federal Register**.

7 CFR Part 1435

Protection of Sugar Producers

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Final rule.

SUMMARY: This rule sets forth the provisions which are designed to protect sugar producers as mandated by section 401(e)(2) of the Agricultural Act of 1949, as amended by the Food Security Act of 1985. Under the rule, the Commodity Credit Corporation (CCC) will pay sugar producers the maximum benefits of the sugar price support program, less benefits previously received by the producers, in the event of the insolvency of the processor with whom they have entered into a contract for the processing of sugar beets or sugarcane.

EFFECTIVE DATE: April 29, 1986.

FOR FURTHER INFORMATION CONTACT: Ross D. Ballard, Cotton, Grain, and Rice Price Support Division, ASCS, U.S. Department of Agriculture, P.O. Box 2415, Washington, D.C. 20013. Phone: (202) 447–4704.

SUPPLEMENTARY INFORMATION:

Rulemaking Requirements

Information collection requirements contained in this regulation (7 CFR §§ 1435.200–1435.206) have been approved by the Office of Management and Budget (OMB) in accordance with the provisions of the Paperwork Reduction Act of 1980, 44 U.S.C. Chapter 35, and have been assigned OMB clearance number 0560–0093.

This final rule has been reviewed under U.S. Department of Agriculture (USDA) procedures established in accordance with provisions of Executive Order 12291 and Departmental Regulation No. 1512–1 and has been classified "not major." It has been determined that the provisions of this final rule will not result in: (1) An annual effect on the economy of $100 million or more; (2) major increases in costs or prices for consumers, individual industries, Federal, State, or local government agencies or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

It has been determined that the Regulatory Flexibility Act is not applicable to this rule since the CCC is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this rule.

This activity is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 29115 (June 24, 1983).

It has been determined that this action is not expected to have any significant impact on the quality of the human environment. In addition, it has been determined this action will not adversely affect environmental factors such as wildlife habitat, water quality, air quality, and land use and appearance. Accordingly, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

The title and number of the Federal Assistance Program to which this final rule applies are: Title—Commodity Loans and Purchases, Number 10.051, as found in the Catalog of Federal Domestic Assistance.

The Rule

Statutory Requirements

Section 401(e) of the Agricultural Act of 1949, as amended by section 903 of the Food Security Act of 1985 (7 U.S.C. 1421(e)), requires that whenever price support for an agricultural commodity is carried out through loans to processors, the Secretary shall obtain from the processors such assurances as the Secretary deems adequate that the producers of the agricultural commodity have received or will receive maximum benefits from the price support program. If the assurances are not adequate to cause the producers of sugar beets and sugarcane, because of the bankruptcy or other insolvency of the processor, to receive maximum benefits from the price support program, within 30 days from the final settlement date of the contract between producers and processors, the Secretary shall pay the producers, on demand, such maximum benefits less benefits previously received.

A proposed rule for implementing the provisions of section 401(e)(2) of the Agricultural Act of 1949, as amended, was published in the **Federal Register** on March 20, 1986 (51 FR 9760). Because some producers of 1984-crop sugar beets are eligible to apply for payment and are currently suffering some financial distress from their failure to receive the maximum benefits of the price support program, the comment period was limited to 21 days.

General Summary of Comments

The public was afforded until April 10, 1986 to comment on the proposed rule. The Department has considered all comments received in developing this final rule. The Department received a total of two sets of comments with respect to the proposed rule.

All comments received are on file and available for public inspection in Room 3627-South Building, 14th and Independence Avenue, SW., Washington, DC 20250.

The following is a summary of comments received and actions taken:

VOL 51 ISS 85 MY 2 1986 UMI

Comments on Major Program Provisions

1. Gramm-Rudman-Hollings Act

A. *Provisions of the Proposed Rule.* The preamble to the proposed rule provided notice that the payments which are made available to producers in accordance with the terms and conditions of this regulation are subject to reduction to the extent required by the Balanced Budget and Emergency Deficit Control Act of 1985, Title II of Pub. L. 99-177 (popularly known as the "Gramm-Rudman-Hollings Act") (the "Act").

B. *Comment.* One comment proposed amending section 1435.203 to include a statement that benefit payments to producers for 1984 crop sugar beets are exempt from reduction under the Act. The commenter argued that the Act did not apply to payments related to contracts between producers and processors entered into prior to the date of issuance of a sequestration order under section 252 of the Act. The commenter relied on the language of section 256(j)(2)(A) of the Act exempting from reduction "[p]ayments and loan eligibility under any contract entered into with a person by the Commodity Credit Corporation prior to the time an order has been issued under section 252," and asserted that "[w]hile the 1984 sugar beet contracts are technically contracts between the processor and the producer, when the processor participates in the price support loan program, the contracts constructively and legally become contracts between the producer and the Commodity Credit Corporation to the extent of the minimum government support price." The commenter also stated that the effect of the subrogation provisions of section 401(e)(2) of the Agricultural Act of 1949 is that the Secretary of Agriculture has purchased the claims of the producer against the processor, and therefore the Secretary of Agriculture is making a constructive payment under the 1984 sugar beet contracts.

C. *Discussion of Comments.* The suggestions made by the commenter have not been adopted. The exemption in section 256(j)(2)(A) applies only to payments and loan eligibility under a contract *"entered into with a person by the Commodity Credit Corporation"* (emphasis added). There was no contract between CCC and the producers prior to February 1, 1986, the date of issuance of the fiscal year 1986 sequestration order.

CCC had no obligation to make payment to producers prior to enactment of the Food Security Act of 1985. It is incorrect to characterize the contracts between the producer and the processor for the 1984 crop of sugar beets as contracts between CCC and the producer. CCC is not a party to those contracts, does not negotiate their terms and has no contractual rights or obligations under such contracts. Similarly, the fact that CCC is subrogated to the claims of the producer against the processor and others responsible for non-payment does not make payments which are made under the provisions of these regulations payments which can be considered to be made under a contract between the producer and processor. CCC's obligation to make payments is derived from the provisions of section 401(e)(2) of the Agricultural Act of 1949 and not from a contract between the producer and processor. Furthermore, it is inaccurate to say that as a result of the subrogation to CCC, CCC has "purchased" the claims of the producers. The payments by CCC precede the subrogation to CCC. As the same commenter recognizes elsewhere in his set of comments, under the principles of equity, CCC is subrogated to the producers' claims because CCC has made payments to the producers; CCC does not make payments to producers because it is subrogated to their claims.

CCC is required to reduce the payments that are to be made to producers under these regulations since the payments are not exempt from reduction under the Act. Had Congress intended to exempt the payments from the application of the Act, it could and presumably would have done so.

2. Subrogation of Claims

A. *Provisions of the Proposed Rule.* The proposed rule provided that a producer must execute an agreement with CCC, acceptable to CCC, subrogating to CCC all claims of that producer against the processor and other persons responsible for nonpayment.

B. *Comment.* Two comments were received with respect to subrogation of claims. One commenter supported the subrogation requirement as set forth in the proposed rule. The remaining commenter recommended that the subrogation requirement set forth in the proposed rule be clarified to show that the amount of the claim subrogated to CCC is limited to the amount of the benefit payment to which the subrogee is equitably entitled.

C. *Discussion of Comments.* The suggestions made by the second commenter have been adopted. This commenter argued that the intent of section 401(e)(2)(B) of the Agricultural Act of 1949, as amended, is that the subrogation to CCC be limited to the amount of the claims of the producer for such nonpayment against the processor and other persons responsible for such nonpayment corresponding to the amount of the benefit payment. This commenter argued that it is implicit in the equitable principle of subrogation that the assignment in aid of subrogation is limited to that to which the subrogee is equitably entitled. The intent should be clarified, according to this commenter, because producers eligible for benefit payments, as provided for in this rule, have claims against the processor and others for damages in excess of the benefit payment as defined in this rule.

The Department concurs with the respondent recommending clarification of the subrogation provisions of the proposed rule. It is not the intent of CCC to require producers to subrogate claims in excess of the benefit payments which they are eligible to receive. Therefore, the final rule provides that a producer must execute an agreement with CCC, acceptable to CCC, subrogating to CCC all claims of that producer against the processor and other persons responsible for nonpayment up to the amount of the benefit payment to that producer, plus any applicable interest or other charges.

3. Other Program Issues

A. *Sugar beets of average quality.* One commenter suggested that CCC clarify the definition of "benefit payment(s)" in § 1435.201 of the regulations to make it explicit that the price support level used in computing the benefit payment for sugar beets is based on sugar beets of average quality as defined in the applicable price support regulations. This suggestion has not been adopted. Such a clarification is unnecessary. The definition of "benefit payment(s)" already provides that a benefit payment is based in part on "the specified price support level for the applicable crop of sugar beets or sugarcane, after all applicable adjustments." One of the adjustments that may be applicable is if the sugar beets or sugarcane are of non-average quality. For the 1983 through 1985 crops, sugar beets of average quality are defined as sugar beets containing 15.59 percent sucrose (7 CFR 1435.112(j)).

B. *Number of requests for payment.* One comment was received with respect to claims by a producer. The commenter recommended that, in the interest of administrative efficiency, a producer be required to make only one claim to receive benefits for a particular crop year and processor. This suggestion has not been adopted. A producer will be required to file one request for payment with supporting documentation as deemed necessary by CCC for each contract with a processor. Requests for payment on a contract by contract basis are more efficient since each contract constitutes a separate accounting unit.

C. *Lien Waiver.* One comment was received with respect to lien waivers. The commenter proposed that a producer be required to obtain and present evidence of a waiver of all rights from any party claiming a lien in the sugar beets or any party claiming title to the sugar beets. This suggestion has not been adopted. The rule provides that, if there are any existing liens or encumbrances, CCC will make all benefit payments jointly to the producer and lienholder unless the producer provides CCC with waiver of such liens.

If there are existing liens and CCC does not receive a lien waiver, the check will be issued jointly to the producer and lien or encumbrance holder. Section 401(e)(2) of the 1949 Act does not authorize CCC to deny payment to producers absent a lien waiver.

D. *Loan Program.* Two other comments were received regarding the provisions of the sugar price support loan program. These comments have not been considered in promulgating this rule since this rule does not affect the regulations for the sugar price support program.

Final Rule

PART 1435—[AMENDED]

Accordingly, 7 CFR Part 1435 is amended by adding a new subpart entitled "Subpart—Regulations Governing the Protection of Sugar Producers" to read as follows:

Subpart—Regulations Governing the Protection of Sugar Producers

Sec.

1435.200 General statement.
1435.201 Definitions.
1435.202 Producer eligibility.
1435.203 Benefit payment of producers.
1435.204 Liens.
1435.205 Subrogation of claims.
1435.206 OMB control number assigned pursuant to Paperwork Reduction Act.

Authority: Sec. 401(e)(2), Agricultural Act of 1949 (7 U.S.C. 1421(e)(2)); 5 U.S.C. 301.

Subpart—Regulations Governing the Protection of Sugar Producers

§ 1435.200 General statement.

If the bankruptcy or other insolvency of a processor has caused producers of sugar beets or sugarcane not to receive maximum benefits from the price support program for sugar beets or sugarcane within 30 days after the final settlement date provided for in the contract between such producers and processor, CCC, on demand of the producers and on such assurances as to nonpayment as CCC may require, shall pay such producers benefit payments.

§ 1435.201 Definitions.

The following definitions apply to terms used in this subpart:

"ASCS" means the Agricultural Stabilization and Conservation Service, United States Department of Agriculture.

"Benefit payment(s)" means an amount to be paid to eligible producers equal to the difference between the specified price support level for the applicable crop of sugar beets or sugarcane, after all applicable adjustments, and any benefits previously received by the producers with respect to such crop of sugar beets and sugarcane.

"CCC" means the Commodity Credit Corporation, United States Department of Agriculture.

§ 1435.202 Producer eligibility.

(a) A producer of sugar beets or sugarcane shall be considered to be eligible for benefit payments only: (1) For that quantity of domestically-produced sugar beets or sugarcane sold under contract to a processor who was a participant in the price support program for sugarcane or sugar beets for the applicable crop; (2) if the contract with the processor provided for a final settlement date after January 1, 1985; (3) if the processor failed to make payment within 30 days after the final settlement date due to bankruptcy or other insolvency; and (4) if the producer was an eligible producer for purposes of the price support program for the applicable crop of sugar beets or sugarcane.

(b) CCC may require as a condition of payment such documentation or other proof of the producer's eligibility, the processor's nonpayment, or other element of the benefit payment as CCC determines appropriate.

§ 1435.203 Benefit payment to producers.

(a) *Where to request benefit payments.* A producer must request a benefit payment from CCC at the producer's local county ASCS office, unless otherwise determined by CCC, in a manner and on a form prescribed by CCC.

(b) *When to request benefit payments.* A producer must request a benefit payment no earlier than 30 days, and no later than 60 days, after the final settlement date provided for in the contract between the producer and the processor, unless otherwise approved by CCC. In the case of eligible producers of 1984-crop sugar beets, the final date for producers to demand a benefit payment shall be 30 days following the effective date of this regulation, unless otherwise approved by CCC.

(c) *Method of payment.* Benefit payments will be made by checks drawn on CCC, by credit to the producer's account, or by such other means as CCC determines appropriate.

§ 1435.204 Liens.

(a) In order to receive a benefit payment, a producer must certify to CCC whether there were any liens or encumbrances on the sugar beets or sugarcane that the producer sold to the applicable processor under the applicable contract as of the time of delivery of the sugar beets or sugarcane to the processor, or as of the time title to the sugar beets or sugarcane transferred from the producer to the processor if title transferred at a time other than at the time of delivery to the processor. If there were any such liens or encumbrances, the producer must provide CCC with a certified list of all such liens or encumbrances together with the names and addresses of the holders of such liens or encumbrances and the amount held by each such holder.

(b) CCC will make all benefit payments jointly to the producer and the holders of such liens or encumbrances unless the producer provides CCC with a waiver of all such liens or encumbrances by each such holder or a certified statement by such holder that the liens or encumbrances have been extinguished. CCC may prescribe the form for such waivers or statements.

§ 1435.205 Subrogation of claims.

(a) A producer must execute an agreement with CCC, acceptable to CCC, subrogating to CCC all claims of that producer against the processor and other persons responsible for nonpayment. The amount subrogated to CCC must be equal to the amount of the producer's claims, up to the amount of the benefit payment plus any applicable interest or other charges. Any recoveries up to the amount subrogated which are received by that producer from any source whatsoever for the processor's nonpayment must be immediately forwarded to CCC. The producer shall cooperate with CCC in CCC's efforts to collect on the claims subrogated to CCC.

VOL 51 ISS 85 MY 2 1986 UMI

(b) A producer shall maintain the books and records pertaining to the benefit payments and the applicable contracts with the processor for a period of at least 3 years following the producer's demand for payment under this subpart. Authorized officials of the United States Department of Agriculture shall have access to, and right to examine, any pertinent books, documents, papers, and records of the producer.

§ 1435.208 OMB control number assigned pursuant to Paperwork Reduction Act.

The information collection requirements contained in these regulations (7 CFR 1435.200 through 1435.208) have been approved by the Office of Management and Budget (OMB) under the provisions of 44 U.S.C. Chapter 35 and have been assigned OMB Control Number 0560-0095.

Signed at Washington, DC on April 29, 1986.

Richard E. Lyng,

Secretary of Agriculture.

BILLING CODE 3410-05-M

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Part 238

Contracts With Transportation Lines; Addition of Virgin Atlantic Airways, Ltd.

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: This rule adds Virgin Atlantic Airways, Ltd. to the list of carriers which have entered into agreements with the Service to guarantee the passage through the United States in immediate and continuous transit of aliens destined to foreign countries.

EFFECTIVE DATE: April 21, 1986.

FOR FURTHER INFORMATION CONTACT: Loretta J. Shogren, Director, Policy Directives and Instructions, Immigration and Naturalization Service, 425 I Street, NW., Washington, DC 20536, Telephone: (202) 633-3048.

SUPPLEMENTARY INFORMATION: The Commissioner of Immigration and Naturalization entered into an agreement with Virgin Atlantic Airways, Ltd. on April 21, 1986, to guarantee passage through the United States in immediate and continuous transit of aliens destined to foreign countries. The agreement provides for the waiver of certain documentary requirements and facilitates the air travel of passengers on international flights while passing through the United States.

Compliance with 5 U.S.C. 553 as to notice of proposed rulemaking and delayed effective date is unnecessary because the amendment merely makes an editorial change to the listing of transportation lines.

In accordance with 5 U.S.C. 605(b), the Commissioner of Immigration and Naturalization certifies that the rule will not have a significant impact on a substantial number of small entities.

This order constitutes a notice to the public under 5 U.S.C. 552 and is not a rule within the definition of section 1(a) of E.O. 12291.

List of Subjects in 8 CFR Part 238

Airlines, Aliens, Government contracts, Travel, Travel restriction.

Accordingly, Chapter I of Title 8 of the Code of Federal Regulations is amended as follows:

PART 238—CONTRACTS WITH TRANSPORTATION LINES

1. The authority citation for Part 238 continues to read as follows:

Authority: Secs. 103 and 238 of the Immigration and Nationality Act, as amended (8 U.S.C. 1103 and 1228).

§ 238.3 [Amended]

In § 238.3 Aliens in immediate and continuous transit, the listing of transportation lines in paragraph (b) *Signatory lines* is amended by: Adding in alphabetical sequence, Virgin Atlantic Airways, Ltd.

* * * * *

Dated: April 25, 1986.

BILLING CODE 4410-10-M

FEDERAL HOME LOAN BANK BOARD

12 CFR Part 556

[Docket No. 86-423]

Federal Savings and Loan System; Interstate Branching Within the District of Columbia, Maryland, and Virginia Region

Dated April 24, 1986.

AGENCY: Federal Home Loan Bank Board.

ACTION: Final rule.

SUMMARY: The Federal Home Loan Bank Board ("Board") is amending its policy statement on branching to allow federal associations whose home offices are located in the District of Columbia ("D.C.") to establish branch office in either Virginia or Maryland (but not both), subject to certain restrictions. The Board is also amending that policy statement to allow federal associations whose home offices are in Maryland or Virginia to establish branches in the District of Columbia.

EFFECTIVE DATE: June 2, 1986.

FOR FURTHER INFORMATION PLEASE CONTACT: Gregory B. Smith, Deputy Director for FSLIC Corporate, Corporate and Securities Division, Office of General Counsel, (202) 377-6454; or Donald J. Bisenius Research Economist, Office of Policy and Economic Research, (202) 377-6766.

SUPPLEMENTARY INFORMATION: By Resolution No. 85-1024, dated November 15, 1985 (50 FR 49937, Dec. 6, 1985)), the Board proposed revisions to its policy statement concerning branching by federally chartered savings and loan associations and federal savings banks. In that proposal, the Board requested comments on a revision to its branching policy statement in § 556.5 of the Rules and Regulations for the Federal Savings and Loan System (12 CFR 556.5) that would allow, as an exception to its general policy limiting interstate branching, federal associations with a home office in the District of Columbia to establish branches in either Virginia or Maryland, but not both, and allow federal associations with a home office in Viriginia or Maryland to establish branches in the District of Columbia. After considering the public comments, the Board has determined to adopt the amendments noted hereinafter, substantially as proposed, with some technical revisions made for clarification and some limited substantive changes.

Summary and Discussion of Comments Received on Proposal

The Board received public comments from fourteen organizations in response to its proposal. Nine comments were from savings and loan associations (6 federal associations based in D.C., Maryland or Virginia; 2 state-chartered associations based in Maryland; and 1 state-chartered association based outside Maryland, Virginia, and D.C.). Two comments were received from savings and loan trade associations, two comments were received from commercial bank trade associations and one comment was from a consumer housing trade association. Eleven commenters generally endorsed the proposal, and all generally suggested some changes. Only three commenters objected to the proposal as a whole.

Five of the commenters that supported the proposal suggested that the proposal should be broadened to allow federal associations based in the District of Columbia to branch into both Maryland and Virginia and to allow branching in Maryland by Virginia-based federal associations and branching in Virginia by Maryland-based federal associations. After considering this comment, the Board believes that the proposal should not be broadened in the manner suggested by those commenters since it would not be consistent with the rationale and purpose of the proposed changes—to establish a degree of parity for the District of Columbia and federal associations based in the District of Columbia in recognition of the extremely small geographic size of the District of Columbia and its relationship with Maryland and Virginia.

Two of the commenters supporting the proposal suggested that the Board delete or expand the 120 days period within which federal associations in the District of Columbia may elect Virginia or Maryland for future branching outside the District of Columbia. Upon further consideration the Board has decided to expand that period to 180 days so that the associations would have more time to give due consideration to their options. Once this choice has been made and the Board has approved a branch in the chosen state, however, the choice may not be changed, *e.g.*, by closing or selling branches in the orginally-chosen state and opening new branches in the other state.

Two other commenters claimed that the proposal would put commercial banks at a competitive disadvantage. In that regard the Board notes that recent legislative enactments by the District of Columbia establish interstate banking rights in the District of Columbia without giving similar rights to state-chartered savings and loan associations.

Failure to serve the credit needs of local communities pursuant to the Community Reinvestment Act was raised as a potential problem by two commenters. They contended that the Board's proposal would inevitably result in a draining of deposits from the District of Columbia to the detriment of the credit needs of residents of the District of Columbia. The Board has considered this concern, but has concluded that the proposal should not have that effect. Federally chartered associations have had the authority to make loans outside of their immediate market area for many years, but, nevertheless, have consistently served the credit needs of their local communities.

Two other commenters also objected to the provision that denies branching rights in Virginia or Maryland to a D.C.-based federal association that has acquired rights to establish branches in the other state on a non-supervisory basis, for example, by making a supervisory acquisition in the state. Those two commenters generally objected on the grounds that the provision was unfair to those institutions since they recently acquired branching rights in Virginia by acquiring Federal Savings and Loan Insurance Corporation ("FSLIC")-insured supervisory case institutions in that state. Both of those transactions took place within 12 months prior to when this amendment was proposed by the Board and issued for comment in December of 1985. Those two transactions were the only such transactions involving the District of Columbia and Virginia or Maryland approved by the Board in 1985. The Board does not believe that the institutions in question have been treated unfairly under the proposal, but believes that certain equitable considerations may warrant different treatment under the rule for these two transactions, which were undertaken at a time when the proposal was in various stages of consideration and development by the Board. In addition, the Board notes that one of those institutions also acquired an FSLIC-insured supervisory case institution in the District of Columbia but elected to establish its home office in Virginia as part of that transaction. For purposes of this amendment, however, the Board will consider its home office as being in the District of Columbia for branching purposes. The treatment of these transactions as not precluding branching into the other state is specifically limited to these cases and it may not be construed as precedent to support any claim by any other entity seeking relief from one of the Board's regulatory requirements or limitations.

Background

Section 5 of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464 (1982 & Supp. II 1984)) grants the Board plenary authority to regulate the operations of federal associations. Pursuant to this authority, the Board has always had the ability to permit and to regulate branching of federal associations on both an intrastate and interstate basis. *See IBAA v. Federal Home Loan Bank Board*, 557 F. Supp. 23 (D.D.C., 1982). However, with the passage of the Garn-St Germain Depository Institutions Act of 1982, Pub. L. No. 97-320, 96 Stat. 1469, a federal association that fails to qualify as a domestic building and loan association under section 7701(a)(19) of the Internal Revenue Code of 1954 or to meet the asset composition test imposed by subparagraph (c) of that section is precluded from operating branch offices outside the state in which the association has its home office. 12 U.S.C. 1464(r) (1982).

The Board has permitted federally chartered associations to branch since 1937, 2 FR 825 (May 14, 1937), although its first policy statement on branching was not adopted until 1967, 32 FR 20630 (Dec. 21, 1967). In 1972, the Board amended the policy to emphasize its preference for intrastate operations by stating that the Board generally would not approve applications for branches outside of the home state of the association, 37 FR 3987 (Feb. 25, 1972). Associations that had acquired out-of-state branches before that 1972 amendment generally were grandfathered and allowed to keep these branches. The Board made it clear, however, that it had the discretionary authority to approve the branching of federal associations irrespective of the location of the branch.

The Board has modified its general policy of preference for intrastate branches, however, because of the economic and financial difficulties facing the thrift industry. In order to limit its exposure in dealing with the most severely crippled thrifts, the FSLIC has used interstate supervisory mergers or acquisitions where no suitable in-state acquiror could be found. In response to these changes and in order to codify its procedures, the Board amended its policy statement on branching to specifically authorize interstate operations by federal institutions resulting from supervisory mergers or acquisitions. *See* Board Resolutions Nos. 82-498, 47 FR 34125 (Aug. 6, 1982); 81-157, 46 FR 19221 (March 30, 1981); and 81-496, 46 FR 45120 (Sept. 10, 1981). These amendments enabled the FSLIC to draw from a wider range of potential merger partners in supervisory situations if a suitable in-state partner could not be found.

The Board has also issued a proposal, Board Resolution No. 85-1198 (51 FR 33 (Dec. 20, 1985)), to amend that policy statement to further expand that supervisory exception and to allow interstate branching by federal

VOL 51 ISS 85 MY 2 1986 UMI

associations located anywhere in the country on a nonsupervisory basis if the laws of the target state and of the state in which the federal's home office is located ("home state") would allow such branching by associations chartered under the laws of that home state. The present amendment differs from that proposal in that the branching rights granted herein are not dependent upon the existence of similar rights under state law for state-chartered associations.

Purpose of the Final Rule

The amendment to the policy statement now being promulgated recognizes that the basis for and result of treatment of Washington, D.C. as a "state" for branching purposes under § 556.5 may well be inconsistent with the basis for limiting branching by state boundaries in the case of the states. In no other area of the country does the Board restrict the branching activities of a group of institutions to a single city. Since Washington, D.C. falls in no state, federal associations located in Washington, D.C. will be allowed to elect one of the two contiguous states in which to establish branches.

The Board is cognizant of the District of Columbia's unique situation. Although it is currently treated like a state for purposes of branching, it differs from any state in comprising only a 61-square-mile wholly urban area surrounded by two contiguous states. Federal associations with home offices in the District of Columbia are effectively precluded from expanding into major parts of the metropolitan area, but federal associations in Maryland and Virginia can branch throughout their respective states.

Now that the deregulation of deposit rates is complete, the actual and potential adverse financial effects of such an extreme demographic constraint upon District of Columbia-based federal associations is a matter of concern. While the economy of the District of Columbia is relatively strong, its suburbs are experiencing major income, employment, and population growth. Federal associations with home offices in the District of Columbia must rely upon a very mature, highly competitive, and geographically compact area, with a decreasing population, for their retail savings growth. District of Columbia-based federal associations need such growth in order to offset low-yielding portfolios of mortgages accumulated prior to the deregulation of mortgage and deposit rates.

The Board is also proposing to grant federal associations located in Maryland or Virginia reciprocal rights to establish and maintain branch offices in the District of Columbia. The number of associations doing business in the District of Columbia has decreased over the last ten years. The resulting increase in competition for deposits and loans should benefit the residents of the District of Columbia.

The Final rule

This amendment pertains only to institutions with a federal charter. The Board is amending the Board's branching policy statement in 12 CFR 556.5 to allow federally chartered institutions (federal savings and loan associations and federal savings banks) whose home offices are in the District of Columbia to establish and maintain branches in non-supervisory transactions in either Maryland or Virginia (but not both). The amended policy statement specifies a procedure for a federal association headquartered in the District of Columbia to notify its Supervisory Agent of which of the two states it selects for branching. Once branches were established pursuant to such choice, however, the choice could not be reversed, *e.g.*, by closing branches in the originally chosen state and opening branches in the other state. Federal associations whose home offices are in Maryland or Virginia would also be allowed to branch into the District of Columbia in non-supervisory transactions.

District of Columbia-based federal associations with full branching rights in either Maryland or Virginia previously acquired pursuant to another provision of the Board's branching policy statement, § 556.5, *e.g.*, a supervisory acquisition, would not be permitted to branch into the other state pursuant to the branching permitted by the amendment unless those previously acquired branching rights were acquired as part of a supervisory transaction approved by the Board during 1985. However, under the amendment, District of Columbia-based associations not having full branching rights in Maryland or Virginia but having grandfathered branches in such state acquired prior to the effective date (February 25, 1972) of the Board's general policy, § 556.5(a)(3)(i), prohibiting interstate branching, could retain those grandfathered branches and still choose to establish and maintain branches in the state (either Maryland or Virginia) in which it did not have the grandfathered branches or it could choose to pick the state in which its grandfathered branches are located for full branching rights. The amendment would not affect any full branching rights in Virginia and Maryland existing prior to the effective date of this final rule that a District of Columbia-based federal association had acquired under another provision of the Board's branching policy statement.

The interstate branching rights granted under this amendment could not, however, be acquired by an institution not having a home office in Maryland, Virginia or the District of Columbia. Therefore, for example, a Florida-based federal association having full branching rights in Virginia that were acquired in a supervisory transaction under § 556.4(a)(3) (ii) and (iv) would not be entitled to establish and maintain branches in the District of Columbia under the proposed rule. Moreover, that association could not acquire District of Columbia branching rights under the amended rule by changing its home office to Virginia. Nor, for example, could a Pennsylvania-based federal association acquire full branching rights in the District of Columbia by acquiring, through a supervisory merger, a Virginia-based association that had established branches in the District of Columbia pursuant to the amended rule. The Pennsylvania-based association could retain, as grandfathered branches, the existing District of Columbia branches it acquired as part of that merger but it could not establish additional branches in the District of Columbia. Moreover, it could not acquire branching rights in the District of Columbia by changing its home office to Virginia or the District of Columbia.

The Board has made a determination that this amendment would reduce the anomalous treatment of institutions based in the District of Columbia. The amendment also would serve the convenience and needs of consumers in the District of Columbia, Virginia and Maryland, without harming existing institutions in those jurisdictions, by increasing competition in those areas and at the same time reducing the risk to the FSLIC, and by promoting the continued existence of institutions serving the consumers in the District of Columbia by enhancing the financial viability of those institutions.

Final Regulatory Flexibility Analysis

Pursuant to Section 3 of the Regulatory Flexibility Act, 5 U.S.C. 604, the Board is providing the following regulatory flexibility analysis:

1. *Need for and objectives of the rule.* These elements are discussed above in SUPPLEMENTARY INFORMATION.

2. *Issues raised by comments and agency assessment and response.* These elements are discussed above in SUPPLEMENTARY INFORMATION.

3. *Significant alternatives minimizing small-entity impact and agency response.* There are no alternative approaches that would achieve the Board's goals of the rule which would have less impact on affected entities, including small institutions. The rule will have neither a disproportionate nor adverse impact on small institutions. The Board rejected the alternatives discussed above in SUPPLEMENTARY INFORMATION for the reasons given therein.

List of Subjects in 12 CFR Part 556

Savings and loan associations.

Accordingly, the Board hereby amends Part 556, Subchapter C, Chapter V, Title 12, *Code of Federal Regulations*, as set forth below.

SUBCHAPTER C—FEDERAL SAVINGS AND LOAN SYSTEM

PART 556—STATEMENTS OF POLICY

1. The authority citation for Part 556 is revised to read as follows:

Authority: Sec. 5, 48 Stat. 132, as amended; 12 U.S.C. 1464); Sec. 341, 96 Stat. 1505, as amended, (12 U.S.C. 1761j-3); Secs. 402-403, 405-407, 48 Stat. 1256-1257, 1259-1260, as amended (12 U.S.C. 1725-1726, 1729-1730); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943-1948 Comp., P. 1071.

2. Amend § 556.5 by adding new paragraphs (a)(3) (v) and (vi) to read, as follows:

§ 556.5 Establishment of branch offices.

(a) *General.* * * *

(3) * * *

(v) Notwithstanding paragraph (a)(3)(i) of this section, but subject to section 5(r) of the Home Owners' Loan Act of 1933, as amended, the Board may approve the establishment of branches in either Maryland of Virginia, but not both, by an association whose home office is located in the District of Columbia; *Provided,* that if the association may establish branches on a nonsupervisory basis in Maryland or Virginia (excluding and grandfathered branches) under any other paragraph of this section other than (a)(3)(ii), unless those branching rights were acquired under paragraph (a)(3)(iv) as a result of a supervisory transaction approved by the Board in 1985, such association may not branch into the other state solely pursuant to this paragraph, (a)(3)(v); and *Provided further,* that the association has informed the Supervisory Agent in writing of its chosen state for future branching within 180 days after [effective date of final regulation] or at the time of obtaining its Federal charter, which choice may not be changed by the association after it has made its election to branch in that state; and *Provided further,* that the Board generally will not approve a branch under this paragraph, (a)(3)(v), if the association's eligibility for approval of the branch under this paragraph would result from a change in the location of the association's home office.

(vi) Notwithstanding paragraph (a)(3)(i) of this section, but subject to section 5(r) of the Home Owners' Loan Act of 1933, as amended, the Board may approve the establishment of branches in the District of Columbia by an association whose home office is located in Maryland or Virginia: *Provided,* that the Board generally will not approve a branch under this paragraph, (a)(3)(vi), if the branch's eligibility for approval under this paragraph would result from a change in the location of the association's home office.

* * * * *

§§ 556.5 and 556.9 [Amended]

3. Amend § 556.5 and 556.9 by removing the authority citations located at the end of the sections.

By the Federal Home Loan Bank Board.

Jeff Sconyers,

Secretary.

BILLING CODE 6720-01-M

FARM CREDIT ADMINISTRATION

12 CFR Part 611

Farm Credit System Capital Corporation; Organization

AGENCY: Farm Credit Administration.

ACTION: Final Rule with Request for Comments; Final Rule Comment Period Extension.

SUMMARY: The Farm Credit Administration ("FCA") has amended 12 CFR 611.1142(c) relating to meetings of the board of directors of the Farm Credit System Capital Corporation ("Corporation") established under the Farm Credit Amendments Act of 1985 ("1985 Amendments") pursuant to section 4.28A of the Farm Credit Act of 1971, as amended ("Act"). The FCA has also extended the period for public comment on final regulations relating to the Corporation set forth in 12 CFR Part 611, Subpart J (published March 13, 1986; 51 FR 8665-8671).

DATES: Effective April 14, 1986. Written comments must be received on or before May 30, 1986.

ADDRESSES: Submit comments in writing to Frederick R. Medero, General Counsel, Farm Credit Administration, 1501 Farm Credit Drive, McLean, Virginia 22102-5090. Copies of all communications received will be available for examination by interested parties in the Office of the General Counsel, Farm Credit Administration.

FOR FURTHER INFORMATION CONTACT: Kenneth L. Peoples, Office of General Counsel, Farm Credit Administration, 1501 Farm Credit Drive, McLean, Virginia 22102-5090, (703) 883-4020.

SUPPLEMENTARY INFORMATION: On February 24, 1986, the FCA chartered the Corporation pursuant to section 4.28A of the Act (51 FR 7121), and on March 10, 1986, the FCA adopted final regulations relating to the Corporation, including the board of directors, corporate powers, financial assistance, and capitalization (51 FR 8665-8671). Since that time, the FCA concluded that the principal offices of the Corporation should be located in the greater metropolitan area of Kansas City, and that the meetings of the board of directors of the Corporation should be conducted from such offices, except where the board pursuant to the Articles of Incorporation specifically resolves to hold a meeting outside that area. The Articles of Incorporation of the Corporation have been so amended. (Published elsewhere in today's Federal Register.)

In order to implement that amendment the FCA has also amended paragraph (c) of 12 CFR 61.1142 to delete reference in that paragraph to the situs of meetings of the board of directors of the Corporation. The deletion was made because the FCA believes that recent amendments of the Articles of Incorporation adequately address the location of meetings of the board of directors and that reference in the regulation is unnecessary.

In adopting the regulation as a final regulation, the FCA determined that the amendment was necessary to make the regulations consistent with recent amendments to the Articles of Incorporation of the Corporation and to enable the board to conduct meetings unrestricted by the regulation. For this reason, the FCA concluded that public notice and publication for comment are impracticable, unnecessary and contrary to the public interest. For the same reason, the FCA has waived the 30-day period otherwise applicable under paragraph (b)(1) of section 5.17 of the 1971 Act. In accordance with section 5.17(b)(2) of the 1971 Act, the FCA declared the amendment effective April 14, 1986. Although the amendment is effective, the FCA has provided the

VOL 51 ISS 85 MY 2 1986 UMI

public a period ending May 30, 1986 to submit written comments to the FCA.

In addition, since the publication of the final regulations relating to the Corporation on March 13, 1986 (51 FR 8665–8671), the FCA has received several comments requesting additional time to respond to the regulations. The FCA has determined that an extended comment period would be beneficial in ensuring that all interested parties have an opportunity to comment on the final regulations. Accordingly, the FCA has extended the period for public comment on regulations related to the Corporation set forth in 12 CFR Part 611, Subpart J for an additional period ending May 30, 1986.

List of Subjects in 12 CFR Part 611

Agriculture, Banks, Banking, Organization and functions (Government Agencies), Rural areas.

As stated in the preamble, Part 611, Subpart J of Title 12 of the Code of Federal Regulations is being amended as follows:

PART 611—[AMENDED]

1. The authority citation for Part 611, Subpart J continues to read as follows:

Authority: Secs. 4.28A–4.28L, 5.17, Pub. L. 99–205, 99 Stat. 1678.

2. Paragraph (c) of § 611.1142 is revised to read as follows:

§ 611.1142 General corporate powers.

* * * * *

(c) *Operations.* The Corporation shall be operated on sound business basis, and its directors, officers, employees, and agents shall be subject to the standards of conduct provisions set forth in 12 CFR Part 612, Subpart B. In addition, in order to ensure that transactions between the Corporation and System institutions are conducted impartially and on a sound business basis, no director, officer, employee, or agent of any System institution or System service organization may be affiliated with or employed by the Corporation in a joint capacity, except as an elected director of the Corporation where otherwise eligible. Any joint officer or employee of any System institution and the Predecessor Corporation must resign from the System institution to remain an employee of the Corporation.

BILLING CODE 6705–01–M

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Ch. VII

General Policy on Sharing Confidential Supervisory Information With State Banking and Thrift Regulatory Agencies; Interpretive Ruling and Policy Statement Number 86–1

AGENCY: National Credit Union Administration (NCUA).

ACTION: Interpretive Ruling and Policy Statement Number 86–1.

SUMMARY: The NCUA Board has adopted as its statement of general policy for federally insured state-chartered credit unions the Federal Financial Institutions Examination Council (FFIEC) policy entitled "General Policy on Sharing Confidential Supervisory Information with State Banking and Thrift Regulatory Agencies".

EFFECTIVE DATE: April 21, 1986.

FOR FURTHER INFORMATION CONTACT: Timothy P. Hornbrook, Office of Examination and Insurance or Steven R. Bisker, Assistant General Counsel, NCUA 1776 G Street, NW., Washington, DC 20456, or telephone (202) 357–1065 (Mr. Hornbrook) or (202) 357–1030 (Mr. Bisker).

SUPPLEMENTARY INFORMATION: On March 14, 1986, the FFIEC approved a recommendation to each of the participating federal financial institution regulatory agencies to adopt its policy entitled "General Policy on Sharing Confidential Supervisory Information with State Banking and Thrift Regulatory Agencies". The NCUA Board, on April 21, 1986, adopted the General Policy with respect to confidential supervisory information obtained by NCUA. The General Policy states what is already the practice by the NCUA with regard to sharing supervisory information about credit unions with state supervisory authorities. The General Policy adopted by the NCUA Board is as follows:

Interpretive Ruling and Policy Statement Number 86–1

General Policy for Sharing Confidential Supervisory Information With State Credit Union Regulatory Agencies

In view of the increasing interstate activities of U.S. financial institutions and the growing need for federal and state agencies to cooperate in their supervisory efforts, NCUA has adopted this General Policy to share with the states certain confidential supervisory information. This policy recognizes that good communications among the various federal and state authorities are in the best interest of all and are vital for an effective and efficient supervisory system. Accordingly, NCUA shall attempt to accommodate any appropriate informational needs of state supervisory authorities regarding the condition of federally chartered and state-chartered institutions in a full and complete fashion. The general conditions under which confidential information on these institutions would be shared are described below:

1. The requesting state agency should have supervisory jurisdiction over an organization related to the institution for which information is requested or have authority over an application that has been submitted by that institution.

2. The requesting state agency must agree to use the information only for appropriate supervisory purposes and be legally able to protect the confidentiality of the information.

Specific requests from state supervisory authorities should be submitted directly to NCUA. NCUA encourages state authorities to enter into this sharing arrangement and that they will also agree to share their information with NCUA.

Dated this 21st day of April 1986.

By: National Credit Union Administration Board.

Rosemary Brady,

Secretary of the Board.

BILLING CODE 7535–01–M

DEPARTMENT OF COMMERCE

Economic Development Administration

13 CFR Part 309

[Docket No. 51207–5207]

General Requirements for Financial Assistance; Unfair Competition Prohibitions

AGENCY: Economic Development Administration (EDA), Commerce.

ACTION: Interim rule.

SUMMARY: This rule amends EDA's regulations concerning general requirements for financial assistance at 13 CFR § 309.2 entitled "Unfair Competition". The rule implements section 702 of the Public Works and Economic Development Act of 1965, as amended, 42 U.S.C. 3121, *et seq.* (PWEDA) which provides that:

No financial assistance under this Act shall be extended to any project when the result would be to increase the production of goods, materials, or commodities, or the availability of services or facilities, when there is not sufficient demand for such goods, materials, commodities, services, or facilities to employ the efficient capacity of existing competitive commercial or industrial enterprises.

42 U.S.C. 3212

EDA's regulations at 13 CFR 309.2 provide that under certain circumstances, EDA must conduct a study (verification and evaluation) of the capacity and demand for particular goods, materials, commodities, services or facilities, based upon specified information submitted by the applicant for financial assistance under PWEDA. EDA's verification and analysis is referred to as a "702 Study". These amendments revise the conditions under which EDA must conduct a "702 Study".

DATES: Effective Date: May 2, 1986. Comments by: July 1, 1986.

ADDRESS: Send comments to James F. Marten, Deputy Chief Counsel for Operations and Administration, U.S. Department of Commerce, Herbert C. Hoover Building, 14th Street between Pennsylvania and Constitution Avenues, NW., Room 7009, Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Walter Archibald, Director, Office of Compliance Review, Economic Development Administration, U.S. Department of Commerce, Herbert C. Hoover Building, 14th Street between Pennsylvania and Constitution Avenues, NW., Room 7329, Washington, DC 20230, (202) 377–2710.

SUPPLEMENTARY INFORMATION: EDA is amending 13 CFR Part 309 entitled General Requirements For Financial Assistance. Section 309.2 concerning unfair competition is being revised by raising the threshold amount of EDA funds in paragraphs (a) and (d) from $10,000 to $25,000. This reflects cost changes since the existing paragraphs were adopted over 10 years ago. The removal of portions of paragraphs (e)(1), (e)(2)(ii) and all of paragraph (e)(2)(v) revises the description of projects not requiring a "702 Study."

The amendment at 309.2(a) narrows the part of the definition of "financial assistance" concerning contracts, purchase orders, task orders or work orders to cover only those in an amount in excess of $25,000.

The amendment at § 309.2(d) narrows the definition of technical assistance grants, contracts, or task orders to amounts in excess of $25,000.

The amendment at § 309.2(e)(1) broadens the definition of projects not requiring a "702 Study" to include non-public works projects, and defines firms deemed "primary beneficiaries."

The amendment at § 309.2(e)(2)(ii) narrows the definition of retention of capacity and employment by deleting the word "existing."

The amendment at § 309.2(e)(2)(v) broadens the prohibition against unfair competition by deleting the exception for direct or guaranteed working capital loans.

The addition of § 309.2(e)(3) narrows the unfair competition requirements by adding the exceptions of certain research, planning, and technical assistance grants.

Under Executive Order 12291 the Department must judge whether a regulation is "major" within the meaning of Section 1 of the Order and therefore subject to the requirement that a Regulatory Impact Analysis be prepared. This regulation is not major because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Accordingly, neither a preliminary nor final Regulatory Impact Analysis has to be or will be prepared.

This rule is exempt from all requirements of 5 U.S.C. 553 including notice and opportunity to comment and delayed effective date, because it relates to public property, loans, grants, benefits and contracts.

No other law requires that notice and opportunity for comment be given for the rule.

Accordingly, the Department's General Counsel has determined and so certified to the Office of Management and Budget, that dispensing with notice and opportunity for comment is consistent with the Administrative Procedure Act (APA) and all other relevant laws.

However, because the Department is interested in receiving comments from those who will benefit from this amendment, this rule is being issued as interim final. Public comments on the interim final rule are invited and should be sent to the address listed in the **"ADDRESS"** Section above.

Comments received by July 1, 1986 will be considered in promulgating a final rule.

Since notice and an opportunity for comment are not required to be given for this rule under section 553 of the APA (5 U.S.C. 553) or any other law, under sections 603(a) and 604(a) of the Regulatory Flexibility Act (5 U.S.C. 603(a), 604(a)), no initial or final Regulatory Flexibility Analysis has to be or will be prepared.

This rule does not contain a collection of information for purposes of the Paperwork Reduction Act (Pub. L. 96–511).

List of Subjects in 13 CFR Part 309

Community development, Grant programs—community development, Loan programs—community development, Penalties.

Accordingly, for the reasons set forth above, 13 CFR Part 309 is amended as follows:

PART 309—[AMENDED]

1. The authority citation for Part 309 is revised to read as follows:

Authority: Sec. 701, Pub. L. 89–136, 79 Stat. 570 (42 U.S.C. 3211); Sec. 1–105, DOC Organization Order 10–4, as amended (40 FR 56702, as amended).

3. In 309.2, in paragraph (a), the definition for "Financial Assistance" is revised, paragraphs (d), (e)(1), (e)(2)(ii) are revised, Paragraph (e)(2)(v) is removed, and new Paragraph (e)(3) is added to read as follows. Paragraph (e) introductory text is shown for the convenience of the user.

§ 309.2 Unfair competition.

* * * * *

(a) Definitions. As used in this section:

* * * * *

"Financial Assistance" means any grant, loan, guarantee, or purchase of evidence of indebtedness by EDA pursuant to the authority of the Act, and any contract, purchase order, task order or work order in an amount in excess of $25,000 which is directed toward an increase in the productive capacity for goods or services by a specific enterprise either existing or prospective.

* * * * *

(d) Technical assistance. Whenever a Technical Assistance grant, contract, or task order in excess of $25,000 is requested for a project which is directed toward an increase in the productive capacity for goods or services by a specific enterprise, either existing or prospective, a "702 Study" will be required. The procedures for preparing such "702 Study" set forth in paragraph (c) of this section shall be followed to the extent necessary to provide the Agency with sufficient information.

(e) Projects not requiring a "702 Study". Financial assistance under the

BEST COPY AVAILABLE

VOL 51 ISS 85 MY 2 1986 UMI

Act may be provided to a project without a "702 Study" when EDA determines such project meets one of the following criteria:

(1) The project to be assisted is not designed primarily or essentially to benefit a particular firm or industry, but is designed primarily for the benefit of the community or area as a whole or for general industrial or commercial purposes. When a single firm or industry will utilize 50 percent or more of an EDA financed facility, that firm or industry is considered a "primary beneficiary".

(2) * * *

(ii) assure the retention of capacity and employment, or

* * * * * *

(e) * * *

(3) That the grant is of one of the following categories which have been found not to result in an increase in the productive capacity for goods or services by a specific enterprise, either existing or potential.

(i) Research or study grants designed to: determine the causes of national, regional, or sectoral unemployment, underemployment, underdevelopment or chronic depression, assist in the formulation of programs to address such problems, or provide the personnal needed to conduct such programs;

(ii) Planning grants issued to State or local governments or to regional or area organizations for administrative expenses of a planning process or for the preparation of economic development plans or programs;

(iii) Technical Assistance grants which are not designed to assist a specific firm or group of firms and/or which will not lead directly to capacity development or expansion in the production of goods or services to be offered for sale in competition with existing producers not benefiting from the grant.

* * * * *

Dated: April 28, 1986.

Orson G. Swindle III,

Assistant Secretary for Economic Development.

BILLING CODE 3510-24-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 86-CE-09-AD; Amdt. 39-5295]

Airworthiness Directives; Beech Models 1900 and 1900C Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD) AD 85-21-07, applicable to Beech Models 1900 and 1900C airplanes and codifies the corresponding priority letter AD dated October 22, 1985, into the Federal Register. The AD requires that in-service airplanes be operated in accordance with revised Pilot's Operating Handbook and FAA Approved Airplane Flight Manual (POH/AFM) material which reflects the performance achieved by production airplanes.

DATES: Effective May 6, 1986, to all persons except those to whom it has already been made effective by priority letter AD from the FAA dated October 22, 1985.

Compliance: As indicated in the body of the AD.

ADDRESSES: Beech Letter 52-85-1948 dated October 21, 1985, applicable to this AD, may be obtained upon request to Mr. Lou Gollin, Beech Aircraft Service Engineering, Department 52, Post Office Box 85, Wichita, Kansas 67201, or FAA, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Mr. Charles J. Maple, Wichita Aircraft Certification Office, ACE-160W, Federal Aviation Administration, 1801 Airport Road, Room 100, Wichita, Kansas 67209; Telephone (316) 946-4433.

SUPPLEMENTARY INFORMATION: The one-engine-inoperative takeoff gradient of climb data contained in the Beech Model 1900/1900C airplane POH/AFM are limitations based on the measured performance of a certification prototype Model 1900 airplane. Additional one-engine-inoperative takeoff climb data, presented by Beech as unapproved data in the POH/AFM, also reflect the performance achieved by this prototype airplane. It has been determined that the one-engine-inoperative gradient of climb performance of production Model 1900/1900C airplanes is measurably less than that calculated by reference to the POH/AFM. When production Model 1900/1900C airplanes are operated at a maximum takeoff weight calculated by reference to the POH/AFM for existing conditions of temperature and field elevation, they may not achieve the 2% one-engine-inoperative takeoff gross gradient of climb required by FAR 135, App. A, paragraph 6(b)(2). They therefore may not achieve the level of safety intended by that regulation. The FAA determined that this is an unsafe condition that may exist in other airplanes of the same type design, thereby necessitating the AD. It was also determined that an emergency condition existed, that immediate corresponding action was required and that notice and public procedure thereon was impractical and contrary to the public interest. Accordingly, the FAA notified all known registered owners of the airplanes affected by this AD by priority letter dated October 22, 1985. The AD became effective immediately as to these individuals upon receipt of that letter and is identified as AD 85-21-07. Since the unsafe condition described therein may still exist on other Beech Model 1900 and 1900C airplanes, the AD is being published in the Federal Register as an amendment to Section 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR Part 39) to make it effective as to all persons.

The FAA has determined that this regulation is an emergency regulation that is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Executive Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required). A copy of it, when filed, may be obtained by contacting the person identified under the caption "FOR FURTHER INFORMATION CONTACT".

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the FAR as follows:
